HAZELTON, B. C., AUGUST 16, 1912

TEN PAGES

RAILS AT NEW HAZELTON BY MIDDLE OF SEPTEMBER

Steel Gang Now Busy Rushing Work on Sealey Gulch Bridge—Will be Completed in Ten Days—Connect With the Rails in Less Than a Week

Wall & Swan's steel workers arrived at Sealey Gulch bridge on Monday last and have started work on the erection of the steel on that big bridge. Everything was ready for them and all the material was on the ground. The work means but the throwing of steel out and bolting it together. It has been said that this would take a month or six weeks, but such statements were made by people who know other things than bridge building. The contractors who are doing the work state that it will take ten days to cross the gulch. Allowing them fifteen days, the bridge will be completed before the first of September.

After the bridge is done there are only three or four miles of track to lay to New Hazelton, and at the rate of a mile and a half a day the rails should be there and the ballasting completed and the road accepted by the railway commissioners before the middle of next month. Then the passengers and freight, mail, baggage and express for all the interior points will be delivered at New Hazelton and distributed from

FIXING THE ROAD

Autos Will Soon be Able to Meet the Trains at Sealey

It has been learned that as soon as Supt. Mehan's announcement was made that the railway would look after passengers and freight to the end of steel as soon as the boats had to stop running, that a gang of men were put to work on the Sealey-New Hazelton road. The road is now being put in good repair so that automobiles can use it with perfect safety. It will not be long before autos as well as rigs will meet the trains and convey the passengers to New Hazelton or old Hazelton.

BRIGHT PROSPECTS ON HUDSON BAY

C. B. Clark Visits R. G. Steele's Property and Several Others in the Vicinity

"One of the brightest prospects in British Columbia today is the property of the Hudson Bay Mountain Mining Co., which is being operated by R. G. Steele," says C. B. Clark. Mr. Clark was after the property himself just before Mr. Steele closed his deal on it, and as Mr. Clark had sampled it and examined it carefully he is in a pretty good position to judge. The assays he got from the surface were satisfactory to him, and he believes Mr. Steele is a very capable man and knows what he is doing. On the property are six leads running from sixteen to twenty-five feet wide, large enough to quarry if necessary. The principal metals are gold and silver, and some of the most recent assays were given last week.

Mr. Steele is now driving a long tunnel which will tap several of the veins at a good depth. If the ore runs down, the property will be one of the biggest producers in the whole province.

Mr. Clark has just returned from a trip over Hudson Bay mountain and Milk Creek in company with Colin Timmins, one of the biggest and most capable mining men that has yet come into the district. Mr. Timmins was very much impressed with the Hudson Bay mountain properties, and is looking for something big which will require big capital, big plants and big gangs of men to operate. With Tom Carr he went to the Dominion Basin from Aldermere, and is expected to return to town any day.

Some of the promising prospects on Hudson Bay mountain are the Canary Bird and Humming bird, owned by Hanna, Charleson and associates. Con-

siderable work has been done there and it is looking first rate. The Coronado group is also a very promising property, and there are many others that are beginning to show up well, and that big mountain is bound to produce some big mines in the very near future.

Mr. Clark expects to soon close a deal which will keep him in the country.

F. G. Dawson, Prince Rupert, arrived in town on Sunday morning on the Inlander and will spend some time in the district on business.

A sample taken from the Harris Mines on Saturday yielded the following results: Gold, \$2.70; Silver, 328.3 ounces; lead, 27.4 per cent.—\$216.12, calculating lead at 3 cents and silver at 60. Picked samples could be obtained which would run very close to a thousand dollars per ton.

belief that the shaft is entering an important body of high-grade mineral. The new shaft on No. 1 vein was started this week on two feet of \$90 ore. It is expected that it will take about three months to reach the 100 foot level, working one shift. If this vein develops as expected, there will be a lot of ore available from it for shipment this winter.

The pile of sacked ore at No. 3 shaft is growing all the time, and two car loads will be ready for shipment as soon as the railway is ready to receive it at New Hazelton. The drift north from the shaft at the 110-foot level has exposed enough ore between it and the surface to keep up the shipments all

eral hours ahead of the regular time. In fact the Monday night train established a new record from Prince Rupert to Hazelton.

