THE PROSPECTOR

VOL. 3, NO. 5 LILLOOET, B. C., FRIDAY, NOVEMBER 21, 1913. $2 PER YEAR

LEGISLATIVE ASSEMBLY NOV 24 1913

ITEMS ABOUT TOWN.

County Court is being held in Lillooet today.

About an inch of snow this morning. Looks wintry.

A. G. Rebagliati, from Lytton, paid us a business visit this week.

Mr. F. W. Hunt came down from the "Broken Hill" mine, Bridge river, on Wednesday.

Two big auto trucks are now engaged in hauling vegetables for P. Welch.

W. W. Jones, the Bridge river host, was a visitor to Lillooet this week.

Pat Dolan, of the pool-room, having sold out his interest in the business, left town Saturday.

Mr. J. F. Rowlands, the water commissioner, proceeded to Victoria on Tuesday morning.

Joe Shuster and Bert Williams have come down to join the Bridge river holidayers in town.

A Court of Revision for Lillooet assessment district will be held at Clinton on Dec. 6, and in Lillooet on Dec. 16.

Mr. E. M. Brown, general auditor for P. Welch, is visiting the various railroad camps. He left for Clinton on Thursday.

W. W. Purdy, an old-time Lillooet prospector, is again with us, and is much surprised at the change in the old town.

The new provincial wagon road on the east side of the river is now completed. It is covered with crushed rock, and is a fine piece of highway.

Majors Church and Gregg were amongst the returning hunters a few days ago; the guide, Henry Swartz, as usual, coming into his own.

Heavy rains Saturday night and Sunday morning did much damage to the Lytton-Lillooet road. The C. P. R. trains were held up for about 24 hours, from landslides.

Some of our spirited citizens are endeavoring to raise a few hundreds to increase our fire-fighting appliances. A worthy object, pursued at the right time.

J. Mathie, a Vancouver lawyer, arrived in town last night. He will appear at the County Court sitting today, in the interests of some Chinamen, who have an appeal case for him to wrestle with.

The last of the big game hunting parties, for this year, arrived in town Wednesday. Frank Gott was in charge of this hunting expedition. Frank states that big game was plentiful this year, very much above the average.

C. P. Dam, who, with his wife, returned to the South Fork last Sunday, is determined to make his abode one of the busy centres of the Bridge river. He is employing about a dozen men, has installed a telephone, and means to keep going all winter.

Chas. Place, the Pemberton pioneer, is in town for a few days. The advent of the P. G. E. railway has made Charley a wealthy man; so much so that he subscribed for the Prospector and paid for it in advance—a most unusual occurrence in this office.

WORK ON THE "BROKEN HILL."

Development work on this mine has been started, which is certainly good news to Lillooet men. At present about a dozen will be employed, the preliminary work being the driving of about 300 feet of tunnels. Work will be continued all winter, and by spring time we may hope to see this property opened up in such shape as will corroborate the opinions of three mining experts this summer—that it is one of the biggest gold propositions in this part of the province. If the "Broken Hill" mine turns out anything like what some of the most reliable mining men have predicted for it, then Lillooet will reap a benefit never before realized from any other project. The mine is close at hand, and is in close proximity to every natural facility for its profitable working. The ore body is little less than a quarry. The three mining experts to report so favorably on the property were Messrs. Dunn, Thomas and Guernsey. They each visited the mine on separate occasions, and unknown to each other, gave practically the same report. The last mining engineer to visit the property, was F. J. Crossland, some two months ago, and he is considered one of the most conservative of mining engineers; this is what he said: "Lying on the main contact between the coast granite and the interior sedimentaries the Broken Hill mining property presents features of unusual interest to the mining expert, and I am of the opinion that the contact lead on which the Broken Hill seems to have the crucial location will, with proper development and management, develop into one of the greatest producers in the province." Mr. Crossland found the ore body to average over 90 feet in width, with values in gold, silver and copper, which, in comparison with the ore treated at a profit by the Granby and B. C. Copper companies, leave no doubt as to the successful operation of this property. Mr. Crossland commented on the striking similarity of the Broken Hill ore and that produced by the Nickle Plate mine, the best gold mine in British Columbia at the present time.

CORONER'S INQUEST.

