THE LEADING WEEKLY NEWSPAPER IN NORTHERN BRITISH COLUMBIA

The Omineca Miner

VOL. I, NO. 41 HAZELTON, B. C. SATURDAY, JUNE 8, 1912 PRICE $2.00 A YEAR

LATEST FROM PLACER FIELD

Early Season Favors Hydraulic Miners in Omineca River Gold Camps.

MANY OUTFITS AT WORK

Profitable Year for Historic District Predicted—Oldtimers Returning—New Companies Begin Work—Prospectors Narrowly Escape Drowning — Harry Walker Injured.

Harry Walker arrived from Manson creek on Monday, having made a quick 200-mile trip to obtain treatment for an injury to his right hand. The Manson Gold Mining & Developing Co., with which Mr. Walker is identified, and which is more generally known as the Huderle-Otterson company, owns valuable ground on Manson, and had been piping for some weeks previous to May 25, when he left the creek. High water gave some trouble for a time, but everything is in good condition now, and the elevator is handling its 500 yards daily. A very profitable season is expected.

As expected, there will be more work done in the Omineca river district this season than for many years. The season is already well advanced, and those who went in early in the spring have been able to work to good advantage. Many parties are now on the trail to Manson, including a number of men under Superintendent Brudvik of the Royal Standard Investment company; W. B. Steele, George Gaffney, Charles McKinnon and other oldtimers.

H. M. Gibson, with a large crew, is engaged in improving the pack trail,

Dr. Stanwood and partner have located claims on Boulder creek. They are now engaged in prospecting for quartz, and have some nice-looking samples.

The Lost Creek Hydraulic Co., which recently acquired the Steele-Mullan property, is operating in Skeleton Gulch, The installation of a pipe line and construction of a dam will occupy the best part of the summer.

John Huderle is expected to arrive in Hazelton within a week, He will immedialely proceed to Manson.

Mr. Walker reports that King and Wrigley had a narrow escape from drowning in the Middle River country. An old canoe in which they were crossing collapsed and they barely managed to reach shore, losing their entire outfit. They made their way to old Fort Babine, living for several days on two pounds of split peas and one grouse.

Larry Canty and Max Gebhart are going to Stranger River for an extended prospecting and trapping trip.

Charles Paquette has gone to Fish River.

C. N. R. Plans

Winnipeg, June 3:—That the Canadian Northern Railway would be operating transcontinental trains early in 1914; that a line of steamers would soon be established on the Great Lakes, and that ultimately the line between Port Arthur and Winnipeg would be double-tracked, were some of the statements made by Sir William MacKenzie, who arrived in the city yesterday from Toronto.

The party leaves for the west this evening and will go direct through to the coast.

Wires Are Down

The government telegraph line to the south is temporarily out of commission. The Miner has received no despatches today.

Bowser Is Mentioned For Mabee's Position

Ottawa, June 7:—It is stated here that Hon. W. J. Bowser, attorney-general of British Columbia, may have the chairmanship of the Railway Board, vacant since Judge Mabee's death, if he will accept. It is the general belief that the position should go to a western lawyer, in view of the large amount of railway construction in the west.

Vancouver, June 7:—It is the general opinion amongst the attorney-general's friends that he would refuse to accept the Railway Board chairmanship were it offered to him.

TRI-WEEKLY TRAINS TO SKEENA CROSSING

Through Trains will Run, but no Provision as yet for Hazelton Freight.

A special despatch to The Miner from A. E. McMaster, district agent of the Grand Trunk Pacific, announces that authority has been received to operate trains through to Skeena Crossing, and that a tri-weekly schedule has been arranged. Beginning tomorrow, through passenger trains will leave the Crossing at 12:30 noon on Tuesdays, Thursdays and Sundays, arriving in Prince Rupert at 8 p. m. on the same days. Trains will leave Prince Rupert for the Crossing at 11 a. m. on Mondays, Wednesdays and Saturdays.

The trains leaving the bridge on Thursdays and Sundays will connect direct with the steamers Prince George and Prince Rupert for Vancouver and Victoria.

Secretary DeVoin, of the Board of Trade, yesterday received a telegram from the Prince Rupert Board of Trade conveying the information that the Grand Trunk Pacific Railway is only accepting freight for Skeena Crossing when charges are prepaid and owners accept all risks, owing to the steamer Inlander not guaranteeing to accept or deliver freight. It is understood that the steamer has been chartered to take two carloads of freight each trip for Foley, Welch & Stewart. This practically precludes the prompt delivery of commercial freight.

It is hoped that the Hudson's Bay Company's steamer Port Simpson will return to the Skeena within a few days, in which case, if that boat can make the necessary arrangements for the transshipment of freight at the Crossing, the public may obtain the necessary service.

"Prince Of Ireland"

Dublin, June 3:—Dublin hopes soon to welcome the young Prince of Wales. It is expected that his younger brother will come with him and thereby hangs a tale which is tearing Irish society into shreds. It is understood that King George is discussing with some members of the cabinet the question of whether it would not be well to revive interest in the dynasty by creating a Prince of Ireland, the title to be born by the second son of each succeeding monarch, and to be held by such son after a change of reign until the next in line attains a certain age.

MUCH EVIDENCE HEARD IN HAZELTON STATION CASE

Galaxy of Legal Talent and Many Witnesses Testify Before Railway Board---Decision Reserved after Three-day Hearing---Strong Case for South Hazelton Townsite.

(Special to The Miner)

Ottawa. June 6:—The rehearing of the Hazelton townsite case before the Railway Board concluded today. Judgment was reserved. No intimation has been given as to the probable date of decision.

