Reliable And Up To Date Mining News

THE SILVERTONIAN.

Of The Richest Camp Of British Columbia.

VOLUME THREE. SILVERTON, BRITISH COLUMBIA, SATURDAY, AUGUST 5, 1899. NUMBER 6

MINING LOCALS.

John Christopher, a miner, was hurt in a small cave in the Arlington mine on Monday. He was taken to the hospital

J. Brandon and W. Seward, owners of the Maydee claim above town, are bu-y running a tunnel on that property.

A W Siegel of Spokane was on Red Mountain on Tuesday, making an examination of the Rockland claim, one of the Willa group.

The local mine managers attended the mine owners' meeting in Sandon last Tuesday. Beyond the casual remark of one of those attending that "a stormy meeting was held," nothing can be learned of the proceedings.

John Tinling returned yesterday from the Colonel Sellers Group on Coffee creek. The government trail up the creek is being pushed ahead and will reach the property in about two weeks.

Bert and Harry Gilbick, who have been prospecting in the Similkameen district, returned home yesterday. They expect to remain here for a short time and will return to the Similkameen to open up the claims they have staked.

THE WILLA GROUP.

The Willa Group is to be thoroughly developed and systematic work has already been started. This Group lies on Red Mountain and adjoins the Little Daisy gold property. A force of men have been employed all summer, stripping and prospecting a big gold and copper ledge that crosses the Rockland claim, one of the Group, with the result that the company now feel themselves justified in thoroughly developing this ledge. It has been examined by some of the best known experts and pronounced equal to anything in the Rossland district. Wednesday a force of miners were put to work to start a tunnel that will open up the vein at a great depth, and arrangements have just been made for the erection of buildings to accommodate a large force of men. This group is owned by the Willa Mining Company, and the work will be done under the management of Frank Watson of Spokane.

THE PROMISING A. E. CLAIM

Among the many prominent Red mountain properties, is the A. E. This is a big gold-copper proposition and lies between the Congo Group and Little Daisy claim. The A. E. ledge shows, on the surface, to be one of the biggest veins in British Columbia, being fully 100 feet wide The strike of the vein is north east and south west with a dip or pitch into the mountain of about 60 degrees The vein is what would be known in the Rossland or Boundary country as a big "iron cap", and a hole drilled anywhere in it and blasted exposes ore that carries large quantities of iron, more or less copper sulphides and in places considerable molybdenite. All of this ore carries values in gold varying from a few cents to $25., and as depth is gained a marked improvement is noticeable in both the gold and copper values. A large amount of labor has been expended in prospecting the surface of this ledge, numerous shallow openings having been made. Lately a tunnel has been started that will cut the ledge at a depth of over 100 feet. This work is being done under the supervision of F L. Byron and will be pushed through to completion at once. The formation is similar to that of the Congo Group a syenite and schist, and the ledge itself may be termed an altered quartzite dyke.

THE SILVER BAND.

The Silver Band, which lies up near the very head waters of Eight Mile creek, is destined to rank among the biggest of the big Slocan mines A large amount of surface work has been done on this property, and the main ledge, which averages ten feet in width, has been opened up on the surface, every little ways for a length of over 300 feet Large bodies of concentrating ore have been exposed, which will prove a bonanza when a mill for its treatment is erected. A spur from the main ledge has produced some very rich shipping ore, assays from which have run as high as 846 ounces in silver to the ton. A tunnel has been driven in on this spur 100 feet and the top of a rich ore shute cut. At present a tunnel is being driven on this spur, which will cut the ore shute at a good depth and give considerable stoping ground, and it is now in a little over 50 feet. The development work is being done under the supervision of E. Foile Smith, who expects to have the property in good shape by the end of the present season.

THE NOONDAY MINE.

The Noonday mine, which is at present Silverton's principal producer, on Tuesday laid off 50 of its men, who were notified that the layoff was only temporary and that their services would be again required within a few days. At present 25 men are employed and all the men laid off are expected to be at work again within a week. This move on the part of the management was due to the lack of accommodations for the men and the necessity of keeping the development work ahead of the stoping. At no time in the history of this mine has it looked so promising or had so much ore in sight as at the present time. Lumber for the erection of buildings etc is being taken up to the mine and every returning team brings down a load of ore. This mine now holds the second place on Silverton's shipping list, being only surpassed in the amount of ore shipped by that of the Wakefield, which it bids fair to soon overtake.

THE HEWITT CLAIM.

