THE PROSPECTOR

VOL. 4, NO. 1 LILLOOET, B. C., FRIDAY, OCTOBER 30, 1914. $2 PER YEAR

Annual Report of Lillooet Mining Division

(Report of Minister of Mines)

South Fork of Bridge River

Why Not — Two other veins occur on this property. One outcrops at a point about 150 feet above the bed of the South fork of Bridge river, and about 300 feet below the one on which work is progressing. The strike of this second vein is about parallel to the one already described, and the dip, so far as can be judged before any work is done, is about the same. The main outcrop, which is about 200 feet in length and from 8 inches to 2 feet in width, seems to indicate a well defined fissue-vein.

The third vein on the property outcrops along the summit of the bluff that forms the river-bank, about 700 feet above the river bed

The opportunities for cheap mining and milling here are better than at almost any other camp I have visited in years, as a good location for a mill-site is to be had on the river, almost in a direct line down from the portal of the drift, the slope being at an angle of about 50 degrees. The river will not only furnish ample water for milling, etc., but also power more than sufficient to drive all machinery at mine and mill, while a plentiful supply of timber occurs in the vicinity of the summit of the river-bank, from where it can be lowered to the mine-workings instead of having to be transported uphill, as is usually the case at Cadwallader creek mines.

Forty Thieves.—On the north and adjoining the Why Not group is situated the Forty Thieves claim, owned by the Estate of the late John Marshall, a pioneer of Lillooet, who died about two years ago. This was located in 1897, one of the earliest locations made in the district. A prominent outcrop of rusty-looking quartz, near a large rock-slide on the face of the high precipitous bluff that forms the east bank of the South Fork of Bridge river, was responsible for the discovery of the vein by a prospector who was engaged tracing up quartz float found at the placer-diggings at the mouth of this river. No work has been done on the dam since it was Crown-granted, about 1898, when it was bonded to a syndicate represented by Barclay Bonthrone, M.E., of Vancouver.

A short crosscut adit had previously been driven near the summit of the river-bank, which had exposed a quartz vein about 3 ft. in width, extremely well defined, so far as could be judged, where it outcropped and was exposed underground. Mr. Bonthrone started driving a crosscut adit under the rock-slides from a point near the high-water mark in the river. The ore-body where opened showed it to be dipping at an angle of about 50 degrees towards the north-east, or in the same direction in which the adit was being driven; this adit was about 200 feet vertically below and 100 feet south-west of the outcrop. This crosscut would require to be driven about 300 feet to strike the vein, but was abandoned after driving about 100 ft; and the property, after being Crown-granted, has remained idle although it is a very promising prospect.

Indian Troops Doing Great Work near Lille---20,000 Killed and Wounded

Paris, Oct 28—Last week the Germans gained the shortest victory of the war to date. In the neighborhood of Lille they massed strong forces behind a slight elevation and suddenly poured into the nearby British trenches an irrestible fire. Despite a rain of fire from heavy guns, Maxims and rifles, their hugh columns by sheer weight of numbers reached the trenches and thrust our fellows out. The Germans followed up their advantage, pursuing the "Tommies" and cheering and singing as they came.

All went well until they met the British reserves, who happened to be Indian troops. For a moment there was a wild scrimmage. The Sikhs and Ghurkas gave the enemy a few rounds in rapid succession, and then swung into them with the utmost fervor

Back past our deserted trenches went the grey-coated Teutons, while Sikh and Ghurka played havoc in their disordered ranks. Never has there been uch slaughter on any battle field.

Twenty thousand killed and wounded Germans, nearly half the attacking force lay along the line of retreat, according to the computation of a staff officer. Our losses did not exceed two thousand.

