COUNCIL DEBATES ON POLE LOCATION

Long Session of City Fathers Produces Much Argument But Few Results.

At a long session of the city council last night little outside the regular order of business was transacted. The meeting was half an hour late in starting and by the time the communications were read it was time that most respectable people should be in bed.

Location of Light Poles.

About half an hour was taken up with discussions about where the light poles should be placed on Columbia street. It was the opinion of Alderman Gilley that a pole should not be placed where an intersecting street crosses Columbia, unless it were placed directly in the centre of that street. All the aldermen, with the exception of Alderman Jardine, took a part in the general talk and the city engineer was called in to give his opinion. It was the unanimous opinion that the poles should be placed an equal distance apart and at the same time be not in the road with the cross streets. Without a map, which none of the aldermen were provided with, it was hard to follow the fine points of the discussion, which was brought about by Alderman Gray's report that the light poles were in the best location at present. After it was all over the report was referred back and the whole council will have a look over the ground and see if the poles can be placed an equal distance apart and at the same time not interfere with the street crossings.

Bridge Matters.

On the report of the engineer it was decided that the new water pipe to Lulu island should be of the flexible joint variety to run along the bottom of the river. It was decided to call for tenders at once for pipe of this description.

The lighting of the bridge, which a few days ago was left in the hands of the light committee to decide with the B. C. E. R., will be arranged by Mayor Lee and Alderman Jardine when they take their trip to Victoria today.

Chief Watson reported that Fireman Burnett had left the force and he had appointed A. E. Kercher in his place.

The board of works reported that it was advisable to build a cement sidewalk on Oak street under the local improvement plan; that Dublin street be graded and sidewalk built under the local improvement plan; that the sidewalk on the west side of Eighth street be renewed. Concerning a contemplated extension of the boulevard, the chairman reported that it would cost about $650 and this was thought to be too much to expend out of the general revenue for such a purpose. The residents of the street will have to wait a while for the extension.

Alderman Gilley asked the chairman of the police committee if he had investigated the rumor that the chief of police had left some horses uncared for for several days in the market stable, whereupon Alderman Smith replied that there was no truth whatever in it. "I thought so," said Alderman Gilley, "but the rumor was in the streets and I thought it should be officially denied."

The plans submitted of a switch from the Great Northern to the plant of the Vancouver-Prince Rupert Meat company were approved by the council.

Requests for B. C. E. R.

It was moved by Alderman Gray and seconded by Alderman Jardine that the B. C. E. R. be asked to continue the centre poles on Columbia street from Fourth street to Leopold place and the company will also be asked to pave Eighth street from Columbia street to Front street, according to a verbal agreement said to have been entered into between the company and last year's council.

A subdivision of a block on Second street presented by Peter Peebles was approved by the council. The plan of the subdivision makes arrangements for the continuation of Princess street and as this is only a thirty-three foot street some objections were raised. Mr. Peebles was present and pointed out that the map had been approved by the council last year, but the mayor had not affixed his signature to it. It had been regularly surveyed and many of the lots had been sold under the impression that the subdivision was in order. If the council now decided to disallow the subdivision it would be a great hardship upon the original owners of the land

(Continued on Page Four).

To Modify Declaration.

London, June 13.—In the commons this afternoon Premier Asquith announced that a bill would be introduced for the modification of the king's declaration and confirmed the report that communications had passed between him and Hon. Arthur J. Balfour on the veto question which, he hoped, would lead to an early meeting.

MANY LIVES LOST WHEN NEWSPAPER OFFICE BURNS

Employees of Montreal Herald Trapped in Burning Building and Roasted to Death—$500,000 Damage.

Montreal, June 13.—Between thirty and forty lives were lost today, it is believed, in a fire that destroyed the Herald newspaper building, at the corner of St. James and McGill streets, here this morning. The exact number of dead will probably not be known until the debris has been cleared away.

About 10:15 o'clock this morning a heavy water tank that was on the roof of the building broke through and crashed down through the five stories to the ground. In the resultant wreck the gas was liberated and caught fire. The building was ablaze in a few minutes.

There was at once a panic among the employees of the various departments. In the bindery, on the fifth floor, many girls were at work, and their retreat was cut off by fire. Firemen with extension ladders rescued many of them through the windows, but Phillis Guindon, one of the survivors, states that many were killed.

Many bindery girls and the linotype men fell through the huge gap in the floors of the building and were buried under machinery and timbers. The crowds assembled outside the burning building could hear the shouts of the dying inside, while the flames were slowly travelling towards them, but practically nothing could be done to save them.

It was impossible to control the fire, which was fanned by a strong wind. Inspector McMahon, of the police force, called upon those around him to organize a rescue party, but a tremendous wall of flames suddenly rising from the basement made it impossible to enter the building.

It is difficult to arrive at anything like a correct estimate of the number of killed and injured at present.

The Imperial Bank building, situated next to the newspaper office, was damaged and some of the clerks are reported missing. Subchief Mann, of the fire department, is reported killed. Later reports will probably show a larger loss of life than was first reported.

There are still some people in the basement under the tanks. Two ambulances were engaged in taking away the dead and injured. Five firemen are reported to have ben killed by the falling of a wall, and ten occupants of the Herald and Imperial bank are missing, believed to have been killed by the falling debris or suffocated before they could escape from the building. Thirty or forty men and women are known to have been injured in making their escapes from the various buildings in the block.

J. S. Brierly, managing director of The Herald, says the loss will be half a million. He thinks the reports of loss of life exaggerated. He believes ten will cover all. Others take a different view. Sixty girls working in the bindery department on the top floor are not accounted for. No list of dead can be secured yet.

The Herald is getting out an eight-page paper tonight in The Gazette building.

COUNSEL FOR BRITAIN PRESENTS CASE AT HAGUE

Argument of Sir Robert Findlay on Newfoundland Fisheries Lasts Over Five Days.

The Hague, June 13.—Before the Fisheries tribunal today Sir Robert Findlay, counsel for Great Britain, continued his argument, which has extended over five days. Coming to the Alabama treaty of 1871, it was stated that the case now put forward by the United States that in the arbitration entered into in 1881, under the treaty signed in 1877, the British government presentd its case on the basis that United States fishermen were not subject to any regulations, and it was certain that the award which was given, allowing greater value to fishery concessions which United States citizens obtained, as compared with those which British subjects obtained on the coasts of America under the same treaty, is a circumstance which really makes it impossible for the British government now to set up the plea that the Newfoundland fisheries were subject to this right of regulation.

He hoped to satisfy the tribunal that the statement made by the United States in the broadest and most confidential terms was one which was not supported by any evidence, but that when the British government case, as presented to a tribunal in 1887, was examined, it would be found that it did not lend the slightest support to the American suggestion that the British government had ever admitted that it had the right of regulation on the Newfoundland coast.

CLAIMS OF DISTRICT TO UNIVERSITY ABLY SET FORTH

Publicity Commissioner Points Out Advantages of This City and Vicinity to Members of Commission—Valuable and Lengthy Data Compiled.

Below is given the city's case in the university site question, as prepared by the publicity commissioner and presented to the University commission:

From the viewpoint of New Westminster, the selection of a site for such an important institution as a Provincial university, is one which should be of vital interest to every individual and every community.

The university question has long been under consideration in this city; it has been discussed from every point of view and the decision was arrived at, that present conditions must be lost sight of and the future alone studied.

Upon this basis I shall endeavor to look ahead, and foresee, as far as possible, the necessities of the people of British Columbia, in the way of higher education, for a period of twenty-five or fifty years to come. I propose to submit as an axiom that the University of British Columbia must possess opportunities for expansion such as no other seat of learning has possessed at its inception.

I believe, that the work entrusted to the commissioners is one requiring the most statesmanlike foresight, in order that they may forecast future requirements; the constructive ability that will enable them to arrange such a scheme of education as will provide ample space and opportunity for study (theoretical and practical) in every branch of learning.

The older seats of learning were hampered by local conditions, by lack of space, and other difficulties that can be obviated (for they are well known to educationalists) by the exercise of forethought based upon the increase of population in this province; the rapid progress now being made in scientific discovery, and the special features which demand a more advanced knowledge, in order to enlarge the prosperity of the people, and the prestige of the university as a centre for education.

Possibly there are sites to be found more suitable than this city, but it is claimed that very many important characteristics are concentrated within our zone of influence; amongst these are climate, geographical situation, contiguity to centres of population, transportation facilities to all parts of the province and continent, pure water, hygienic conditions, electric facilities of various kinds, special opportunities for practical study in agriculture, forestry, mining, engineering, applied mechanics, meteorology and astronomy, as well as chemistry and physics.

Originally established as the seat of government, that honor was subsequently bestowed elsewhere, and we may therefore be pardoned if our aspirations are now centred in making our influence felt, throughout the Dominion, by reason of our close proximity to the University of British Columbia.

Practically destroyed by fire in September 1898, the city of today is but a little over eleven years old; the citizens by their thrift have made themselves independent, established mercantile enterprises, and a commercial reputation.

The policy of today is one of wise and thoughtful, but energetic expansion. No expense is being spared in making this "City of Homes," as we proudly term it, an ideal one for residential purposes; thoroughly up-to-date as regards the purity of its water, its sanitary arrangements, the cleanliness of its streets, and the lighting of the same. In improving these public utilities, provision has been already made for some $800,000 expenditure in work this year, whilst further comprehensive plans, for the public benefit, are already prepared and under civic consideration.

The following figures show the assessment for the last two years:

Personal property, 1909, $3,008,000, increase, 1910, about $930,000; realty, 1909, $1,984,000, increase, 1910, about $830,000; total assessment, 1909, $10,891,755, increase, 1910, about $1,800,000.

The prosperity of the city is equally shown by the returns of the city treasurer, as follows: 1907, $287,368; 1908, $345,437; 1909, $588,166.

Increase of population is a guide to the stability, as well as the commercial possibilities of a city or district; the municipalities of which New Westminster is the mercantile centre, are becoming steadily, but rapidly settled and now contain from 40,000 to 50,000 inhabitants.

The population of the city proper, in 1898 was 6,321; in 1901, 6,499; in 1905, 7,280; in 1909, 12,100. Very conservative estimates for this year approximate upwards of 15,000.

The work of development, already referred to, has largely consisted of sewerage, sanitary road-making, cement sidewalks, and a splendid electric-lighting system; proposed improvements under consideration include two sewerage systems; one estimated to cost $42,000; the other, serving an area of about 150 acres in the vicinity of Eighth street, extending for a distance of some ten miles.

An enlarged water system is another important work which will be entered upon within the next few weeks by the laying of seventeen miles of water main to the intake at Lake Coquitlam; these pipes with laying will cost about $375,000, and are estimated to provide a supply of 6,250,000 imperial gallons every twenty-four hours.

A recent local improvement scheme provides for the rapid extension of wide concrete pavements throughout the city; tree-planting, and boulevarding of streets; and the beautifying of our open spaces; all of which are, I submit, points worthy of consideration as desirable adjuncts for an education centre, or for a city in near proximity to an university.

The climate is too well known to require special consideration, but the topography of New Westminster must not be lost sight of from a hygienic point of view.

Situated on the swift-flowing Fraser and with a southern aspect, the warm sun is tempered by the cool breezes from the Selkirks and the Pitt River mountains; it is neither enervating nor relaxing, and the ozone-ladened atmosphere from the nearby Pacific ocean, with its health-giving properties, so tempers the climate that even in the height of summer the cool nights permit of the physical system and mental faculties recuperating.

The steady growth of the city, its commerce and industries, has induced the B. C. Electric Railway company to make it the centre of their operations throughout the peninsula. The Canadian Pacific, and Great Northern transcontinental system provide facilities covering the entire continent of America; whilst the Canadian Northern system will shortly establish its engineering and other works at Port Mann, opposite to New Westminster.