A force of men went up to the Hewitt claim on Thursday and the No. 1 tunnel on that property is to be driven ahead The Hewitt, lies about four miles from town and on the mountain overlooking the Galena Farm Flats and is directly on the strike of the Vancouver ledge. Considerable work has been done on this property, which besides a lot of surface work two tunnels have been driven on the vein, both of which have a good showing of ore, the upper one being in 60 and the lower one 40 feet, The work will be done under the management of Maj. Reed, one of the owners of the property.

AROUND SLOCAN CITY.

Considerable activity is manifest about the mines and prospects around Slocan City. Old strikes are being opened up and developed and new strikes are of daily occurence. Five strong companies are operating in that district, all of which are paying the Union scale of wages. The companies are, the Chapleau, Arlington, Tamarac, Skylark & Ranger and the Black Prince Slocan City itself is full of life and bustle and no complaints of dull times are heard.

On the Free Gold Group, which adjoins the Howard Fraction and is owned by J. M. M. Benedum, William Kyte and others, a well defined vein of free gold ore has been struck. This vein is over three feet in width and pans in free gold about $100 to the ton. The vein has been traced some distance and a series of open cuts run into it.

Another neighboring property that is showing up well under development work, is the Hoodoo, which has a vein over five feet wide of good milling ore.

The Liberty which adjoins the Hoodoo, is another promising property. Surface ore taken from the Liberty vein assayed $12 in gold and 50 ounces in silver to the ton. Dave Davis and William Horton of Silverton are both interested in this property and are at present doing the assessment work.

The wagon road running up Springer creek from Slocan City and connecting that place with the mines, is being cleaned out, fourteen men being engaged in the work. It is the intention of those in charge, as soon as it is cleaned out, to continue the road up the creek as far as the present supply of money will permit.

The Black Prince on Lemon creek, near Slocan City, is proving itself to be the big strike of the season in that neighborhood and its ore shute is big rich and continuous. The ledge averages five feet in width and is all shipping ore that will run considerably over 150 ounces in silver to the ton. A large force of miners will be put on at this property as soon as the necessary accommodations can be erected for the men. ore is being packed out to the end of the wagon road for shipment to the smelter and steel rails, lumber and supplies are being hurried up to the mine. There appears to be now little doubt but that the Black Prince vein crossed the Two Friends ground and is a parallel vein to the Two Friends.

THE LOCAL LAY-UP.

J. Yates and family have taken up their residence on Hume Ave.

The moral (or immoral) effect of Sunday football is agitating the press of Sandon.

Mrs Barclay. left Monday for the Halcyon Springs, where she will spend a few days.

Axel Larsen, who has been prospecting around Kamloops for some time, is back in town.

Barrister Christie, of Sandon, and Miss Hatt, of Fredericton, N. B., were married in Vancouver last week.

Russell and Billy Thompson were over from New Denver on Wednesday, chopping stakes on Red Mountain.

Geo Cole and Douglas Darg left on Thursday for the Lardeau. They expect to prospect there during August.

Nelson's street railway is no longer a thing of the future. The silver spike was driven, amid appropriate ceremonies, last Saturday.

The dining room of the Arlington Hotel, the popular Slocan City hostelry, which has been closed for some time, will be reopened next week.

F. L. Christie, Barrister of Sandon B. C. will be at the Selkirk Hotel every Friday in the future. Anything requiring his services will be attended to by him.

A street sprinkler has made its appearance on our streets, much to the satisfaction of our dust worried citizens. The footfield field has received a much needed dampening.

Those who are lucky enough to be to be able to indulge in bathing off the wharf should remember that the place is within the town limits and within hearing distance of several families. Profanity is becoming too common among the bathers. A hint of this should be enough.

Mr and Mrs Grant Thorburn returned yesterday from their eastern excursion among their relatives. During their trip they visited all the principal cities of Canada and the larger ones of the northern States Although they had an enjoyable trip, they return convinced that "there is no place like home."

The informant who furnished the Nelson Miner the article on the Noonday Mine, of this place, and which was published by that paper on the 4th. inst, is a liar pure and simple. The article is a tissue of falsehoods and could only have originated in the mind of some shyster, who is having his heart eaten out with envy to see honest men making an honest living by honest work

The Sentinel, Toronto, the official organ of the Orangemen, is celebrating the completion of its twenty fifth year of publication, and has issued a special edition of sixteen pages. It is handsomely illustrated with potraits of the various celebrities of the Orange order. Nicholas Flood Davin, Professor Goldwin Smith and James L Hughes are among the contributors to this special number.