F. H. Mobley, of Stewart & Mobley, was one of the passengers. He expressed great appreciation of Mr. Mehan's action, as it would have been very inconvenient had they all been left at Skeena Crossing for several days. He says that the trip up from the bridge was a great pleasure. The ballasting has been completed as far as the Sealey Gulch Bridge and the road bed is in fine shape. There is no reason, he said, why the road should not be accepted by the commission as soon as it

G.T.P. PASSENGER SERVICE ADVANCES TO WITHIN FOUR MILES OF NEW HAZELTON

First Train Arrived Monday Night—Passengers Were Guests of General Superintendent From Skeena Crossing—Ballasting Completed to Sealey—Stages Met Train and Conveyed the Passengers to Their Destinations—A Beautiful Trip

On Monday night the first passenger train arrived at Sealey, a distance of from three to four miles from New Hazelton. During the day word was sent to the General Superintendent, Mr. Mehan, that there would be no boats to meet the train at Skeena Crossing. The genial superintendent wired to New Hazelton for stages to meet the train at Sealey that evening. Then an invitation was extended to the passengers to be the guests of the superintendent from Skeena Crossing to Sealey. Needless to say those who were coming through gladly accepted and thoroughly enjoyed the trip, arriving in New Hazelton and Hazelton sev-

DESTRUCTIVE FIRES

Some of Them Deliberate and Loss Will Be Great

This year has witnessed more serious bush fires than for a great many years. From all parts of the district reports of damage to good timber is reported and the owners of timber licenses who are paying the government a good tax for fire protection will be heavy losers. Most of the fires have been deliberately started, and it is understood that one or two of these are being investigated, as complaints were laid by some of the losers. A larger force of fire wardens is required.

ARRANGEMENTS COMPLETED FOR CONSTRUCTING BRIDGE

New Structure Will Carry Sixty-Eight Tons—Timber to be Supplied Locally—New Roads also to be Built, Diverting the Traffic—Order Placed for Material

Arrangements have been completed for the supply of everything required at this end for the construction of the new bridge across the Bulkley river at Hagueltgate. Mr. Garrett, who represents the company at Vancouver, was here all last week getting data neces-

sary before ordering the material from Geo. Craddock & Co., of England.

When he went over the site of the proposed bridge, he was enthusiastic. It is the finest site for a suspension bridge he has ever seen. The location is ideal, and the solid rock banks on both sides of the river will give a foundation that will be everlasting.

The bridge will be a double suspension, 16 feet wide—which will allow teams to pass—400 feet long, 48 foot towers, and a carrying capacity of 68 tons. The timber and lumber will be supplied by the Interior Lumber Co., and work will be started on the construction in a very short time.

While Geo. Craddock & Co. manufacture cables and build bridges in all parts of the world, this is their first bridge in northern British Columbia, and it is the intention of the company to make it one that will do them credit and will also build up their business in this new country.

While the bridge is being built, the new road will also be constructed. This road, from the point where it leaves the present government road through to New Hazelton, will have a grade at no place exceeding 4 per cent. It will run through Hagueltgate, and most likely along the dividing line between section one and section two to the depot at Laurier street and the railway crossing. Later this road will be continued down Laurier street to connect with the present government road to the Bulkley valley, and thus all the traffic will be diverted through New Hazelton.

Mr. Garrett left Sunday morning for Vancouver to finish up the preliminary work there and place the order for the material.

ANOTHER STRIKE ROCHER DE BOULE

Four-and-a-half Feet of Copper and Eighteen Inches Silver-Lead in the Lower Vein

Another big strike has been made on Rocher de Boule mine. This time it is on the lower vein where the long tunnel was driven last winter. A short time ago a drift was started on the vein about thirty feet from the surface and just west of the point where the tunnel tapped the vein at a depth of 130 feet. The men have opened up a four foot vein of fifteen per cent. copper which looks to be the very same stuff as found in the big upper vein. Along side the copper is eighteen inches of high grade silver-lead ore. This makes the lower vein every bit as promising as the upper vein and nearly doubles the value of the mine. Men will now be put to work on a drift west from the big tunnel level and pick up this ore shoot.

NEEDED A TRAIL

Road Superintendent Sees Necessity for More Work

One day recently Road Supt. Jennings visited Mr. Grey's ranch at Lorne Creek to see what trails and roads would be needed to serve that neighborhood. While there the superintendent was taken out to see the oat field. The oats were so high that it was not long before Mr. Jennings was lost and did not know which way to turn. He fully appreciated what it meant to get lost in the underbrush without a trail in sight, and he will likely recommend more work in that neighborhood in the near future.