The increasing reputation of the city as a port possessing wharfage accommodation to the mouth of the Fraser itself (16 miles), presages its attaining an industrial and maritime repute equal to that of Liverpool, or Glasgow, within the next few years; which is emphasized by the fact, that within the last few months several wholesale houses have established themselves along our waterfront, and two leading Canadian banks opened their doors for business,—in addition to four long established; new industries and factories are locating in our midst, whilst many capitalists are investigating with a similar object.

Included amongst the seventy different enterprises already in operation are the largest machine works in Western Canada, as well as the only railway car building factory; within a few miles is the largest lumber mill in the world, and in the city itself three other mills of first rank!

The Fraser river canneries (39), and the halibut and salmon fisheries with their cold storage plants, and the shipyards are in themselves a basis of stability from a commercial point of view; but, besides there, there are foundries, iron works, boiler works, shingle mills and box factories, carriage works, sash and door factories, a wood-pipe factory, brewery, tannery, distillery, tin-can factory, condensed-milk factory, oatmeal mill, creamery, a new steel-pipe factory, and many other important industries well established upon the 3,000 acres of land within the city limits.

From the foregoing, it will be noticed that engineering works, already existent, would provide excellent opportunities for practical demonstration to the student, particularly the turbines of the Western Power Co. at Stave river; and the ever-increasing ascent of the Fraser by ocean-going steamers, would give similar advantages to the marine engineer; this branch of study being probably one which will eventually be embodied in the ordinary curriculuum.

The District of New Westminster.

This covers an area of 4,900,000 acres of land, consisting of an undeveloped mineral region, a large timber belt, and practically the richest and largest agricultural district in British Columbia.

The commissioners have traversed but a small portion of this locality; and what they have seen is a fair, average sample of the arable, fruit-growing, and dairying portions of the New Westminster district.

From this land the future wealth of our province must be largely obtained; and entirely so, if steps are not speedily taken to protect our salmon fishing industry! The lack of knowledge has of recent years imperilled our future prosperity: forest protection and tree cultivation, equally with fishery protection and development, must be studied scientifically, or these two great industries will pass into alien hands; the fruit-growing experts fear (with good reason) for the future of our orchards, now threatened by insects and parasites imported from elsewhere!

We respectfully submit, that the establishment of an university in the

(Continued on Page Four).

C.P.R. MAGNATE SURPRISED AT GROWTH OF BUSINESS

General Superintendent Bury Pays Annual Inspection Visit—Promise Better Train Service.

G. J. Bury, of Winnipeg, general manager of the western lines of the C. P. R., was in the city yesterday on his regular annual inspection tour. He came from Vancouver in an automobile and dropped in quite unexpectedly on the local agent, Ed Goulet. When Mr. Bury noticed the extent of the business done here he was surprised that the proposed alterations and extensions to the station had not been carried out long ago as the trade done certainly warranted such a step. He remarked that the work would be commenced at once.

Mr. Bury visited the yards and buildings of the company and found everything in satisfactory order. When asking the agent if there were any complaints about the service, Mr. Goulet told him that there had been some protests against the night service to the Junction, some of the travellers stating that they had to wait too long there before being brought into town.

This was the kind of thing that Mr. Bury was looking for and he promised that anything that could relieve the situation would be done at once. As a consequence of the visit the city will doubtless soon be given a much better service than heretofore.

RESTOCKING THE WILD.

Ontario Is Encouraging the Spread of Animal Life.

Toronto, June 13.—Under the Provincial park policy, as applied to the Algonquin reserve, the Department of Lands, Forests and Mines has been enabled to inaugurate steps towards the restocking of unsettled districts of the north country with wild life. Five years ago, the district was practically depleted, but for some time past the government rangers in the Algonquin park have been instructed to encourage the animals in travelling beyond the park confines.

This procedure has been notably successful with the beaver. "Our rangers have encouraged their progress down the streams from the park," said Hon. Mr. Cochrane, in an interview, "with the result that beavers are now found a hundred miles and more from the park limits and are fast multiplying. This condition is possible owing to the fact that their killing is now prohibited."

It is understood that the policy of the minister contemplates similar distribution of other wild life, and the probable enlargement of the park. No official steps, however, have yet been taken as to the territory to be annexed.

JACKSON TEACHINGS ARE STILL CAUSING STRIFE

Session of Methodist Conference at Toronto Is Livened Up by Resolution on Professor's Book.

Toronto, June 13.—A series of resolutions relating to Professor Jackson's book, "Studies in the Old Testament," caused a stormy session of the Toronto Methodist conference this afternoon. A resolution tabled on Saturday, pronouncing against Jackson's teachings, was removed this morning and two amendments moved to it; one to send the question to a committee, and one to send it to the general conference.

Rev. Dr. Cleaver declared that the Jackson teachings were going through Methodist colleges and were accepted by the professors and taught.

Two professors from Victoria, McLaughlin and Bowles, denounced their colleagues, McLaughlin challenging the conference to bring formal charges of heresy for trial before a church court. A leading layman in the Sherbourne street church and Bible class teacher declared that he had accepted the Jackson teachings, and that if these teachings were denounced he and hundreds of others would withdraw from the Methodist church.

TO INVESTIGATE STORY OF "FRIAR LANDS" LEASE

Washington, June 13.—As a result of information sent to the house last Saturday by the war department, disclosing the alleged fact that Frank W. Carpenter, executive secretary of the Philippine government, and Mr. Worcester had bought and leased "friar lands" in the Philippines, Representative Martin (democrat) today introduced a resolution to demand an investigation, charging malfeasance in office.

ROOSEVELT SPEECH DISCUSSED IN HOUSE

Lengthy Discussion on the Egyptian Question Follow Reference to Remarks.

London, June 13.—Theredore Roosevelt's speech led to a lengthy discussion of Egyptian affairs in the house of commons tonight, the insurgents demanding to know what course the ministers proposed to pursue and some of the liberal members denouncing what they termed Mr. Roosevelt's interference. Arthur J. Balfour expressed warm appreciation of Mr. Roosevelt's sympathy and kindly treatment.

There was nothing in the speech to which the most sensitive could take exception. The situation in Egypt, he declared, called for prompt action and he hoped that they would take haste to give support to the British representatives there.

Sir Edward Grey, foreign secretary, who replied to the criticism on behalf of the government, announced that Mr. Roosevelt's speech was good. He had seldom listened to a speech with greater pleasure, its friendly intention, he said, was obvious and, taken as a whole, it was the greatest compliment to the work of one country ever paid by a citizen of another. There was nothing in the present situation in Egypt, the foreign secretary declared, to cause disquietude or justify a sudden resort to unusual methods, but if the symptoms already noted of anti-British agitation continued, the government would immediately assert its authority and protect the Egyptian minister who followed the government's advice.

Interpellations were submitted in the house during the course of the day bearing on the same subject, to which the secretary of foreign affairs made a brief reply.

COLLEGE SUCCESSES.

Local Students Pass Examinations With Honors.

Three parts of the University of Toronto examinations, which have just been published, contain the names of four of the students of Columbian college, who wrote their examinations here a few weeks ago. The second year students are all that have written so far, the first year students starting in a few days on the senior matriculation, which is equivalent to the first year in arts.

Miss Hazel Kenny came first in second class honors and fourth in general proficiency in the second year.

J. Le Roy Laidley came second in second class honors and fifth in general proficiency in the second year.

Miss Effie Shaw and George White passed their second year examination.

AN ECHO OF 1885.

Former H. B. Co. Employee Blames Rising on Incompetency of Inspector.

Montreal, June 13.—W. J. McLean, who landed at York Factory in 1849, to enter the employment of the Hudson Bay company at that place, and who in 1885 was stationed at Fort Pitt, and with his family was a prisoner in Big Bear's camp for sixty days during the rebellion, is now in the city. He declares that Inspector Dickens, son of the great novelist, being deaf and incompetent for the position, sent out scouts with Mr. McLean. Had they remained at the fort, McLean is almost sure that an arrangement could have been reached whereby the Indians would have gone back to their reserves. They in fact had about decided to abide by the Hudson Bay agent's advice, when the two policemen came along and upset everything.

Mr. McLean says there can be no doubt as to the feasibility of a four months and a half shipping season at Fort Churchill, and that the road can be built from the Pas to Churchill without any difficulty. Nelson, he says, is not in the race.

WAS TOO FAMILIAR WITH THE PRIESTS

Montreal, June 13.—Bourassa's paper, Le Devoir, Saturday published documents with a view to showing that the famous lodge called the Emancipation was the cause of the removal of Consul-General Kleckowski from this post two years ago.

The paper in the first place shows that the Montreal Masons brought pressure to bear on the Grand Orient of France and that the consul was removed to South America.

The claim was set up, so it appears, that Mr. Kleckowski went out of his way to look after French priests who came over here and that he was also too familiar with the Canadian clergy, insomuch that it was necessary to have him recalled.

Cloudburst Kills Many.

Cologne, June 13.—Great loss of life has occurred in the Ahr valley of the Efel region as the result of a cloudburst which swept over the district on Sunday night. Late estimates place the total number of dead at 190.

STREET IMPROVEMENT DEBENTURE OR REGISTERED STOCK BYLAW, 1910.

A Bylaw to enable the Council of the City of New Westminster to raise by loan the sum of One Hundred and Fifty Thousand ($150,000.00) dollars for Street Improvements.

Whereas, certain sums of money have this year been expended out of the general revenue of the city for the construction, improvement and repair of streets and sidewalks, and it is expedient that additional sums be spent in like manner, amounting in all (with the sums already spent) to the sum of One Hundred and Fifty Thousand ($150,000.00) dollars;

And Whereas, it appears that if the said sum of One Hundred and Fifty Thousand ($150,000.00) dollars, be appropriated from the general revenue of the city for the current year the rate of taxation will be excessive, and it is expedient that such excessive taxation should be avoided, and the said sum should be raised on the credit of the corporation, and that debentures or registered stock certificates should be issued for that amount;

And Whereas, for the payment of interest on the debentures or registered stock certificates, proposed to be issued under this Bylaw, and for creating a sinking fund for the payment of the said debentures or registered stock certificates when due, it will be necessary to raise by special rate, in addition to all other rates, each year during the currency of the said debentures or registered stock certificates, the sum of Seven Thousand, Five Hundred and Ninety and 32-100 ($7,590.32) dollars;

And Whereas, in order to raise the said yearly sum of Seven Thousand, Five Hundred and Ninety and 32-100 ($7,590.32) dollars, an equal rate on the dollar will be required to be levied on the whole rateable property of the City of New Westminster.

And Whereas, the whole rateable property of the said city, according to the last revised Assessment Roll thereof, is Seven Million, Two Hundred and Forty-nine Thousand and Ten ($7,249,010.00) dollars;

And Whereas, the total amount of the existing debenture debt of the said city is One Million, Six Hundred and Seventeen Thousand, One Hundred ($1,617,100.00) dollars, irrespective of the sum of One Hundred and Seventy-four Thousand, Five Hundred ($174,500.00) dollars proposed to be raised under the "Lulu Island Bridge Debenture or Registered Stock Bylaw, 1910"; the "Fire Debenture or Registered Stock Bylaw, 1910"; the "Schools Debenture or Registered Stock Bylaw, 1910," and the "Parks Debenture or Registered Stock Bylaw, 1910," of which none of the principal or interest is in arrears;

Now Therefore, the Municipal Council of the Corporation of the City of New Westminster enacts as follows:

1. It shall be lawful for the Mayor of the said city to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the debentures or registered stock certificates hereinafter mentioned, any sum or sums of money, not exceeding in the whole the sum of One Hundred and Fifty Thousand ($150,000.00) dollars, and to cause the same to be paid into the treasury of the said city for the purposes mentioned herein.

