

CANADIAN NORTHERN STARTS CONSTRUCTION

Work Commenced Yesterday
at Port Mann—Big Force
of Men Being Secured.

Early this morning the first shovel of dirt on C. N. R. construction across the river will be lifted, but any ceremony, this being a system in vogue all over the Macmillan & Mann lines. Neither of the way magnates are fond of pomp or ceremony, and when they decide to build, they proceed to do so without calling on all the world to witness the turning of the first sod.

Actual work at Port Mann, the headquarters of the Canadian Northern, was commenced yesterday, a small force of men commenced digging close to the shore line, about a hundred yards east of the old mill between Bon Accord and Westminster bridge. Foreman McCutcheon is in charge of preliminary work.

Start Ahead of Time.
An agreement between the Canadian Northern and the provincial government calls for the commencement of construction work by the first of July, and it is in order to comply with this agreement that work has been started, although the intention is to proceed right along with the construction, and not merely comply with the agreement on a technicality by turning over a shovelful of soil.

Fifty Men at Work.
About fifty men will be at work, and this force will be steadily increased. Construction Agent C. V. Mann is at present hiring men from Vancouver, and will ship them down the river in dozens and scores as soon as a sufficient number has been secured.

One tent was put up yesterday, but on Saturday three more canopies will be fixed up for the men.

Progress Should Be Rapid.

The Northern Construction company was recently awarded the contract for the building of the sixty-mile section of the Canadian Northern railway from Port Mann up the valley of the Fraser river. The survey of the location line of this section was completed some months ago. Owing to the comparatively light nature of work to be done on the first section of sixty miles of the road it is expected that rapid progress will be made, so much so that within a month there should be a big showing of work performed.

The Canadian Northern railway in British Columbia is known as the Canadian Northern Pacific railway in agreements entered into with the government for its construction and the bonds of the Canadian Northern Pacific railway which are guaranteed by the government.

WEDDINGS FLOCK TO SEE POPULAR COUPLE WEDDED

Ceremony at St. Andrews
Church When Miss Mazie Robertson Becomes Mrs. James Gifford.

One of the most popular weddings of the season took place at St. Andrews church yesterday evening, when Miss Mazie Robertson and Miss Stoddart Gifford and Miss Robertson were pronounced man and wife in the presence of a large assembly of friends by the Rev. S. Henderson. For the occasion the church had been prettily decorated by the girl friends of the bride, floral arch and a bell of orange blossoms and roses being suspended before the altar.

Before the ceremony the church choir rendered "The Voice That Breathed O'er Eden," while after the ceremony Miss Vass, the organist, played a wedding march. The bride, who wore a white satin dress with veil and orange blossoms, was assisted by Miss Julia Gifford, sister of the groom, who wore pink gown with hat to match. The groom was attended by Alex. Robertson, brother of the bride. Little Elsie Gifford, niece of the contracting parties, made a charming flower girl. George Macmillan and William Turnbull acted as ushers.

The groom's gift to the bride was a gold necklace set with pearls, and to the bridesmaid an amethyst and pearl pin.

A recherche supper was served at the home of the bride's parents, Third Avenue, after which Mr. and Mrs. Gifford, accompanied by a number of friends, motored to Vancouver, where they took the boat for Seattle, where the honeymoon will be spent.

GOVERNMENT NOT TO CHANGE REGULATIONS

Recent Order Governing Disposal of Railway Belt Lands is Held Back.

The regulations for the disposal of the remaining government lands in the railway belt, which were to have gone into force on July 2, will not come into effect then, and not until the government is prepared to put them into force.

Dominion Land Agent John McKenzie yesterday received a telegram from Ottawa in which it was stated that the regulations were not to apply until further notice. No reason for the postponement is given.

The announcement will probably cause some change in the plans of landseekers who have been waiting for the time to arrive when they could enter for land in the railway belt. It was expected that there would be quite a rush at the local office, but that will come later.

The regulations which are not coming into force make provision for homesteading and preempting land in the railway belt. The lands are divided into several classes. Bench land is that which is not more than 2,500 feet above the sea level and not ordinarily affected by high water. A homesteader could file on twenty acres of land of this description in the Coast division and in addition, by paying certain fees and performing certain duties, he could preempt an adjoining twenty acres.

The other lands in the province were subject to different conditions of settlement according to their location and desirability.

Seeks Men in Great Britain.

Toronto, June 29.—Rev. Dr. McLaren, secretary of the Home Mission board of the Presbyterian church of Canada, is going to Great Britain to secure men for home mission work.

CHINESE RESIDENTS TAKE KINDLY TO FIRE INSURANCE

Oriental See Advantages of System and Pay High Premiums for Protection on Shacks.

Though the Chinese race are generally considered outsiders as far as western methods of business are concerned, when it comes to looking after their own interests they are quick to adopt any western business feature that tends towards that end.

Insurance is one of the things investigated and found good by the Chinese. In speaking to a News reporter the other day, A. W. McLeod, the well known insurance man, stated that a great many of the Chinese residents of the city were holders of fire insurance policies. In some cases the premiums paid on their dwellings and business houses is very high, even as high as nine per cent, as their buildings are generally cheaply constructed and in congested districts. They also take out some life insurance, but they do not fully understand this class of business.

Mr. McLeod's business, starting eight years ago as little more than a side line to his newspaper work, shows, in its remarkable expansion, the growth of the insurance business in this district. He has now the only exclusive insurance office in the city and his activities extend as far as Kamloops and through all the Fraser valley. So great has his business in this direction increased that recently he gave up his newspaper business and now devotes his attention entirely to insurance.

Some of the kinds of insurance he writes are not dealt in by any other agency in town. Live stock insurance, a system which has only during the last few years attained to favor with the farmers of the province, is written by him, and by no other man in the city. The same thing applies to motor boat insurance.

The extent to which Mr. McLeod's business has expanded to meet the needs of the growing city and district, is shown by the fact that for licenses to the city for the different companies he represents more than \$800 per year, and with the recent companies for which he has assumed the agency the amount will be considerably increased. For most of the companies he represents, Mr. McLeod is the agent and not a sub-agent, and he can consequently write the policies in his office and deal direct with the head office of the company.

