Citizens Ate Fish And Meditated On Future Of Industry

British Will Keep Hammering All Winter At Germans

Prince Rupert Should Look Well To Holding Fishing Industry

Yesterday the citizens of Prince Rupert, to the number of about eighty, gathered at the Central Hotel and enjoyed a "fish luncheon" served by Mr. and Mrs. Black. The menu was practically confined to fish, and was served in excellent form. The luncheon was arranged for by the Board of Trade, and following the meal T. H. Johnson, Manager of the Canadian Fish & Cold Storage Company, addressed the gathering.

Mr. Johnson referred to the fact that the fish dinner was provided at the request of the Fish Association. He admonished them to eat fish every Tuesday and every Friday.

Prince Rupert had the title of being the home of the fishing industry on the Pacific coast. To retain that title they must give service in all ways as to transportation. The industry in Prince Rupert had not been stolen. It was secured by better service and by the geographical position of the city. It spoke well for the men who foresaw this in establishing Prince Rupert. The fact that so many American fishermen were coming here showed that there was better service here.

He believed that after the war prices would again become normal. They must look well to the quality so that the trade might be held. The fish should come in in good condition, be packed well and shipped in good shape. The chain between the fisherman and the house wife in the east must be kept unbroken.

The railway company was very essential. The raliway had a keynote, "safety first." He did not know whether this refered to the public or to the railway. He thought it should be "service first," for that implied safety to the public. It cost $2 to deliver 100 pounds of fish from Prince Rupert to Montreal. This included all the cost of boxing, etc. It cost 65 cents to take 100 pounds of copper over the same route. This was important when it came, as it would soon come to a question of delivering ground fish with which these rates abounded. These matters would have to be adjusted.

Dealing with the Government end, he advocated the experimenting in transferring haddock spawn from the Atlantic to the Pacific. It was a most valuable fish and this should be done. The United States Government had done this in the matter of shad, and this year Pacific shad had been shipped east.

He advocated more frequent fish luncheons like this.

Following the address a vote of thanks was moved by Mayor McCaffery, seconded by G. A. Woodland, Vice-President of the Board of Trade, in which thanks were conveyed to the speaker and to Mr. and Mrs. Black.

G. L. Nickerson, the President of the Board, who is now in the city for a few days only, in putting the vote to the gathering, laid stress upon the importance of the fishing industry as far as Prince Rupert was concerned. He said there should be united action by the citizens in such a matter. They had shown this at one time previous and had got good results. He was sorry that they were not more united now. Mr. Nickerson said one of the best ways to show faith in the industry, as it affected the city, was to put money into it. He could, from experience, speak well of the results of investing in a fishing boat. It had given the best returns he had got in Prince Rupert. If the people of Prince Rupert would but invest in fishing boats the question of the foreign owned vessels would soon pass, for all the new boats would be Canadian and would control the business done into the port.

The gathering dispersed after singing "God Save the King."

ROAD TO SOUTH FORK OF TELKWA

JEFFERSON AND DOCKRILL HAVE BIG GANG OF MEN AT WORK IN INTERIOR

Will Take Compressor Plant In Over Snow This Winter.

Jefferson & Dockrill have over sixty men working on the snow road to the Santa Maria mine, and every effort is being made to get it through before the snow flies, says The Omineca Herald. This will be a trunk road for sixteen miles up the Telkwa and for fourteen miles up the south fork of the same river. It will open up a good country. As soon as the road is finished a compressor plant and hoist and other machinery will be taken in, so that the property can be worked on a big scale this winter.

The Santa Maria is not a big property but it is high grade copper and there are seventy-five tons on the dump now. With the machinery in operation the ore can be taken out fast enough to keep every available horse in the district busy hauling, and that is Mr. Dockrill's intention.

The road now being constructed will also be of service to the coal properties which are likely to be opened up next spring.

New and permanent camps are being built at the mine and the outlook for a busy season is very bright.

BRITISH WILL KEEP HAMMERING ENEMY UNCEASINGLY

Whatever may be the developments of the next few weeks, one thing which most impressed The New York World correspondent in the four days' visit he made to the British front is the complete readiness of the colossal British war machine in France to meet the rigors of a third winter there.

The Germans argue that cold weather will stem the Anglo-British attacks in the west, thus giving the Germans opportunity to dig in for the winter, but the slogan of the British army is: "Hammer the Germans, and hammer them unceasingly."