All work in the Jewelry Repairing line, left at the Silverton Drug Store, will be promptly forwarded to Jacob Dover, the well-known Nelson jeweler. All repairs are GUARANTEED FOR ONE YEAR *

This year the Spokane Industrial Exposition will be held in a monstrous circus tent. It will not be a building, as heretofore, composed of a wooden frame work, with a roof of canvas, but it will be a regular circus tent made in sections and put up in sections. When the exposition is over it will be taken down, folded, and put away until next year. It has cost more to make this tent than to put up one of the buildings heretofore used for the fruit fair, but when it is finished it will be good for many years at least. There are in fact three tents. The main one is 100x350 feet in size The two others are each a little smaller. There will be no danger of the tents blowing down, for, in case of a severe storm the centre can be lowered and thus avoid the force of the wind. The tent is being made by F. O. Berg, until recently of Spokane, but now of Seattle.

ORE SHIPMENTS FOR THE WEEK

The only ore sent off the Lake during the week, was sixty tons sent to the Trail Smelter from the Noonday mine at Silverton. This mine has also two carloads of ore lying on the wharf ready to be loaded onto the steamer and the ore haulers are steadily hauling ore from the mine to the wharf. Several properties around Slocan City are preparing to ship and packing has already commenced at the Black Prince.

A FOOTBALL MATCH.

What should be a good football game will be pulled off on the Silverton field next Tuesday, between the Sandon and Silverton teams The game will be called at 6:30. This will be the fourth game between these two teams, each having a victory and a draw to its credit. A dance will be given in McKinnon's Hall after the game.

THE NEW SCHOOL HOUSE.

Secretary McKinnon of the School Board has received a letter from Alex-Robinson, Superintendent of Education, stating that a requisition had been sent to the Lands and Works Department for the amount necessary for the immediate erection of a school house in Silverton.

The site selected is on Hume Ave, near the corner of Fourth St. Work will doubtless commence within two weeks school reopens on the 14th inst, and the new building should be ready for occupation early in the term.

IN FAR PASTURES.

W. McIntosh who was one of a party of Silvertonians, who left here some months ago for the Atlin gold fields, in a letter dated June 6th, gives his impression of the much talked of Atlin, as follows:

"I have been rustling ever since I came here, but have not seen a thing as yet. I have been over one hundred miles of country since I came, besides up on creeks and mountain tops, and as yet have not seen a good looking piece of quartz. We sunk holes and panned dirt 'till further orders—could get colors and no more and I tell you it's not very encouraging. We did not get down over 8 or 10 feet any place as the water would come in and we would have to get out. No doubt there are some good placer claims, but they are not many and the season does not open until August 1st There are lots of men in here with starvation staring them in the face, who cannot get anything to do and cannot get out. The freight and passenger rates here are something awful, from Atlin to the portage across the lake is from 3¾ to 4miles and the steamboat fare is $4 Just think of that. I will not go into details about the country, when not in a swamp you are on dry sand or gravel hills; when off these, climbing a granite or limestone mountain Granite and lime is the principal formation with occassionally a little slate. I consider it a loss of time to write about the country and a greater loss to be here."

THE MAN BEHIND THE PLOUGH.

There's been a lot to say about the man behind the gun.
And folks has praised him highly for the noble work he's done;
He won a lot of honor for the land where men are free,
It was him that sent the Spaniards kitin' back across the sea;
But he's had his day of glory, had his little spree, and now
There's another to be mentioned-he's the man behind the plough.

A battleship's a wonder and an army's mighty grand,
And warrin's a perfession only heroes under and.
There's something sort o' thrillin' in a flag that's wavin high,
And it makes you want to holler when the boy's go marchin by;
But when the shutin's over and the fightin's done, somehow,
We find we're still depending on the man behind the plough.

They sing about the glories of the man behind the gun,
And the books are full of stories of the wonders he has done;
The world has been made over by the fearless ones who fight;
Lands that used to be in darkness they have opened to the light,
When God's children speak, the soldier has to settle up the row,
And folks haven't time for thinkin' of the man behind the plough.

In all the pomp and splendor of an army on parade,
And all through the awful darkness that the smoke af battle made;
In the halls where jewels glitter and where shouting men debate,
In the places where rulers deal out honors to the great,
There is not a single person who'd be doing business now,
Or have medals if it wasn't for the man behind the plough.

We're a-buildin' mighty cities and we're gaining lofty heights;
we're a-winnin' lots of glory and we'er gettin' things to rights;
We'er a showin' all creation how the world's affairs should run,
Future men'll gaze in wonder at the things that we have done,
And they'll overlook the feller, jist the same as they do now,
Who's the whole concern's foundation-that's the man behind the plough.