GOLD DISCOVERIES EXAGGERATED IN ENGLAND

London, June 29.—Callers at the British Columbia agent's general office in connection with the reported gold discoveries are numbered by scores, and there are indications that passenger agents are using sensational reports as a means of attracting passengers.

BIG GAME EXPECTED ON DOMINION DAY

Champions Will Have Strong Twelve to Pit Against Con's Brigade.

The chances of the Salmon Bellies taking the great game from Vancouver on Dominion Day look good even with the absence of Gray, and they will probably look better tomorrow morning, for indications point to Sandy's return to take his old place between the sticks. If Sandy arrives the team to face Vancouver will be practically the same as that which swamped Con's home brews at the last game. Jimmy Gifford will not play, and Hughie will be given a chance in the field against the redoubtable Bones Allen, the man with the heavy action and the get-there tactics.

However, Sandy may miss his train or get a job at Kamloops or sign with the Nationals, and in that case Hughie will take his place in goal and the whole defence will be shifted back one, putting long Bill Turnbull on third defence, and leaving Doughey Spring at center. In that case Latham will go on to fill the hole in the scoring division, playing outside home, while the others are moved out one. C. Spring will be right on the job at inside home and important developments are looked for. Longfellow will not play.

The Vancouver team will be the strongest Con has scraped together yet. He has cast his dragnet over Canada and the result will be put up in green and white shirts on Saturday to try and put a different complexion on the league standing.

Griffith's eye is all right again and Harry Pickering will be in uniform once more. Bun Clark will guard the nets and Sandy Cowan will make his first appearance of the season. O'Reilly and Hogan will not play on account of a protest from Father Time.

Ditchburn will referee and is expected to make a bigger hit than Bob Dewar did on his last appearance.

The tickets on sale at Ryall's store here are being disposed of in fast time, and those wanting seats for the game will have to get around early today as there is expected to be a record crowd. Vancouver estimates placing it as high as ten thousand.

The Westminster players will put up at the Commercial hotel in Vancouver.

A letter was received yesterday from the Montreal club stating that the team would leave Montreal on July 5 and would be here on July 10. The letter read "be in New Westminster," but this is not conclusive evidence that they will put up here all the time they are on the coast.

BRYAN COMING BACK.

Montreal, June 29.—Hon. W. J. Bryan, who sailed from Bristol on June 24 on the Canadian Northern steamship Royal George, is due to arrive here tomorrow morning. At one o'clock he is to address a gathering at the Y. M. C. A.

MANITOBA MONEY COMING THIS YEAR

W. J. Kerr Studies Crop Conditions in Middle West During Business Trip.

"Crop conditions in Manitoba, Saskatchewan and Alberta are much more favorable than is generally supposed at the coast, and, barring early frosts and hailstorms, which cannot be guarded against by human agency, the western provinces should show an immense increase in wheat yield this year," remarked W. J. Kerr, head of the real estate and investment firm of W. J. Kerr, Ltd., yesterday, in a conversation with The News.

Accompanied by Harrison Hunter, formerly of Chicago, but now connected with W. J. Kerr, Ltd., Mr. Kerr has just returned from a two-weeks' visit to the prairie country. Part of their time was spent in Winnipeg on business for the firm, but considerable attention was paid to the country districts, stops being made at over a dozen places en route on the way back.

Mr. Kerr not only stopped off at towns, but drove out many miles in the country in order to gain first hand information from the farmer. One Sunday he drove fifty miles in the Moose Jaw district, where some of the finest of this year's wheat was seen. The only district where the wheat was hardly up to expectation was around Lethbridge.

In addition to studying crop conditions, Mr. Kerr did considerable missionary work on behalf of the Pacific coast generally and the Fraser valley in particular, talking British Columbia to every man who would consent to have his attention drawn away from wheat for a few minutes—no easy task in Manitoba at this season of the year. "What is the feeling towards the coast in the middle west at present?" inquired The News.

"Most of them intend to visit this province as soon as they can, and many of them propose making their homes here within the next few years," replied Mr. Kerr; adding "We'll see a lot of Manitoba money here before this year is out."

HEAVY FINES IMPOSED FOR UNLAWFUL COMBINES

Newport News, Va., June 29.—President Daniel B. Harris, General Manager A. B. Andrews, and twenty-one members of the Southwestern Underwriters' association were convicted here today in a magistrate's court of unlawfully conspiring to control insurance rates in this city and were fined \$500 each. The cases were appealed.

STEWART'S FOUNDER SAFE.

Seward, Alaska, June 29.—Joseph Laubner, F. R. Stewart and five others who were believed to have been drowned during the storm on Cook Inlet last Wednesday night were found by a party of searchers at Point Possession yesterday. The men encountered a severe storm and lost their dory on a bar, but managed to reach shore in safety.

FIRES THREATEN ONTARIO TOWNS

Fort William So Clouded With Smoke That Street Lights Are Necessary.

Fort William, June 29.—Forest fires are threatening towns in this vicinity, and Fort William is clouded with smoke, it being necessary to turn on the big street lights this morning.

The fires are getting worse at Silver mountain, twenty miles out. Scores of men, women and children fought the flames all last night and could not put them out. The fire is near Mackie & Taylor's camps and making great headway toward Silver mountain, which is inhabited by 300 people.

Mackie & Taylor intend making a raft to load the horses and camping outfit on if they cannot extinguish the fire.

People are getting nervous. There has been no rain for four weeks and everything is as dry as tinder.

MANUFACTURERS OPPOSE.

Ottawa, June 29.—That any treaty or reciprocal arrangement between the United States and Canada will be confined to natural products rather than manufactures, is the opinion expressed at Washington, according to an Ottawa man who has just returned from there and who had an interview with President Taft.

The manufacturing influence is very strong, and manufacturers naturally object to any competition save under the general tariff by manufacturers of other countries.

Negotiations will be taken up in the fall, probably at the end of September, and will likely be conducted both in Ottawa and Washington.

LIQUOR LICENSE BYLAW IS PASSED FOR THIRD TIME

Hotelmen May Put Up Fight Before Measure Compelling Them to Close Earlier Becomes Law.