London Oct 28—Earl Kitchener and Sir John French insist on the urgent need for more men, Germany's fierce resistance in trying to win her way to Calais even if every watercourse and canal in Flanders becomes choked with her dead leads the Times to remind the citizens of the Empire that that they must follow the German example. Germany is hurling mass after mass of men against the Allied lines as ruthlessly as she would sacrifice sheep and Britain and the British Empire can only remain free if, in spite of immense sacrifices the British, French and Belgians have made in the flower of their manhood, fresh troops now come forward.

London still maintains the average of a thousand recruits daily All classes are attempting to share in the great struggle, not even clergymen are holding back. Five curates from the London suburb of Brixton have joined the colors,

War Gleanings

Count von Berndorff is getting into the lime-light — change of brand is a good thing!

Russia has purchased Lady Grey and J. T. Horne, ice breakers, for the express purpose of keeping Angel Harbour open all winter.

London, Oct 28— An evening News despatch, from Northern France, and timed 7 o'clock this morning, says: "It is reported that the Germans are falling back all along the line from LaBassee to the sea."

Prince Maurice of Battenberg, a cousin to King George, and a son of Princess Henry of Battenberg, has been killed on the battlefield in France.

General News of Lillooet District

Mr. A. F. Noel left for the coast Sunday.

Local War enthuiast—I guess the Germans thought the Indian troops, with the rags on their heads, were the wounded.

Mr. and Mrs. J. M. Walker of Alexander creek, are spending a few days in Lillooet.

Mr. and Mrs. Archibald and child, Alexander creek, is also in town these days, they having recently arrived from the mine; they are very enthuiastic over their section of the country.

Mr. and Mrs. J. T. Rigg and child, from the Horse Shoe Bend Mine, accompanied by Mr. and Mrs. T. R. Hollingworth and child, are in town.

Messrs V. E. Keeley and F. Keeley, arrived this week from the coast cities, after a month's vacation.

The key to "some shack" was found the other evening—some key, too.

Mr. and Mrs. M. R. Eagleson arrived home the latter part of last week. We are pleased to state that at present "Mark" is considerably better, and we hope ere long to see his familiar face in our midst.

W. O. Black of Vancouver says he saw seven or eight British soldiers "shot to pieces" by drink—what a percentage—records in the trenches, hardly prove that the British Empire defenders are "shot to pieces" by drink.

Public Meeting

At a Public meeting held in Santini Hall on October 24th, (Mr. W. Adams in the chair) the disposal of the money in the hands of the Secretary-Treasurer of the Lillooet War Fund was discussed.

A statement by W. T. Bridge, in the absence of P. LaMare showed a balance in hand of $332

W. McIntyre moved and S. Gibbs seconded a motion "that the funds in hand be sent to the Belgian Relief Fund." An amendment to this to the effect "that the sum of $500, when the funds have reached that figure, be sent to the Belgian relief fund was moved by E. Sweet and seconded by A. B. Greig," motion carried.

During the discussion J. T. Rigg mentioned the fact that letters from his relatives in the Old Country referred to numerous cases of Belgian families being housed by private families. He had also first hand information of innumerable victims of German barbarity in the form of children with ears slashed off and faces disfigured by the brutal soldiery of the Kiser.

A motion by S. Gibbs, to the effect "that following the donation of $500 to the Belgian fund, there be sent to the Canadian Patriotic Fund a sum of $500, as soon as the collection should reach that figure" was seconded by M. McIntyre, motion carried.

A vote of thanks to the Chairman was carried and the "Maple Leaf" was sung and "God save the King" closed the meeting.

Distribution of Seed Grain From Dominion Experimental Farms

By instructions of the Hon. Minister of Agriculture a distribution of superior sorts of grain and potatoes will be made during the coming winter and spring to Canadian farmers. The samples for general distribution will consist of spring wheat (about 5 lbs) white oats (about 4 lbs.), barley (about 5 lbs), and field peas (about 5 lbs). These will be sent out from Ottawa. A distribution of potatoes (in 3lb samples) will be carried on from several of the experimental farms the Central farm at Ottawa supplying only the provinces of Ontario an Quebec. All samples will be sent free, by mail.