At today's session, Walker, a G. T. P. engineer, testified that it was quite possible to establish a station at South Hazelton, with proper curvatures and grades. Many stations in eastern Canada, he said, were no more favorably located, citing Renfrew as an example. The curve at South Hazelton could be straightened and the necessary grade maintained at an additional cost of $20,000. This evidence, based on topographical data, was introduced to offset the opinion expressed by Baird, an engineer who said a station could not be established at South Hazelton.

N. Gaucher, C. E., called by the Price interests, said it would probably cost $200,000 to straighten the curvatures and reduce the grades at South Hazelton. Walker, recalled, stated that, with the improvements he outlined, South Hazelton would be a desirable location. It would be better if the line were straightened. In reply to a question he stated that the G. T. P. had in recent years expended large sums in straightening such lines.

In argument, John Thompson, K. C., representing several mine-owners, said the location of the station at South Hazelton would increase the cost of the mineral output by four dollars a ton. James Smellie, for Robert Kelly, and Clive Pringle, who appeared for the settlers of Kispiox, both contended that a much larger community would be served by having the station located at New Hazelton. Both laid stress on the alleged engineering difficulties. For the people of Hazelton, F. G. T. Lucas upheld the opposite view. The older community, he maintained, would suffer much inconvenience and great financial loss if the station were not established at South Hazelton. The case for the G. T. P. was argued by Mr. Biggar.

W. D. Hogg appeared for Harold Price and other owners of Lot 150. Neil F. McKay, of Victoria, on behalf of Ellison people, said that townsite had been established in good faith. If a station could not be established there the people interested would strongly favor South Hazelton. Mr. Calder appeared for W. J. Sanders, one of the owners of the South Hazelton townsite. For the Methodist Mission, which owns the adjoining property, N. W. Rowell, leader of the Ontario opposition, explained that the interests he represented were not opposed to New Hazelton; but contended that, in the public interest, there should be a station at South Hazelton.

On Tuesday R. A. Pringle, counsel for the British Columbia government, summed up the case in a masterly argument. He stated that the province was not going to be mixed up in any townsite quarrel; but claimed that it was not the business of the Railway Board to adjudicate on an agreement between the railway and private individuals and which was not in the interests of the public. The province had placed its lots in South Hazelton on the market, never supposing that an order prohibiting a station at that point would be issued. The province was willing to leave the question of the public interest with the Board.

Palmer Clark, the first witness, owning land in new Hazelton, testified that G. U. Ryley had told him the station would be on lot 882. Boyd Affleck testified that New Hazelton was the best location. The question of navigation was then brought up by Mr. Rowell, who stated that the Bulkley was not navigable and that steamers could not run to New Hazelton. In reply to a question, Mr. Lucas explained how South Hazelton was located.

Vernor W. Smith, manager at New Hazelton for Foley, Welch & Stewart, testified that he had invested in New Hazelton on the strength of the fact that the railway had filed plans for a station there. He was interested in mines east of New Hazelton and believed the latter was the best shipping point. When the contractors undertook work on the next section of the railway they would probably move a hundred miles east of New Hazelton.

C. W. Peck said that when he first visited the district three years ago everybody said the station would be on lot 882. For 100 acres $102,000 had been paid by his company and surveys had since cost $20,000. Since the Board's order in favor of New Hazelton the company had sold lots to the value of $90,000. Previous to that date the sales had totalled $20,000.

H. S. Clements, M. P., said his firm became selling agents for New Hazelton on the understanding that there was to be a station there. When South Hazelton was put on the market he called on Chamberlin and Ryley and expressed the view that New Hazelton was the better site. He refused to allow his firm to sell another lot until after the Board's decision. He added that lots to the value of $265,000 had been sold, and that residents of the district, including Hazelton, had bought land to the value of $100,000. He declared that Hon. W. R. Ross had personally stated to him that if he had known the conditions he would not have put South Hazelton on the market. Cross-examined by Mr. Lucas, the witness said that he was not in Hazelton when the residents of the town decided in favor of South Hazelton, but maintained that when at Hazelton last fall a majority of the people he met favored New Hazelton.

Mr. Lucas presented copies of a petition from Hazelton and a resolution of the Board of Trade with a large number of affidavits from business men favoring South Hazelton.

On behalf of South Hazelton it was contended by expert witnesses that, accepting Affleck's figures as correct, a high level bridge for New Hazelton would cost $225,000; that a bridge at lot 150 would cost $60,000. and that the official estimate of the cost of a bridge at the South Hazelton site was $30,000.

There was a new development on Wednesday, when Harold Price appeared to assure the commissioners that lot 150, in which he is interested, was the logical location for a high-level bridge. He testified that the proposal to locate the station at New Hazelton was, before the Board's decision, regarded as a joke.

A long examination of W. P. Murray followed. He explained the position taken by the residents of Hazelton, and stated that those who had reserved lots in New Hazelton had done so only to protect themselves in the event that a station was not established at South Hazelton.

The hearing opened on Tuesday and continued through Wednesday and Thursday. The western member of the Board, A. S. Goodeve, did not sit, not having been a member of the Board when the case was first heard. Acting Chairman D'Arcy Scott and Commissioners Mills and McLean were present on Tuesday, the two former leaving in the evening for Nova Scotia. Commissioner McLean continued the case and heard the evidence and arguments, which will be considered in written form by the full board.

More Forest Fires

Heavy smoke along the Skeena indicates the starting of several bush fires west of Hazelton. The telephone line is down today.