W. E. Davis left on Sunday for Trail. He will return to the Hazelton district in a couple of weeks.

New Shoot of Ore on No. 3 Shaft Assays \$216 to the Ton and is Increasing in Width Every Day

winter of a grade and quantity that will provide for a large amount of development work from the proceeds.

Economy has been the watchword with the management from the very beginning. While there has been enough money to keep the work going ahead all the time, there has never been a large treasury fund to draw from, so a policy of developing ore for shipment was adopted as the wisest course. In October the company will enter on its second year of active development with enough ore in sight to keep the work going ahead at a considerably faster rate than for the past ten months.

There are eight full claims in the company's property and over 1,800 feet of surface stripping of the vein was the first thing done toward showing it up. A shaft on No. 2 vein and another on No. 3, 37 and 25 feet deep respectively, comprised the underground development at the time the Harris Mines, Ltd. was organized. Since last October, when the company took hold, a tunnel has been driven 400 feet to develop No. 2 vein, and which has not reached the ore shoot; the shaft on No. 3 vein has been carried down to 170 feet of depth and a drift run north on the vein for 110 feet, passing through three shoots of shipping ore. The shaft just started on No. 1 vein will be at the 100 foot

level by the time the G.T.P. is in operation to New Hazelton. The freight and treatment rate from New Hazelton will be about \$18.50 a ton. The sacked ore carries values of over \$80.00 a ton at the actual basis of settlement at the smelters. The ore now being hoisted is of assay value of over \$200 a ton.

The government wagon road to the property will be finished in a few days, and either a short wire tram or a raw-

hide trail will deliver ore at the foot of the hill, one-half to three-quarters of a mile from the different shafts, at small cost, and the six mile haul over a downhill or level road to the railway will not increase the bill of expense by a great deal. Mining costs at Harris Mines are the lowest of any place in the camp, owing, among other things, to the very favorable rock and no water to hoist.

There is money to be made in mining the ore as it occurs on the surface. While there is no theory for it, the ore does get better with depth, that is there is more gray copper in it as the shaft gets deeper, and gray copper is by far the most valuable part, weight for weight.

The pile of sacked ore at No. 3 shaft is growing every day, and two car loads will be ready for the railway as soon as it reaches New Hazelton. From there the freight and treatment will cost \$18.50 a ton. The sacked ore carries values of over \$80 a ton actual settlement at smelter.

SHERIFF'S SALE

Half Way House to Be Sold by Auction on Monday Next

On Monday afternoon August 19th at 3 o'clock in the Court House at Hazelton there will be sold at Public Auction the premises known as the Half Way House, on the Aldermere-Hazelton road.

WM. LARIMER,
Deputy Sheriff.

C.P.R. Steamers

The Canadian Pacific Steamer "Princess Mary" leaves Prince Rupert for Vancouver at 9 p.m. every Sunday, one hour after arrival of G.T.P. train from Skeena Crossing, arriving Vancouver 8.30 a.m. Tuesday.

Capt. Bonser, Str. Inlander, went to the hospital on Sunday last to undergo repairs. He has not been feeling well for some time and needed a good rest.

NEEDED A TRAIL

Road Superintendent Sees Necessity for More Work

One day recently Road Supt. Jennings visited Mr. Grey's ranch at Lorne Creek to see what trails and roads would be needed to serve that neighborhood. While there the superintendent was taken out to see the oat field. The oats were so high that it was not long before Mr. Jennings was lost and did not know which way to turn. He fully appreciated what it meant to get lost in the underbrush without a trail in sight, and he will likely recommend more work in that neighborhood in the near future.

W. E. Davis left on Sunday for Trail. He will return to the Hazelton district in a couple of weeks.

FRIDAY, AUGUST 16, 1912

Things Are Happening

Things have been happening in the Hazelton district at a pretty rapid rate during the past few days, and the people are beginning to appreciate the fact that modern civilization is knocking at our door. The day of the old habits, the old customs and the old systems is rapidly passing into history. The townsite question is working itself out in a manner that is causing all to sit up and take notice. The construction of the high level bridge across the Bulkley at Haguelgate is now assured, and the work will be commenced in a very short time. Before the very severe weather of January the structure should be ready for use. With this bridge connecting Silver Standard, Harris Mines, Silver Cup, Lead King, Sunrise, Erie, the Surprise, and several other mining properties, together with the immense farming county in the Kispiox valley with New Hazelton, the townsite situation is practically cleared up. It matters little what may be done at any other proposed site, the big business will be done where the big shipping is done, and that will be at New Hazelton. The new bridge puts the mines several miles closer to the track than any other route could do. The new bridge gives a level grade while all others would mean very heavy grades and greater distances. On the other hand the trains are running to Sealey thus diverting the traffic from the old channels into the new. In less than a month the rails will be at New Hazelton, and a very few days later freight, mail, passengers and baggage for all interior points will be delivered there.