Bad weather may hinder certain operations, but the shell heaps in France indicate no decrease in the straffing. There is an ominous steadiness about on other parts than in the Somme sector even now. In the zone adjacent to the fighting line, especially in the Somme sector, it looks as if the British army had no idea of settling down now; they have got Germany going, and the British soldier is absolutely convinced of the magnificent organization back of him.

CANADIANS HAD PART IN TANKS

IT IS BROUGHT TO LIGHT THAT THEY ARE AMONG CLAIMANTS FOR INVENTION

Suggestions Seem To Have Been Made A Little Too Late.

Montreal, Oct. 31.—Among the several claimants for the credit of the invention of the tanks used in the Somme offensive are two Canadians. One is Pte. T. Hughes Cuddy of Winnipeg, who has been in charge of the X-ray installation at the Kenneth Camerons Hospital. Cuddy today showed the correspondent of the Gazette his diagrams and correspondence with the war office, which shows that toward the end of 1915 he submitted designs which were seriously considered, but the idea was apparently later than the invention which was accepted by the war office. The foregoing was a cable message to the Gazette, from its correspondent in London. The dispatch went on:

"Another claimant, according to the News of the World, is an unnamed Scottish Canadian in the R. N. V. R., who submitted designs in January, 1915. This journal suggests that these plans were the real basis of the experiments which were ultimately successful."

BATTLE FLUCTUATES ON SOMME FRONT TO SOME EXTENT

Paris, Oct. 31.—In the northern section of the Somme front the French and British have advanced in the regions around Morval and Sailly Saillisel, where they have captured sixty German prisoners.

Gained Some Ground.

London, Oct. 31.—On the Somme front, where they have received fresh supplies of big guns and strong reinforcements, the Germans have launched a yigorous attack and have succeeded in regaining portions of their former trenches from the French. Four hundred and twelve French soldiers were taken prisoners in the attack.

INDIAN AGENT HAS MOVED OFFICE TO PRINCE RUPERT

C. C. Perry, Indian Agent in this district, has moved his office into Prince Rupert. He has hitherto lived on the reserve at Metlakatla and conducted his business from there. This was found very inconvenient at times and it was felt advisable to have him in the city, within reach of the telegraph and mails.

He has opened an office in the Federal Building and will take up his residence in Prince Rupert.

ALLIES REPORTED TO HAVE TURNED ON VON MACKENZEN

Petrograd, Oct. 31.—According to a correspondent at Odessa, the Russians, Rumanians and Serbians on the Dobrudja front have assumed the offensive against Von Mackenzen's forces.

New Vein Struck On Cassiar Queen Property Near Telkwa

WILL SEEK CAPITAL TO DEVELOP COAL AT SEATON

James Wright, of the coal company that is opening up a seam at Seaton, on the line of the G. T. P., is said to have decided to go east to interest capital in the project. The work, it is estimated, will take several thousand dollars to get to a producing stage.

Mr. Wright has great confidence in the coal, and has now prospects of getting the capital to put it on a producing basis.

DAUGHTERS OF EMPIRE HOLD MASQUERADE

Despite Unfavorable Weather Large Number Were In Attendance.

One of the most successful and pleasant events of the season took place last evening in the Railwaymen's Hall, when the Daughters of the Empire, Chapter Hill 60, gave a Halloween masquerade ball. The hall was most tastefully decorated in keeping with the event by those in charge. Despite the unfavorable weather which prevailed about seventy-five couples were present, most of whom were in costume. The ladies prize was won by Miss E. A. Barbeau, representing a Spanish girl. The gentleman's prize went to Mr. H. Astoria, who represented a Chinese, both in costume and dialect. A most appetizing refreshment was served about midnight, after which dancing was resumed and kept up till about 3 o'clock. The Westholme Orchestra provided an excellent selection of dance music for the affair, which was enjoyed by all present.

CANADIANS ARE TAKING REST AFTER HARD FIGHT

Ottawa, Oct. 31.—The Canadian divisions, after several weeks of very hard fighting, have been granted a rest and have now retired to the reserve trenches in the rear, while a proportion of the men have been granted a few days leave to visit in England.

Interested In Property.

G. R. Bancroft, representing the Tonopah-Belmont people, has taken a bond on the property up the north fork of the Telkwa which is owned by J. L. Hatch and P. J. Powers, says the Omineca Herald.

N. B. C. AGRICULTURAL AND INDUSTRIAL ASSOCIATION

The Annual General Meeting of the Association will be held at the City Hall, Prince Rupert, on Tuesday the 7th day of November next.

