The new strike on Nine-mile mountain reported in last weeks paper was made by Frank Brown and C. G. Harvey. It is a little east of the claims owned by Harris and Rosenthal and looks to be as rich as any on the mountain. Some of the men from there have been cruising out a new trail with an easier grade so as to be able to ship out ore in the very near future. The ore is very rich and can be shipped profitably at the present time.

Messrs. Barrett, Charleson and Williscroft went to Nine-mile Friday, Mr. Williscroft returned the same day, Barrett and Charleson spent the night on the mountain, Mr. Barrett expects to do packing for some of the claims this season. Mr. Williscroft was looking over the trail in view of the government doing some work on it. With the trail in its present condition it will be difficult to do much shipping and as these are the first in the district to do any shipping, the government should help by doing some trail work.

Brown and Rosenthal have a good trail cruised out with a good grade and free from drifting snow so it can be used during the winter. It is the intention of the men to work during the winter so they want to make the trail wide enough for a sleigh road and later be turned into a wagon road.

SATURDAY, JULY 31, 1909.

Hazelton is now upon the eve of a great stroke of prosperity which will be the starting of industries that will develop the wonderful resources of the district and build up a permanent population of thrifty, resourceful people who will build up institutions of sound financial standing.

The letting of the contract between Kitselas and Aldermere will start traffic on the Skeena that will be a marvel to those who have been skeptical regarding the Skeena as a navigable stream, and by the time navigation opens in the spring there will be scenes of activity in this part of the Province that will attract the attention of the world,

for so soon as railroad work starts the mineral claims in this section will receive more attention and development work will begin on a more extensive scale. With mining going on in the vicinity of Hazelton and a railroad being built through the country, will create employment for a large number of men, and with the large number of settlers who are sure to come in during the coming year, should make this a business center with nearly every line of trade represented.

Although the grade along the Skeena and up the Bulkley is comparatively an easy one there will be two tunnels near here, one eight miles up the Bulkley of 1300 feet and another five miles down the Skeena not quite as long, and several more in different places along the line, but the 140 miles between Kitselas and Aldermere will be a great deal easier to construct than the 100 miles from Prince Rupert to Kitselas, so that General Manager Hays' prediction that the Grand Trunk would be completed within three years looks to be very nearly correct.

We have received one of the first numbers of the new Prince Rupert paper, "The Prince Rupert Optimist," it is a bright, newsy paper devoted to the interests of Prince Rupert. It is a credit to its publishers.