The council yesterday afternoon had a busy session considering the liquor license amendment bylaw. The bylaw was discussed at length and passed for the third time. It is still necessary, before the bylaw comes into effect, for it to come before the council to be reconsidered and finally passed.

The great change from the present law is in the hours of closing, the proposed amendment cutting down the time of closing from 2 a. m. to 11 p. m. It is understood that the liquor men are preparing for opposition to the measure before it is declared law.

After the meeting the council adjourned to the Russell hotel for lunch on the invitation of Alderman Smith.

OLD PUPILS HONOR PRINCIPAL STRAMBERG

Graduates of High School Give Teacher Funds For Trip to Europe.

An event of great interest to many of the residents of New Westminster and many of those who lived here at some former time took place yesterday when H. M. Stramberg, principal of the New Westminster High school, was presented with an address and a purse by the old graduates of the school. To be a graduate of the High school here means to be an ex-pupil of Principal Stramberg, and consequently yesterday's meeting was a representative gathering of all those who had passed at one time or another under the instruction of Mr. Stramberg.

Judge Howay's Compliments.

The function took place in the kindergarten room of the Public school. Judge Howay read the address, and in his preceeding remarks paid a high tribute to the work accomplished by Principal Stramberg. He said that most of the students did not realize at the time they were going to the High school what a splendid foundation Mr. Stramberg was laying for their after success in life. For his part he had not realized it. He thought that the work Mr. Stramberg had done in being the only man teaching higher education in British Columbia for such a long time held a unique position in not only teaching many of those present higher education, but of also teaching their sons and daughters higher education.

Regrets From Premier McBride.

The speaker regretted that the premier of the province, who is a graduate of the Westminster High school, could not be present, but he read a letter from him, expressing his great regard for Mr. Stramberg and regretting that he could not make his subscription to the fund ten times as large.

Judge Howay then read the address and handed the purse of Mr. Stramberg, explaining that it was the wish of the donors that he should use the contents on a trip to the historic places of Europe, at the same time informing him that he had been granted three months' leave of absence.

The following is the address and the appended names:

The Address.

Dear Mr. Stramberg: For nearly thirty years you have carried on the work of higher education in this city, and in that time a very large number of pupils have been under your care and instruction.

The influence which you have wielded upon the life and destiny of this province can scarcely be estimated. Your old pupils all fully realize that whatever measure of success in life

(Continued on Page Five.)

AVIATORS EXCHANGE COURTESIES AT MONTREAL

American Takes French Count for Aerial Ride and Executes Daring Evolutions.

Montreal, June 29.—Count De Lesseps, the French aviator, who came to Canada to demonstrate the good points of the Bleriot monoplane, made his first trip this evening in a Wright biplane. He did so on the invitation of Manager Knabenshue, of the Wrights, the safe carriage of the guest being entrusted to Brookens, the most daring of the Wright aviators.

Brookens took the count up about a thousand feet and the flight extended far beyond the limits of the course, including a reverse and a side dip which took away the breath of the big crowd on the ground and in the grandstand.

As the count does not talk a word of English and Brookens cannot speak a word of French, there was no extended conversation between the international aviators while aloft, but when the pair landed the count gave Brookens a hearty slap on the back which fully expressed his admiration of the skill of the American aviator.

Outside of this the program was confined to a couple of short flights by the count in the Bleriot, some speed circles of Brookens, and a flight by Johnson, both of the latter using the Wright biplane.

The competitive features of the meet are held in abeyance awaiting the arrival of the Bleriot monoplane on which the count depends for success, the machines he has been using being of too small horsepower to admit of success in competing with the more powerful Wright biplane.

Not only has the count made firm friends of the Wright aviators, but he has taken young Cromwell Dixon, the boy aeronaut, who lost his dirigible balloon on Monday, under his wing. He is going to make a Bleriot operator out of the boy, using the machine owned by James Carruthers, of Montreal. The count says the boy has the nerve, as he showed by the management of his ill-fated dirigible that he should make a great aviator.

Champion Lacrosse Players Who Have and Who Will Hold the Minto Cup

NEW WESTMINSTER LACROSSE TEAM, 1910.

Reading from left to right, starting with the lower row, the men are: Jimmy Gifford, George Rennie, Charlie Galbraith, Tommy Gifford (Capt. in), C. A. Welsh, (Manager), Punk Wintemute, Len Turnbull, Hugh Gifford; Sandy Gray, Pat Feeney, Gordon Spring, W. Turnbull, Ed Longfellow; Buck Marshall, Pete Latham, Cliff Spring; Trainers Dan McElroy and Tim Mahoney.

District of New Westminster.

New Westminster Land District.

Take notice that I, Norman Caswell, of Abbotsford, B.C., minor, intend to apply to the Chief Commissioner of Lands at Victoria, B.C., for a license to prospect for coal and petroleum on and in the following described lands:

Commencing at a post marked N. C., N. E. corner, planted at the N. E. corner of Section 10, in Township 19, Municipality of Sumas, New Westminster District; thence south 80 chains; thence west 80 chains; thence north 80 chains; thence east 80 chains to point of commencement and containing 640 acres.

Dated at Abbotsford, B.C., this 9th day of June, A.D., 1910.

NORMAN CASWELL.

STREET IMPROVEMENT DEBENTURE OR REGISTERED STOCK BYLAW, 1910.

A Bylaw to enable the Council of the City of New Westminster to raise by loan the sum of One Hundred and Fifty Thousand (\$150,000.00) dollars for Street Improvements.