The day for the river transportation is rapidly closing. No doubt there will be several weeks

work for the steamers yet in hauling old Hazelton freight, but there will be no rush. It will be sad to see the steamers pull out this year on their last trip, for the river boats have represented for thirty years the life blood of the whole district. But with a larger population, greater speed is demanded, and the big stern wheelers must look elsewhere. They have done a wonderful service for this country, and the people appreciate it.

With these rapid advances the people of old Hazelton are considering the new town problem in a light heretofore unknown. It will not be an easy matter to remain all winter in the old place while the new town is receiving the new benefits and being in almost daily touch with the markets of the world. Time and expense will cut a wider swath than previously admitted. It looks now as if there would be considerable activity in the building line in New Hazelton this summer or early fall.

New Wholesale Centre

With the completion of the Panama Canal the interior points of the Dominion will receive a benefit which very few realize as yet. The railway companies are aware of the fact that they must

adjust their freight rates to meet the new competition. They will no longer be able to charge a back haul for freight from the east to points in the western interior. At the present time Vancouver wholesale houses are doing business as far east as Calgary because they can get goods from the east and ship back to Calgary for less money than Calgary can get the same goods from the same eastern houses. The same condition would prevail on the Grand Trunk Pacific were it not for the Panama Canal. To meet the new competition the railways will cut out the back haul rate and in its place create new distributing points. Calgary, Edmonton, Fort George will likely be the new wholesale centres with cheap distributing rates from there. The coast territory will be greatly reduced thereby, and instead of Prince Rupert being the supply point for New Hazelton and the Hazelton district it will be Fort George, Edmonton or some other eastern town and the freight will be delivered here for less money than to Prince Rupert. Thus the interior points are in line for a new boom and will have an equal show with the coast towns for expansion.

BACK FROM THE OMINECA WILL REPORT FAVORABLY

R. D. Featherstonhaugh Went Over the Ground for the Omineca Development Co.—People There are Optimistic.

R. D. Featherstonhaugh returned from the Omineca district on Tuesday of this week, after having spent a little over two months in there for the Omineca Development Syndicate, of Vancouver. This syndicate is composed of some of the best business and professional men in that city, and they have large holdings in the rich placer country.

Mr. Featherstonhaugh was accompanied by Messrs. Sam Olson and J. Crawford, and in speaking of his trip he seemed very favorably impressed with the country, and there is every reason to believe that his report to his principals will be a favorable one, and that the Omineca Development Syndicate will be among the operators in the district next year. As to what he will report to the Vancouver gentlemen Mr. Featherstonhaugh was unable to say, but he promised to send a copy of it to the Herald in a short time.

He said he could not speak too highly of the hospitality and the kindness of the people in that district, and especially of post-

master Elliott, Mr. Childs and deputy mining recorder Steele. The latch key for the latter's cabin is always hanging on the outside. Mr. Otterson would never allow anyone to leave his place hungry even if the pack train is overdue and the grub is getting short.

Speaking of the output of gold for this year, Mr. Featherstonhaugh said that it would necessarily be small. The Kildare Co. are not operating their hydraulic plant this season, and it will not be possible for the Royal Standard Investment Co. to take out a great quantity as they will do well to get their machinery in working order. Mr. Childs is prospecting on an old channel on Manson creek and he will probably recover enough gold to pay his expenses. Mr. Otterson's work is largely in the nature of development work and cannot be expected to make large returns this season. Mr. Bowen on Lost Creek only expects to get his plant installed this year and be ready for a big season next year. Dr. Stanwood and party have located considerable quartz, but Mr. Featherstonhaugh was not able to get around to see any of them. He says the doctor is well satisfied, and that is sufficient.

The Omineca district is rich in gold, says the Vancouver man, but it is past the stage of individual operation. It requires a modern and scientific operation. As soon as the new machinery can be installed there will undoubtedly be large quantities of gold recovered.