2. It shall be lawful for the Mayor to cause any number of debentures or registered stock certificates to be made, not exceeding in the whole the sum of One Hundred and Fifty Thousand ($150,000.00) dollars, for such sums of money as may be required, not less than $100.00 each, or an equivalent expressed in pounds sterling of the United Kingdom of Great Britain and Ireland, at a value of 4.866 to the pound sterling; and all such debentures or registered stock certificates shall be sealed with the seal of the corporation, signed by the Mayor and countersigned by the treasurer thereof, or by such other person or persons as may be thereunto lawfully authorized.

3. The said debentures or registered stock certificates, shall be payable on the first day of July, 1960, at such place or places as the Council of the said corporation may from time to time appoint with the approval of the holders thereof, and shall bear interest at the rate of four and one-half per centum per annum, payable half yearly on the first day of January and the first day of July in each and every year, and the debentures shall have attached to them coupons for the payment of interest, which said coupons shall be signed by the said Mayor.

4. A special rate on the dollar shall be levied and raised in each year, in addition to all other rates, on all the rateable property of the city, sufficient to pay the interest upon the debentures or registered stock certificates, and to create a sinking fund for the payment of the principal thereof when due, subject to any act or enactment respecting the same.

5. Subject as aforesaid, there shall be raised annually by special rate as aforesaid, during the currency of the said debentures or registered stock certificates, the sum of Six Thousand, Seven Hundred and Fifty ($6,750.00) dollars for the payment of the interest thereon, and the sum of Eight Hundred and Forty and 32.100 ($840.-32) dollars to provide for the payment of the principal.

6. The proceeds of the sale of the said debentures or registered stock certificates shall be applied as follows, and not otherwise: towards paying the cost of the passing of this Bylaw and the issue and sale of the debentures or registered stock certificates therein referred to, recouping the treasury of the city such sums as have been this year expended in street works, or may be so expended until the proceeds of the sale of the said debentures or registered stock certificates have become available, the making, improving and repairing of such streets and sidewalks in the city as may be deemed expedient by the council, but no sidewalk or street shall be made or repaired out of the moneys borrowed under this Bylaw unless the same shall have first been approved by a resolution of the Council.

7. This Bylaw shall take effect on the day of 1910, and may be cited as the "Street Improvement Debenture or Registered Stock Bylaw, 1910."

8. This Bylaw before the final passing thereof, shall receive the assent of the electors of the said city in the manner required by law.

Received the assent of the electors on the day of 1910.

Reconsidered and finally passed in open council the day of 1910.

NOTICE.

Take notice that the above is a true copy of the proposed Bylaw which will be taken into consideration by the Municipal Council of the City of New Westminster one month from the day of the first publication thereof in the "Daily News" newspaper, which first publication took place on the 13th day of June, 1910, and that a vote of the electors of the city will be taken on the said proposed Bylaw on the 14th day of July, 1910, between the hours of nine o'clock a.m. and five p.m. at the following places, namely: The Council Chamber, Civic Building; the Fire Hall, Sapperton; and the Waterworks Storehouse, Eleventh street.

W. A. DUNCAN,
City Clerk.

City Hall, June 11, 1910.

SCHOOLS DEBENTURE OR REGISTERED STOCK BYLAW, 1910.

A Bylaw to enable the Council of the Corporation of the City of New Westminster to raise by loan the sum of Ninety-seven Thousand, Five Hundred ($97,500.00) dollars for School Purposes.

Whereas the Board of School Trustees of the City of New Westminster have caused to be prepared and laid before the Council a detailed estimate of the sums required by the Board for the current year's ordinary expenses of maintaining the schools of the said City of New Westminster; and have also prepared a like detailed estimate of the sums required to meet any special or extraordinary expenses legally incurrable by the Board, which last mentioned estimate is subject to consideration, alteration and final approval by the Council, and the same has been finally approved by the Council.

And Whereas, the amount required under the said last mentioned estimate for schools amounts to Ninety-seven Thousand, Five Hundred ($97,500.00) dollars, made up as follows: Thirty-five Thousand ($35,000.00) dollars for the erection and equipment of the new Sapperton school; Two Thousand, five Hundred ($2,500.00) dollars for the erection and equipment of a school on Lulu Island, and Sixty Thousand ($60,000.00) dollars for the erection of a High school.

And Whereas, by Section 40 of the the Public Schools Act 1905, as re-enacted by Section 30 of the Public Schools Act 1905, Amendment Act 1906, any statute to the contrary notwithstanding, the Council of any city, town or rural municipality in the Province including the City of Vancouver and City of New Westminster, may in each and every year pass a Bylaw or Bylaws for levying aspecial rate of not more than Five (5) mills on the dollar for school purposes, and the Council may in addition to such rate apply any portion of the ordinary revenue to school purposes.

And Whereas, it appears that the amount required to meet the current year's ordinary expenses of maintaining the schools will exhaust the amount authorized to be levied under Section 40 of the Public Schools Act 1905, as re-enacted by said Section 30 of the Public Schools Act 1905, Amendment Act 1906, and it will be necessary also to apply a portion of the ordinary revenue for such purposes.

And Whereas, it appears that if the said sum of $97,500.00 be appropriated from the general revenue of the city for the current year, the rate of taxation will be excessive, and it is expedient that such excessive taxation should be avoided, and the said sum should be raised on the credit of the corporation, and that debentures or registered stock certificates should be issued for that amount.

And Whereas, for the payment of interest on the debentures or registered stock certificates proposed to be issued under this Bylaw, and for creating a sinking fund for the payment of the said debentures or registered stock certificates, when due, it will be necessary to raise by special rate, in addition to all other rates, each year during the currency of the said debentures or registered stock certificates the sum of four Thousand, Nine Hundred and Thirty-three and 70-100 ($4,933.70) dollars;

And Whereas, in order to raise the said yearly sum of $4,933.70, an equal special rate on the dollar will be required to be levied on the whole rateable property of the City of New Westminster.

And Whereas, the whole rateable property of the said city, according to the last revised Assessment Roll thereof, is Seven Million, Two Hundred and Forty-nine Thousand and Ten ($7,-249,010.00) dollars;

And Whereas, the total amount of the existing debenture debt of the said city is One Million, Six Hundred and Seventeen Thousand, One Hundred ($1,617,100.00) dollars, irrespective of the sum of Two Hundred and Twenty-seven Thousand ($227,000.00) dollars proposed to be raised under the "Street Improvement Debenture or Registered Stock Bylaw, 1910;" the "Fire Debenture or Registered Stock Bylaw, 1910;" the "Lulu Island Bridge Debenture or Registered Stock Bylaw, 1910," and the "Parks Improvement Debenture or Registered Stock Bylaw, 1910," of which none of the principal or interest is in arrears.

Now Therefore, the Municipal Council of the Corporation of the City of New Westminster enacts as follows:

1. It shall be lawful for the Mayor of the said city to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the debentures or registered stock certificates hereinafter mentioned, any sum or sums of money not exceeding in the whole the sum of $97,500.00, and to cause the same to be paid into the treasury of the said city for the purposes mentioned herein.

2. It shall be lawful for the Mayor to cause any number of debentures or registered stock certificates to be made, not exceeding in the whole the sum of $97,500.00 for such sums of money as may be required, not less than $100.00 each, or an equivalent expressed in pounds sterling of the United Kingdom of Great Britain and Ireland at a value of 4.866 to the pound sterling; and all such debentures of registered stock certificates shall be sealed with the seal of the corporation, signed by the Mayor and countersigned by the treasurer thereof, or by such other person or persons as may be thereunto lawfully authorized.

3. The said debentures or registered stock certificates shall be payable on the first day of July 1960, at such place or places as the Council of the said corporation may from time to time appoint with the approval of the holders thereof, and shall bear interest at the rate of four and one-half per centum per annum, payable half yearly on the first day of January and the first day of July in each and every year, and the debentures shall have attached to them coupons for the payment of interest, which said coupons shall be signed by the said Mayor.

4. A special rate on the dollar shall be levied and raised in each year, in addition to all other rates, on all the rateable property of the city, sufficient to pay the interest upon the debentures or registered stock certificates, and to create a sinking fund for the payment of the principal thereof when due, subject to any act or enactment respecting the same.

5. Subject as aforesaid, there shall be raised annually by special rate as aforesaid, during the currency of the said debentures or registered stock certificates, the sum of $4,387.50 for the payment of interest thereon, and the sum of $546.20 to provide for the repayment of the principal.

6. The proceeds of the sale of the said debentures or registered stock certificates shall be applied as follows, and not otherwise; towards paying the cost of the passing of this Bylaw and the issue and sale of the said debentures or registered stock certificates therein referred to, and all expenses connected with the issuance of the said loan, and the balance shall be paid over from time to time as required upon the order of the trustees by the city treasurer to the several persons to whom moneys are payable.

7. This Bylaw shall take effect on the day of 1910, and may be cited as the "Schools Debenture or Registered Stock Bylaw, 1910."

8. This Bylaw before the final passing thereof, shall receive the assent of the electors of the said city in the manner required by law.

Received the assent of the electors on the day of 1910.

Reconsidered and finally passed in open council the day of 1910.

NOTICE.

Take notice that the above is a true copy of the proposed Bylaw which will be taken into consideration by the Municipal Council of the City of New Westminster one month from the date of the first publication thereof in the "Daily News" newspaper, which first publication took place on the 13th day of June, 1910, and that a vote of the electors of the city will be taken on the said proposed Bylaw on the 14th day of July 1910, between the hours of nine o'clock a.m. and five p.m., at the following places, namely: The Council Chamber, Civic Building; the Fire Hall, Sapperton; and the Waterworks Storehouse, Eleventh street.

Notice.

All vehicles while waiting on Columbia street must stand lengthways with the street, and not back up against the sidewalk, so that there may be sufficient room for vehicles and especially the fire teams to pass along the street with safety to the public.

By Order: W. A. DUNCAN,
City Clerk.

City Hall, May 27, 1910.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Steel Dredge for British Columbia," will be received at this office until 4:00 p.m., on Wednesday, July 20, 1910, for the construction of a Steel Bow-Well Twin Screw Barge Loading Dredge.

Plans, specification and form of contract can be seen and forms of tender obtained at this department, at the offices of J. L. Michaud, Esq., District Engineer, Merchants Bank Bldg., St. James Street, Montreal; J. G. Sing, Esq., District Engineer, Confederation Life Building, Toronto, Ont., and G. A. Keefer, Esq., District Engineer, New Westminster, B.C.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Tenderers must specify time of delivery of dredge at Vancouver, B.C., free of all risks and charges.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Lands and Works, for twenty-five thousand dollars ($25,000.00), which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The department does not bind itself to accept the lowest or any tender.

LOCAL IMPROVEMENT NOTICE.

The Municipal Council of the Corporation of the City of New Westminster having by resolution determined and specified that it is desirable to carry out the following works, that is to say:

To construct cement concrete sidewalks on both sides of Tenth street from Sixth avenue to Tenth avenue, except on the east side of said street between Sixth and Eighth avenues, also on both sides of London, Edinburgh, Dublin and Hamilton streets, Eighth and Seventh avenues between Tenth and Twelfth streets.

And that the said works shall be carried out in accordance with the provisions of the Local Improvement General Bylaw, 1909.

And the City Engineer and City Assessor having reported to the Council in accordance with the provisions of the said bylaw upon the said works, giving statements showing the amounts estimated to be chargeable against the various portions of real property to be benefited by the said works and other particulars and the said reports of the said City Engineer and City Assessor having been adopted by the council.