Premier Is Coming About End of June

(Special to The Miner)

Vancouver, June 6:—Wm. Manson, M. L. A. for Skeena, who sailed tonight for Prince Rupert, stated that Hon. Richard McBride and Hon. W. J. Bowser will leave about the end of June for a visit to Prince Rupert and other northern points. Mr. Manson announced that Alan Waters, city engineer of Nanaimo, had been appointed by the provincial government as district engineer for Skeena, with headquarters at Prince Rupert.

WELCH ON HIS WAY TO INSPECT WORK HERE

Head of Contracting Firm Starts on Trip---Many Men Being Brought in.

(Special to The Miner)

Vancouver, June 4:—P. Welch, head of the firm of Foley, Welch and Stewart, who recently returned from a trip to the Yellowhead, sailed last night for Prince Rupert en route for Hazelton to inspect the progress of construction on the western section of the Grand Trunk Pacific Railway.

On his return here Mr. Welch, if time permits, will go over the route of the Pacific Great Eastern between North Vancouver and Lillooet, where two surveying parties are now engaged locating the line. His firm has entered into a contract with the provincial government to build a railway from North Vancouver to Fort George in a period of three years from July 1st next.

Over two hundred laborers are leaving Vancouver weekly for the scene of construction work on the Grand Trunk Pacific Railway. A large party of laborers and many horses will go north on tonight's boat for Prince Rupert.

ROAD CREWS BEGIN WORK

Many Men Now Engaged In Construction and Improvement of Highways.

CARR A SUPERINTENDENT

Popular Foreman Promoted To New Position—Takes Charge In South Bulkley and Lake Districts—Some of the Important Work Underway In Omineca

News has just been received of the appointment of W. J. Carr as superintendent of the new South Bulkley road district, comprising the country south and east of Telkwa, including the Francois and Ootsa lake districts. Mr. Carr has proved himself a competent road man, and there is no doubt he will make good in his new position. Superintendent Williscroft retains charge of the northern portion of the district which, as it includes some six hundred miles of roads and trails, is quite enough for one official.

The season's work on roads and trails has now begun in earnest. Many crews are now at work or on their way to the various parts of the district.

Ed Mullen, with fifteen men and sixteen packhorses loaded with supplies, is on his way to cut the new trail to Groundhog.

Hugh Gibson and his crew have started work on the Manson creek trail.

A party of twenty is already working on the main trunk road up the Bulkley.

Shel. Robinson has gone to North Francois to superintend the completion of the wagon road from Burns Lake to Francois.

W. R. Ellison, in charge at Ootsa Lake, has taken in supplies for the season.

A. Blayney, foreman on the South Francois road, who also has the Pleasant Valley-Francois Lake road in his charge, is preparing an outfit for the season's work,

Work has begun on the Kitseseguecla road.

T. G. Johnson, with a small crew, is making a road on the west side of the Skeena.

T. W. Brewer is continuing work on the road to the Ninemile mountain mines.

Other roads and trails will be constructed and improved as soon as crews can be organized and supplies obtained.

Marvelous Coal Showing

On Wednesday, F. B. Chettleburgh, who is in charge of development work on the Groundhog properties of the Canadian Mining Operators and Associates, arrived in town, to meet Amos Godfrey, who is a director of the company, and who is now on his way to Hazelton, in company with a party of engineers who are going in to examine the coal areas controlled by the Operators.

Since going in to Groundhog early in the spring, Mr. Chettleburgh has been engaged in cutting trails, building camps, and locating the many showings of anthracite on the company's properties. He declares the district watered by Moss creek and its branches to be most promising from a coal mining point of view, and is particularly pleased with the showings to be seen from Falconer creek west to the Jackson properties. His people control eighty sections of coal land, which bids fair to prove extremely valuable.

Mr. Chettleburgh joins with others who have investigated the field in stating that it is marvelous in its extent and in the high quality of the coal.

The Omineca Miner

PUBLISHED EVERY SATURDAY AT HAZELTON, THE CENTER OF THE GREAT OMINECA DISTRICT OF BRITISH COLUMBIA.

Macdonald & Rauk, Publishers and Proprietors.

SUBSCRIPTION RATES: Canada and British Possessions, Two Dollars a year; Foreign, Three Dollars a year.

ADVERTISING RATES: Display, $1.50 per inch per month; Reading Notices, 15 cents per line for first insertion, 10 cents per line for each subsequent nsertion. Legal notices inserted at B. C. Gazette rates.

VOL. I. SATURDAY, JUNE 8, 1912. No. 41.

Throughout Omineca district development of natural resources has received increased impetus through the virtual elimination of the uncertainty of river traffic by the completion of the railway to Skeena Crossing. While through traffic is not yet well organized, there is assurance that from this time forward supplies will be at all times available and that freight rates to Hazelton will be lower than ever before. With this improvement in conditions those who are exploring this great country and exploiting its resources have taken hold with renewed energy, and reports from every section indicate that the season of 1912 will see a greater advance in prosperity and development than any year in the past.

The agriculturists of our central areas are prospering exceedingly, finding a ready market and high prices for everything they can produce; our silver-lead and copper mines are being developed to the shipping stage, and from the immense coal fields of the Groundhog district come numerous reports confirming the optimistic predictions of the experts whose statements regarding the extent and value of the deposits have created such wide comment. In newer sections, prospectors are uncovering veins of ore which will, in time, add greatly to the importance of Omineca as a mineral-producing district, while the companies and individual miners who are taking part in the revival of placer mining in the Omineca river camps are assured of a very profitable season.