Whereas, certain sums of money have this year been expended out of the general revenue of the city for the construction, improvement and repair of streets and sidewalks, and it is expedient that additional sums be spent in like manner, amounting in all (with the sums already spent) to the sum of One Hundred and Fifty Thousand (\$150,000.00) dollars;

And Whereas, it appears that if the said sum of One Hundred and Fifty Thousand (\$150,000.00) dollars, be appropriated from the general revenue of the city for the current year the rate of taxation will be excessive, and it is expedient that such excessive taxation should be avoided, and the said sum should be raised on the credit of the corporation, and that debentures or registered stock certificates should be issued for that amount;

And Whereas, for the payment of interest on the debentures or registered stock certificates, proposed to be issued under this Bylaw, and for creating a sinking fund for the payment of the said debentures or registered stock certificates when due, it will be necessary to raise by special rate, in addition to all other rates, each year during the currency of the said debentures or registered stock certificates, the sum of Seven Thousand, Five Hundred and Ninety and 32-100 (\$7,590.32) dollars;

And Whereas, in order to raise the said yearly sum of Seven Thousand, Five Hundred and Ninety and 32-100 (\$7,590.32) dollars, an equal rate on the dollar will be required to be levied on the whole rateable property of the City of New Westminster;

And Whereas, the whole rateable property of the said city, according to the last revised Assessment Roll thereof, is Seven Million, Two Hundred and Forty-nine Thousand and Ten (\$7,249,010.00) dollars;

And Whereas, the total amount of the existing debenture debt of the said city is One Million, Six Hundred and Seventeen Thousand, One Hundred (\$1,617,100.00) dollars, irrespective of the sum of One Hundred and Seventy-four Thousand, Five Hundred (\$174,500.00) dollars proposed to be raised under the "Lulu Island Bridge Debenture or Registered Stock Bylaw, 1910"; the "Fire Debenture or Registered Stock Bylaw, 1910"; and the "Parks Debenture or Registered Stock Bylaw, 1910," of which none of the principal or interest is in arrears;

Now Therefore, the Municipal Council of the Corporation of the City of New Westminster enacts as follows:

1. It shall be lawful for the Mayor of the said city to raise by way of loan from any person or persons, body or bodies corporate, who may be willing to advance the same on the credit of the debentures or registered stock certificates hereinafter mentioned, any sum or sums of money, not exceeding in the whole the sum of One Hundred and Fifty Thousand (\$150,000.00) dollars, and to cause the same to be paid into the treasury of the said city for the purposes mentioned herein.

2. It shall be lawful for the Mayor to cause any number of debentures or registered stock certificates to be made, not exceeding in the whole the sum of One Hundred and Fifty Thousand (\$150,000.00) dollars, for such sums of money as may be required, not less than \$100.00 each, or an equivalent expressed in pounds sterling of the United Kingdom of Great Britain and Ireland, at a value of 4/86 to the pound sterling; and all such debentures or registered stock certificates shall be sealed with the seal of the corporation, signed by the Mayor and countersigned by the treasurer thereof, or by such other person or persons as may be thereunto lawfully authorized.

3. The said debentures or registered stock certificates, shall be payable on the first day of July, 1960, at such place or places as the Council of the said corporation may from time to time appoint with the approval of the holders thereof, and shall bear interest at the rate of four and one-half per centum per annum, payable half yearly on the first day of January and the first day of July in each and every year, and the debentures shall have attached to them coupons for the payment of interest, which said coupons shall be signed by the said Mayor.

4. A special rate on the dollar shall be levied and raised in each year, in addition to all other rates, on all the rateable property of the city, sufficient to pay the interest upon the debentures or registered stock certificates, and to create a sinking fund for the payment of the principal thereof when due, subject to any act or enactment respecting the same.

5. Subject as aforesaid, there shall be raised annually by special rate as aforesaid, during the currency of the said debentures or registered stock certificates, the sum of Six Thousand, Seven Hundred and Fifty (\$6,750.00) dollars for the payment of the interest thereon, and the sum of Eight Hundred and Forty and 32-100 (\$840.32) dollars to provide for the payment of the principal.

6. The proceeds of the sale of the said debentures or registered stock certificates shall be applied as follows, and not otherwise: towards paying the cost of the passing of this Bylaw and the issue and sale of the debentures or registered stock certificates therein referred to, recouping the treasury of the city such sums as have been this year expended in street works, or may be so expended until the proceeds of the sale of the said debentures or registered stock certificates have become available, the making, improving and repaving of such streets and sidewalks in the city as may be deemed expedient by the council, but no sidewalk or street shall be made or repaired out of the moneys borrowed under this Bylaw unless the

same shall have first been approved by a resolution of the Council.

7. This Bylaw shall take effect on the day of 1910, and may be cited as the "Street Improvement Debenture or Registered Stock Bylaw, 1910."

8. This Bylaw before the final passing thereof, shall receive the assent of the electors of the said city in the manner required by law.

Received the assent of the electors on the day of 1910.

Reconsidered and finally passed in open council the day of 1910.

NOTICE.

Take notice that the above is a true copy of the proposed Bylaw which will be taken into consideration by the Municipal Council of the City of New Westminster one month from the day of the first publication thereof in the "Daily News" newspaper, which first publication took place on the 13th day of June, 1910, and that a vote of the electors of the city will be taken on the said proposed Bylaw on the 14th day of July, 1910, between the hours of nine o'clock a.m. and five p.m. at the following places, namely: The Council Chamber, Civic Building; The Fire Hall, Sapperton; and the Waterworks Storehouse, Eleventh street.

W. A. DUNCAN,

City Clerk.

City Hall, June 11, 1910.

SCHOOLS DEBENTURE OR REGISTERED STOCK BYLAW, 1910.

A Bylaw to enable the Council of the Corporation of the City of New Westminster to raise by loan the sum of Ninety-seven Thousand, Five Hundred (\$97,500.00) dollars for School Purposes.

Whereas the Board of School Trustees of the City of New Westminster have caused to be prepared and laid before the Council a detailed estimate of the sums required by the Board for the current year's ordinary expenses of maintaining the schools of the said City of New Westminster; and have also prepared a like detailed estimate of the sums required to meet any special or extraordinary expenses legally incurrable by the Board, which last mentioned estimate is subject to consideration, alteration and final approval by the Council, and the same has been finally approved by the Council;

And Whereas, the amount required under the said last mentioned estimate for schools amounts to Ninety-seven Thousand, Five Hundred (\$97,500.00) dollars, made up as follows: Thirty-five Thousand (\$35,000.00) dollars for the erection and equipment of the new Sapperton school; Two Thousand, five Hundred (\$2,500.00) dollars for the erection and equipment of a school on Lulu Island, and Sixty Thousand (\$60,000.00) dollars for the erection of a High school.