Notice is hereby given that the said reports are open for inspection at the Office of the City Assessor, City Hall, Columbia street, New Westminster, B.C., and that unless a petition against the proposed works above mentioned, signed by a majority of the owners of the land or real property to be assessed or charged in respect of such works representing at least one-half in value thereof is presented to the Council within fifteen days from the date of the first publication of this notice the Council will proceed with the proposed improvements under such terms and conditions as to the payment of the cost of such improvements as the Council may by by-law in that behalf regulate and determine and also to make the said assessment.

Dated this 9th day of June, A.D., 1910.

W. A. DUNCAN,
City Clerk.

Date of first publication, the 10th day of June, 1910.

LAND ACT.

New Westminster Land District.

Take notice that James Bateman, of Vancouver, B. C., occupation, stonecutter, intends to apply for permission to purchase the following described lands:

Commencing at a post planted at the southeast point of a small island lying about 10 chains north of Nelson Island, thence northerly, westerly, southerly and easterly, along the shore to the place of commencement; containing 6 acres more or less.

JAMES BATEMAN,
Applicant.
JOHN F. BAGGS,
Agent.

ADVERTISE IN THE DAILY NEWS

LAND REGISTRY ACT.

Take notice that an application has been made to register Duncan Bell Hall as the owner in fee simple, under a Tax Sale Deed from E. A. Wilmot, Inspector of dykes, to Duncan Bell Hall, bearing date the 13th day of June, A.D., 1907, of all and singular that certain parcel or tract of land and premises situate, lying and being in the District of New Westminster, in the Province of British Columbia, more particularly known and described as part 3.60 acres of the southeast quarter of Section 18, Township 3, Range 29, west of 6th Meridian.

You and those claiming through or under you and all persons claiming any interest in the said land by virtue of any unregistered instrument, and all persons claiming any interest in the said land by descent, whose title is not registered under the provisions of the "Land Registry Act," are required to contest the claim of the tax purchaser within forty-five days from the date of the first publication of this notice upon you and in default of a caveat or certificate of lis pendens being filed within such period, or in default of redemption before registration, you and each of you will be forever estopped and debarred from setting up any claim to or in respect of the said land, and I shall register Duncan Bell Hall as owner thereof in fee. And I hereby order that publication of this notice for thirty days in a daily newspaper published in New Westminster will be good and sufficient service thereof.

Dated at the Land Registry Office, New Westminster, Province of British Columbia, this 30th day of April, A. D., 1910.

THREE YEARS FOR FIEND WHO BRUTALIZED SOLDIERS

Prussian Army Officer Had no Fewer Than 250 Specific Acts Charged Against Him.

Berlin, June 13.—A court-martial sitting at Glogan, in Prussian Silesia, has sentenced a non-commissioned officer, Franz Libowska, to two years' imprisonment and degradation for perpetrating twenty-six acts of cruelty on members of the First Battalion of Sappers.

The evidence showed that Libowska hit a recruit's head fifty times in succession and then struck his victim in the face with the flat of his sword. Libowska also maltreated the same recruit by kicking his head with knee boots.

Another recruit received thirty blows in succession on the head and face, and Libowska dug his nails so deeply into the unhappy soldier's cheek that blood was drawn. Many recruits and young soldiers had to submit to having their hair pulled out of their heads.

One of Libowska's habits was to throw bags of cartridges, swords and similar missiles at the men's heads while they were cleaning the barracks. He once compelled his men when drilling to hit one another on the head, while he looked on and enjoyed the combat. After a hard day's drill he would compel the men to get up at night and sing to him. Those whose voices or songs displeased him were beaten and systematically illtreated on the following days.

In many cases, Libowska forced his men to lend him money, which he never repaid.

SEND THE TIME BY WIRELESS.

France Making a Test of Invention to Correct Ships Clocks.

Paris, June 13.—Acting upon the suggestion of two members of a scientific society, Captain Guyon and M. de la Grye, the French government is now experimenting with a scheme for supplying all chronometers at sea with the time at noon, eight o'clock at night, and at midnight by means of wireless messages from the Eiffel Tower. The first trial took place last Monday with ships at Brest. Three sparks are transmitted at intervals of two minutes each. Thus, for instance, one is given at eight o'clock precisely, a second at 8 h. 2 m., and a third at 8 h. 4m. The same method is to be followed at noon and at midnight. Arrangements have been made for the regular transmission of the time at midnight from this time onwards captains at sea, therefore, provided with wireless receivers will be able to regulate their chronometers whenever they require. A clock, furthermore, specially prepared on the Eiffel Tower to transmit the time, second by second, by wireless flashes so that the longitude may be computed almost instantaneously anywhere at sea on ships provided with wireless apparatus.

The advantages of this procedure in cloudy or foggy weather will be enormous, especially in places where there are irregular currents, and ships in that case will at once be warned if they are drifting out of their course. The new "wireless" will also be used hereafter to determine the longitude of various places on the continent, and of various stations in Africa. The Eiffel Tower, in fact, is already in regular communication with Dakar, Fort Etienne, and Rufisque, on the Atlantic coast of North West Africa, as well as with the Canary islands, and with Bizerta and Oran on the Mediterranean coast. In a short time it is expected that several posts in the interior of Africa such as Abecher and Lo-ango and Brazzaville, farther south will be in regular wireless communication with Paris.

BANANA SPIDER GAVE MAN A SCARE

Montreal, June 13.—With a large bunch of bananas upon his shoulder, a man trotted from a waggon to a booth in Bonsecours market, where already he had deposited several such burdens. He went back for another load, got it upon his shoulder, and was stepping across the pavement, when suddenly with a wild shriek, he dropped the bananas and jumped aside. His companion rushed up. So did the market hangers on. And there on the pavement all saw the cause of the man's white face.

A tarantula, one of those large spiders of tropical countries whose bite is so often fatal, had been in the bunch, and now lay on the sidewalk. The unaccustomed cold had made it stupid but from time to time it would advance, and then the crowd would give before it. Some time passed before the man who had carried the venomous insect near his cheek could muster courage to kill it.

Then the work of unloading the bananas went on, but each bunch was carefully examined before being shouldered.

DOES ANYONE KNOW WHERE IS HAMILTON?

Toronto, June 13.—If Hamilton is any way touchy she will be offended at the address which appeared the other day on a letter received at the post office at the legislature. The communication was intended for Dr. C. A. Hodgetts and was addressed: "The District registrar of births, etc., Hamilton, near Coburg, Ontario, Canada."

Only the other day a letter reached the premier safely from a South African correspondent addressed to "Sir James Ontario, parliament of Canada." An equally amusing address adorned an Australian letter some weeks ago which reached Queen's park, directed to "The government chaplain, Toronto."

HAS ADVANTAGE OF RESEMBLING BUNYAN

Hamar Greenwood Asked to Run for Bedford Because He Looks Like Author.

London, June 13.—Hamar Greenwood—the former member for York—is not likely to be permitted for any length of time to subordinate politics to law. Since his defeat by J. G. Butcher he has been the recipient of a number of invitations to contest other constituencies, though, so far, the requests have been made in vain.

Among the constituencies anxious to secure his services has been that of Bedford, which is at present represented in the house by W. A. Attenborough—a London barrister, who has qualified by long residence in the neighborhood and his interest in Bedford enterprises to be considered a local man. Mr. Attenborough displaced Percy Barlow, who held the seat in the Liberal interest in the last parliament. The Unionist majority was only 169, but Bedford is generally regarded as Unionist rather than as a Liberal seat.

It is pleasantly suggested by some of Hamar Greenwood's local friends that the Bedford invitation was due to the discovery of a supposed resemblance in him to John Bunyan. Other constituencies have also been offered to Mr. Greenwood.

SHACKETON TO GO NORTH WITH EARL GREY

Ottawa, June 13.—The desire of Sir Ernest Shackleton, the man who got nearest to the South Pole, to devote the next few years of his life to an investigation of the mineral and water-power resources of northern Canada seems to be more likely of accomplishment today than it was when Sir Ernest made the suggestion in his address to the Canadian club of Ottawa some two months ago.

It is understood that Earl Grey has been in communication with Lieutenant Shackleton with the idea of having his company upon his trip to Nelson or Churchill and so on through Hudson bay to Quebec.

Sir Ernest is now somewhere between Winnipeg and Ottawa, but he will reach here before the governor leaves on Wednesday and it is probable that the arrangement which Earl Grey desires may be agreed upon.

The program includes a tour from Norway house in light pack condition. The party will comprise not more than a dozen and each one of them, including His Excellency himself, will have to take their share of the portaging which will be involved in the tour down the Hayes river.

The only difficulty which seems to stand in the way of "South Pole Shackleton" accepting the Governor-General's invitation is his itinerary, but it is hoped that he will be able to complete that before Earl Grey starts for the north in August.

CLEVER CONFIDENCE MAN FOOLS WINDSOR ALDERMAN

Windsor, June 13.—As a result of placing too much confidence in a stranger, Alderman Trumble is out over $100 in cash, besides other prospective rewards. The man, who represented himself as a wealthy resident of St. Louis, Mo., looking for investment, readily agreed to pay Trumble $8,000 for the latter's bakery business. He stipulated that Trumble should remain in the store three months to teach the new owner the business, in return for which the latter voluntarily agreed to present Trumble with an expensive auto.

The matter had progressed so far that the man took over the active management of the store, while Trumble attended to the bakery end. Tuesday night the supposed purchaser disappeared with the two days' receipts. The provincial police have been asked to investigate.

"STAR" REPORTER BECOMES A PRIEST

Montreal, June 13.—An event of interest to Montreal will take place in St. Mary's Chapel of St. Paul's Seminary, St. Paul, Minn., on Wednesday, when Rev. Stephen Louis Theobald will be ordained to the priesthood.

Rev. Father Theobald is well known in Catholic circles of this city, he having been a reporter of The Montreal Star for two years, coming from Georgetown, British Guiana, to this city. He was highly recommended to Archbishop Ireland of St. Paul by His Grace Archbishop Bruchesi and Very Rev. Superior Lecoq of the seminary.

Before leaving for the seminary in St. Paul, Mr. Theobald spent a week in retreat with the Jesuit Fathers at Sault au Recollet.

KOCH WAS BELIEVER IN RACE SUICIDE

Berlin, June 13.—That it was no wise impossible for the human race at some future time to disappear from the earth, because of a disinclination to procreate is declared to have been the opinion of the late Dr. Robert Koch, who discovered the germ of consumption.

The person who makes the declaration is a friend and co-scientist, Adolphe Zimmerman, who will shortly publish the particulars of Prof. Koch's theory.

Prof. Koch held that the birth rate of all peoples as they get civilized becomes at first stationary, and then as they reach the stage of prosperity declines, this fact being a sure sign of degeneration and the beginning of the end.

Thus when all terrestrial peoples have arrived at that stage the extinction of humanity will gradually ensue.

OF HUMOUR.

This is an age of serious purpose. We all seem to be perpetually engaged in the struggle to make money—and in spending it. "'Tis true 'tis pity, and pity 'tis 'tis true," for this unceasing competition for material prosperity dulls the human sense of the real beauty and joy of life. Men of today have little time and less inclination for the enjoyment of the arts or for indulgence in the rare joy of humour. In fact, humour as a national asset may be said to be almost dead.

Nor is there any great exponent of the art of humour remaining to us now that Mark Twain has passed to his rest. Perhaps some day, out of the throng of busy money-getting humanity crowded in the market place, there may arise a Canadian to whom shall be given the genius to expand the hearts and excite the laughter and tears of his fellows, but as yet there is no sign of his advent.