Applicants must give particulars in regard to soil on their farms, and some account of their experience with such kinds of grain (or potatoes) as they have grown, so that a promising sort for their conditions may be selected.

Each application must be separte and must be signed by the applicant. Only one sample of grain and one of potatoes can be sent to each farm. If both samples are asked for in the same letter only one will be sent. Applications on any kind of printed form cannot be accepted.

As the supply of seed is limited farmers are advised to apply early; but the application will not necessarily be filled in the exact order in which they are received. Preference will always be given to the most thoughful and explicit requests. Applications received after the end of January will probably be too late.

All applications for grain (and and the applications from the provinces of Ontario and Quebec for potatoes) should be addressed to the Dominion Cerealist, Central Experimental Farm, Ottawa. Such applications require no postage. If otherwise addressed delay and disappoinment may occur.

Applications, for potatoes, from farmers in any other province should be addressed (postage prepaid) to the Superintendent of the nearest Branch Experimental Farm in that province.

J. A. GRISDALE,
Director, Dominion Experimental Farms.

Power Company

Messrs T. A. Frey and W. McElroy of Vancouver are in town, they are here in the interests of the Bridge River Light and Power Company. The engineers are expected here tomorrow, and together they will review the proposition.

The C.P.R. Steamer Princess Royal, accompanied by a tug, limped into Vancouver dock with an hole in her bow through striking a rock at Bucaneer bay.

Anderson Lake Boat

The Anderson Lake boat will run as follows until further notice

Leaves head of Anderson Lake 8 a.m. Wednesday and Saturday mornings, connecting with Seton Lake boat. A. C. PHAIR.

OCT. 30. 1914.

Confidence

Our first duty, at any cost, is to aid Great Britain's sustenance and defence, and our next duty, not less important, is to keep the business of the Dominion as normally as possible.

Let it be remembered that while we must lay aside something to pay our share of the cost of the war, we have at our backs storehouses of natural wealth scarcely yet touched. As the calamities of Europe place a higher value on our wheat and other exportable crops, so will the same calamities—the result of militarism and conscription—make the peaceful land of Canada more attractive to some of the best people of Europe whose hopes and lands, generation after generation, have been despoiled or devastated by war. At the present instant Canada stands practically immune from the physical menace of war; our fields are giving their wealth to the harvester, and our other resources are yielding their bounty in far greater proportions than ever Wealth production is proceeding, and the opportunities for still greater primary production are not diminishing. This continent, including Canada, will profit largely and speedily by the changes in the world's currents of trade during the war. Many of our factories will find demands upon them stimulated because of restriction placed upon the productive machinery of Europe by the exigencies of war, and though for a time in diminished quantities, a fair proportion of Britain's available capital will come to Canada for investment. Under the circumstances, therefore, the one great essential to keep business moving is confidence, and Canada, probably of all nations of the world, has least excuse to offer for lack of it.

But for this to be accomplished, the situation must be faced with courage and confidence on the part of everyone. Investors must continue to invest, bankers must continue to lend, and every one according to his ability must endeavor to work hard in order that individual incomes, and therefore the income of the whole nation, may be maintained at the highest possible level.

A little over a century ago, when the nation was at war with Napoleon, its income was a very small one, being less than one-eighth of what it is at present, and in a comparatively small space of time the British people succeeded in raising about £1,000,000,000 of money for war purposes, and so great was their confidence and courage that at the end of the great war, which severely taxed their resources, they were stronger and wealthier than they had been at the beginning.

Canada's natural store is as yet barely touched. From any temporary lull in our progress, from whatever cause, we can, therefore, recover ourselves more quickly than did the Motherland after her world struggle of a century ago, if our people are of the same heart and industry, and we are confident they are. Courage in the fight for the Empire is not more necessary than courage in the maintenance of the industry and commerce of the country.
