THE LILLOOET PROSPECTOR

Vol. 1 No. 23 FRIDAY, APRIL 19, 1912 $2.00 Per Year

PLAN TO RUSH WORK ON RAILWAY

CHIEF ENGINEER IN VANCOUVER

Vancouver, April 19.—John Callaghan of Winnipeg recently appointed civil engineer of the Pacific Great Eastern Railway has arrived in the city. No decision as to the date of the commencement of the location of the route between North Vancouver and Fort George or the number of engineering parties to be placed in the field, he said, would be reached until P. Welch of Messrs. Foley, Welch and Stewart, railway contractors returned from the East. He will probably be here about the middle of the week.

It is now well understood that the construction of the line from Point Atkinson to Newport atthe head of Howe Sound and from a point in Squamish Valley to Green Lake summit will be the first work to be undertaken owing to its heavy character. Eleven miles of line built by the Howe Sound and Northern Railwaynow in operation and controlled by J. C. Keith McArthur, McEvoy and associates of this city will be taken over by the new company. The contractors are credited with the intention of building the 450-mile road at a more rapid rate than similar work was ever performed in British Columbia.

J. M. Walker of Cincinnati Ohio, came in this week and after spending several days in town left for a short trip to McGillvray Creek and Bridge River. Mr. Walker is interested in mining properties in both localities and states that he expects to do extensive work on his holdings this year.

Paul Santini came in from the coast today.

REALTY TRANSFERS

The deal for the Hoey ranch which has been pending for some time, is now practically closed. Tnis property which adjoins the town of Lillooet, has already been partly subdivided into town lots and now that the transaction is practically an assurred fact the surveyors will undoubtedly be recalled and the work of subdividing finished that the lots may be put on the market at the earliest possible date.

C. N. Cran disposed of the Coughlan property in the southwest part of town to A. H. Aronson of Vancouver.

E. S. Peters sold to local parties 59 feet between the new store now being erected and the lot recently purchased by Dr. Clarke. In all Mr. Peters has disposed of 101 feet this spring for which he he received $3170. Two years ago he held this property at $500.

A. W. A Phair purchased a house and lot in the south end from Anna Pocock.

M. R. Eagleson sold a two and a half acre tract to William Adams. This property is situated just out of town on the road to Seton Lake.

Several options were granted of more or less importance and several deals started that will probably be closed up within the next few days.

CLINTON ASSIZES

The following is a list of the jurors summoned from Lillooet to attend the assizes at Clinton in May:

A. W. A. Phair, J. H. S. Rowbottom, Charles Noel, W. G. C. Manson, G. Hurley R. Stephenson, Duncan McDonald, C. D. Wray, M. R. Eagleson, H. J. Keary, Edward Dougherty, E. S. Peters.

NEW STRIKE MADE ON FRASER RIVER

PROMISING ORE BEING SHOWN

Jack Lyne and Lee Chism have been showing some very promising looking ore about town the last few days and report that it came from up the Fraser River about a mile above the suspension bridge. They have had four samples picked at random from off the surface of the dyke and while the returns were not overly high they were of sufficient value to be encouraging, as there is a very large ore body included in the proposition, fully a half a mile in extent it is said. The rock that showed the best returns consisted of quartz and arsenical pyrites of iron, and the owners are very optismistic regarding their find in view of the great quantity of ore and the nearness of the property to thenew railway line. They will start development work in the near future.

BLACKWATER ORE

A display of ore from the Blackwater section of Lillooet district has been placed in the show window of the C. A. Phair store and should prove quite a boosting medium for that promising locality. The display consists of three samples, from the Iron Butte, Iron Dale and Copper Plate clalms. The ore from this section is base and is found in large quantities. The various properties have been developed more or less and it has been proven that the ledges improve with depth so with transportation Blackwater should prove another of Lillooet's valuable mineral assets.

Mrs. A. F. Noel returned this week from an extended visit to the coast.

BUILDING ACTIVITY ON INCREASE

The local carpenters are kept busy these days trying to keep apace with the increased demand in building, and at present there are several places in town where the lumber for the erection of structures is on the ground awaiting machanics to rush them to completion. There is every indication that this activity will increase as the season advances so there should be room for several more carpenters here.

There is a great demand at present for houses to rent and to the end of helping supply this demand Artie Phair will construct three or four cottages on his property in the east end of town. Work will start as soon as material can be placed on the ground and labor can be obtained.

Phair and Keary have all material on the ground and only await carpenters to construct their office building on the lot next the postoffice.

W. Abercrombie is awaiting help to extensively improve the old butcher shop where he in partnership with George Carson will open up a meat market in the near future.

Dr. Clarke has opened up his drug store in the room formerly occupied by the restaurant but it his intention to build on his recently purchased property next the old butcher shop.

It is also reported that several residences will be started in the near future.

Mr. and Mrs. P. Fergus on came in from the coast this week and left today for the Pioneer mine in which Mr. Ferguson ls interested.

THE PROSPECTOR

Permanently camped at Lil ooet, B. C.

Sending out samples every Friday afternoon to be assayed by the public at large.

Yearly, $2.00 in advance. Single copies, five cents.

Advertising rates on application

FRIDAY, APRIL 19, 1912

With the coming of spring the real estate market of Lillooet has developed in a most surprising manner and all over the district is feeling the rush of spring energy.

The prediction made last fall that this would be one of the most progressive seasons in the district's history is proving true to a very great extent, even more so than the most optimistic citizens dared to think. The "go-ahead" spirit can be seen on all sides in new buildings and improvements In all parts of the town the hammer and the saw can be heard and the demand for building materials is steadily increasing. There is a scarcity of carpenters that prevents the building movement from going ahead as rapidly as it might, but this will soon be overcome and we have every reason to believe that this summer will be one of the busiest in the history of Lillooet.

The outlook therefore for the year is very bright indeed and with a season of activity before it Lillooet should be one of the most widely advertised and popular districts in the province, a district where there are possibilities for everyone to make good and where the newcomer is welcomed by a community that has naught but the welfare of the district at heart.

What about that proposed fire brigade? Get busy and organize.

It is sometime hard to understand just how the Sunday closing act works in Lillooet, that is, why the stores conducted by the white citizens are forced to close while those in Chinatown are allowed to remain open. It may be a square deal, but we can't see it that way.

What's the matter with playing a little baseball this summer? There are now enough baseball enthusiasts in town to line up and put a lively team in the field to represent Lillooet this season.

What's the Use

Weep and you're called a baby,
Laugh and you're called a fool,
Yield and you're called a coward,
Stand and you're called a mule,
Smile and they'll call you silly,
Frown and they'll call you gruff,
Put on a front like a 'millionaire—
And some guy calls your bluff!

Water Notice