WORKING BOND ON SILVER TIP

Frank A. Brown Leaves Rocher de Boule to Work Morrice River Property For Himself

Frank A. Brown has resigned his position as superintendent at the Rocher de Boule Mine and left his work on Wednesday, and Jos. Adams, Seattle, has arrived to take his place. Mr. Brown has been with the Rocher de Boule people since they took over the property last fall and he has carried on considerable important work for them. He has now decided to go into the mining business for himself and he has taken a working bond on the Silver Tip group on the Morrice River which was recently located by Ridsdale and Gore. Mr. Brown has made a trip to the property and he thinks he can make a good proposition out of it. He leaves today or to-morrow with several men and will put them to work at once on it. He will first cut a trail overland to the property and this work will take about a week, but it will cut some ten miles off the distance to the railway and give a good easy grade all the way. Then all the men will be put on the mineral deposit and the work will be continued for six or eight weeks. By that time Mr. Brown will have a good idea of what he has, and further plans will be made. Frank is one of the old timers in this district, and he is also one of the best miners, and his many friends will wish him all success in this undertaking.

Ladies' goods will be cleared out entirely at McArthur's Emporium. Prices sacrificed.

ONE MORE TRIP

Hudson Bay Steamer Will Go to Port Simpson for Winter

The steamer Port Simpson arrived Wednesday morning with a full cargo of liquors for the Hudson Bay Co. The steamer will make one more trip, probably arriving here on Saturday, and will then go below and up to Port Simpson where she will be laid up for the winter.

The freight is pretty well up for this season, the water in the river is getting low and the wood supply is running short.

A Flying Visit

On Wednesday night G. W. Morrow, Vancouver, and Mr. Spear, of Daniels, Marshall & McNeil, corporation lawyers, Vancouver, arrived in town and left again Thursday morning for Vancouver. Mr. Spear was accompanied by Mrs. Spear and they were out on a pleasure trip. They were delighted with the trip from Vancouver to Prince Rupert and stated that it was one of the world's greatest tourist routes. It was his first visit to the interior, but he says that it will not be his last. Mr. Morrow was up on business in connection with some land he owns down the river. He says he will be back again next month after the sale of Government lots in Prince Rupert. Mr. Morrow met quite a number of his old Prince Rupert and Essington friends in town.

More Roads

Wm. Manson, M.P.P., arrived in town on Wednesday night to consult with the authorities here in connection with the improvement of some of the roads in this vicinity. Mr. Manson stated to the Herald that some repairs would be made to the road between town and the Kispiox and that some money would also be used on the road between Hazelton and New Hazelton. Some other improvements might also be made. Mr. Manson will likely return to the district in about a month. At that time he hopes to be able to remain longer.

Send to Merryfield & Co., Prince Rupert, for wholesale grocery price list. It means big money to you.

For Sale

Large quantity of old newspapers. Just the thing for wrapping parcels or putting under carpets. Big bundle for two-bits. Apply Herald Office.

settled. New Hazelton obtains
the station.

ROOMING HOUSE CHANGES HANDS

W. A. Ferguson Disposes of the Grand
to H. E. James, and is Going
to the Babines

On Friday last W. E. Ferguson
completed a deal with H. E.
James whereby the latter takes
over the Grand Rooming House
and cigar store. Mr. Ferguson
was one of the first business men
in New Hazelton and he has done
well during his stay here. The
new proprietor is well known to
the majority of local people and
to a great many along the river.
That he will do as well as the
former proprietor is assured. Mr.
Ferguson left the fore part of
the week for the Babines where
he will be engaged for some time
on his mineral claims. What he
will do in the winter will depend
upon his mineral property.

ENLARGING PLANT

Richards & Knight Are Preparing for
the Coming Business

Richards & Knight, building
contractors, are erecting a ma-
chine shop on Twelfth Ave. ad-
joining their carpenter shop. It
is their intention to put in several
machines as soon as they can
get them here. When these
arrive they will be in shape to
handle many lines of work that
cannot be touched now.

OVERHEARD AROUND NEW HAZELTON

Mr. Zackon, Cohen & Zackon,
expects to leave shortly for
Montreal on a business trip.

Pat. Welch arrived here Satur-
day night and spent several days
in town in consultation with the
office staff here.

Mr. and Mrs. Cohen have sold
their house and lot in Prince Ru-
pert and went down on Sunday
to close the deal.

The scavenger system has been
installed. The garbage cans
have been received and distrib-
uted and in future the town will
be in a much better condition.

Work was started on Thirteenth
Ave. to build over the little dry
creek, but as the money donated
by the provincial government
has run out it cannot be finished
for the present at least.