On the 7th inst. an accident occurred on the Soo river, Pemberton Meadows, in which Thos. Ryan and Patrick Mullen lost their lives through the premature explosion of dynamite. Owing to the lack of sufficient evidence the inquest was deferred until Wednesday last, 19th inst., when Coroner Phair empanelled the following jurors: Samuel Gibbs (foreman), J.S. Bell, V.E. Keeley, D. Hurley, Geo. Bell, and Fred. McDonald. After hearing the evidence of several eye-witnesses in which it was made clear that the accident occurred through the accidental explosion of a box of dynamite while the men were engaged in thawing it, and that there was no blame attached to anyone, the jury returned a verdict in accordance with the evidence.

Both Ryan and Mullin were employees of the P.G.E. railway. Their bodies were interred in the Lillooet cemetery on the 7th inst.

MYSTERIOUS DAN HAMILTON.

When the Golden Dream Mining Co. concluded to go into extensive placer mining on the South Fork of Bridge river, the other day, they annexed a claim that had been in continuous operation for over a dozen years—Dan Hamilton's gold nugget cache. He worked alone, and no one but himself knew what the financial result was. Little Dan confided in no one; to any enquiries about the claim he always replied that it kept him "broke." The result was that he had the whole river to himself. In the meantime he bored tunnels into the bank—one of them 80 feet long—and kept quiet. For years little Dan supplied the gold nugget market of Lillooet. If a man wanted a ten or twenty dollar specimen he went to Hamilton. Upon one occasion he came into Lillooet with a chunk of gold valued at $82, and a gold buyer, of Lytton some years ago paid him $2000 for some specimens. Dan was always a mysterious man—he is so yet; for, notwithstanding the fact that he has sold out his mining property, he is still "broke," and claims that he always will be if he stays in this town. He claims that the company now about to operate his old placer ground will eventually make a big clean-up—when they wing-dam the river.

ARROWHEAD'S LAST SPREE.

Last Sunday morning the rigid body of Charley Arrowhead, an Indian well-known in these parts, was found lying face down on the road between Seaton and Anderson lakes. Constable McLeod investigated the case, and found that deceased, had, on the previous night, been on a whisky debauch close to the spot where his body was found. The night was a cold one, with a little snow, and it was quite evident that the Indian had laid down in a drunken stupor and died from exposure. Dr. Christie held an examination over the body and concluded that an inquest was unnecessary.

Arrowhead was a man fond of his bottle, and had made numerous pilgrimages to the Kamloops bastile. He had only been at liberty one week when the white man's enemy, as well as the poor Indian's, knocked him out.

MORE DEVELOPMENT WORK.

William Sutherland and Joseph Shuster have just finished a six-roomed log cabin on their property near the mouth of the South Fork. Close to the cabin they have located a couple of mineral claims on which they will do considerable development work this winter. Experts who have visited the property pronounce it good; they have a 14 foot ledge running through both claims, on which which gold can be panned. No assays have yet been made, but the prospects are good enough for them to commence work on a tunnel, at which "Deadshot Bill" is now busily engaged. Joe says that the latch of the cabin door is on the outside, so Bridge river men can govern themselves accordingly.

POLICE COURT PROCEEDINGS.

(Before Magistrate Saul).

The last ten days has been brisk in police circles. Following is a few of the cases disposed of:

Oscar Green, d. and d., 15 days hard labor.

Robert Ramsay, d. and., $10.

Joe Salvatico, supplying intoxicants to Indians, $50.

J. Polecini, F. Minuzzi, T. Grazione, F. Toni, D. Francesco, and Sabatino, enjoying a social fight, dismissed.

R. Butler, interdict, $20.

Aeneas, an Indian, drunk, $30.

R. Butler, interdict, 1 month.

Anton Wolden, supplying an interdict, $100.

Alex. Kuloff, supplying intoxicants to Indians, 2 months hard labor.

Swan Dihlin, disorderly conduct, $5.

Milker Soderberg, disorderly conduct, $10.

Eric Olsen, d. and d., $10.

Rosie, an Indian maiden, charged with being drunk, had her sentence postponed.

Giuseppe Chiotti, accused of entertaining Miss Rosie with gin, $50.

Chas. Johnson, theft, suspended sentence.

Rosie was found drunk again. This time she was fined $10 and banished.

Tommy Bull, drunk on reserve, $30.

Willie Thom, a whisky suspect, $5.

Paul Colich, supplying, 1 month hard labor.

Ernest Larsen and Andrew Bergman, disorderly conduct, 20 days.

George Renning. disorderly conduct, $10.