Business: Election of officers for the year 1917.

All members of the Association are asked to make a special effort to attend this meeting.

F. S. WRIGHT, Secretary.

Raleigh P. Trimble arrived last evening from the interior on his way south to Portland, Ore., where he will spend a short time. He reports that work is going along very satisfactorily on the Cassiar Queen property held by him near Telkwa. A new vein has been struck but the extent of it was not known when Mr. Trimble left.

The new vein was discovered in cross-cutting from the main tunnel, which is in about 400 feet now.

A cross-cut was being run to meet the main body, which should be encountered at about 750 feet. At about 250 feet from the main tunnel this new body of ore was found. The ore is of a very similar character to that found elsewhere.

Mr. Trimble says the new find can by no chance run to the main vein which could not be encountered there. It is a distinct vein which had not been counted on.

Everything at the property is progressing well.

ROCHER DE BOULE HAS CUT ONE VEIN IN TUNNEL

At the Rocher de Boule mine the No. 1 vein was cut by the cross-cut tunnel at about 1,400 feet. The cut happened to be made in a barren part of the vein and no stop was made to drift on it. The vein is in good shape and the management is not in any way discouraged. The big tunnel is being pushed ahead as rapidly as possible to get under the main vein, which will be tapped at nearly 2,000 feet depth. The long drive is now about 1,700 feet into the mountain, or about half way to the main vein.

The shipments from the mine were held up the past week on account of a break on the tram line. This will be repaired and the tram running again by the end of the week. In the meantime the ore is being stored in the mine.—Omineca Herald.

WEDNESDAY, NOVEMBER 1, 1916.

FISH DAY REFLECTIONS.

The Fish Day speeches of Mr. Johnston and Mr. Nickerson might well furnish food for reflection on the part of citizens of Prince Rupert. It may be that the transportation companies are charging too much for hauling fish from the seashore to the consumers. This is something that is frequently heard urged against railway corporations all over. It is scarcely fair, however, to compare the hauling of copper blocks to the conveying of fresh fish. Copper loaded on the cheapest class of cars here requires no further attention until it reaches its destination. It can be side-tracked and left in a blazing sun without the least concern. It is entirely different with fish. It is an exceedingly perishable commodity and must be watched constantly. It has to travel in expensively constructed cars and be kept iced. It must be hurried along without loss of time. For this reason the comparison was not one upon which a layman could base a conclusion.

But there were some other points that many would have liked Mr. Johnston to have explained when the question of cost was raised by him. One is the relation of a plant like the cold storage to the fish trade here. That plant to a layman's view is big enough to take care of perhaps all the companies operating here at present. It draws a subsidy from the Dominion Government as a public necessity. Yet it is complained by those who would use it that the rates demanded by the cold storage are excessive and prohibitive. This all has a part in connection with the economic handling of fish here.

* * *

Going back again to the question of the railway rates, we believe that if they are too high they reflect upon our boasted Railway Commission. We have long believed that body and its beneficient work as a rate controller was a false alarm and a delusion. As a court for equalizing rates and maintaining good stiff rates for the transportation companies it is all right. As a promoter of trade arrangements between transportation companies and producers of traffic it is a hindrance. We would rather trust the railway companies to make rates that would work to the advantage of a growing concern or community than leave it to the Railway Commission to arrange. Under the commission form, railways are afraid to give concessions to benefit any certain community, because the rate may be used against it in some other part. The result is that the commission keeps a practically uniform rate over all systems and it is kept high enough.

* * *

The public, after all, is to blame for most of the ills. They demand commissions and officials of all kinds and they want fast services and luxurious appointments. All this raises the cost and then they blame the other fellow.

Electric Light For Terrace.

Geo. Little, the father of the flourishing little village of Terrace, is planning to put an electric lighting plant in for the place. Power will be obtained from the saw mill.

SYNOPSIS OF COAL MINING REGULATIONS.

Coal mining right of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Teritory, the Nothwest Teritories and a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 per acre. Not more than 2,560 acres will be leased to one applicant.

Aplications for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant.

Each application must be accompanied by a fee of $5, which will be refunded if the rights applied for are not available but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights re not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only; but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 per acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

LIQUOR ACT, 1910.

PARCELS SHOULD BE WELL PACKED

POST OFFICE DEPARTMENT GIVES INFORMATION ON TIMELY SUBJECT

Packages For Prisoners Of War in Germany Must Be Strongly Packed.