G. C. Hartley is having the
New Hazelton Hotel painted and
decorated and when completed it
will be the best looking building
in the interior. Business is pick-
ing up rapidly and soon all the
business people will be using
paint.

When the first train arrived at
Sealey on Monday night with
passengers Carel's stages met
them and brought quite a bunch
here. One stage went to the
old town with a few. There is
no doubt that this town will get
the preference as soon as regular
trains run to Sealey. It is a
shorter trip and a much more
pleasant one while the accommo-
dation here is equal to that in the
old town.

STRIKE BROKEN MEN GO BACK

Laborers Coming in Steadily and Full
Gangs Will Soon Be Working
—Agitators Gone

The strike on this section of
the railway is all over and all the
men left in the country have
gone back to work and nearly
every day a new crowd is coming
in. There are no members of
the I. W. W. left and the agitators
have also left so that the work-
ers are not interfered with in
any way. The strike is at an
end and it is now just a matter
of time to get new men up from
the south until all the camps will
have full gangs again. At the
present time the camps are work-
ing small crews and taking on all
the men that are looking for a
job.

AFTER MORE MONEY

Bill Manson Being Asked to Try for
Increase in Appropriation

The money appropriated for
street improvements has been
disposed of and some improve-
ments made, but just enough to
show the need of many more
improvements. A request has
been sent to the government
through the local member for an-
other appropriation. The town
needs the money and the weather
is ideal for that kind of work.
The town is also entitled to more
money.

HAZELTON MINING DOPE

Geo. Poole was in this week. He has been doing a lot of work on his ground this side of Nine Mile Mountain and reports that it is improving. He says he has great faith in the ground and expects to uncover something good shortly.

Work is progressing favorably on Silver Standard. The shaft is holding its own and the ore is just as good as ever it was. The width of the vein remains nine feet at one end and over five feet at the other end. The past week they have been doing some prospecting on other veins on the property and with very satisfactory results.

Billy Thompson and Barney Halleran are prospecting on Rocher de Boule and they expect to make some good strikes in the very near future. Billy says that the hills were never in better shape for high prospecting. On top of Rocher de Boule there is no snow at all. Everything is gone except the clear ice. He says that there will be some big strikes made this fall.

Have you thought much of the "Silver Cup" Shares? Remember this Company may ship ore when the railway is able to take it to the Smelter, and these shares will then jump "away up," these shares can be bought "way down" from E. H. Hicks-Beach.

The boys working on the Mammoth Group on Glen Mountain have been prospecting a few days on the Silver Standard property and have uncovered a ten foot vein just three hundred feet from the line between it and the Mammoth Group. They are now tracing this vein over on to their own ground and it should not be long before another mining camp is opened on Glen Mountain.

Call at the Herald office for suggestions for your printing.

J. C. Boyd Goes to Telegraph Creek for the Hudson's Bay Co.

About the first of Sept. Hazelton loses one of its best citizens in the person of J. C. Boyd, for nine years manager for the Hudson's Bay Co. in Hazelton. Mr. Boyd is going to Telegraph Creek where he will succeed Mr. Warren, formerly of this store but who has resigned and will shortly join the ranks of the benedicts. When Mr. Boyd came to the Hazelton post there were two men besides himself on the staff and one man could have done all the work and not been very busy. During his stay here the business has increased by leaps and bounds and it is now necessary to carry a staff of fifteen or sixteen, and they are all kept busy. Mr. Boyd is also very popular and is held in the highest regard by all. His going away will leave a vacancy hard to fill in a day. With him he will carry the very best wishes of the community. Mr. Boyd is succeeded here by Geo. H. Graham, for a year or more connected with the office staff. These changes were announced last Thursday night during the stay of the general manager of the Hudson's Bay Co. in Hazelton.

POULTRY DEPARTMENT

There are several phases of the poultry business that it would be well for the lover of poultry to consider when desiring to go into the work. It is not always possible for every person to keep hundreds of chickens, as they haven't the room nor the time, but it is possible to do some parts of the work and get a lot of recreation and some profit from it.

