JAN 17 1916
VICTORIA, B.C.

THE PROSPECTOR

VOL. 6, NO. 11 LILLOOET, B. C., FRIDAY, JANUARY 14, 1916. $2 PER YEAR

Results of The "Greater Production" Campaign

The results of the Greater Production campaign far exceed even the most sanguine hopes. Canada has harvested a crop of wheat estimated at ovor 336,000,000 bushels—more than double that of the previous year, and 45 per cent. more than any previous wheat crop in her history. The dairy sent from the port of Montreal butter and cheese valued at $23,705,000, exceeding the exports of 1914 by over $5,000,000.

In mineral production Canada has made numerous advances. Copper and zinc refining plants have been established at Trail, B.C., and are treating native ores. Improvements have been made in certain steels to enable them to be used for shell purposes. Improvements have also been made in the concentration of molebdenum ores, the molybdenum being used in the manufacture of big gun linings and high speed lathe tools. The recovery of benzol from by-product coke ovens has been developed. Benzol is used in the manufacture of explosives. In Western Canada the discovery of phosphate of lime in Rocky Mountain park should prove of great value to the agricultural interests.

Canada's fisheries have received especial attention, not only in the production but in the marketing. Both on the Atlantic and Pacific coast advances have been made. Due to conditions brought about by the war, Canada last year placed her fish upon the British market, and it is hoped that some species may be permanently established there.

Progress has been made in the cultivation of ideals looking to improvements in our homes and our munincipalities. Conferences and meetings have been held from coast to coast. Nova Scotia possesses advanced town-planning legislation. Other legislatures have special town-planning acts under consideration. On January 20th next, there will be held at Ottawa under the auspices of the Commission of Conservation, a Conference for the formation of a Civic Improvement League, to enbrace all Canada, and to endeavour to secure betterment of conditions in the cities, towns and minor municipalities of the Dominion.

While greatly increasing her wealth through the output of natural resources, Canada has also made a very large saving by reduction of her fire losses. While the figures are not yet available, these, it is expected, will show substantial progress toward the standards of other countries in the ratio of the fire losses.

The past year has been an era of awaking in Canada, and earnest endeavour has been made to eliminate waste, not only in manufacturing but in mining and in the development of all our natural resources.

An old criminal was once asked what was the first step that led him to ruin, and he said: "The first thing that led me to my down-fall was cheating an editor out of two year's subscription. When I had done that the devil had such a grip on me that I could not shake him off."—Trail News.

Bert Phair left for the coast on Thursday's train.

Jack Eagleson is spending a few days in Clinton.

Unsafe ladders have many permanent disabilities to their credit

Mr. P. B. Lewis, proprietor of the Victoria hotel, left town this week on a visit to the coast cities

The recruiting officer has been busy this week, quite a number of the boys are lining up.

We are glad to hear that two sons of Mr. Sam Gibbs of this town have donned Kahki. Reginald Gibbs in the 88th Regiment and Harry Gibbs in the 102nd Regiment.

Sergt. Taylor—"Now, boys, here's the English general coming to inspect you. Keep steady, no spitting, and, for heaven's sake don't call me Herb!"

TO-NIGHT

Farewell Smoker to Boys Leaving For the Front.

Excelsior Hotel at 8 p.m. Everybody Invited.

The skins of two chickadees were noticed on a lady's hat the other day by an official of the the Central Experimental Farm, at Ottawa.

The chickadee is one of our most beautiful and widely distributed birds, 70 per cent of whose food consists of injurious insects. To all lovers of the Canadian woods, it is a general favourite. There is every reason, humane, aesthetic and economic, for preserving it; yet thoughtless, fashion-crazy women persist in wantonly sacrificing it and others of man's feathered friends to decorate their millinery.

Not all women are included in this indictment, but the law should be amended to reach those who will not refrain from patronizing the slaughter of innocent and useful birds. Already, our legislators have forbidden the importation of foreign plumage, but this must be supplemented by an act to suppress the traffic in native birds. It should be made illegal, not only to kill useful, rare and insectivorous birds, but the vendors and wearers of the plumes of such birds should be punished likewise.

BEATING LOCAL OPTION

Farmers in the vicinity of New Carlisle, U.S.A. have found a way to "beat" the local option laws.

Thousands of gallons of cider were made in that section this fall, and the farmers have discovered that by running it thru a cream separator the water is extracted, leaving little but the pure alcohol remaining.