It has been said, and very appositely, that a sense of humour is a great asset, a saving grace for humanity, and that the expression of it occupies a large space in the healthy mind. Mr. Owen Seaman, the accomplished editor of the world-famed journal Punch, speaking at a dinner of the Authors club recently, described humour as a great thing to clear the air; a great solvent against snobbishness and vulgarity, false rhetoric and shams. He spoke of this corrective sense of humour as a trait peculiar to Englishmen, and said: "Men whose tastes would have led them to give serious expression to lofty ideas were restrained by a too keen sense of the ridiculous; they saw the pitfalls of their craft, the danger of banality, obviousness, pathos and ambiguity. They were severe critics of themselves and contemptuous of every standard but the highest." This is giving great but yet not unworthy credit to the influence of humor. It is justified in one respect at least, that is by the large share of public life which has been and is obtained by the journal over the destines of which Mr. Seaman presides.

Council Debates On Pole Location

(Continued From Page One.)

and the persons who had purchased lots there.

A letter from the railway commissioners concerning the right-of-way of the V. V. & E. through the east end of the city was received and filed. The city objected to the way some of the crossings were put in, but the letter indicated that the city would be adequately protected in any work the company carried on there.

Accounts Ordered Paid.

Accounts amounting to $8,809.45 were passed for payment. The amount was distributed as follows: Board of works, $3,784.11; water committee, $1,293.76; health committee, $4.80; fire committee, $137.96; market committee, $20.41; parks committee, $543.36; finance committee for schools, $644.14; library committee, $5.50; light committee, $1,213.80; police committee, $40.05; bridge committee, $228.80; finance committee, $892.76.

Correspondence.

The following letters were read, discussed and disposed of:

F. McCuhlin, of 831 Fourth street, asked that the city open up the balance of Fourth street and also Tenth avenue. Referred to the board of works.

John Stewart, of 1118 Fourth avenue, called the attention of the council to the unsafe and wornout condition of the sidewalk in front of his residence. Referred to the board of works.

C. E. Fowler, of the International Contract company, wrote asking for a meeting with the bridge committee in order to settle some differences arising from the construction of the Lulu island bridge. Referred to the special bridge committee to act.

A letter from J. A. Montgomery asking the council to assist him in boulevarding in front of his residence at the corner of Fourth avenue and Fourth street was read. The city will pay the cost of the drain as asked for.

Whiteside & Edmonds, on behalf of Captain J. Croll, notified the council that they would lay a formal claim against the city for damages sustained to their client's automobile. Captain Croll was coming along Front street about two o'clock on Friday morning when he ran into an excavation in the middle of the street. It is alleged that there were no lights to warn travellers of the danger. Referred to water and finance committees for report.

The Citizens Temperance and Moral Reform league has given the city its support in the contemplated changes in the liquor license law. The following resolution was passed at a recent meeting:

"Whereas it has come to our attention that it is the declared purpose of our city council to require all saloons and licensed drinking places of this city to close their business places at 11 o'clock p. m. instead of 2 o'clock a. m. as has been the custom, we would heartily extend the appreciation and endorsement of the league to the gentlemen of the city council for taking the matter in hand."

The letter, which was sent to the city council containing the resolution, also stated that if the council wanted to make the hour 10 o'clock instead of 11, there would be no objections offered by the majority of the citizens.

The communication was filed for reference. The bylaw was not considered by the council last night but laid over for a week.

A letter from Rev. R. Lennie, secretary of the school board, asking that the city's sewage system be extended so as to permit the Lord Kelvin school to be connected with it was referred to the engineer for report.

The B. C. E. R. submitted plans of a siding on Sixth street which is necessary for an adequate car service to the north of the city and on the Edmonds line. Referred to the city engineer for report. The company also submitted plans of a switch to its wharf on the river front. The council will visit the spot and decide what to do.

Rev. Father O'Boyle, on behalf of the French-Canadian settlers at Millside, asked leave to tap the water main there. Referred to water committee.

The Canadian General Electric company advised the city of quotations on light meters. They offered to accept the old meters in part payment. The letter was filed and the city clerk authorized to write to the company asking it to keep the meters in stock as the city would probably order them.

Claims of District Ably Set Forth

(Continued from Page One.)

centre of these industries, and upon the banks of the Fraser river, would be wise both from a commercial and educational point of view; and especially beneficial to the great revenue-producing departments of the province, whilst the river steamboats would enable students from Chilliwack, and other points, to spend short vacations at their homes; or provide facilities to students from other districts for improving their faculties or observations in many varied localities.

Recreation!

No seat of learning would be satisfactory unless ample provision were made for boating, bathing, fishing, and similar recreations if reasonably attainable: the neighborhood of New Westminster city offers all these inducements, and many others! The campus, the cricket field, the athletic grounds, the experimental farm, together with extensive pleasure grounds, we conceive should receive far more consideration than has been given to them in the past: for the field of play is in itself a school of the highest rank in forming the individual character; in implanting a spirit of self-reliance; in teaching obedience; in inspiring that spirit of comradeship, without which no university can attain the highest rank! Here are learnt the great lessons of discipline and self-control; of sobriety and morality; by which alone, the highest honors can be attained,—and which has already won for the sons of New Westminster a world-wide renown—as the champion lacrosse players!

The future prosperity of British Columbia depends not merely on commercialism; but rather, on our ability to wrest the secrets of nature from the soil, the rocks, and the forests amid which we live!

If this be a fact, our training should be something far superior to the usual purely academic teaching! It should inspire a student to patient and careful scientific investigation of those minutiae which the untrained, or careless, observer passes by as beneath his notice; the eyes, as well as the mental faculties must be developed; and the varied natural sciences applicable to the special requirements of this country must be particularly cultivated!

The ordinary curriculum must be so extended (and so capable of further expansion from time to time), that not only every branch of theoretical study in the arts and sciences, classics and theology, music and mathematics, may be taught; but, that space may also be available for experimental work, and practical training schools established for the purpose of educating teachers—who shall be trained with a view to qualifying for appointments to positions which will enhance the reputation of the University of British Columbia, and establish it as being an ideal centre of learning; not merely in the Dominion of Canada, but in the first rank of the world's universities!

It is respectfully submitted, that not less than 1,000 acres of land be set apart for the future needs of this province; and it is believed, that the wisdom of allocating, what may be considered by some, an unnecessary extent of university land, will be fully justified by the increased settlement which will be speedily induced by the mere knowledge that ample provision is being made to secure the utmost possible educational facilities for all futurity!

In submitting these observations for your consideration, those entrusted with the duty of showing you around the district, and preparing this statement, have endeavored to do their part conscientiously, and in the interest of the entire province.

CHAS. H. STUART WADE,
Publicity Commissioner.

Trapp Block Phone 714

THE TIME

to buy real estate is now, during the lull before the storm, while prices are stationary long enough to see them plainly. For instance, for a few days we can offer: Lot 6, Block 22, Royal Avenue, at $5,000; half cash. Be wise in time. Some day this lot will be worth $20,000.

THE PLACE

to buy is a matter of opinion. We suggest the West end, Surrey, and Sapperton. We have a bargain in each. Agnes Street, 6-room cottage on full sized lot, $4,200; $1,500 cash. This will undoubtedly be business property.

Five acres in Block 5 of Section 36, Surrey; $800 per acre; third cash.

Columbia Street, Sapperton: Two new modern houses on four lots; $8,000 for the outfit, or separately; third cash.

AND

80 acres, Mount Leman, $5,200. The soil will grow anything the climate will stand for. Note the terms, $1,600 cash, 1, 2 and 3 years, 7 per cent.

As for

THE GIRL

she won't love you the less if you have a good piece of real estate going up like a sky-rocket.

ETHNOLOGICAL FIGHT IN NEW YORK COURT

New York Magistrate Must Decide Whether Parsee Comes Under Designation of White Man.

New York, June 13.—Argument was made in the United States circuit court of appeals today as to when a white man is white and the why and wherefore. The particular subject of the litigation is Bhinaji Franzi Balsara, a Parsee, a native of Bombay, India.

Some time ago Mr. Balsara made application to become a citizen, and while it was held up he went before Judge Lacombe and obtained an order admitting him to that high estate wherein a man can order his wife to stay home and keep the fire working while he goes out to vote.

That order wasn't to the liking of the United States attorney who stands guard at the nation's portal in the naturalization court, and he made up his mind to see what he could do about it. Hence the proceedings yesterday. Mr. Balsara was not in court, but he was described by Addison S. Pratt, representing the government, as being chocolate tinted.

Carl A. Hansman, attorney for Mr. Balsara, begged leave to differ.

"This man," the lawyer said to the court, "is a white man with a dark complexion."

Then Louis Marshall, who is Counsel for several Syrians who want to be American voters and fear their prospects are in danger, mingled in the argument.

"If we take the word white in its literal meaning," he argued, "there is not a white man in this court room. We have complexions, not color. The phrase 'free white persons' was used in 1790 to classify those who were not negroes or slaves. None of us would be a citizen if required to comply with the literal meaning of the word white."

Mr. Pratt was armed with a lot of ethnological data which he submitted in support of his argument that Mr. Balsara is not entitled to citizenship.

Judges Ward, Cox and Hazel asked many questions and reserved decision.

ITCHING ERUPTIONS QUICKLY COOLED

Just a few drops of the famous D. D. D. Prescription applied to the skin will take away instantly the worst kind of an itch. We positively know this.

Oil of wintergreen, a mild, soothing liquid, combined with such healing substances as thymol and glycerine, will penetrate to the inner skin, kill the germs, and heal. The D. D. D. Prescription, made at the D. D. D. Laboratories of Chicago, seems to be just the right compound, as thousands of remarkable cures prove.

Don't go on suffering from eczema or any other itching skin disease, when relief is so easily obtained.

Just write the D. D. D. Laboratories, Dept. N. N., 23 Jordan St. Toronto, and they will send you, free, a trial bottle. This sample will relieve the itching at once, and prove to your satisfaction that here at least is the cure for your torture.

Write for a trial bottle today. We know it will relieve you. Frank McKenzie, Druggist. **

SPORTING NEWS

THLECUS UNEARTHS A TERRIBLE PLOT

porting Mail Writer Falls Asleep at His Work and Has Awful Dream.

The scribe who has first call on the "I" of The Vancouver Sporting had a rush of brains to the head Saturday and pounded the key- rd of an inoffensive typewriter in rvicious manner. When he got ough he discovered that he had e whispering in his ear and his sweet speech had made a noise a street rumor to the effect that estminster was to blame for the ke in the ranks of Con Jones' hired . His story, of course, is replete ifs and maybes, but the gist of ll is that it is the fault of the mon Bellies.

w you beat it?

e fact that Ed Longfellow, who ed to substitute for one of the ers, has since signed on with locals is grass fed beef for Ath- s in his labored effort. This, mul- ied with a made-in-the-Mail street ot, is the pivot on which his plot olves.

The whole story is silly. It is hard- worth denying, but if it will give hlecus any satisfaction, The News ll say on behalf of the Westmin- r club that his statements are ab- utely false. The locals are not try- to make trouble for Con Jones; better his team the better will Salmon Bellies be pleased.

ast to ward off any future pipe ams which may trouble Athlecus ore the season is over, he will do ll to paste in his hat the following of things which Westminster has done and does not intend doing: Hocked the Minto Cup; drugged the king water of the Vancouvers; ed the referee; driven spikes in fence for the benefit of the visi- s; greased the rubber at half time; ised a self-closing net to prevent is; kidnapped Con Jones; connived h J. Pluvius to affect the attend- ce receipts; hired girls to make goo eyes at the aspirants and affect their usefulness; inserted dsaws in the local sticks; suborned timekeepers; befuddled the um- es; trained the champions in jiu- su, or bought up the Vancouver m holus bolus.

ADMIRAL DOUGLAS IS COMING TO CANADA

New York, June 13.—Admiral Sir Archibald Douglas, of the British navy retired, on his way to Canada, where he is to receive an honorary degree from McGill university, arrived here today on the liner Baltic from Liverpool.