From now on Omineca will make steady and rapid progress towards the era of prosperity to which every resident of the district looks forward.

Advocates Another Wire

Serious complaints in regard to the telegraph service from Ashcroft, especially along the Cariboo road to Quesnel and Fort George, have reached this office, says the Ashcroft Journal, and we have been requested to bring the matter to the attention of the Dominion government for their consideration. Business men who are actively engaged in this section have lost considerable money and business through the lack of either wires or operators to handle with promptitude important telegrams which should be transmitted with the least possible delay. The people who have invested considerable capital in building up business, not only in their own interests but in the interests of the country generally, should be treated with every consideration and if the facilities for the handling of the telegraph business are inadequate the government should meet the business requirements or place the service in the hands of a private concern who would keep up with the increasing tide of commerce. The amount of traffic between this place and the northern interior has greatly increased during the last few years but the telegraph facillties are exactly the same and no effort is apparent either to increase the number of wires or the interest in the service in regard to the remuneration paid to those who look after these essential adjuncts for the up-building of the country. We are inclined to believe that the lack of facilities is due to the timidity of those who can, (if they wish,) easily point out to the government the needed extension of telegraphic facilities and something done to keep in line with the progress of our fast developing country.

The increase in the telegraph business must have completely choked the wires and serious delays are unavoidable since the night letter rate came into force. What is required, and it is of the utmost importance to the whole country, is another wire, strung from Quesnel to Hazelton, with a gevernment branch to Fort George, this extra wire would then be only barely sufficient to give the service required. We are quite aware of the nature of the country between Ashcroft and Hazelton and that is all the more reason why a second wire should be installed at once to keep up a continuous service and handle the business properly.

The Missed Hole Problem

Machine men in various parts of the province are taking up the important topic of missed holes and how to avoid them, and many suggestions how to avoid accidents are being made.

Eight hours constitute a shift and most mining is carried on now by three such shifts in the 24 hours. One of these shifts, going to work at their proper time, find the place where they are working clear, and drill a certain number of holes, and the next shift completes the work of putting in the requisite quota of holes. In some places the same shift not only charges and fires the holes they have drilled but also the holes drilled by the previous shift. Before charging the holes, the tamping stick is placed in the hole to determine the depth and angle they are drilled in order to decide how many sticks of powder each hole requires. The men who do this are obviously the only ones who know the exact location of each hole, its depth, the amount of powder in each, and the amount of tamping placed on top of the powder. Suppose one of the holes missed fire, and all laws and the company's regulations are complied with, the next shift is fully aware of a missed hole, but they can only have a faint idea of its exact location or its angle, and are quite ignorant of the amount of powder and tamping used, so very often drilling is begun without a diligent search being made, the result sometimes being fatal.

The remedy suggested, is that the only person to search for missed holes should be those who charged and fired the same.

In the Rossland camp, where regular blasters are employed, the system is somewhat different from that in vogue in other parts and there are not many serious accidents, but the suggestion seems to be a happy one and should be the means of reducing accidents in those districts where they are fairly numerous.

LAND NOTICES

Omineca Land District. District of Coast, Range V.

Take notice that Jasper M. Riddle of Bellingham, Wash., contractor, intends to apply for permission to purchase the following described lands.

Commencing at a post planted at the southwest corner of lot 4246, and marked J. M. R., S.E. corner, thence north 40 chains, west 40 chains, south 40 chains, more or less, to Nadina river, thence east following Nadina river to point of commencement, containing 160 acres more or less.

April 5, 1912. Jasper M. Riddle.
42 M. C. Wanlich; agent.

Omineca Land District. District of Coast, Range V.

Take notice that Swan Hawkins of Bellingham, Wn., contractor, intends to apply for permission to purchase the following described lands.

Commencing at a post planted about 1 1-2 miles west of the head of Francois lake, at the southwest corner of ungazetted lot 4245, thence north 40 chains, west 40 chains, south 40 chains more or less to Nadina river, thence east following river to point of commencement, containing 160 acres more or less.

April 5, 1912. Swan Hawkins.
42 M. C. Wanlich, agent.

Omineca Land District. District of Coast, Range V.

Take notice that Swan Pearson of Bellingham, Wash., railway contractor, intends to apply for permission to purchase the following described lands:

Commencing at a post planted about two miles west of the head of Francois lake, at the southwest corner of ungazetted lot 4244, thence north 80 chains, west 80 chains, south 80 chains, more or less to Nadina river, thence east following river to point of commencement. containing 640 acres more or less.

April 5, 1912. Swan Pearson.
42 M. C. Wanlich, agent.

Omineca Land District. District of Coast, Range V.

Take notice that John Matson of Bellingham, Wn., painter, intends to apply for permission to purchase the following described lands:

Commencing at a post planted about 3 miles west of the head of Francois lake, at the southwest corner of un gazetted lot 4243, thence north 40 chains, west 40 chains, south 40 chains, more or less to Nadina river, thence east following river to point of commencement, containing 160 acres more or less.

April 5, 1912. John Matson.
42 M. C. Wanlich, agent.

Omineca Land District. District of Coast, Range IV.

Take notice that Sarah E. Olslager of Bellingham, Wn., married woman, intends to apply for permission to purchase the following described lands:

Commencing at a post planted at the northwest corner of lot 1630, thence south 40 chains, west 40 chains, north 40 chains, more or less to Nadina river, thence east following river to point of commencement, containing 160 acres more or less.

April 5, 1912. Sarah E. Olslager.
42 M. C. Wanlich, agent.

Omineca Land District. District of Cassiar.