Mr. C. L. Copp, one of the best known mining men of Lillooet, has decided to make his home in Vancouver for the present, being influenced in this by Mrs. Copp, who, after spending last winter in Victoria, has decided in favor of Vancouver. Mr. and Mrs. Copp have purchased a home at 1918 York street, which commands a beautiful view of Kitsilano beach and English Bay.—Province.

Mr. James McAdams, who had his leg badly fractured about a month ago, and who has been in the Lillooet hospital ever since, now has every chance of saving the limb. It was at one time feared that amputation would be resorted to, but now he has every hope of saving the leg.

NOTICE.

Strayed on my ranch, one iron gray mare; branded (H) on left hip. Owner may have same by paying for pasturage and this advertisement.

LILLOOET BRANCH.

A. P. HUGHES, - MANAGER.

THE VALUE OF BIRDS.

Some investigations at the University of Wisconsin, the results of which have just been published, give astonishing facts regarding the ability of birds to destroy insects. One small exhibit, a Virginia wren, proved to be able to dispose of twice its weight of insects in two days. This is a tremendous illustration of the value of birds around orchards and grain fields, says the Ottawa Journal. It emphasizes the importance of what we all know, namely, of encouraging and protecting small birds. The only exception is the English sparrow, which is known to have no particular ambition to live on insects and which is positively objectionable from the tendency it has to drive away other birds.

Birds are very beautiful and very desirable if merely from their color, their songs and their cheerfulness. When to this is added their tremendous value to the food producer it certainly ought to be the aim of every intelligent person to encourage and protect them in every possible way.

Water Notice

Application for a License to take and use water, and to store and pen back water, will be made under the Water Act of British Columbia, as follows:

1. The name of the applicant is Duncan William Donelly.
2. The address of the applicant is Lillooet, B. C.
3. The name of the stream is an unnamed spring. The stream has its source in a spring on Crown land, flows in a southerly direction, and disappears into ground about 15 chains from Southern boundary of P. R. 2096.
4. The water is to be diverted from the stream on the East side, about twenty-five chains from the North-east corner of P. R. 2096.
5. The purpose for which the water will be used is irrigation.
6. The land on which the water is to be used is described as follows: Pre-emption No. 2096.
7. The quantity of water applied for is as follows: One cubic foot per second.
8. This notice was posted on the ground on the 11th day of November, 1913.
9. A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Clinton. Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

DUNCAN WILLIAM DONELLY,
Applicant.
By SAMUEL GIBBS, Agent. o21

Water Notice

For a Licence to Take and Use Water

NOTICE is hereby given that I, Clifford Adair Caldwell, of Canoe Creek, B. C., will apply for a licence to take and use twenty-five miner's inches of water out of a small spring, which flows in a South-westerly direction through Government land and sinks on the lower end of my pre-emption. The water will be diverted at a quarter of a mile from the pre-emption, and will be used for irrigation purposes on the land described as my pre-emption No. 1562.

This notice was posted on the ground on the 1st day of November, 1913. The application will be filed in the office of the Water Recorder at Victoria.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

CLIFFORD ADAIR CALDWELL,
o21 Applicant.

Dissolution of Partnership

PROVINCE OF BRITISH COLUMBIA,
COUNTY OF CARIBOO.

I, Patrick Dolan, of Lillooet, formerly a member of the firm carrying on business as Pool Room proprietors in the town of Lillooet, in the County of Cariboo, under the style of Culhane & Dolan, do hereby certify that the said partnership was on the 13th day of November dissolved by mutual consent.

All debts and liabilities of the late firm will be received and paid by John Culhane, who continues the business.

Witness my hand at Lillooet this 15th day of November, A. D. 1913.

PARTICK DOLAN.
Witness: SAMUEL GIBBS, Notary Public

Water Notice.

Application for a Licence to take and use Water will be made under the "Water Act" of British Columbia, as follows:—

1. The name of the applicant is Donald Arthur Manson.
2. The address of the applicant is Lillooet, B. C.
3. The name of the stream is Little Blackwater Creek. The stream has its source in Little Blackwater Lake, flows in a Southeasterly direction, and empties into Anderson River on Lot 2757.
4. The water is to be diverted from the stream on the North side, about one mile and a half from where it empties into Anderson River.
5. The purpose for which the water will be used is irrigation.
6. The land on which the water is to be used is described as follows: P.R. 1856.
7. The quantity of water applied for is as follows: One cubic foot per second.
8. This notice was posted on the ground on the 27th day of October, 1913.
9. A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Clinton. Objections may be filed with the said Water Recorder, or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

DONALD ARTHUR MANSON,
Applicant.
o31 By SAMUEL GIBBS, Agent.