Sir Archibald, gray-haired, but bright-eyed and erect, with bullet-furrowed forehead, was characteristically reticent. After much urging, however, the Admiral talked briefly. "If you must know something about me," he said, "do you remember the way the Japanese destroyed the Russian navy in the Sea of Japan."

Being assured of the recollection, Sir Archibald made his one statement: "Most of the officers of the Japanese fleet were my pupils," he said.

For his services in training Japanese naval officers and promoting a higher state of naval efficiency, the Japanese government bestowed on the British veteran official the highest of its honors, the Order of the Rising Sun.

Sir Archibald will visit a relative in New York for a few days before going to Canada. He retired from active service in 1907.

SPORT NOTES.

The Alerts and Balmorals are scheduled to play a league game of ball tonight.

Pete Latham will probably figure in the next game against Vancouver. It is doubtful if Doughey Spring will be in condition to play.

The plans of the men interested in the golf club are being completed. A sketch of the grounds at Westminster Junction may be seen in the office of the secretary of the board of trade.

Gordon Spring is rapidly recovering from his attack of quinsy and will probably be able to toss a few shots in the Vancouver net in the next mixup.

Doughey Spring is suffering from a serious injury to his hand, which he sustained in Saturday's game against Vancouver. Yesterday Doughey paid a visit to a surgeon and submitted to an operation.

All playing members of the lacrosse team and members of the executive are requested to put in an appearance at Queens park on Wednesday evening, when a group picture of the champions and the officials is to be taken by S. J. Ritchie.

Pat Feeney knows how Jack Johnson will feel after James J. Jeffries gets through with him on July 4, or vice versa. Pat is beautifully marked from heel to crown. Punk Wintemute and Bill Turnbull also bear some resemblance to zebras. All this because they insisted on going through the Vancouver defence on Saturday.

Secretary Ryall, of the New Westminster Lacrosse club, received a telegram from James Murphy, of Toronto, stating that he had shipped the sticks for the team. Great difficulty has been experienced this year in getting good sticks, and the team is badly in need of the shipment which is now on the way.

BUTCHERY.

Ottawa Free Press Lectures Savage Lacrosse Players.

It was a pitiful exhibition of 'sport' that the Capital Lacrosse team gave the thousands of onlookers at Lansdowne park on Saturday afternoon, says the Ottawa Free Press.

There was a minimum of sport and a maximum of hooliganism in their play.

A surer way of killing lacrosse in Ottawa could not be found than the methods adopted by the Capital lacrosse players to obtain a victory over the Toronto club.

The day has gone by when the respectable citizens of any city will pay money to watch a butchery under the disguise of sport. Hundreds came away from the game before it was over on Saturday with a feeling of disgust.

The decisive defeat which the Ottawa team sustained was as nothing compared with the way in which they lowered themselves in the estimation of the onlookers by their unsportsmanlike conduct.

With new grounds and a splendid grand stand, there was every reason to believe that the Ottawa lacrosse club would have a most prosperous season. These predictions were confirmed by the very large attendance of Ottawa people on Saturday afternoon.

That favorable forecast has been upset, not by the team's inability to win, but by its evident adoption of the loathsome motto "Victory at any cost."

In this case the price paid is loss of public respect.

The team is also welcome to the satisfaction of realizing that it might have won if its players had been able to stay on the field instead of wasting their time on the benches while their opponents piled up the score.

The Capital lacrosse club has had no truer friend and supporter than The Free Press, and it is with regret that we find it necessary to make these severe remarks.

The managers of the club are good sportsmen. They cannot help but be disgusted at the conduct of their players. We can well believe that they have already read the riot act to them and taken steps to prevent a repetition of such scenes as those which were witnessed on Saturday.

In New York.

Some statistician, who thinks the world ought to know about it, has devised a table which is intended to show the activity of New York. Here are certain extracts from it:

Every hour has a fatal accident.
Every eight hours a divorce.
Every ten hours a suicide.
Every second two telephone calls.
Every second 3,750 gallons of water are consumed.
Every two seconds an arrest.
Every thirty seconds an immigrant lands.
Every minute forty tons of coal are consumed.
Every five minutes a child is born.
Every six minutes a death.
Every thirteen minutes a marriage.

"Wonderful!" We might add a few items, as, for instance:

Every tenth of a second a champagne cork pops.
Every twenty minutes the son of a Pittsburg millionaire does something foolish.
Every forty-five seconds a joy rider passes a given point.
Every three seconds somebody is "tinped" at the Waldorf-Astoria.
Every twenty minutes somebody arrives to spend money he has secured elsewhere.
Every fifty minutes some man from the west steps into a leading position.
Every three minutes a new play is offered to some theatrical manager.—Chicago Record-Herald.

CATTLE WAR ON.

St. John, June 13.—Local wholesalers are perturbed over the cattle situation at present, and particularly over the action of the Toronto firm of D. B. Martin, which is quoting cattle delivered here at a lower figure than the local wholesalers can buy from the raisers. It is stated that the Martin firm is the Canadian branch of the Swift & Co., of Chicago, and that they are determined to capture the trade of the provinces for the Chicago firm.

Cattle are at present sold at a figure which the wholesalers say hardly pays them for slaughtering.

ABSINTHE IS SAPPING STRENGTH OF FRANCE

Public Men Are Called Upon To Fight Against the Growing Evil.

Paris, June 13.—Public men in France are at present engaged in a desperate struggle with that terrible green demon, Absinthe.

What one may almost describe as a national institution in France is the "aperitif hour," the hour, usually about five o'clock in the afternoon, when most people leave off work and take some sort of appetiser in preparation for dinner. In the great majority of cases this "aperitif" is a glass of absinthe, the slow green poison that drives its patrons to the mad-house.

Some one has said that "absinthism" costs France an army corps every year, and it is certainly among the young conscripts for the army that the effects of the deadly liquor are first felt.

Most of the recruits are addicted more or less to the absinthe habit before they are called up to serve the colors, and it has been found that in the districts where absinthe is most popular as many as fifty per cent of the young men called up are unfit and have to be rejected.

An army officer has declared that in the garrisons are innumerable men physically unfit, the hospitals are filled with invalid soldiers, while every prison has an alarming proportion of insubordinates.

Introduced in France.

Curiously enough it was through the army that absinthe was first introduced into France. During the Algerian war that came to a close about 1847, the troops suffered severely from malaria, and the army physicians urged the soldiers to take a little absinthe as a safeguard against the fever. The soldiers liked the flavor of the new drink, and continued to consume large quantities even after their return to France.

The vogue of the new drink spread, and very seen the manufacture of absinthe became a flourishing industry. The liquor is prepared by pounding together the leaves of wormwood and some other herbs, and afterwards soaking them in alcohol for about a week.

When distilled, this compound gives the emerald-colored liquor that is the cause of so much misery in France.

Some people are said to drink the green liquor neat, but it is nearly always diluted with water. The water is added very slowly in order to avoid a chemical reaction that would make the tumbler as hot as the globe of an electric lamp.

The usual way is to place on top of the tumbler containing the absinthe a saucer with a small hole in the bottom. This hole having been covered with a lump of sugar, the water is poured into the saucer and allowed to filter slowly through and drip down amongst the absinthe. Sometimes the lump of sugar is held over the tumbler in a perforated teaspoon and the water slowly poured over it.

Looks Like Milk.

The mixture produces a greyish, cloudy liquid. Public opinion in France against absinthe has become so strong that the manufacturers have introduced a new kind in which this cloudy appearance is intensified to make the liquor look like milk, so that the habitues may drink it without reproach.

When taken in excess absinthe quickly deranges the digestive organs and destroys the appetite. An unappeasable thirst takes possession of the victim. The next stage produces delusions and unbearable mental depression, and, finally, lunacy.

Equally horrible is the fate of the man who avoids orgies and drinks his absinthe in smaller but regular doses. His face gradually becomes sallow and care-worn, and his hair begins to drop off. Next come muscular quiverings, especially of the arms and shoulders. Loss of brain power follows, and he is haunted by horrible dreams and delusions. Gradually paralysis overtakes him and lands him in a merciful grave.

Absinthe has been prohibited in Switzerland and Belgium, and it is probable that France will soon follow the example of these neighbors.

RECOMMEND TH LASH.

Toronto Grand Jury's Suggestion For Protection of Girls.

Toronto, June 13.—That the lash should be used more frequently in the cases of persons found guilty of committing criminal assaults on girls was strongly urged by the grand jury in their presentment to Judge Winchester on Saturday in the general sessions. In dealing with this question the presentment contained the following reference: "Our attention has been particularly drawn to the numerous cases of assaulting young girls, some of which were of a very serious nature. Scarcely a week passes but some report of this kind is published, and as the crime is becoming very alarming, we, as a grand jury, recommend whipping in all such cases. We feel that the lash is the only remedy that will keep this sort of crime down, and at the same time serve as an admirable protection for young girls."

LIFER PROTESTS AGAINST HAVING PICTURE TAKEN

Kingston, June 13.—When two photographers were taking pictures in the penitentiary, Carl Dullman, leader of the dynamite plot to blow up the Welland canal, refused to give the camera man a sitting. He was put in a dungeon. Then he yielded.

Dullman raised a technical objection that he was not an ordinary criminal, but a political prisoner. He is regarded at the penitentiary, however, as an ordinary "lifer."

VAST FORTUNE IS TO BE GIVEN AWAY

Heir to English Title Plans Distribution of Millions to Charity.

Omaha, June 12.—To give away $1,000,000 every month for ten months and then go to work as a day laborer, in the gold mines whence he has just been snatched in order that he may inherit $10,000,000 and a title in England, is the task set for himself by Alfred James Alexander Brown, who was in Omaha the other day on his way to Gloucestershire, England.

From papers in his possession there is no doubt as to Brown's identity nor of the existence of a vast fortune which he says he is going to England to claim.

For fifteen years Brown has been believed by his family to be dead, and only by accident did he discover that his father, Sir Gentelles Brown, of Belmont Manor, Gloucestershire, was dead and that the estate and title had descended to him.

He was in Australia when he read the news in a daily paper and the next day found him on his way to England via the United States. He stopped at Big Springs, Neb., in an effort to locate a cousin in that town, but failed to find him and came on to Omaha.

Fifteen years ago, Brown, at that time about twenty-five years of age, had a quarrel with his father, Sir Gentelles, and was ordered to leave and never return. Alfred left home and, going to Australia, became a gold miner.

Two months ago Brown came down from the gold mines near Ballarat, New South Wales, Australia. On the night of his arrival in Sydney, Brown dropped into a restaurant and while waiting to be served accidentally picked up a newspaper. The first item to attract his attention told of the death in England of Sir Gentelles Brown.

"What am I going to do with all this money? What right has any man to that which he has not produced? I have always believed that no man should have more than he actually needs, and now that I have an opportunity to 'make good' I am going to do it."

PAWN CHILDREN FOR GIN.

Disastrous Effect of Liquor Trade in Southern Nigeria.

London, June 13.—The Native Races Committee have published a remarkable reply to the Report of the Government Committee of Inquiry into the liquor trade in Southern Nigeria. The Native Races Committee contend that the government inquiry was incomplete, and colored in such a way as to give a wrong impression about the enormity of the liquor trade and its disastrous effect on the natives of the colony.

They allege in reply to the government report that an important document submitted to the committee of inquiry was completely ignored, that a native chief's pension was suspended because he advised his people to abstain from gin, and that the committee of inquiry was plainly biased against missionary evidence.

The Native Races committee allege in direct contradiction of the results of the inquiry that the importation of spirits in South Nigeria is steadily and rapidly increasing, and that much drunkenness results therefrom, that educated Mohammedans, young men, women and children are all learning to drink gin, and that gin is used as one of the forms of currency in the colony.