And Whereas, by Section 40 of the Public Schools Act 1905, as re-enacted by Section 50 of the Public Schools Act 1905, Amendment Act 1906, any statute to the contrary notwithstanding, the Council of any city, town or rural municipality in the Province including the City of Vancouver and City of New Westminster, may in each and every year pass a Bylaw or Bylaws for levying a special rate of not more than Five (5) mills on the dollar for school purposes, and the Council may in addition to such rate apply any portion of the ordinary revenue to school purposes.

And Whereas, it appears that the amount required to meet the current year's ordinary expenses of maintaining the schools will exhaust the amount authorized to be levied under Section 40 of the Public Schools Act 1905, as re-enacted by said Section 50 of the Public Schools Act 1905, Amendment Act 1906, and it will be necessary also to apply a portion of the ordinary revenue for such purposes.

And Whereas, it appears that if the said sum of \$97,500.00 be appropriated from the general revenue of the city for the current year, the rate of taxation will be excessive, and it is expedient that such excessive taxation should be avoided, and the said sum should be raised on the credit of the corporation, and that debentures or registered stock certificates should be issued for that amount.

And Whereas, for the payment of interest on the debentures or registered stock certificates proposed to be issued under this Bylaw, and for creating a sinking fund for the payment of the said debentures or registered stock certificates, when due, it will be necessary to raise by special rate, in addition to all other rates, each year during the currency of the said debentures or registered stock certificates the sum of four Thousand, Nine Hundred and Thirty-three and 70-100 (\$4,933.70) dollars;

And Whereas, in order to raise the said yearly sum of \$4,933.70, an equal special rate on the dollar will be required to be levied on the whole rateable property of the City of New Westminster.

And Whereas, the whole rateable property of the said city, according to the last revised Assessment Roll thereof, is Seven Million, Two Hundred and Forty-nine Thousand and Ten (\$7,249,010.00) dollars;

And Whereas, the total amount of the existing debenture debt of the said city is One Million, Six Hundred and Seventeen Thousand, One Hundred (\$1,617,100.00) dollars, irrespective of the sum of Two Hundred and Twenty-seven Thousand (\$227,000.00) dollars proposed to be raised under the "Street Improvement Debenture or Registered Stock Bylaw, 1910"; the "Fire Debenture or Registered Stock Bylaw, 1910"; and the "Parks Improvement Debenture or Registered Stock Bylaw, 1910," of which none of the principal or interest is in arrears.

Now Therefore, the Municipal Council of the Corporation of the City of New Westminster enacts as follows:

1. It shall be lawful for the Mayor of the said city to raise by way of loan from any person or persons, body or bodies corporate, who may be will-

ing to advance the same on the credit of the debentures or registered stock certificates hereinafter mentioned, any sum or sums of money not exceeding in the whole the sum of \$97,500.00, and to cause the same to be paid into the treasury of the said city for the purposes mentioned herein.

2. It shall be lawful for the Mayor to cause any number of debentures or registered stock certificates to be made, not exceeding in the whole the sum of \$97,500.00 for such sums of money as may be required, not less than \$100.00 each, or an equivalent expressed in pounds sterling of the United Kingdom of Great Britain and Ireland at a value of 4/86 to the pound sterling; and all such debentures or registered stock certificates shall be sealed with the seal of the corporation, signed by the Mayor and countersigned by the treasurer thereof, or by such other person or persons as may be thereunto lawfully authorized.

3. The said debentures or registered stock certificates shall be payable on the first day of July 1960, at such place or places as the Council of the said corporation may from time to time appoint with the approval of the holders thereof, and shall bear interest at the rate of four and one-half per centum per annum, payable half yearly on the first day of January and the first day of July in each and every year, and the debentures shall have attached to them coupons for the payment of interest, which said coupons shall be signed by the said Mayor.

4. A special rate on the dollar shall be levied and raised in each year, in addition to all other rates, on all the rateable property of the city, sufficient to pay the interest upon the debentures or registered stock certificates, and to create a sinking fund for the payment of the principal thereof when due, subject to any act or enactment respecting the same.

5. Subject as aforesaid, there shall be raised annually by special rate as aforesaid, during the currency of the said debentures or registered stock certificates, the sum of \$4,337.50 for the payment of interest thereon, and the sum of \$436.20 to provide for the repayment of the principal.

6. The proceeds of the sale of the said debentures or registered stock certificates shall be applied as follows, and not otherwise: towards paying the cost of the passing of this Bylaw and the issue and sale of the said debentures or registered stock certificates therein referred to, and all expenses connected with the issuance of the said loan, and the balance shall be paid over from time to time as required upon the order of the trustees by the city treasurer to the several persons to whom moneys are payable.

7. This Bylaw shall take effect on the day of 1910, and may be cited as the "Schools Debenture or Registered Stock Bylaw, 1910."

8. This Bylaw before the final passing thereof, shall receive the assent of the electors of the said city in the manner required by law.

Received the assent of the electors on the day of 1910.

Reconsidered and finally passed in open council the day of 1910.

NOTICE.

Take notice that the above is a true copy of the proposed Bylaw which will be taken into consideration by the Municipal Council of the City of New Westminster one month from the date of the first publication thereof in the "Daily News" newspaper, which first publication took place on the 13th day of June, 1910, and that a vote of the electors of the city will be taken on the said proposed Bylaw on the 14th day of July 1910, between the hours of nine o'clock a.m. and five p.m. at the following places, namely: The Council Chamber, Civic Building; The Fire Hall, Sapperton; and the Waterworks Storehouse, Eleventh street.

De Raging Secret

Hudson's Bay Company's Employees Coming to Toronto.

Toronto, June 28.—A man representing Hudson's Bay store, occupying blocks, modelled after the fashion of Harrod's great emporium in London, and handling almost exclusively a conceivable product which the merchants could call for, is the theory in Toronto business circles that the extensive buy-out of the Yonge-Carlton-Alexander block; \$8,000,000 is probably the cost.

Victoria, June 29.—Eleven sperm whales were taken by the steamers Orion, St. Lawrence, and S. A. Jones on the west coast last week. It is an unprecedented number of whales, the product from which is very valuable. The steamer Orion has chartered to the Pacific Whaling company is at present engaged in carrying oil to this port from Kyushu and Sechart, the lower grades of which are to be shipped on the Blue Funnel Oanfa, which is expected about the middle of the week.