Take notice that Marcel Varicle of Seattle, Wn., dentist, intends to apply for permission to purchase the following described lands:

Commencing at a post planted at the southeast corner of lot 2172, thence east 80 chains, south 80 chains, west 70 chains more or less to north bank of Bulkley river, thence following north bank of Bulkley river northwesterly 10 chains more or less, thence north 80 chains more or less to point of commencement, containing 640 acres more or less.

April 9, 1912. 42 Marcel Varicle.

Omineca Land District. District of Cassiar.

Take notice that Wilbert Elliott Brewer of Hazelton, B. C., laborer, intends to apply for permission to purchase the following described lands.

Commencing at a post planted on north bank of Bulkley river about 80 chains west of the southwest corner of lot 1066, thence 80 chains north, 80 chains east to west bank of Bear river, thence following west bank of Bear river 80 chains more or less to north bank of Bulkley river, thence following north bank of Bulkley river 60 chains more or less to point of commencement, containing 500 acres more or less.

Wilbert Elliott Brewer.
April 3, 1912. 42

Omineca Land District. District of Cassiar.

Take notice that Alex. Morales of Anaheim, California, prospector, intends to apply for permission to purchase the following described lands:

Commencing at a post planted three miles north and one-half mile west of the northeast corner of lot 1062, thence north 80 chains, west 80 chains, south 80 chains, east 80 chains to point of commencement, containing 640 acres more or less. Alex Morales.
April 9, 1912 43

Omineca Land District. District of Cassiar.

Take notice that Antonia Friend of Anaheim, Calif., married woman, intends to apply for permission to purchase the following described lands:

Commencing at a post planted 3 miles north and 1-2 mile west of the northeast corner of lot 1062, thence north eighty chains, east eighty chains, south eighty chains, west eighty chains to point of commencement, containing 640 acres more or less.

April 9, 1912 43 Antonia Friend.

Omineca Land District. District of Cassiar.

Take notice that Frank A. Jackson of Hazelton, miner, intends to apply for permission to purchase the following described lands;

Commencing at a post planted on the east bank of the Skeena river, about 1 mile northerly from the junction of Bear river, thence east 80 chains, south 80 chains, west 80 chains, more or less, to Skeena river, north 80 chains, more or less following bank of Skeena river to point of commencement, containing 640 acres more or less.

SERVES UNCLE SAM RIGHT

Roycroft Sage, In Epigrammatic Article, Gives His View of Relations Between Canada and United States—Annexation Talk Was Insulting To Dominion.

A rather interesting American comment on the reciprocity issue is the following, from a recent article by Elbert Hubbard:

Emerson says that the honest person cannot accept a favor without giving one.

Gifts not backed up by the proper spirit are insults.

We want love, but only on certain terms.

Reciprocity, when it is reciprocal, is beautiful. But reciprocity passed out with a guffaw or a grouch we decline. Reciprocity is a matter of spirit. Reciprocity cannot be voted in any more than virtue can be a matter of legislation, of edict, mandate, injunction and interdict.

Canada voted against reciprocity, if the papers have correctly informed us. Also, the overwhelming vote against reciprocity was a surprise to both Liberals and Conservatives, Also, it was a surprise and a shock to the United States of America.

For twenty years Canada had been suggesting reciprocity with us. McKinley scorned the thought. In fact, the whole District of Columbia did the same, and all the time population in our cities was increasing faster than in the rural districts.

Twenty-five years ago half of our population were farmers. It is not so now. The population of Iowa, for instance—the greatest farming state in the Union, that is, the state with the least amount of waste land—has decreased in population during the last decade.

Illinois shows an increase of a million people, but this increase is all in the cities and towns, and especially in the city of Chicago.

Food is the primal need. We dig our sustenance out of the soil. Cities have to be fed by and through the efforts of the people who live in the country. This is a fact so patent that it seems foolish to say it, and yet wise people very often know everything but the obvious.

High prices of living are owing to this steady increase in city population.

And so it comes about that we need Canada's farm-products to feed our people.

Pinched by the growing and increasing prices of foodstuffs, shocked at our grocery bills, grieved at the independence of the grangers, and the American buckwheat ceasing to be a joke, we suddenly look to Canada for relief and offer her the reciprocity she has been offering us.

In the meantime, Canada has found a market elsewhere for her growing things. She has awakened a distinctly national spirit. Moreover, her values have vastly increased and the tide of empire has turned in her direction. The world has not only discovered Canada, but Canada has looked out of the window and discovered herself.

Love from a discarded suitor, who wears his derby over one eye and neglects to remove his cigar when he approaches, is not a gracious figure, especially when he comes from Missouri, his flag a-fluttering in the breeze, and on his banner the slogan, "Show Me!"

A becoming curiosity is always beautiful. A desire to learn is most excellent, but the attitude de of asking to be shown should be balanced with a desire and ability to show. And so Canada replied to Colonel Missouri with a shibboleth of her own to this effect, "I'll Show You!" and she did.

The question of economics was not even remotely considered.

Material prosperity is beautiful but it must come only on certain terms.

Sentiment speaks louder than soup, especially if you are not hungry.

We should have talked reciprocity with Canada soft and low, in the moonlight, years and years ago.

Even the Scotch turned reciprocity down good and hard.

The word "annexation" is always an insulting word. No individual wants to be annexed. We want to give ourselves, not to be grabbed.

The Romans annexed the Sabines—and everyone else. In fact, the wealth of Rome came through exploitation and annexation.

Nowadays, no gentleman wants to annex anybody unless the other party is perfectly willing.