Worse than all, the Native Races committee assert that fines—although this is denied by the governor—have been paid in gin in six of the colony's courts for a long period, and that the disgraceful practice of pawning children for gin—absolutely ignored by the committee in its report—obtains throughout the colony.

Here is part of the evidence on this subject given by the Ven. Archdeacon Melville-Jones before the committee of inquiry:

Q.—Have you any idea of the number of children who are pawned at the present moment?

A.—No, but the number is very large.

Q.—Would it run into hundreds?

A.—Thousands.

Q.—How long would a child remain in pawn?

A.—They would remain in pawn for ten, fifteen or twenty years. People grow to be quite old as pawns.

Q.—Is the pawn in the position of a slave or of a domestic servant?

A.—As long as he is a pawn he is in the position of a slave.

The Native Races committee believe that there is a widspread desire among the people for prohibition, and that prohibition is practicable.

INDIANS UNHEALTHY.

Alarming Condition of Minnesota Aborigines Revealed by Report.

Washington, June 13.—Alarming health conditions on the White Earth Indian Reservation in Minnesota have aroused the commissioner of Indian affairs to strenuous action in an effort to stamp out disease and correct evils believed to contribute to serious results.

A corps of physicians have submitted a report showing that of 568 Indians examined thus far, 195 were suffering with trachoma, eighty-five had tuberculosis in some form, with the glandular form predominating, and seventy-five were suffering from other diseases. The report showed that of the 150 Indian homes visited, ninety were unsanitary, forty fairly clean, and only twenty in good sanitary condition. On the reservation there are approximately 5,000 Indians.

DOMINION LANDS RAILWAY BELT BRITISH COLUMBIA.

Coast Division.

Surveyed agricultural Dominion Lands in the Railway Belt not reserved or withheld from entry and not disposed of or occupied, are open to entry under the provisions of the British Columbia Dominion Land regulations.

In the Coast Division of the Railway Belt any male person over eighteen years of age and otherwise eligible, may obtain under entries as homestead and pre-emption, a legal subdivision of forty acres of Bench Land. Residence is required for at least six months in each of five years. Total cultivation required to earn patent for a twenty acre homestead, ten acres cleared and six cultivated, and if the remaining twenty acres is pre-empted by the homesteader, an additional ten acres cleared and six cultivated either on the homestead or pre-emption,, no additional residence for the pre-emption. Price of pre-emption, five dollars per acre, payable in five installments with interest.

Conditional purchase entries may be obtained for twenty acres of Bench Land by a male over eighteen and otherwise eligible and not holding homestead or pre-emption. Residence required only for six months during the fifth year but cultivation duties increased. Price, ten dollars per acre, five installments.

Bench Lands in this division are lands below twenty-five hundred (2,500) feet above sea level. Uplands are lands above that altitude and are subject only to disposition by quarter sections under homestead entry or grazing lease to settlers. Flooded lands may be reserved for hay purposes or leased to settlers by legal subdivisions.

Entree fee for homestead, pre-emption and conditional purchase is ten dollars for each entry. After securing patent in connection with the land first entered for, the settler may secure another entry and so on, but not for more than a total of one hundred and sixty acres.

Entries under the British Columbia Dominion Land Regulations, effective on the 2nd July, 1910, may on and after that date be made for lands then open to entry. Any lands withdrawn from timber berths, as well as newly surveyed lands, will before becoming available for entry require advertisement for thirty days. "Surveyed" Lands for the purpose of entry means legal subdivisions abutting on a surveyed line, or, in case of Uplands, quarter sections abutting on a surveyed line.

For further Information apply to the Dominion Land Office, New Westminster, B. C.

P. G. KEYES,
Secretary.

MAIL SERVICE.

Following are the hours of despatch and arrival of mails at the New Westminster postoffice and hour given in each case being the hour of closing, which is half an hour, as a rule, before the actual despatch. All mails, unless otherwise stated are despatched and received daily except Sunday. The only mails despatched and received Sunday are the G. N. R. south and C. P. R. east mails, not including way mails, Sapperton, Fraser Mills and Coquitlam.

Mails Despatched.

8 a.m.—Vancouver and Victoria via B. C. Electric railway.

First C.P.R. east taking all points east including Langley and district.

The mail for Abbotsford and district, Clayburn and district, Huntingdon and district, and Matsqui are despatched by way of Vancouver.

8 a.m.—Blaine and Seattle, including all U. S. points east and south, and Hall's Prairie, Fernridge and Hazelmere, on Tuesdays, Thursdays and Saturdays.

All Surrey mails are received from Cloverdale, except Hall's Prairie, Hazelmere and Fernridge, which arrive on the Port Guichon train on Tuesdays, Thursdays, and Saturdays.

11:00 a.m.—Vancouver, Victoria and Central Park, via B. C. Electric rail-

Mails Received.

8:30 a.m.—Vancouver and Victoria including U. S. matter, and also (except Tuesday) via B. C. Electric railway.

9:00 to 10:00 a.m.—Strawberry Hill, by courier (Tuesday and Friday).

9:15 a.m.—Vancouver and Victoria, via G. N. R.

8:30 a.m.—C. P. R. east (first train) Sapperton, Fraser Mills and Coquitlam.

12:00 p.m.—C. P. R. east.

1:00 p.m.—Vancouver, Central Park and Fraser Arm.

1:30 p.m.—East Burnaby by courier.

2:30 p.m.—Burquitlam, by courier.

3:15 p.m.—Blaine and Seattle, including all U. S. points.

7:00 p.m.—Revelstoke local and C. P. R. intermediate points.

way.

1:30 p.m.—Strawberry Hill, Timberland and South Westminster, by courier (Tuesday and Friday).

1:30 p.m.—Ladner and down river points, East Burnaby, Queensboro and Burquitlam, by courier.

2:30 p.m.—Vancouver and Piper Siding, via G. N. R. north.

3 p.m.—Cloverdale, Nicomekl, and Port Kells, daily, Clayton on Tuesday, Thursday, Friday and Saturday; Tynehead on Tuesday and Friday; Bon Accord, Tuesday and Friday.

4:00 p.m.—Vancouver and Burnaby Lake, via B. C. Electric railway. Saturday an extra mail is despatched to Victoria via Vancouver at this hour.

Blaine and Seattle, including all U. S. points, east and south, via the G. N. R. "Flyer."

Roblin May Retire.

Winnipeg, June 13.—Premier Roblin has notified the members of his cabinet that owing to a serious affection to his heart he will not be able to take part in the campaign. The other members of the cabinet, are urging him to stick, but announcement of his retirement may be expected any day.

STARTS MORMONISM FOR SPIRITUAL UPLIFT

Senator Reed Smoot Tells Boston Folks How They Would Be Far Better Off

Boston, June 13.—Reed Smoot, Mormon apostle and United States senator from Utah, visiting in Boston, said today, in an interview at which all the newspapers of this city were represented, that Mormonism, if adopted as the religion of this community, would operate as a powerful stimulus in the spiritual life of the people.

Polygamy, he said, is a dead issue so far as present conditions are concerned. But he admitted that polygamous marriages contracted by the chief saints prior to the manifesto of 1896, are still in force. He declared that the Mormon church does not sanction plural marriages today, and that while the Latter Day Saints still believe that the Bible sanctions polygamy, the edict prohibiting plural marriages extends over the whole world, wherever the church maintains a mission. Senator Smoot delivered an address tonight on "Mormonism of Today," before the Thursday club in Brooklyn.

In talking with newspaper reporters Senator Smoot said:

"Our church is growing, not only in Utah but elsewhere. We maintain a corps of at least 2,000 missionaries in the field all the time, mostly young men, all of whom pay their own expenses.

"It is a poor sort of an individual who does not get a call to spread the gospel, and in the smallest communities out in Utah fully seventy-five per cent of the male population have carried on the work in foreign countries. This of itself is a liberal education for our young men.

"A good many priciples of the Mormon church, if put into operation in any community, would result in the spiritual uplift of the people. And the benefit would not only be spiritual, but moral, social and financial. For instance, there is no want or suffering among our people. We take care of that through our system of tithes and offerings. While all Mormons do not strictly observe the mandate, we are supposed to give one-tenth of our income in worldly goods for just such purposes.

"Polygamy is a past issue. It was never mandatory on our people, but we did hold that it was carrying out the precepts of the Bible."

DOG'S HEAD LOST, CHILD MAY DIE

Head of Animal Supposed to Have Had Rabies Shipped for Examination.

Utica, June 13.—Because the head of a dog which was suffering from rabies became lost in transit somewhere between this city and Cornell University at Ithaca, Hazel Beekman, six years of age, whose home is in Yorkville, a suburb of Utica, and who was bitten by the rabid animal, is in danger of death from hydrophobia.

The child was attacked by the animal more than two weeks ago, and after the dog had been killed its head was shipped to Cornell University for an examination to determine if it was suffering from rabies. The physician attending the Beekman child in the absence of word from the experts at Cornell assumed that the dog had not been suffering from rabies and nothing out of the ordinary medical treatment was resorted to in the girl's behalf.

Word came from Cornell that the dog's head had just arrived, after having been lost two weeks, and that examination showed the presence of rabies. The Beekman child was rushed to the Pasteur Institute in New York for treatment.

MEDICAL INSPECTOR OF ASYLUMS FOR INSANE

Toronto, June 13.—Several important changes in connection with the asylums for the insane have been decided upon by the Provincial secretary, which form a part of the general policy for the improvement of these institutions that will be carried out in the near future.

All the institutions at Toronto, Kingston, Brockville, Cobourg, Hamilton and London, will be designated as "Hospitals" in place of Asylums. Another step which marks a radical departure from the past is the placing of these under inspection, as are the general hospitals of the province. The Provincial secretary has notified the medical superintendents that Dr. Bruce Smith will in future conduct the medical inspection, report on the care and treatment of patients, the training of nurses, and other matters pertaining to the hospital care of patients. It is understood that the new position will not interfere with the position now occupied by Dr. Bruce Smith as Inspector of Prisons and Charitable Institutions.

OWEN SOUND OUTRAGE.

Mischievous Persons Destroy Y.M.C.A. Furniture.

Owen Sound, June 13.—Some time after eleven o'clock last night some miscreants gained access to the Y. M. C. A. parlors and perpetrated an act of vandalism of a particularly wanton character by breaking and practically destroying the athletic trophies, breaking the hammers and other fixtures of the piano, slitting the leather seats of the chairs and cutting the rugs and carpets.

The deed is all the more noticeable in view of the fact that a big ten days' Y.M.C.A. campaign to raise a large sum of money is being successfully carried on and is now at its height. The police are working on the case and the Attorney-General's department has been notified.

FREEMASONS ARE MANY AMONG THE OTTOMANS

Relations With Italian Branch of Order Which Were Broken May Be Resumed.

Rome, June 13.—The visit of a party of Young Turks to Italy, organized by various semi-official bodies and placed under the patronage of the Italian government, has more than one object in view. Primarily it is a commercial undertaking for the purpose of promoting Italian exports to Turkey, and is a sign of a generally awakened interest in the Levantine markets among Italian manufacturers and merchants. But it has also a political object and forms part of a general plan to extend Italian influences in the near east.

One of the organizers is Signor Prinn Levi, an ex-journalist and art critic, who was recently given an appointment in the foreign office and subsequently sent to Salonica as Italian consul-general. Signor Levi is a Freemason of high degree and his mission in the near east was to revive the connection between the Italian and Turkish Freemasons, which at one time had been very close, but during the recent Turkish revolution had been broken off. The Turkish leaders belong, and in fact, at one time been under the authority of the Italian grand master (the Grande Oriente), and it is now hoped that by resuming the intimate relations between the two organizations Italy's political influence in Turkey may be enhanced.