The new whaler William H. Murray should be at the Queen Charlotte Islands ere this and it is understood will commence hunting at once.

THURSDAY, JUNE 30, 1910.

CHINATOWN.

The people of New Westminster will rejoice if the suggestions of Fire Chief Watson respecting the demolition of the old shacks down in Chinatown are adopted by the Council. For the most part these are nothing less than disease and fire traps and as such are a menace to the health and safety of the city. More than this, they serve to tarnish the good name and reputation of our fair city. The aspect of the Asiatic section, lying just on the western margin of the improved Columbia street, forms a very unpleasant contrast to that thoroughfare, and for mere appearance sake it would be a very good thing to get the rickety, tumbled down old wooden structures done away with and their hideous and noisome surroundings put in decent order. We hope therefore that, as the result of the visit of the Council to this quarter, such measures will be taken as will secure an improvement in the appearance of this part of the city.

BRITISH POLITICS.

After the storm the calm. There has been a lull in political affairs in Great Britain since the lamentable decease of our late sovereign, but now a state of excitement even greater than that which prevailed a few weeks ago threatens to set in. The stormy condition of the political atmosphere is due, first to the menacing attitude of the Irish party led by Mr. Redmond, which declares its intention of opposing the budget of the Liberal government, and presumably aught else that may be brought forward, in the event of the veto resolutions not being proceeded with; secondly to the threat of the suffragettes to set about a more vigorous campaign than ever against the government.

With a view to a pacific settlement of the greatly vexed question that has arisen over the constitutional position and powers of the House of Lords, negotiations have been proceeding between Premier Asquith and his cabinet with the leaders of the Unionist party, in the hope of arriving at a satisfactory basis of settlement. So far as can be at present learned these negotiations have been of a gratifying character and there is a general feeling that a solution to the difficulty will be reached. But the Redmondites insist upon pursuing the original policy respecting the veto to the bitter end, and failing a surrender to their demand threaten war to the knife against the government. The Labour party is also in a state of revolt upon this same matter.

But if the hoped for arrangements between the Liberal and Unionist parties respecting the House of Lords are satisfactorily concluded then doubtless Premier Asquith will be assured of the support of the opposition in the passing of the budget and possibly some other measures already introduced. He would thus be able to snap his fingers in the face of Mr. Redmond and Mr. Keir Hardie and tell them he can do without their help. It is scarcely likely that Mr. Asquith would neglect to take into account the possible revolt of the Nationalist and Labour parties before he entered into negotiations with the opposition, and it is very probable that he will be very profoundly thankful to be without the dearly bought support of this revolutionary element in the House of Commons. It has appeared on one or two occasions that the Premier has been forced to take a course contrary to his own feelings by the alliance which he formed when entering upon the government of the country. That is why we are inclined to believe that he of all men will be perfectly glad to wash his hands of every connection

with the Redmondites and Labourites.

As to the suffragettes, their threat to make things lively for the government is due to the refusal of Mr. Asquith to comply with their demand for expediting the suffrage bill introduced into parliament before Easter. This militant body also threatens that numerous women property holders will refuse to pay their taxes unless they get their votes. Though the re-institution of this ridiculous agitation may cause the British Premier some annoyance, it is scarcely likely to influence him in the desired direction. Respecting unpaid taxes, summary methods of recovering these are provided and such a form of protest will not produce any very serious effect.

Great Dog Town.

The greatest dog town in Great Britain, if not in the world, is Haverfordwest, England. There are many men in the town who live wholly and make a good living by breeding, buying and selling dogs. Although the population is only 6,000, at least 6,000 dog licenses are issued annually, and there are also a large number of exemptions. Almost daily there are more dogs than people in the public streets, though valuable animals are never allowed to run loose. Haverfordwest dog breeders are known for their working terriers, show terriers, pointers, setters, and spaniels, which are daily traded for big sums through the fanciers' journals and go everywhere. The quaint old town, with its mixed Welsh, English and Flemish population, is almost the hub of the dog's universe.

Lisle and Cotton Hose in All Colors and Polka Dots. We are selling lots of stockings this week. Almost any shade in Lisle. Our regular 35c line now on sale at 25c pair.

AGED AVIATOR PLANS TO REPAIR WRECKED FLYER

Count Zeppelin Not Discouraged by Failure of Aerial Passenger Service. Deutschland to Be Dismantled.

Osnabreck, Germany, June 29.—Count Zeppelin, disappointed but not discouraged, hurried here today to superintend the salvage of his latest aerial model, the great airship Deutschland, which came to grief in less experienced hands yesterday.

The count, who will be seventy-two years old on Friday of next week, has an engagement for the near future to fly from Friedrichshafen to Vienna to exhibit his invention to Emperor Francis Joseph, and he proposes to make good his promise. The prospects for early resumption of the passenger service, however, are not bright. The airship company announces that the accident will necessitate a suspension for several months of the advertised excursions.

After hours of perilous flight, during which it was driven hither and thither at the caprice of a gale, the Deutschland lodged in the trees of Teutoburgian Wald. Its framework was wrecked and the great envelope badly torn. The thirty-two passengers, including twenty newspapermen, had narrow escapes.

It was found today that it would be necessary to dismantle the ship, and this will begin at once. During the operations today a member of the crew was severely injured. Throughout the night 200 soldiers guarded the clump of trees in the branches of which the airship was lodged. Today soldiers were occupied with the restraining of thousands of persons who flocked from miles around.

The next voyage of the Deutschland will be made with Count Zeppelin at the helm.

Colonies Not Yet Ready.

London, June 29.—Replying to a question by H. J. Mackinder, the conservative member for Camalochie, in the house of commons today, Colonel Seeley, the under secretary of state for the colonies, stated the colonies had not yet indicated subjects which they desired raised at the next imperial conference. The precise date of the conference could not be decided until after the date of the king's coronation had been set.

IT WILL BRING RESULTS

NEW YORK TO HAVE IMMENSE RESERVOIR

Greatest Engineering Project on Continent Will Carry Water Ninety Two Miles

New York, June 29.—A hundred years after the advent of Christ, the great engineers of Rome constructed an aqueduct, to bring pure water into the Eternal City over mighty arches of masonry, which still stand as monuments to their genius and skill. Soon Rome boasted fourteen of these aerial waterways and running miles and miles over hill and dale.