The talk about annexing Canada was an absolute insult—if it were not silly—because Canada is supposed to be the weaker party, and for a country of a hundred million people to annex a country of ten million people, without even saying by your leave, comes with a slam and a bang and a biff.

The man who used the word annexation, even as a joke, lacked humor. Humor implies a certain knowledge of psychology. When this joker followed up his joke with remarks to the effect that the Stars and Stripes would soon be unfurled over Parliament House in Ottawa, he caused a revulsion to spread through the Dominion, and the Conservative party were not slow in making use of the turn things took. * * *

It will not do to say a majority of the people of the States sympathized with this talk of annexation, but we were too slow in condemning it. But the sentiment swept on and tinted the Canadian Zeitgist, and naturally, and very properly, Canada declined the soft impeachment.

The rebuke was coming to us. In one sense, it did not come through the Canadian people; it was a part of the great law of compensation. When we passed retaliatory laws against Canada, issuing a prohibitory tariff because Canada kept our property that reached the Dominion by the Underground route, we built a Spite Fence,

And every Spite Fence has a line of spikes on top. In the course of time the builder of this Spite Fence is surely going to find it necessary to climb over, and when he does, God and Destiny can't keep his trousers from getting ripped. Uncle Sam got caught on the Spite Fence that he built.

Quebec Still Liberal

The Quebec provincial elections resulted in the return of the Gouin government by an increased majority over that which it had in the last house, By the redistribution act passed at the last session of the legislature, seven new seats were added, and while the opposition captured two of these it lost two others, thus making the net gain in the Liberal majority in the new house seven. All of the members of the cabinet were re-elected, the only one to suffer defeat being the Hon. Chas. Devlin in Temiskamingue. Mr. Devlin was, however, successful in Nicolett county. Premier Gouin was elected by a large majority in both Port Neuf and St. Johns.

"Selling your home to buy an automobile. What will you do without a home?"

"Won't need none after I git the auto: wouldn't never be there anyhow."

Canada's Legal Standard

Canadian bushel standards are set by the Inspection and Sale Act, administered by the Dominion Department of Trade and Commerce. This act specifies that "In contracts for the sale and delivery of any of the undermentioned articles the bushel shall be determined by weighing unless a bushel by measure is specially agreed upon, and the weight equivalent to a bushel shall (except as specially provided) be as follows: Barley, 48 pounds; buckwheat, 48; flaxseed, 56; Indian corn, 56; oats, 34; peas, 60; rye, 56: wheat, 60; beans, 60; beets, 60; bituminous coal 70; bluegrass seed, 14, carrots, 60; castor beans, 40; clover seed, 60; hempseed, 44; lime, 70; malt, 36; onions, 50; parsnips, 60; potatoes, 60: timothy seed, 48; turnips, 60 pounds.

A legalized bushel weight has been established by the United States Government (mainly for customs purposes) for but few agricultural products as follows: Barley, 48 pounds; castor beans (shelled), 50; buckwheat, 42; corn (shelled), 56; corn meal, 48; flaxseed (linseed), 56; oats, 32; peas, 60; potatoes, 60; rye, 56; wheat, 60 pounds.

Forestry Plans

Victoria, June 3--Overton Price, who is working out a plan for the reorganization of the forestry branch of the British Columbia lands department, has about completed his work. The labor of conserving the forests will be divided into four sub-departments. The office of operation will have for its primary object the protection of timber areas from fire. The matter of timber inspection will be in the hands of the forest management, which will also look after and prevent unnecessary destruction, reforestation and the more complete utilization of forest material through the development of commercial by-products.

The office of forest survey will endeavor as early as possible to establish a sound knowledge of the extent, character and condition of all forest areas in the province.

The office of records will endeavor to keep the field force supplied with knowledge of the results accruing through the application of the system.

R. E. Benedict will be chief of operation, John Lafon will have charge of the office of forest management, Allerdale Grainger will be chief of the office of records, and H. K. Robinson will have charge of the office of forest surveys.

Immigration Figures

Ottowa, June 3,—The department of the interior, through the immigration branch, has prepared a complete report on the year's immigration classified under the vatious heads, The report is now in the press, and will be shortly ready for distribution. It covers the fiscal year ending March 31st last, and shows immigration of the year to have been made up of 138,121 British, 133,710 United States, and 82,406 from other countries, a total of 354,237.

It is estimated that 20 per cent. British, 40 per cent. American and 31 per cent. continental immigrants became homesteaders in Western Canada. The list by nationalities shows that the new citizens were drawn from the far and out of the way corners of the earth and from every continent. There were 977 rejections at ocean ports and 220 from the U. S. Trachoma and a lack of funds were among the principal causes. There were 950 deportations. Of these 248 were from Ontario, the largest number from any one province.

The American homesteaders outnumbered the British by nearly two to one. the figures being 5,730 and 10,976. Those who came in through ocean ports included 72,828 farmers, 61,752 laborers, 24,133 mechanics and 18,390 domestics. From the United States there came 59,560 farmers, 44,777 general laborers and 10,795 mechanics.

Millions for Charity

Sydney, N. S. W., June 3:—The widow of the late Walter Hall, the Mount Morgan mine owner, of the estate of ten million dollars left to her, has donated five millions to Australian charities.

The doctor told him he needed carbohydrates, proteids, and above all, something nitrogenous. The doctor mentioned a long list of foods for him to eat. He staggered out and wabbled into a Penn avenue restaurant.

"How about beefsteak?" he asked the waiter. "Is that nitrogenous?"

The waiter didn't know,

"Are fried potatoes rich in carbohydrates or not?"