The Italian Colonial Institute and the Venice Commercial Museum have helped to promote the project. There has been a remarkable spread of Latin Freemasonry in Turkey since the deposition of Abdul Hamid. As is well known the Committee of Union and Progress, before the revolution of 1908, took advantage of the shelter and secrecy of the mainly Jewish lodges of Salonica, and the Young Turkey party would now seem to have identified itself with this form of Freemasonry.

The movement is almost entirely political and is mainly the result of propaganda. Many Turks have been induced to join the lodges in the belief that they are thus being connected with an English institution. It is, of course, extremely difficult for them to distinguish between English and continental Freemasonry.

IN A SNAKE'S COILS.

Narrow Escape of an Attendant in an Animal Show.

Albany, June 13.—Fast in the coils of a monster boa constrictor which was slowly crushing his legs and body, John W. McCarthy, an attendant in an animal show exhibiting on Broadway, had an experience yesterday that he will not soon forget. But for the alertness of Bert Christian and two other men McCarthy would have been crushed to death.

McCarthy was cleaning the large pit in which the boa was confined. He had been warned by the manager not to attempt to enter the pit under any circumstances, but to use long handled bushes. McCarthy, however, neglected to obey orders, being in a hurry, he said, and he leaped into the pit. Without warning the snake snapped at him, and the fangs caught in the sleeve of his left arm, tearing away the cloth and scratching the flesh badly. McCarthy attempted to jump aside but was not quick enough to avoid the serpent, which quickly wound itself around him several times.

McCarthy was thrown to the bottom of the pit, where he struggled desperately to free himself. His danger was realized by Christian, who heard his cries, and with others he leaped into the pit, one man armed with a cleaver and others with knives. Christian quickly hacked the muscles of the boa until the serpent relaxed its hold, allowed McCarthy's body to be drawn from the pit. He was faint and dripping with perspiration.

The snake, which was then killed, was about twenty-eight feet long and twenty-six inches in circumference. The manager said it was valued at $2,800.

RICE PRICES CAUSED RIOTS.

Chinese Believed Foreigners Raised Prices and Trouble Followed.

Toronto, June 13.—"It was the high price of rice and not anti-missionary feeling which led to the recent riots in China," said E. C. Emmett, of Shanghai, China, when talking of the riots last night. He said the mandarins, or governing classes, were by their manipulations, responsible for the rise in the cost of rice, and the natives were led to believe that the foreigners were really to blame. At the places where the troubles arose, fully 1,400 miles inland from Shanghai, there were few foreigners except the missionaries, and the people did not discriminate, but attacked or threatened all foreigners.

Mr. Emmett, who is at the Queen's Hotel, represents the shipping firm of Jardine, Mathieson & Co., Shanghai, who have a fleet of many vessels trading in Chinese waters.

Mr. Emmett says Shanghai is splendidly governed by a commission of five representatives of foreign powers.

USED EMPLOYEE'S PASS AND WAS ARRESTED

Kenora, June 13.—A French-Canadian from Caughnawagan named George Canadian, was arrested here on the arrival of the east bound train Friday, on a charge of having travelled on a C. P. R. employee's pass, given him by one, F. Miller, of Montreal, in whose favor it was issued .

Canadian said he was unaware he was doing an unlawful act and pleaded not guilty. The magistrate found the prisoner guilty, but reserved sentence for a few days.

SYNOPSIS OF CANADIAN HOMESTEAD REGULATIONS.

Any available Dominion Lands within the railway belt in British Columbia, may be homesteaded by any person who is the sole head of a family or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate. Entry by proxy may, however, be made on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land on each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the commissioner of Dominion lands at Ottawa of intention to apply for patent.

Coal.—Coal mining rights may be leased for a period of twenty-one years at an annual rental of $1 per acre. Not more than 2560 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY.
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid

PRICE OF BEER RAISED; CROWD BURNS BREWERY

Munich, June 13.—Despatches received today from Dorhen, Bavaria, say that a crowd of 10,000, every person in it mad with drink, rioted, fighting off the police and firemen while a brewery, which the mob had fired, was burned with a loss of $60,000. A score, including several police and firemen, were injured. The refusal of the brewers to lower the price of beer half a cent a pint after it had been incerased, caused the trouble. The crowd manhandled the police and cut the firehose till the brewery manager agreed to the demands for lower prices.

WATER NOTICE.

Notice is hereby given that an application will be made under Part V. of the "Water Act, 1909," to obtain a license in the New Westminster Division of New Westminster District. (a) The name of Company, Vancouver Power Company, Limited. The head office at the City of Vancouver, British Columbia. The capital, $2,500,000, divided into 2,500,000 shares of $1.00 each, all fully paid up; (b) The name of the lake, stream or source, unnamed stream running through section 29, block 5, north range 2, west, thence in a northwesterly direction flowing into the Fraser river; (c) The point of diversion, 2,300 feet in a southeasterly direction from the southeast corner of section 19, block 5, north range 2, west; (d) The quantity of water applied for, .166 cubic feet per second; (e) The character of the proposed works, a small dam and pipe line; (f) The premises on which the water is to be used, two (2), three (3) and four (4), group two (2), New Westminster District; (g) The purpose for which the water is to be used, domestic; (h) If for irrigation describe the land intended to be irrigated, giving acreage, no; (i) If the water is to be used for power or mining purposes describe the place where the water is to be returned to some natural channel, and the difference in altitude between point of diversion and point of return, no; (j) Area of Crown land intended to be occupied by the proposed works, none; (k) This notice was posted on the 2nd day of June, 1910, and application will be made to the commissioner on the 13th day of July 1910; (l) Give the names and addresses of any riparian proprietors or licensees who or whose lands are likely to be affected by the proposed works, either above or below the outlet, none; (m) The part of the Memorandum of Association of the company which authorizes the proposed application and works reads as follows: "(3) The objects for which the company is established and to which objects the Company are restricted are the acquisition of water and water power by records of unrecorded water or by the purchase of water records or water privileges for,——— (g) Rendering water and water power available for use, application and distribution by erecting dams, increasing the head of water in any existing body of water, or extending the area thereof, diverting the waters of any stream, pond or lake into any other channel or channels, laying or erecting any line or flume, pipe or wire, constructing any race-way, reservoir, aqueduct weir, wheel, building, or other erection or work which may be required in connection with the improvement and use of the said water and water power or by altering, renewing, extending, improving, repairing, or maintaining any such works or any part thereof." (n) The Company applies for a license to store water. The place of the proposed reservoir for storing the said water is section twenty-nine (29), block five (5), north range two (2) west; (o) The means by which it is proposed to store the water, by dam; (p) The area of the reservoir site or sites at each foot in depth above the outlet, the depth above the outlet will approximately average about six or seven feet; (q) How it is proposed to acquire the land necessary for the purpose, by purchase, or if necessary by expropriation; (r) Approximately the number of acre feet intended to be impounded, 20,000 square feet.

Poundkeeper.
New Westminster, June 8, 1910.

Garden Work

English gardener is open to undertake all kinds of garden work; making and seeding lawns, laying out and planting new grounds; or would attend one or two days a month to trim up. Apply C. H., Box 556, New Westminster, B. C.

PITTSBURGHERS TO HONOR LATE KING

Pittsburg, June 13.—Residents of Pittsburg of British birth or descent have decided to erect as a memorial to the late King Edward VII. a research laboratory for the tuberculosis sanitorium there. About 400 attended the mass meeting Saturday at which the decision was taken.

The funds, which will be provided by subscription, will also provide for eight permanent beds in the sanitorium. British Vice Consul B. C. Childers presided at the meeting.

Something New in Floor Wax

The easiest way to finish a floor is to saturate a soft cloth with Columbus Liquid Wax and apply lightly to the floor, let it dry for about fifteen minutes, and bring to a polish by light rubbing with a soft cloth.

No brush to push—no work—no backache. Resists heel-marks, scratching, and water will not turn it white. Goes farther and lasts longer than any paste wax. Try it! Be sure to ask for the genuine

CITY NEWS

Frank S. DeGrey's new yacht, the Faloma, is at present lying at Schaake's wharf being fitted up.

See the new Camp and Veranda Furniture at Fales, Agnes street. **

Publicity Commission C. H. Stuart Wade will address a meeting of the Society of Londoners in Vancouver next Sunday evening.

Phone L-528 for all kinds of teaming. J. H. Huggard. **

The local Council of Women held its regular meeting in the board of trade room in the city hall yesterday afternoon.

For Bamboo Shades see Fales. **

Tait's mill at Aldergrove was burned to the ground at noon yesterday. The loss will be about $40,000, of which about half will be covered by the insurance.

For a pleasant cool drink, try the Ice Cream Sodas at The Royal Cafe. **

Remember the lawn social on the grounds of Queen's avenue Methodist church this afternoon and evening. Strawberries, cakes and ices will be served from five to ten o'clock. **

Awnings—All kinds at Fales, Agnes street. **

Dominion Penitentiary Inspector Dawson and Architect E. J. Adams, of Ottawa, are spending a few days in the city on their annual visit to the penitentiary. They will be here for several days.

We have a number of fine residences for sale on easy terms. Come in and see me. S. Fader. **

E. M. Bryant, found guilty last Friday of stabbing a C. P. R. sleeping car conductor, was sentenced yesterday to nine months in jail, the sentence to start from April 21, the time of his incarceration.

The Bohemian Cafe will in future be open all night. Special arrangements for private parties. **

Samples of the different kinds of concrete, which were submitted to the city by contractors in different parts of Canada and the United States, were yesterday packed up and shipped back to their respective owners.

For spring plants or cut flowers, phone Davies' Greenhouse, R208. **

The results of the McGill college sessional examinations have been published. John J. McNiven, a Royal City High school lad, leads with honors. Charles P. Creighton is another Westminster scholar on the pass list.

The proper place to dine is at the Bohemian Cafe, Depot Hotel block. The best of everything. **

The death occurred on Sunday of Celvania Carl Bowman, the eight-months-old son of Mr. and Mrs. Carl Bowman. The funeral took place yesterday to the Odd Fellows' cemtery, Rev. A. F. Baker conducting the services.

Spring is here—how about those plants for the garden? Tidy, the Florist, can suit you to a T in anything in that line. **

An apron sale and strawberry social will be held in the grounds of St. Barnabas rectory on Thursday afternoon and in the parish hall in the evening. An orchestra will be in attendance at the hall, and a number of vocal selections will be given.

A Japanese stabbing affray which occurred on Saturday night and was only reported to the provincial police yesterday took place at Tait's mill at Aldergrove. The assailant in the affair has left and cannot be found. The victim is in the hospital at Sumas, with a cut and broken arm and a cut leg. His wounds will probably not be fatal.

Archibald Gray, general traffic manager of the Great Northern railway, paid a visit to the city yesterday and inspected the yards and offices of the company here.

For Geraniums, Dahlias and all kinds of Spring Bedding Plants phone Davis' Greenhouse, R 208. **

Mayor Lee and Alderman Jardine will go to Victoria today to see about a re-survey of the city and some other matters. Mayor Lee may be gone a couple of days and Alderman Gray has been appointed acting mayor in his stead.

Archbishop McNeil, of Vancouver, held confirmation services in the St. Peter's Roman Catholic pro-cathedral here on Sunday. As this was the first visit of his grace to this city he was presented with an address of welcome on Sunday evening. The address was read by Joseph McDonald. Yesterday morning a reception in honor of the bishop was given at St. Anne's college.

The wedding of David Roy Donley and Miss Mabel Gertrude Reichenbach was solemnized yesterday evening at the residence of the bride's father, 641 Eighth stret, by Rev. J. S. Henderson, the ceremony taking place at five o'clock. Miss Annie Ashby acted as bridesmaid and E. L. Tait supported the groom. About thirty guests, all intimate friends of the contracting parties, were present. After the ceremony Mr. and Mrs. Donley left for a honeymoon tour in Washington.
