FOUR MILE HILL

A BRIEF DESCRIPTION OF THE HILL AND THE WORK BEING DONE

Four Mile hill, lying just north of Bulkley river and between Four Mile and Six Mile creeks, on the Babine trail, is a camp that is being brought into prominence by the fine showings that are being opened up by the prospectors owning claims there.

Some fourteen or fifteen claims were located about a year ago and since then such development has been done as means would permit. The country rock looks the same as the rock on Nine Mile in which ore occurs and if not a continuation is more than likely to be a recurrence of the same formation.

The top of this hill is not more than a thousand feet above the Bulkley river and within a mile of the railway line, on the opposite side of the river.

Six or seven separate veins are known to exist on the different claims and at least two of them are five to six feet wide. One of the claim owners took samples from his property to the coast last fall. Separate samples were made of the ore from each wall to the center of the vein. From the hanging side the assay value was 358 ounces of silver to the ton and the foot wall side 46 ounces. Another prospector had returns of $86 in silver and lead, including a few dollars in gold.

This hill is already bare of snow and two of the prospectors interested on the hill are at work on their claims. Tom Stephenson is deepening a shaft started last fall and Harry Thoen is driving an open cut.

Being situated so close to the line of the railway, with no transportation difficulties to contend with, the showings on this hill should come in for enough development this year to fully determine their worth.

Another Boat for Upper Skeena.

While R. H. Gerow was in Vancouver two weeks ago he inspected the new boat for the upper river just completed at the Wallace shipyards. The final coat of paint was being put on the hull and in a few days she would be ready for the water. Gasolene engines of 65 horsepower were installed and the vessel is designed to carry thirty tons of freight. At the yards Mr. Gerow was told that she is being built by the Packers Association to ply between Kitselas and Hazelton. Instead of the usual stern wheel she is driven by a propellor.

The first pack train of the season left town Wednesday, taking supplies out to a gang of right of way men near Moricetown.

J. D. Campbell,, Frank Brown and Geo. T. Stewart went up to the Silver Cup Wednesday morning. This is Mr. Campbell's first visit to the property since work was started.

Friday morning a small pack train was sent out to Twenty Mile on Bear river with supplies for the Buckskin Group. It will be necessary to have all the supplies for the 300 foot tunnel landed on the far side of Bear river before high water.

Arthur Skelhorne and W. J. Bryan returned from Nine Mile Friday afternoon. They called at the Silver Cup camp but did not go up to the tunnel. The face of the tunnel is now in over 150 feet and a crosscut to determine the width of the vein will be started immediately.

THE TUNNEL ON THE BUCKSKIN

THE NEW TUNNEL NOW WELL UNDER WAY

The tunnel on the Buckskin group on Bear river, the largest piece of development yet undertaken on a raw prospect, was in ten feet when Bob Montgomery, one of the miners, came to town for supplies this week. The news of a strike on this property can be expected almost any time. The tunnel is to be driven 300 feet and open up the vein at depth.

New Quarters for Postoffice.

Postmasrer Sargent is preparing new quarters for the postoffice, in the addition to the main store building. A door is being cut in the front to give separate entrance into the new office and as soon as they can be brought up the river locked boxes will be installed.

SURROUNDING HAZELTON

Surrounding Hazelton there is good agricultural land conserv- estimated at 300,000 acres. This land is in the valleys of the Skeena, Bulkley, Kispiox, and Kitwangar rivers and will grow all the crops that are grown in the north temperate zone. It is eminently suited for diversified farming but many people believe dairying will be the leading industry with the farmers. The mining of coal and metals will draw a large population and create a home market for what the farmer has to sell.

Expressed in acres the amount of farm land is large but in proportion to the whole country it is small.

Of coal the amount is practically unlimited. The formation is which coal occurs is found in practically every valley and new areas with seams of workable thickness are being found every year. A large part of the country has not been prospected and cannot but offer a favorable field for exploration.

In lode mining the development so far fas been most flattering for a future industry of great value. Gold, silver, copper and lead have been found in paying quantities in almost every direction. Close to Hazelton, on Nine Mile mountain, one property has been proved to be a mine and a big one. Bulkley valley is bordered on both sides by mountains on which some hundreds of claims have been located. Once rails are laid into the valley ore shipments can be made profitably and a constantly increasing force of men employed at the mines.

The timber supply is represented by the spruce and cedar forests covering the mountain slopes and in some places spreading over the valley lands. These forests are not extensive enough to support a large business in exporting lumber but will provide plentifully for all the requirements of the immediate vicinity.

Water power along the G. T. P. is practically unlimited. This may mean but little now but the time is not far distant when it will be developed and turned into a source of wealth.

Extensive clay deposits are ready to hand whenever a demand shall arise for the products of the brick and tile factory.

In the eastern part of the district is a gold placer country that was world famous forty years ago but from which latterly the output has sunk to small proportions owing to the high cost of supplies, the utter impossibility of transporting heavy machinery and the richest ground being worked out. Signs of a renewed activity are already apparent and commencing this summer will be seen the first movement toward establishing large plants and recovering the millions still lying in the gravel.

FOR CLEAN MONEY

The associated Boards of Trade in southeastern B. C. at their meeting recently passed resolutions advocating the coinage of a Canadian silver dollar and abolishing the filthy bills that are now being handled.

Under favorable conditions one and two dollar bills soon get dirty enough to disgust anyone but it is only in this part of the country where we get the full benefit of a filthy currency. One hundred and eighty miles from a bank paper money is never retired from circulation as long as the denomination is recognizable.

Outside of the dirt and unsightly appearance paper money is claimed to be responsible for the transmission of more or less disease. Another argument for the coinage of silver dollars is that Canada is now the second silver producing country in the world, second only to the United States, and any legitimate demand that can be created for the white metal is bound to help the silver market.