The Imperial City of America is boring into the earth for the same purpose that Rome built aloft. A dozen miles back of the sleepy Hudson Valley town of Kingston, the city of New York has begun to build the greatest artificial reservoir in the world. To bring its billions of gallons of water into the city, modern engineers are digging out a tunnel which will cost half as much as the Panama canal, and which it will rival in mechanical complications.

New York is preparing to furnish water to a "ten million city." To say that the new Ashokan reservoir, when completed will hold 127,000,000,000 gallons of water means little to the average man. But when you realize that this single reservoir, when completed, will be a great lake among the hills, twenty-two miles long and two miles wide; that the filling of it will take the mountain rivers a whole year, then you begin to get a measure of the task.

And when you realize further that this great body of water, once cooped up in this reservoir, is to be brought into the city and distributed, you gather the full significance of the job the engineers have set for themselves.

Today more than 12,000 laborers are working on the monster project. Complete in 1914.

Late in 1914 the water is to be turned into the two basins of the reservoir. The ninety-two-mile long aqueduct, under mountains and great rivers, will be completed by the same time—and New York may fill her cup to overflowing.

In 1905 a commission was appointed to plan a water supply for a "ten-million city." The water supply had to be secured in New York State—to get water from another state would have caused endless litigation. The Catskills looked best. It was found that a total watershed of 900 square miles, capable of supplying 750,000,000 gallons of water daily, was available. It was ninety-two miles to New York's door—ninety-two miles in an air line, across a mountain ridge, deep valleys, and a great river. But the engineers said it could be done, and it is being done.

The Ashokan Reservoir will be the main impounding station for the system. So ingeniously is it planned that the natural hills will make up nine-tenths of its walls. The remaining tenth will be in the form of great dykes, save for the key-stone of the entire structure, the Ashokan Dam, now being built on the edge of the Sepus creek. Seven good steel towers will be covered by 200 feet of water when this monster dam holds back the water it is to imprison. Sixty-five cemeteries had to be moved. Between the villages were hundreds of farm houses. Every one must go. Even trees and underbrush will be cleared away, for Gotham must have her mighty drink.

A Tremendous Structure.

When you pass through Brown's station, where the dam begins, you come to the edge of the gorge of Esopus Creek and peer down the side of the growing dam. It is a gorge, wide as well as deep—it's nearly a mile across. The dam will rise 240 feet above the water level of the creek. At its base it will be 190 feet thick. At its crest it will carry a thirty-foot roadway. The engineers tell you it contains eight times more material than the great pyramid of Egypt. The dam is built of cyclopean stones, blasted from neighboring hills, imbedded in solid concrete. The structure is lined with an even masonry construction of giant concrete blocks. The wall against which the water will beat is perpendicular, while the outer wall slopes away at a forty-five degree angle.

Any masonry dam, no matter how solidly constructed, is bound to crack and leak. Nervous people below might get scared and move away, fearing another Jamestown disaster. So the Ashokan dam is built in each section, securely keyed together, but having no binding cement. In other words the dam was purposely cracked in advance. Small drains will carry away the seepage.

From the great reservoir the water will run into a smaller reservoir—the aerating pool. The far-famed fountains of Versailles must give way to this pool. Within its boundaries—only half a mile square—two thousand fountains, each sending up a stream of water 100 feet high, will play day and night. It is not for show these fountains work; it is to force life-giving air into the water.

A Wonderful Aqueduct.

And then the water is ready for the aqueduct—that marvelous underground structure that is the envy of every railroad engineer in the world. It cuts a straight edge south from the Ashokan dam, piercing the very heart of the Shawangunk mountains, dipping again in a tunnel under the valley of the Walkill river, pausing not at the deep waterway of the Hudson.

In cross section the tunnel is shaped like a horse shot, seventeen feet high. Through this tubing will come a bounding 800 cubic feet of water a second. While it is expected that the tunnel will be kept only half full, the

MILWAUKEE MAYOR BUILDS IDEAL CITY

Emil Seidel, Socialist, Tells Saengerbund of His Hopes and Ambitions.

Chicago, June 29.—Building the groundwork of an "ideal Socialist city" was described by Mayor Emil Seidel yesterday as the object of the present Socialist administration of Milwaukee. He addressed an audience of 5,000 German-American singers at a "Volksfest" in a local park, speaking first in German and closing his address in English.

The occasion was the open-air demonstration in connection with the fifth annual convention and saengerfest of the German-American Saengerbund of the Northwestern states.

"When we came into the city hall at Milwaukee we found the administrative machinery rickety and rusty and absolutely useless for our purposes," said the Socialist mayor. "The board of public works was a three-headed monster with tentacles reaching into corporation and contractors' offices in all parts of the city."

"When we set about to kill the monster, the Republicans and Democrats told us we could not do it. We said nothing, but went ahead and killed it."

"Many are wondering if we have introduced Socialism in Milwaukee. I am frank to confess that we have not, and it probably will be a long time before we shall be able to do so. We are building the groundwork for an ideal city for men and women to live in."

CROWD CHASED BRUIN IN STREETS OF ROSSLAND

Rossland, June 29.—The southern portion of Rossland was the scene of an exciting, but unfruitful, bear hunt the other afternoon. A well grown and very impudent brown cub ventured well within the city limits. It had evidently strayed from its mother, and, astonished at the novelty of its surroundings, went on an exploring expedition, venturing as far as Cook avenue. Round by Spokane street and Washington street and the intervening bush, he meandered at his own sweet will, scaring a few neighbors, and being frightened by others. Then he passed along eastward, coming out of the bush into Washington street. Here he frightened a young lad, who dropped the rake he was using and took to his heels. By devious ways he went to the south end of Washington street and into the bushes. By this time the news had reached Columbia avenue and very soon several men were helter-skelter down Washington street with guns of all kinds ready to give Bruin a happy dispatch. The party scattered in all directions, but no further sight of the bear was obtained, although tracks and signs were apparent all about. None of the dogs which accompanied the hunters got any scent of the animal, and so he got away. But, while the excitement lasted, it was intense.