Water Notice

NOTICE is hereby given that William McIntyre, of Lillooet, B. C., will apply for a licence to take and use 10 acre feet per annum, of water out of a spring which raises about centre of original P. R. 1830, and empties into the ground near by.

The water will be diverted at its source, and will be used for irrigation purposes on the land described as —original P.R. 1830– (record now pending).

This notice was posted on the ground on the 7th day of November, 1913.

The application will be filed in the office of the Water Recorder at Clinton, B. C.

Objections may be filed with the said Water Recorder, or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

WILLIAM McINTYRE,
Applicant.
Nov. 14

Navigable Waters Act.

(R. S. C. 115.)

THE PACIFIC GREAT EASTERN Railway Company hereby gives notice that it has, under Section 7 of the said Act, deposited with the Minister of Public Works at Ottawa and in the office of the District Registrar of the Land Registry District of Yale, a description of the site and plans or its proposed bridge over the Fraser River, near Lillooet.

And take notice that after the expiration of one month from the date of the first publication of this notice the said Railway Company will, under Section 7 of the said Act, apply to the Minister of Public Works at his office in the city of Ottawa for approval of said site and plans and for leave to construct the bridge in accordance therewith.

Dated at Victoria, B. C., this 16th day of October, 1913.

D'ARCY TATE,
Counsel for Pacific Great Eastern Railway..

This notice was first published in the Lillooet Prospector on the 31st day of October, 1913.

Water Notice.

Application for a Licence to take and use water, will be made under the "Water Act" of British Columbia, as follows:—

The name of the applicant is James Landsborough; the address of the applicant is Pemberton Portage; the name of the stream is unnamed and comes from a spring on Lot 1253. It flows Southerly in Lot 1253 and empties into Summit Lake at a point in said Lot. The water is to be diverted from the stream on the East side, about 125 yards up stream from the Pemberton Portage road; the purpose for which the water is to be used is agricultural; the land on which the water is to be used is described as follows: Lot 1253, owned by Frank Swannell Vilhelm Schjelderup and the applicant.

The quantity of water applied for is as follows:—One cubic foot.

This notice was posted on the ground on the 11th day of October, 1913.

A copy of this notice and an application pursuant thereto, and to the requirements of the "Water Act," will be filed in the office of the Water Recorder at Clinton.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

JAMES LANDSBOROUGH,
Oct. 23. Applicant.

Liquor Licence Act.

(SECTION 41)

NOTICE IS HEREBY GIVEN THAT on the first day of December next, application will be made to the Superintendent of Provincial Police for renewal of the Hotel Licence to sell liquor by retail in the Hotel known as the Excelsior Hotel, situate at Lillooet, in the Province of British Columbia.

Dated this 24th day of October, 1913.

WM. J. ABERCROMBIE,
Applicant.

Water Notice

Application for a Licence to take and use Water will be made under the "Water Act" of British Columbia, as follows:—

1. The names of the applicants are Henry George Coldwell, Alfred Joseph Drinkell, and Robert Shafto Coldwell.
2. The address of the applicants is Mountain House, linton, B. C.
3. The name of the stream is Seven Mile creek.
4. The water is to be diverted from the stream on the North side, about 2 miles South from the S. E. corner of ungazetted Lot 3458, thence down stream about 550 yards.
5. The purpose for which the water will be used is irrigation.
6. The land on which the water is to be used is described as follows:—Land as covered by our applications for pre-emption, filed with the Provincial Land Office at Clinton, B. C., on the 27th day of October, 1913.
7. The quantity of water applied for is as follows:—200 miners' inches.
8. This notice was posted on the ground on the 28th day of October, 1913.
9. A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Clinton. Objections may be filed with the said Water Recorder, or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

Published to promote the Welfare of the Lillooet District.

R. A. HUME, Manager.

NOVEMBER 21, 1913.

RECLAIMING THE DESERT.