"It's got an awful kick" declared one farmer, who allowed his barrel of cider to stand in the warm sun for two weeks before giving it the cream separator test.

Since his discovery others are filling their cellars with jugs of the extracted juice.

The Call to British Columbia

British Columbia is called upon to supply 36,000 more men for active service. Already this province has contributed over 20,000 It is a big order for a spersely populated province, but we will take off our coats, roll up our sleeves and go at it. If we don't produce the 36,000 men it will be because they are not here.

British Columbia takes this war as seriously as any part of the Empire. We realize that for British Columbia the war is a serious matter. We are a maritime province and our material progress is largely along the maritime. If the allies were defeated British Columbia would be under the domination of the Prussian banner of murder, both on land and sea.

That is one way of looking at the matter. Another is that British Columbia is a part of the British Empire which is fighting for the freedom sf civilization from the savagery, brutality and bestiality of Prussian militarism.

The avowed object of tho Kaiser and his Prussian warbund is to dominate the world with force. Everything that we value, personal liberty, popular government, the ballot, would all be subjugated to the same necessities, the same moral standards which order the murder of children by zeppelin bombs, which torpedo passenger ships and kill women and children wholesale, which ordered the brutal murder of unselfish and heroic Edith Cavell, which crucifies prisoners, which has committed every dastardly crime ever perpetrated by the most depraved savages.

This is the thing that must be annihilated by this war. That is what we are fighting for. And British Columbia, as part of the British Empire, must, and will, do her share.

If men would take five minutes to seriously consider what this war means and what it is for there would be no eligible man left to be recruited in British Columbia. And every man who is a man should carefully study this question and then searchingly ask himself what his own duty is and why he should not do it.—Western Call, Vancouver.

The Overseas News Agency at Berlin announces the destruction of the German cruiser Bremen. Reports of the sinking of the warship were carried in press despatches several days ago.

Ottawa. Jan.—The Minister of Militia has decided to authorize the raising of a number of special regiments. These will include one or more Indian Battalions, a Metis Battalion, a colored Battalion and a naturalized Japanese Canadian Battalion.

Considerable damage has been done to the Krupp works at Essen by fire. The fire broke out in a shed used for models and spread to an adjoining building that contained the wheel workshops, which were destroyed.

Metals Used in Making Shells

The following figures furnish a comparison between the quantities of the different metals used in the manufacture of the 22,000,000 shells, for which orders have been placed in Canada, with our production of such metals in 1913.

Steel used, 400,000 tons. In 1913 it was estimated that the production of iron ore in Canada, 307,634 tons, did not exceed 5 per cent of the country's requirements of iron in that year.

Zinc used, contained in brass, 11,200,000 pounds. No zinc was refined in Canada in 1913 but the exports of metalic zinc in ore shipped amounted to slightly over 7,000,000 pounds.

Copper used, 55,000,000 pounds, The total production in 1913 was about 77,000,000 pounds and all of it was exported for refining.

Lead, 101,760,000 pounds. The production in 1913 was about 37,665,000 pounds, of which over 97 per cent was recovered as refined lead

---

It has been figured that the average cost of apprenticeship, including the cost of bringing a man to the working efficiency necessary to profit, is approximately $1,000. If this man is disabled from any cause, the employer must recognize a charge for the cost of training another workman, in addition to whatever damage he may be called upon to pay as a result of the accident.

That the people of Sydney, Australia, may derive full benefit from fish caught by the recently purchased Government trawlers, the municipality of Sydney has opened a fish market where the catch is disposed of at moderate prices to the public. The windows at the market are especially constructed, being airtight and fitted with panes of glass in front, so that the space in which the fish are kept is insulated. From a refrigerator beneath, a blast of cold air is constantly passing over the fish, which, it is stated, will keep fresh for several weeks,

---

One of the immediate results of the present war has been to encourage the smelting and refining ores in Canada. While certain metalic minerals have, in the past, received preliminary treatment in Canada, the ordinary metals of commerce, excepting lead, have been exported for refining. Recent reports announce the establishment in Canada of plants for refining both zinc and copper.

Katherine and Margaret found themselves seated next to each other at a dinner-party and immediately became confidential.

"Molly told me that you told her that secret that I told you not to tell her," whispered Margaret.

"Oh, isn't she a mean thing!" gasped Katherine. "Why, I told her not to tell you!"