A party living in the city had a large house and wanted to find some way of helping to pay the rent and to make something besides. She did not care to take roomers, and at last in a happy moment she thought of hatching chicks. She had always loved poultry and had some experience in the work. She secured incubators and purchased eggs, and after the chickens were hatched they were sent to the farm of a friend where they were raised as broilers, and sold for the high prices paid in the city. The venture proved to be a very profitable one. The hatching of chicks is one way whereby a nice profit may be made each year. When ready to hatch a few chicks for yourself, let your friends know that you will hatch eggs that they may send you at so much apiece. If you have several fifty-egg machines you can in this way keep the eggs separate, and with a few hatches pay for the machines. When it becomes known that you do this kind of work you will be overstocked with orders. There are always lots of

people in the village who want chicks but do not care to do the hatching themselves. This custom hatching business is profitable, and it will be well for you to look into the details of the matter. Find out if your neighbors want hatching done, and how many orders you could get.

Then there is the selling of day old chicks that you get from eggs laid by your own hens. Even if you do not have room to raise many chicks, you can hatch all the eggs laid and sell the surplus chicks to neighbors, and, if you advertise, to people hundreds of miles away. This will give you a handsome profit on the eggs, and the actual work connected with it is very little.

There are a few people who have the skill to raise a large per cent. of chicks and of getting them past the danger period safely. These people should hatch out a great many more chicks than they can actually raise on the ground they have. These birds can be sold to good advantage when they are only a couple of months old. The writer had some chickens of this age one year and wanted to dispose of them on account of crowded conditions. They went quickly and the supply was much less than the demand. This leads one to believe that a good business could be worked up on a small back yard in this way.

By looking into these things one may find a way to better re-

THE HOUSE FLY MENACE : AND HOW TO LESSEN IT

PROVINCIAL BOARD OF HEALTH
VICTORIA, B.C.

It is now admitted that the fly is responsible for the spread of many diseases. It is also known that we ourselves are responsible for the presence of the fly.

The fly season is in, and action at this time will prevent many deaths.

Flies breed in filth. Over 90 per cent. breed in stable manure;

week, or must be kept in covered and dark receptacles and from time to time sprinkled with lime or coal-oil.

Garbage receptacles should be covered and removed at regular intervals, and the surroundings sprinkled with lime.

The above action will well repay for the trouble. To be real effective, all must join in the fly warfare. Householders attending to their own premises have a right to demand similar action by their neighbors. A complaint made to any local Board of Health will be attended to.

the balance breed in garbage, out-house refuse, etc.

An immediate and thorough cleaning of premises should be effected. Accumulation of filth must be avoided. Stable manure should be removed at least every

turns from the small plant and thus secure the greatest profits from a small piece of ground.

When you need good printing you need the Herald to do it.

FORESTRY CONVENTION

Developing and Protecting the Forests
Will be Discussed at Victoria

Ottawa, Aug. 15—This annual convention of the Canadian Forestry Association, for the first time since 1906, is to be held this year on the Pacific coast, the place being at Victoria, and the dates September 4, 5 and 6. Mr. James Lawler, of Ottawa, secretary of the Association, has just

returned from the coast, where arrangements are now well under way for the meeting. In addition, a number of prominent men interested in forestry conservation in the east, both lumbermen and others, have signified their intention of being present. The railways have granted specially low rates to delegates, and as the subjects discussed will be of importance to all parts of Canada, it is expected there will be a large attendance. A number of well known forest engineers and lumbermen from the United States will also attend.

DO YOU KNOW?

- Do You Know** That the greatest wave of progress and prosperity on earth today is in British Columbia. The point that seems to be the centre and the one to have the most sensational values established in a short time is New Hazelton.
- Do You Know** That British Columbia money, Canadian money, United States money and money from all directions is pouring into New Hazelton District for investment and development and everyone feels confident that sensational profits will be sure.
- Do You Know** That the Grand Trunk Pacific rails are now laid to Skeena Gulch and will have steel laid into New Hazelton early in September.
- Do You Know** That New Hazelton is a good substantial town now. That the merchants (about 60 in number) are located around the corner of Thirteenth Avenue and Pugsley Street.
- Do You Know** That 12 mining companies are working within 9 miles of New Hazelton, and will be shipping ore from New Hazelton in July or August.
- Do You Know** That the business done in the Hazelton district this summer will be transacted mostly at New Hazelton.
- Do You Know** That the B.C. Government are spending \$2000.00 on street improvement in the vicinity of Pugsley Street and Thirteenth Avenue.

DO YOU KNOW?