The waiter couldn't say.

"Well, I'll fix it," declared the poor man in despair. "Bring me a large plate of hash."

"Are you looking for work?"

"No, sir; I'm looking for money, but I'm willing to work because that's the only way I can get it."

Said one man on the street, speaking to a friend:

"Well, money talks,"

"Maybe it does," answered the other, "but all it ever said to me was 'Good-by.' "

A gentleman who was once stopt by an old man begging replied, "Don't you know, my man, that fortune knocks once at every man's door?"

"Yes," said the old man, "he knocked at my door once, but I was out, and ever since then he has sent his daughter."

"His daughter?" replied the gentleman, "What do you mean?"

"Why, Miss Fortune."

April 8, 1912.

Belgium's School Problem

Brussels, June 3:—The parliamentary elections yesterday throughout Belgium were of special importance as the final chapter in the long struggle between the clericals—the government party—and the Liberal-Socialist combination over the school question. The clericals have been in power uninterruptedly for 28 years, but their majority in the outgoing chamber has dwindled to six.

Although official returns have not been announced, the figures available appear to give the advantage to the clericals, who desire to place free denominational schools on an equality with state public schools, where no religion is taught. This has been fiercely opposed by the Liberals and Socialists and the campaign turned entirely on this question.

Disturbances occurred in several parts of the city. Rioters broke windows in the Catholic club and the police charged repeatedly, firing in the air. The mob was dispersed by the use of a fire hose. Several persons were injured.

Disorders also occured at Ghent and more serious rioting is feared tomorrow. The government has mobilized troops and gendarmerie and has called on three sections of the reserves, numbering three thousand men.

International Amity

Canada's friendship for the United States was reaffirmed in a telegram which Premier Borden has sent to the London Times for use on Empire Day. He said:

"As neighbors and kinsmen, we desire an enduring friendship with the American people, being ever-conscious of the obligation which rests on us to be wise and temperate in our international dealings and pre-eminently to maintain and strengthen as far as we have opportunity the good relations between the mother country and the republic.

"Rivalry in trade there must be; international differences there may be, but these only illustrate the vitality and energy of a free people and the endeavor alike of Canadians and Americans to increase their industrial efficiency and improve human conditions."

The Dockers' Strike

London, June 3:—The dockers' union has decided to start strike pay, but beyond this announcement there was no development in the dock strike.

The unrest in the railway world is illustrated by a demonstration today in Hyde park, in which 20,000 railroad workers participated as a protest against the Central London railway dismissing men because they engaged in trade union organization work.

This meeting merely adopted a resolution of protest, but a strong feeling was displayed in favor of a general strike.

People Against Rebels

Navojoa, Mexico, June 3:—The people of the border of western Chihuahua and eastern Sonora have risen against the rebel leader Orozoco. The people of Morris have taken Ocampo from the rebels, killing five and obtaining considerable arms and ammunition.

The prefect at Morris wired here today that the whole country side is against Orozoco and that troops have started from Chinipas and Guazupares to take Batopilas. Orozoco formerly lived in this mountain district.

Vancouver, June 3:—The recent robbery of an "aristocratic" gambling game in Winnipeg, was emulated in Vancouver just before midnight on Friday, when two masked men stuck up a game that was running upstairs at No. 19 Cordova street west. Twelve thousand dollars were cleaned up by the Winnipeg robbers, but in Vancouver the gunmen had to be content with a little less than an even thousand.

Local and Personal

Hunter Corner is on his way to Groundhog.

W. J. O'Neill is in from Telkwa on a business visit.

Harry Marment, of Francois lake, is in town on business.

Mrs. C. Miller has gone to Telkwa to open a laundry.

Mrs. F. A. Dewar returned on Tuesday from a visit to Telkwa.

Miss Clive will open a cleaning and pressing establishment at Telkwa.

A successful dance was held in the auditorium on Thursday evening.

Roy Moseley returned on Wednesday from a trip to Groundhog mountain.

David Irons and Alex. Thomson, of South Francois, came in for supplies.

Mrs. Ed. Lambert, of Spokane, with two children, registered at the Ingineca on Tuesday.

S. F. Calkins, the newly appointed Dominion constable for this district, has entered upon his duties.

Miss Wessell of Kispiox, who is suffering from neuralgia, was brought to town on Tuesday for medical treatment.

A party under the guidance of N. D. McMillan started for the Babine district on Thursday to inspect agricultural areas.

Walter Harper came up from Prince Rupert on Tuesday and proceeded to Aldermere, where he will join the Broughton & McNeil staff.

C. B. Clark, the mining operator, accompanied by Dr. J. Morgan Clement, M. E., went to Telkwa on Wednesday to examine the Dominion group.

The question of a telegraph line into the Groundhog district is receiving consideration at the hands of the government telegraph authorities.

"Paddy" McEwen has gone to Telkwa to assume the duties of steward at the New Telkwa hotel. He will be an acquisition to the Valley town.

Mr. and Mrs. Dan Harris, of Vancouver, are expected to come to Hazelton shortly, to spend the summer with their sons, the well-known Harris brothers.

Steve Slinger returned on Tuesday from a business trip to Vancouver. He has acquired a fruit farm in the Cowichan district, but is not yet ready to leave Hazelton.

Drysdale Ogilvie has gone to Hudson's Bay mountain, to superintend the season's work on the Coronado group, the notable mining property owned by R. J. McDonell and associates.

Dr. Ewing, superintendent of the medical staff on G. T. P. construction, was here during the week. He will make his headquarters at Sealey for the present, and will soon be joined by Mrs. Ewing.