The Post Office Department has been notified by the British Post Office that many parcels sent from Canada to Prisoners of War in Germany are being received in London in a damaged condition, so that frequently they have to be repacked before they can be forwarded to Holland for transmission to Germany. The British Post Office adds that in most cases the damage appears to be due to the fact that the parcels were inadequately packed by the senders.

The public are warned, therefore, that parcels for Prisoners of War, unless they are very strongly packed, will probably arrive in such a condition as to be of little or no use to the recipients.

Ordinary thin cardboard boxes, such as shoe boxes, and thin wooden boxes should not be used; nor does a single sheet of ordinary brown paper afford sufficient protection. Even where proper materials are used, it is important that the contents should be tightly packed so as not to shake about during transit. The following forms of packing are recommended:

1. Strong double cardboard or strawboard boxes. Those made of corrugated cardboard and having lids which completely enclose the sides of the box are the most suitable.
2. Tin boxes such as are used for packing biscuits.
3. Strong wooden boxes.
4. Several folds of stout packing paper.

The British authorities advise that parcels for Prisoners of War in Germany must not be wrapped in linen calico, canvass, or any other textile material.

Parcels posted in Canada for Prisoners of War in Germany, which have not been adequately packed by the senders will not be forwarded, but will be returned to the senders, as the British Post Office has notified the Department that parcels which are inaedquately packed must be returned to the senders.

Production and Thrift

"CANADA from her abundance can help supply the Empire's needs, and this must be a comforting thought for those upon whom the heavy burden of directing the Empire's affairs has been laid. Gain or no gain the course before the farmers of Canada is as clear as it was last year—they must produce abundantly in order to meet the demands that may be made, and I believe this to be especially true in regard to live stock, the world's supply of which must be particularly affected in this vast struggle. Stress and strain may yet be in store for us all before this tragic conflict is over, but not one of us doubts the issue, and Canadians will do their duty in the highest sense of that great word."—*HON. MARTIN BURRELL, Minister of Agriculture.*

"MODERN war is made by resources, by money, by foodstuffs, as well as by men and by munitions. While war is our first business, it is the imperative duty of every man in Canada to produce all that he can, to work doubly hard while our soldiers are in the trenches, in order that the resources of the country may not only be conserved, but increased, for the great struggle that lies before us. *'Work and Save'* is a good motto for War-time."—*SIR THOMAS WHITE, Minister of Finance.*

THE CALL OF EMPIRE COMES AGAIN IN 1916

TO CANADIAN FARMERS, DAIRYMEN, FRUIT GROWERS, GARDENERS

WHAT IS NEEDED? THESE IN PARTICULAR—

WHEAT, OATS, HAY,
BEEF, PORK, BACON,
CHEESE, EGGS, BUTTER, POULTRY,
CANNED FRUITS, FRUIT JAMS,
SUGAR, HONEY, WOOL, FLAX FIBRE,
BEANS, PEAS, DRIED VEGETABLES

We must feed ourselves, feed our soldiers, and help feed the Allies. The need is greater in 1916 than it was in 1915. The difficulties are greater, the task is heavier, the need is more urgent, the call to patriotism is louder—therefore be thrifty and produce to the limit.

"THE AGRICULTURAL WAR BOOK FOR 1916" is now in the press. To be had from The Publications Branch, Department of Agriculture, Ottawa.

WATER ACT, 1914.

Before The Board Of Investigation.

In the matter of Yule Lake and Yule River a tributary of Swanson Bay, Khutze River a tributary of Khutze Bay, and all other streams emptying into Graham Reach and its Inlets and Bays in Rang IV Coast District.

TAKE NOTICE that each and every person, partnership, company, of municipality who, on the 12th day of March, 1909, had water rights on any of the above-mentioned streams is directed to forward, on or before the 10th day of October, 1916, to the Comptroller of Water Rights at the Parliament Buildings at Victoria, a statement of claim in writing as required by Section 294 of the Water Act, 1914. Printed forms for such statement (Form No. 50 for irrigation or Form No. 51 for other purposes) can be obtained from any of the Water Recorders in the Province.

And take notice that a meeting of the said Board will be held at the office of the Board, Parliament Buildings, Victoria, on Tuesday the 24th day of October, 1916, at 11 o'clock in the forenoon, when the evidence and argument on the said claims and on any objections field will be heard.

Dated at Victoria, B. C., the 7th day of September, 1916. For the Board of Investigation.

J. F. ARMSTRONG,
Chairman.