"Well," returned Margaret, "I told her I wouldn't tell you she told me—so don't tell her I did."

JAN. 14, 1916.

WATER NOTICE

Diversion and Use

Take notice that Joseph Dickey whose addres is Lillooet will apply for a licence to take and use fixty (60) acre feet per annom of water out of Moon Creek, filso known a Seven Mile creek, which flows Essterly and drains into Bridge River. The water will be diverted from the stream by a ditch formerly the property of the Lillooet Mining Company, into Dickey creek, thence from Dickey creek at a suitable point above the falls by pipe, flume and ditch and will be used for irrigation purpose upon the land described as P.R. 1686.

This notice was posted on the ground on the 9th day of November, 1915.

A copy of this notice and an application pursuant thereto and to the "water act, 1914" will be filed in the office of Water Recorder at Clinton, British Columbia. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

JOSEPH DICKEY, applicant
Samuel Gibbs, agent

This notice first appeared in the Lillooet "Prospector" of the 19th day of November, 1915.

WATER NOTICE

Diversion and Use

Take notice that Alexander Graham whose address is Alexis Creek, B.C. will apply for a licence to take and use Ten acre feet of water out of Two small springs which rise about 100 yards north of N.W. corner of lot 284 and flow south and drains into the Chilcoten River about 3-4 of a mile below the mouth of Alexis Creek. The water will be diverted from the stream at a point about where it is in use on Lot 234 and will be used for domestic and irrigation purpose upon the land described as lot 284.

This notice was posted on the ground on the 11 day of November, 1915.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Ashcroft, B.C.

Objections may be filed with the said Water Recorder, or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

ALEXANDER GRAHAM, applicant.

The date of the first publication of this notice is November 26, 1915.

Water Notice

Use and Storage

Take notice that G. I. Wilson whose address is 525 Seymour Street, Vancouver, B.C. will apply for a license to take and use 75 acre feet and 1200 gallons per day and to store 120 acre feet of water out of Moon creek also known as Seven Mile creek which flows in an Easterly direction and drains into Bridge river. The storage-dam will be located at Moon Lake. The capacity of the reservoir to be created is about 120 acre feet, and it will flood about five acres of land. The water will be diverted from the stream by mining ditch formerly property of the Lillooet Mining Co. into Dickey creek thence from Dickey creek at a suitable point above the Falls by pipe, flume and ditch, and will be used for irrigation and domestic purpose upon the land described as Lots 1 to 6 Sub. Block 1a, Townsite of Lillooet.

A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Clinton, B.C.

Objections may be filed with the said water Recorder or with the Comptroller of water rights, Parliament Buildings, Victoria, B.C., within thirty days after the the first appearance of this notice in a local newspaper.

Diversion and Use

Take notice that John McIntosh Jones whose address is Big Bar, P.O. B.C. will apply for a licence to take and use 25 acre feet of water out of an unnamed spring known as French Bar Springs, which flows westerly and sinks into the ground about three-quarters of a mile east of Lot 3477, Lillooet District.

The water will be diverted from the stream at a point about three-quarters of a mile east of Lot 3477, Lillooet District. Three-quarters of a mile east of N.E. corner lot 3477, and will be used for Domestic and Irrigation purposes upon the land described as Lot 3477. Lillooet District.

A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Ashcroft, B.C.

Objections may be filed with the said Water Recorder, or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

This notice was posted on the ground on the 25th day of September, 1915.

J. M. JONES, applicant.

WATER NOTICE

Diversion and Use

Take notice that the Pioneer Syndicate whose address is Cadwallader Creek, Bridge River, Lillooet District, will apply for a licence to take and use Eighty-four cubic feet per second of water out of Cadwallader creek, which flows westerly and drains into South Fork of Bridge River about six miles from Bridge River. The water will be diverted from the stream at a point about seventeen hundred feet from the Pioneer Mineral claim and will be used for Milling purpose upon the mines described as the Pioneer Syndicate Group of Mineral claims.

This notice was posted on the ground on the 6th day of October, 1915.

A copy of this notice and an application pursuant thereto and to the "water act, 1914" will be filed in the office of Water Recorder at Clinton, British Columbia. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

Land Lease Notices

LILLOOET LAND DISTRICT
DISTRICT OF LILLOOET

Take notice that Evelyn Edith Koster of Crows Bar, Clinton, B.C. occupation married woman, tends to apply for permission to lease the following described lands:

Commencing at a post planted at the North west corner of lot 382, thence west 80 chains, thence south 40 chains, thence east 80 chains, thence north 40 chains to point of commencement, 320 acres more or less.