Mr. J. F. Rowlands, government engineer for the comptroller of water rights, left for Victoria on Monday last, having completed his season's work in this district. Mr. Rowlands has been employed by the government in examining all records of water granted in this district, and also inspecting the watershed of the Fraser river. He has had a large experience in all matters pertaining to the irrigation of land, and was employed by the British government in Egypt and the Soudan, where thousands of acres of desert land, by means of irrigation, have been brought under cultivation. Of course, in British Columbia there is no large area of land lying fallow for want of water, but no doubt there are tracts of land now used for range purposes which, by the outlay of money made by the government, may be brought under fruitful cultivation. At the present time the greatest irrigation schemes ever planned are now being carried out in the United States. Irrigation has long been practised in California and Arizona, but prior to 1875 all irrigation enterprises in the west of the United States were of a private character, and none of a national character were undertaken until the year 1902. Today some six million acres have been won to the service of man, and many millions more will, it is expected, be redeemed from worthlessness in the years that are coming. In 1875 Senator Carey, of Wyoming, obtained an Act from Congress, giving to certain western States one million acres of barren desert, the property of the people of the republic, on condition that within ten years each state should irrigate and develop twenty acres in each quarter section. The cost of the irrigation work was divided pro rata among all the quarter sections benefited. The land so benefited was sold at fifty cents per acre, to which the cost of irrigation was added, ranging from $25 to $50 per acre. Payments were extended over ten years, secured by mortgages on the land. The scheme proved a great success, and some three million acres have been wrested from the desert under the Carey Acts. In 1898 a Mr. Gifford Pinchot, a gentleman of means interested in the national forests of the United States, and anxious for their preservation, obtained from the legislature at Washington the necessary power to organize an efficient Forestry Preservation Service. It has done noble work, especially in preserving the forests about the headwaters of the rivers and streams which have been drawn upon for irrigation purposes by the Reclamation Service. In Colorado the Gunnison river was admirably suited for irrigation purposes, but there was no land suitable for irrigation in the valley. However, there was plenty of land in the adjacent Uncompahgre valley separated by a range of mountains. This fact did not deter the engineers; they constructed a tunnel 30,583 feet through the mountains and diverting the Gunnison river through the tunnel, brought irrigation to 140,000 acres in the Uncomphagre valley. United States Reclamation Service has done noble work, for in the States of Wyoming, Colorado, Idaho, Montana, Nevada and Washington they have reclaimed from the desert 3,250,000 acres of land. The men who instituted and suggested this grand work are known to few outside their particular sphere. Who, here, has ever heard of F. H. Newell, A. P. Davis, Senator Carey or Gifford Pinchot. These names should rank above those of victorious generals or potentates of great renown. These men are conquerors, but they are conquerors who have not destroyed life. They have added territory to their nation, but in so doing they have not robbed any other nation or despoiled any other people. They have subdued the desert and converted it into green fields, fat pastures and smiling deserts. In the world's great temple of fame their names will be emblazoned in letters of gold.

BRITISH COLUMBIA.

The coal measures of this province are sufficient to supply the world for centuries; it possesses the greatest compact area of merchantable timber in North America; the mines have produced over $400,000,000, and may be said to be only in the early stages of development; the fisheries produce an average annual value of over $10,000,000, and, apart from salmon fishing, their importance is only beginning to be realized; immense deposits of magnetic and hematite iron of the finest quality still remain undeveloped; the agricultural and fruit lands produced approximately $21,000,000 in 1912 and less than one-tenth of the available land is settled upon, much less cultivated; British Columbia has millions of acres of pulp wood unexploited; petroleum deposits but recently discovered. Endowed by nature with all these essentials, British Columbia is destined to occupy a significant position in the world's commerce and industry.

CLINTON CORRESPONDENCE

BORN.—On Thursday, Oct. 23, to Mr. and Mrs. Kerr, of the 57-Mile House, a son.

Mrs. W. George, of Cl[illegible], is spending a few days wi[illegible] Mrs. Pollard, of Pollard, B. C.

Clinton has a building boom in progress; seven buildings are in course of construction.

Motor trucks have of late been making the trip between Ashcroft and Kelly Lake, loaded for the construction camps.

Miss Sadie McMillan has returned home after a three weeks' visit to Mrs. Kerr of the 57-Mile House.

Small parties of men, with packs on their back, are daily to be seen footing it through Clinton, headed for the camps at Kelly lake.

C. J. Beatty, public works engineer, passed through Clinton on Saturday on his way to Quesnel. Mr. Beatty has been engaged in surveying certain proposed roads near Lillooet.