- Do You Know** That the owners of New Hazelton are spending a vast amount of money on improvements in New Hazelton.
- Do You Know** That thousands of people are coming to New Hazelton this summer.
- Do You Know** New Hazelton will have 3000 to 5000 people in 1912 having about 2000 people altogether in the Hazelton District now.
- Do You Know** That lots in the merchantile section New Hazelton will soon be selling for thousands of dollars for each lot. They are now selling for a few hundred.
- Do You Know** That thousands of men will soon be working in the mines in New Hazelton district, producing millions in value for the fortunate owners.
- Do You Know** That thousands of farmers will develop the vast area of agricultural land in the Skeena, Kispiox and Bulkley Valleys and that they all will be rich in a few years.
- Do You Know** That New Hazelton will have thousands of visitors this year. Some will locate, and others will invest, all will boost—can't help it.
- Do You Know** That New Hazelton minerals, coal, timber, together with rail and water transportation guarantees big smelters, big industries of all kinds, all of which will make a City of world wide importance.
- Do You Know** That you should not wait until the many big things are announced and the prices of lots go soaring.
- Do You Know** Get in now at the starting prices and on easy terms.
- Do You Know** That you should get in now.

Harvey F. C. Walker Pub. July 19

SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.

N. B.—Unauthorized publication of this advertisement will not be paid for. Mar. 4 6m

**PERSONAL AND
LOCAL**

Mrs. Anger leaves this week for a
trip to Seattle.

E. C. Stephenson has returned from
a trip to the south.

Wm. Ellis returned to town on Mon-
day night, after a trip below.

R. P. Trimble returned from his trip
to the south on Wednesday night.

Mrs. Leslie and Miss Light left on
Sunday for the south for a short visit.

Mrs. J. M. Adams and daughter left
on Sunday for Victoria where they will
visit for some time.

Pat Welch, of Foley, Welch & Stew-
art, was in town on Thursday, and left
by the Port Simpson for the south.

Fire Warden Larimer went to Lorne
Creek this week to investigate the
cause of the serious fires in that vicin-
ity recently.

Do not forget to enquire at the office
of E. H. Hicks-Beach concerning that
snap of 160 acres near Meanskiisht at
\$10 per acre.

Charlie McKinnon, one of the pion-
eers of '69 and '70, was taken to the
hospital Saturday night. He has not
been well since winter.

F. H. Collins has left the service of
the Hudson Bay Co., and has gone up
to the east end of Babine Lake to take
charge of the Dominion fisheries there.

A Bargain you cannot afford to miss
is the 185 acres to be had from E. H.
Hicks-Beach at \$5.50 per acre, Crown
Granted. Splendid land in the Stewart
Lake district.

F. H. Mobley, Prince Rupert, is a
business visitor in town this week. He
reports the wholesale business to be ex-
ceptionally good, although the retail
business in some parts is quiet.

"Live well and die rich" should be
your motto--this can be accomplished
by taking up a few of the snaps offered
in this district, which can be bought
from E. H. Hicks-Beach, write and en-
quire about them.

A big crowd went down in the canoes
to Skeena crossing on Tuesday morn-
ing. The captain of the Inlander is in
the hospital and it was impossible for
the boat to get down. The Port Simp-
son was down below the bridge.

R. E. Paget made a new record for
the trip from Vancouver to Hazelton
this week. He had been down on busi-
ness and came back in 44 hours. This
is the fastest time yet made, and before
very long this will be cut down more.

R. D. Cameron, walking boss for
Duncan Ross at the big tunnel, left
this week to visit his old home on the
Atlantic coast. It is three years or
more since he joined Mr. Ross' staff,
and he has not been home since. Mr.
Cameron will have several month holi-
days before returning to railroading.

What do you think of 80 acres near
Round Lake in the Bulkley Valley at
\$10.50 per acre? This can be had from
E. H. Hicks-Beach.

Robt. Rock left on Thursday morn-
ing for Victoria. He will be married
there the first week in September and
will then return to this district with his
bride. Bobbie says he hopes the loca-
tion of the new town will be settled
and that Mr. Noel will have the store
moved and settled before he gets back.

Mr. and Mrs. Wm. Kennedy left on
Thursday morning for Vancouver and
will make their home there in the fu-
ture. Mr. Kennedy will open an office
in Vancouver, and will be associated in
a business way with J. H. Kugler. The
many friends of Mr. and Mrs. Kennedy
are very sorry to see them go, but
wish them every success.

Strayed

Strayed from Hazelton, a Pinto Grey
mare, brand 10-anchor on left hip, sil-
ver eye on right side. Return to Gust.
Haller, and be rewarded.