Evelyn Edith Koster, applicant
March 22, 1915. Henry Koster, agent

Lillooet Land District District of Lillooet

Take notice that Minnie Louise Allwood, of Lethbridge, Alta. occupation married woman, intends to apply for permission to lease the following described lands:

Commencing at a post planted 40 chains south of the North west corner of lot 117, thence north 80 chains, thence west 60 chains, thence south 40 chains. thence east 40 chains, thence south 40 chains, thence east 20 chains to point of commencement, 300 acres more or less.

Minnie Louise Allwood, applicant
March 22, 1915. Henry Koster, agent

LILLOOET LAND DISTRICT
DISTRICT OF LILLOOET

Take notice that the British Columbia Cattle Company Limited of Canoe creek, occupation Stock Raisers, intends to apply for permission to lease the following described land

Commencing at a post planted at the North East corner of lot 194, thence running east 80 chains, thence south 80 chains, thence west 80 chains, thence north 80 chains to point of commencement; 640 acres more or less.

British Columbia Cattle Company Limited, applicant
Lincoln Calhoun Hannan, agent

35—June 5, 1915

Hindrance to Forestry Progress

The greatest hind rance to the progress of forestry in this country is the low level of stumpage values. In Europe, where labour is much cheaper and stumpage values several-fold higher than with us, forest properties may be maintained on a perpetual yield basis and pay a fair return on the investment. What obtains in Europe to day will obtain in America tomorrow. The practical question is, "How may we hasten it?" In a large measure the answer to this question will be found in the developement of the art of the logging engineer.

Stumpage is that which remains when the cost of marketing the forest product has been paid out of the returns from the sale. Obviously, there are but three ways of increasing stumpage values, namely, by raising the price of the product, by eliminating waste, or by reducing the cost of marketing. Unhappily, the price of lumber, the main forest product, is determined by a great variety of considerations, most of which are wholly beyond the control of the friends of the forest.

The utilization of materials previously wasted make slow progress. There have not been nearly so many by-product developements as could be wished, and every step in advance—no matter how rich in early promise of good financial returns—largely defeats its own hopes on account of the overwhelming supply of raw materiais on the one hand and market limitations for the product on the other.

Until lumber prices substantially and permantly advance, the main hope of bettering forest finances, and thereby widening the field where forestry may be practiced, rests in lowering the costs of marketing the forest crop.

The cost of marketing the forest's crop may be roughly divided into logging costs, milling costs, lumber transportation, and selling costs.

The sawing and finishing of lumber, together with lumber transportation, have already been highly standardized. No doubt many further economies will be effected in these departments from time to time. A start, which has every promise ot large results, has already beenmade in the, heretofore, much neglected field of lumber salesmanship. But perhaps the largest field for economies is that of logging, and the hope for greater efficiency in this quarter is in the development of the art of logging engineering.

As agricultural calls to its aid so much of the sciences of chemistry, physics and biology, so the logging engineer in the development of his profession, takes toll from the whole field of mechanical science, and calls for much of the best that has been produced by the modern alchemist, the metallurgist. No occupation calls for greater resource and adaptability. Every logging unit differs from every other in the complexity of variations in topography and stand; of the thousand ways in which logging may be done there are not many profitable ways, and there is of course, only one best way. The man who knows and can effectively carry out one or more of these better waos is a potential logging engineer.

The successful logging engineer of the past has compelled success by a more than average ability and adaptability. How may the average logging foreman improve his methods and thus take the first steps to qualify for a mining engineer? Must it not be through bringing to him the results of the best thought of the thousands of men who are devoting their lives to this work?

The graduate of the forest school, with a special training in the department of logging engineering, may hope to be of considerable service to a logging company from the start, bu, to be of the greatesa service in the end, he must be willing to start his practical apprenticeship at the bottom and work up.

—Dr. J. F. Clark

Anderson Lake Mining and Milling Company, Limited.

HEAD OFFICE - LILLOOET, B.C.

The Annual General Meeting of the Shareholders of the Anderson Lake Mining and Milling Company Limited will be held in the head office of the Company at Lillooet, B.C., on Friday evening the 14th day of January, 1916 at the hour of 7.30 p.m.

SAMUEL GIBBS,
SECRETARY

December 12, 1915.