Eddie Bell is erecting an 8,000 pound capacity Fairbanks scale near the government stable, adjoining the road. A large scale of this kind has been needed in the town for some little time.

Mrs. Lewell, of Kamloops, and Miss Phyllis Christie, of Ashcroft, are on a visit to the Gang Ranch, where they will remain a week or so as guests of Mr. R. Stobart of the Western Canadian Ranching Co.

Mrs. Harry Horan, who has been staying with Mrs. Chas. Dougherty for the past few months, has returned to Clinton. Mr. Horan is shortly to start up in an extensive way as a saddle and harness maker. Harry claims to have enough work in sight for all winter.

A party of five men, armed with picks and axes, started up Soues creek a few days ago, in search of a jam of logs reported about six miles up stream. The water in the creek has been very low of late and in danger of freezing up, leaving south Clinton without water.

Willis West, manager of the B. C. Express Co., passed through Clinton a few days ago, on his way north. Mr. West states that, notwithstanding the loss of the mail contract, they have still all they can handle, and owing to the steadily increasing volume of traffic to northern points, they are continually adding to their rolling stock.

The Chilcoten country, which has for so long been associated principally with cattle raising, seems in a fair way to shortly boast of another industry on a simliar large scale. Naturally the proposed railway through the interior district has brought the adjoining districts into the range of vision of the investing public. It is stated on good authority that thirty thousand sheep will be taken into the Chilcoten country next spring. This large venture is credited to Vancouver enterprise. It has been claimed many times by those interested in sheep raising, that the large tracts of grazing land, both east and west of the Fraser river, are admirably suited to this industry, and predictions have been made foretelling an extensive carrying on of this industry in the near future. In the Horse Lake, North and South Bonaparte districts, which have been opened up very rapidly during the past year, is pasture claimed to be very suitable for sheep raising. Several settlers in this part are now experimenting with a few sheep, with more than satisfactory results, and claim they will commence on a large scale with the spring of next season.

ANOTHER MINERAL DISCOVERY.

Mr. Wm. Keddy, who has been prospecting in the neighborhood of Lillooet river, reports to us that he has discovered what he believes to be a valuable zinc deposit. It is situated on the west side of Lillooet Lake and about one mile from the mouth of the upper Lillooet River. A large body of ore is represented, the ledge being from twenty to forty feet in width and extending a distance of 4,000 feet. Samples of the ore are now in the hands of an analyst, and we hope to hear more about this find. Mr. Keddy staked five claims, which are situated about six miles from the line of the P.G.E. railway; there is a good wagon road for about five miles.

Zinc is a metallic element occurring in nature only in combination with other elements. It is a blue white, crystalline, brittle at ordinary temperature, and is a fair conductor of electricity. Zinc rolled into sheets is used for roofing; the metal is also largely employed to alloy with copper to form brass. It is also much used for coating or galvanizing iron to keep it from rusting. Zinc chloride is obtained by dissolving the oxide, metal or carbonate, in hydrochloric acid. It is an irritant poison and is used in the solid form as caustic, and in solution as an antiseptic. The world's production in 1907 was 813,842 tons, the bulk of which was raised in the United States. The leading zinc producing States are Kansas, Missouri, Illinois and Colorado.

PEMBERTON PROGRESS.

Several miles of new road on the east side of the river have been constructed this summer, from the Upper Lillooet bridge up stream.

Messrs. Cleveland & Cameron are just now surveying the lower part of the Upper Lillooet river, and are taking water levels. There is a scheme on hand to lower the Lillooet Lake, and during the summer some careful survey work has been done at its outlet. A report on the results has already been issued, and it is hoped that the scheme will be carried through by the government.

Wm. Miller passed through the Meadows on his way from Hazleton to the Squamish. He came down the Fraser on a scow, exchanged the scow for a buggy, hitched a saddle horse to it and drove on. He said that the 150-Mile House and Pemberton Meadows were the agricultural spots that had particularly taken his fancy.

Three thousand dollars has been allotted this year for the clearing of the river of jams, etc. Work will commence in a few days. Bert Perkins is the new foreman.

Perkins & Shull have taken over the Dermody sawmill and are busy with orders.

For Sale.—Rudge Whitworth bicycle, nearly new and in splendid condition. Apply to Corkett, Govt. office, Lillooet.

All kinds of fresh fruit at the Dupras candy and lemonade parlor. Likewise, the very finest brands of cigars by the box.