The last seen of the bear was by some residents in the west part, when Bruin was making for the Sunset side of the city.

water can be raised to within fifteen inches of the top.

It is when the tunnel reaches the Hudson river that the greatest feat must be accomplished, and already the engineer's preliminary work has shown that they will succeed. On opposite sides of the Palisades engineers sunk shafts hundreds of feet deep. One shaft went down at the foot of historic Storm King mountain, the other across the river at the foot of Breakneck mountain. Down in the earth, through these shafts, the engineers took diamond drills—they are set with \$800 worth of diamonds each—and sent them straight through the bed of the river until they met in mid-stream. They went all the way through bed rock. So the tunnel will follow them through solid rock, 1,000 feet below the level of the river. Under the stream the water will flow to the east bank and thence, by gradual sloping, to New York City. Gravity and siphon system controls the water throughout.

Will Cost \$200,000,000.

The water penned up in the Ashokan reservoir would cover the entire surface of Manhattan island to a depth of twenty-eight feet. The great reservoir was planned to cost \$12,670,000. So great an undertaking was it that the contractors spent \$1,000,000 in preliminary work before a pick was stuck in the earth.

It is estimated that when the first water comes from this new system into the city, more than \$200,000,000 will have been expended. Along the ninety-two miles of the aqueduct the army of laborers is working day and night. It costs nearly \$100,000 a day to pay their wages. Two hundred and seventy policemen guard the work and protect the lives and property of the employees. The city of New York weekly sends thousands of books from its public library to the various camps, for the benefit of the laborers.

When the tunnel enters New York it will run through the center of the city from one end to the other. At no point will it be less than 175 feet below the surface. It will dive under the East river and supply Brooklyn; at the Battery it will plunge far under the waters of the Upper Bay and make its way to Staten Island, to furnish Catskill mountain water to the inhabitants of the Borough of Richmond.

The gigantic work will end in the Silver Lake reservoir away down in the wilds of Staten Island.

The Daily News will not suspend publication on account of the holiday tomorrow.

For a pleasant cool drink, try the Ice Cream Sodas at The Royal Cafe.

The Roman leaves at seven o'clock this morning for the fishing grounds in the north.

For Geraniums, Dahlias and all kinds of Spring Bedding Plants phone Davis' Greenhouse, R. 208.

A daughter was born to Mr. and Mrs. R. J. Burde, of Alberni, in Victoria, on Wednesday, June 22.

Carloads in and more on the way. See our stock. We defy competition. For Anything in the Furniture line come to W. E. Fales.

The B. C. E. R. started yesterday to place the brackets for holding its trolley wire on the new poles on Columbia street.

The management of the Bohemian Cafe sees to it that the best only is served there.

Mr. and Mrs. N. H. McQuarrie returned yesterday from Seattle, where they have been spending a short holiday.

McQuarrie Bros. are now ready to do business in the real estate and insurance lines. Office, 609, Columbia street.

Up to the end of banking hours yesterday the provincial tax collector took in over \$5,500 in the payment of taxes.

Sons of Scotland picnic to Westminster Junction, July 1. Sports, highland dancing and piping. Trains leave 9:10 a.m. Come and have a good time.

The Trader came into port yesterday with a load of lime for Gilley Brothers. As soon as she discharged her cargo she left again for Victoria.

The ladies of St. Peter's church yesterday held a successful garden fete and card party at the residence of Mrs. Carroll, on Columbia street east.

This is the last day on which leniency will be shown to owners of dogs who have neglected to provide their canines with the tax required by law.

In the police court yesterday James White, a negro, was fined \$2.50 and costs for assault, and E. Henderson paid the usual premium for getting drunk.

In the county court yesterday, the case of Erickson vs. the Surrey Shingle company was adjourned until July 8, when it will be heard before Judge Howay.

Malins, Coulthard & Co. have moved their offices on the south side of Columbia street to more spacious quarters over Annandale's store at the corner of Columbia and McKenzie streets.

At the home of the bride's parents, 729 Fifth avenue, Rev. F. Baker yesterday united in wedlock Frederick Samuel Davies, of Vancouver, and Miss Jane Ann Calder, daughter of Mr. and Mrs. John Calder, formerly of Brandon, Man. Mr. and Mrs. Davies will reside in Vancouver.

A quiet wedding was solemnized at St. Andrew's manse yesterday morning by the Rev. J. S. Henderson, Lewis Ethelbert Thomas and Miss Clare Nettie Barry, of Bellingham, being the contracting parties. Mr. and Mrs. C. L. Thomas, also of Bellingham, supported the principals. After the ceremony the bridal party motored back to their home in Bellingham.

Alex. Forrester, of Nanaimo, architect and contractor, who is drawing plans for the new \$25,000 Odd Fellows hall at Nanaimo, was in the city yesterday. He inspected the local I. O. O. F. hall, and after his visit commented favorably on the splendid home of the Westminster members of the order.

McQuarrie Bros. are specialists in New Westminster realty. Watch their advertisements for bargains.

The First Presbyterian Church of Prince Rupert has extended a unanimous call to Rev. J. S. Sutherland, of St. John's church, Halifax, N. S. A pro-nata meeting of the Presbytery of Westminster was held yesterday in Vancouver to deal with the call, which was forwarded to the Halifax presbytery.

W. N. Clarke, of Vancouver, who has assumed the management of the insurance department of T. R. Pearson's business, will remove to this city this week. Mr. and Mrs. Clarke will take up their residence at 305 Carnarvon street, where they will be the guests of Mrs. McNamara for the summer months.

A dry kiln and its contents, belonging to the Otter Shingle company at Otter, B. C., was destroyed by fire early yesterday morning. The loss is about \$10,000 and will be mostly covered by insurance. A. W. McLeod made arrangements for the immediate adjustment of the losses sustained by the companies he represents.

MARKET REPORT

Yesterday's market, owing to the fact that it was held on Wednesday instead of Friday and that it came so close to the last market, was one of the poorest held in months. The attendance was very slim and the amount of produce brought in was away below the average. In fact, some of the lines were not represented at all.

Under those conditions buying was stagnant and the prices did not vary from those of last week. There was no unusual feature to the event. Next week's market is expected to be a record breaker on account of the fact that nine days will elapse before it is held.