A safe weighing three tons, destined for the Telkwa branch of the Union Bank, arrived on the Inlander on Tuesday. There was also a smaller safe for the New Hazelton branch.

P. Vibert, known here as a popular and efficient inspector for the Union Bank, has received the appointment of manager at Vancouver and superintendent of British Columbia Branches, in succession to the late Thos. McCaffery, who was lost on the Titanic.

Two drives of beef cattle, aggregating 750 head, are on the trail from Cariboo to Hazelton, and are expected to arrive about July 1. P. Burns & Co., who are bringing them in, expect to handle a total of 2000 head this year. Most of the cattle will be distributed where required in the valley, enough to supply Hazelton and vicinity being brought to Mission Point.

Frank Martin and W. S. Sargent have just returned from a trip to Groundhog, having been gone a month. They report having gone in over a new route from Kiskegas by way of the Secundine pass to the Slamgees, cutting off the big bend in the Skeena. The route, they say, is perfectly feasible for a trail, with plenty of horse feed. It is also likely to prove practicable as a railway route. The country, according to the explorers, gives great promise of being rich in minerals. From a point ten miles below Jackson's camp they returned to the mouth of the Slamgees on a raft, having a rather exciting experience.

The Inlander arrived from Vanarsdol on Tuesday, with 43 through passengers.

W. E. Blake, fire warden for the Lake District, is in town on departmental business.

G. W. Spinning, of the Babine hatchery, returned on Tuesday from a visit to the coast.

W. W. Kerr has begun carrying the Aldermere mail, under the contract recently awarded him.

Johnson's pack train of 22 animals is taking freight to Broughton & McNeil's Chicken Lake store.

J. R. Martin, government timber inspector, was among the passengers from the coast on Tuesday's Inlander.

Morgan O'Brian, well known in the Bulkley valley, is now the proprietor of the Mount Baker Hotel in Sumas, Washington.

H. H. Little was the gold badge winner at the rifle ranges last week, Dr. Wrinch being the present wearer of the silver badge.

The oldest veteran of the Omineca River to go in from Hazelton this year is Charles McKinnon, who left on Thursday for his summer's work.

Mrs. and Miss Blayney arrived from Bella Coola on Tuesday and left this morning for Francois Lake, where Mr. Blayney has a large ranch.

Mrs. A. B. Miller, of Oakland, Cal., arrived on Tuesday's Inlander for an extended visit with her son, R. O. Miller, proprietor of Hazelton Bakery.

W. J. Lynch, accountant at Sargent's, returned on Tuesday from Seattle, accompanied by Mrs. Lynch and their little son. They have taken up their residence in Hazelton.

In the Pemberton tunnel on the Rocher de Boule upper vein, a winze is being sunk, 300 feet east of the shaft. The vein at this point, as in the shaft, carries a large body of good ore.

E. E. Barnum, E. C. Townsend, John Randall and J. W. Randall arrived yesterday from Vancouver, via the telegraph trail. Mr. Barnum, who is now paying his second visit to the district, told The Miner that the party, which left Vancouver on May 12, had travelled through the Ootsa and Francois lake district on their way to Hazelton, and had been much impressed with the appearance of the country, in which vegetation was well advanced and everything looked good. Many settlers are going into the district, the party having met a large number of outfits on the trail.

St. Peter's Vestry

A Vestry meeting of St. Peter's church was held in the mission school room on Tuesday evening at 8 o'clock, Rev. J. Field presiding. Miss Soal, the Hazelton representative at the meeting of the Diocesan Synod held at Prince Rupert last summer, presented a most interesting and instructive report of the proceedings at the meeting of the Synod.

R. S. Sargent, the Rector's Church Warden for the year past then read the financial statement of St. Peter's church for the year ending December 31, 1911.

Rev. Mr. Field then made a few remarks on the most satisfactory statement and explained what the mission fund of the diocese was, saying that it was a fund for the upkeep of the new missions started throughout the district.

Regret was expressed by the meeting that Mr. Sargent resigned the position of Church Warden, a position he has held since the church was built.

E. H. Hicks Beach was elected as the the people's Church Warden for the ensuing year, with A. C. Aldous, E. Price, G. O. Graham and Charles Hicks Beach as sidesmen.

Miss Soal was unanimously chosen as the representative to the Diocesan Synod.

The Omineca Photographic Co. has just received a consignment of up-to-date post card cameras.

Willis, the blacksmith, has received a consignment of seat springs, chains, hardwoods of all kinds, and other requisites for wagon-making and repairing. He is also prepared to supply blacksmith coal, horseshoes and nails.

No Matter

what your requirements may be, in any department of merchandise, they can be filled at Sargent's Big Store. The business of the last few weeks has been a severe test of commercial capacity for Hazelton stores and Sargent's points with pride to the fact that, notwithstanding the impossibility of obtaining new stock, the store's many customers have suffered a minimum of inconvenience. Large orders for supplies from all parts of the district have made serious inroads upon our stock, however, and the announcement that the railway is to operate regular trains, bringing passengers and freight to Skeena Crossing is welcomed as affording an opportunity for replenishing our departments. Within a few days we hope to display our usual great variety of merchandise. In the meantime, you will still find every necessity here for Prospector, Miner, Surveyor or Rancher.

Our years of experience in supplying outfits for all purposes and for every part of this great district enable us to supply your wants in a manner entirely satisfactory. Remember, we make a specialty of packing supplies for shipment by wagon or pack train, ensuring receipt of goods in satisfactory condition.