—S. E. Kiser, in Chicago News.

YELLOW FEVER AT THE HOME

STRICT QUARANTINE THERE.

Large Number of Inmates Stricken—Several Deaths Have Occured—Thousands Have Been Exposed—Government Surgeons Ordered There.

Norfolk, Va., August 1.—A message from Governor Woodfin of the Soldiers' home at Hampton, says there have been three deaths from yellow fever in the last 24 hours, and 30 cases are now under treatment. Expert surgeons and immune nurses are being installed and rigid quarantine regulations enforced. He does not think the disease will spread beyond the home.

An Alarming Outlook.

Washington, August 1.—Surgeon General Sternberg received the following from Lieutenant Colonel Dewitt:

"Fort Monroe, Va.—Surgeon Pettus, United States marine hospital service, quarantine officer, officially stated that yellow fever was at the National Soldiers' home at Hampton. There were 34 cases with six deaths. The commanding officer took immediate measures for quarantine."

General Corbin says the conditions are serious and there is no telling how far the infection may have reached. Excursion parties have been coming to Old Point, Newport News and the soldiers' home. Many of the excursionists have mingled with the soldiers.

Corbin says one theory of the way the fever might have been brought to the home is that one of the soldiers recently visited Santiago. He returned some time since, suffering with what the physicians thought to be dengue. It seems it was not until the inmates of the home began to die that the disease was discovered to be yellow fever.

Officials of the war department are very much concerned about the situation. Corbin and Sternberg had a conference early this morning and it was decided to hold everything in readiness to take care of the yellow fever should it appear among the troops.

Orders have been issued by the department removing the garrison at Fort Monroe to some point on the northern coast to be selected by General Merritt. A few officers and enlisted men will remain at Fort Monroe as guards.

Surgeon General Van Ruypen of the navy department said he did not believe it would be necessary to suspend operations at Norfolk. The navy yard, however, would be quarantined.

How Did It Get There?

Newport News, Va., Aug. 1.—The officers of the Soldiers' Home at Hampton have no idea how the yellow fever worked its way into the place where over 4000 old union veterans are quarantined.

This city is completely cut off from Hampton, Old Point, and Soldiers' Home except by wire. Reports telephoned from the last named place today show the fever situation there is well in hand. Only one new case has developed since yesterday afternoon and no other deaths have been reported.

The home grounds are effectually quarantined and it is not thought the disease will spread beyond the reservation. Armed guards will prevent any persons from the fever infected districts from entering the city.

Powers Sign the Protocol.

Washington, Aug. 1.—Secretary Hay received a cablegram from Ambassador White, president of the American delegation to The Hague peace conference, stating that the 16 powers represented have signed the protocol of the arbitration and mediation treaty. Included in the list are France, England and Russia.

The treaty will not become effective so far as the United States is concerned until it has been ratified by the senate, so that its provisions could not be availed of at this time to settle the boundary dispute between the United States and Canada. Even after the treaty is ratified it is said that arbitration of this question can not be invoked unless with full consent of both parties.

Spread of Plague Throughout India.

Bombay, Aug. 1.—At Poonah there have been 59 cases of plague and 56 deaths from disease in 58 hours. At the cantonment in this city 310 cases, 261 deaths are reported.

Several new cases are reported among Europeans. Meteorological conditions indicate the close of the monsoon and the prospects are ominous.

Thresher Engine Exploded

Detroit, Aug. 1.—A special from White Cloud, Mich., says: A threshing machine engine exploded near Big Prairie. Charles Haight, Alpha Haight, Charles Crabtree, George Overly, Cecil Priest and Raymond Howe were killed. Oscar Evans and George Haight were severely injured.

Three Were Drowned.

Ashland, Wis., July 31.—A rowboat containing W. C. Ott and Mrs. and Miss Boynton, was caught in a terrible gale which prevailed for two hours on Chequamagon bay. All three were drowned and the bodies have not yet been recovered. Ott was a resident of Chicago.

Sir Julian Is Honored.

London, Aug. 1.—It is officially announced that Sir Julian Pauncefote, British ambassador to the United States, who was the head of the British delegation to the international peace conference at The Hague, has been elevated to the peerage.

Brigandage and Blackmail.

Hong Kong, July 31.—Brigandage and blackmail have become so rampant in the neighborhood of Canton that silk merchants have been obliged to notify foreign buyers that they will prbably be unable to fulfill their contracts owing to the insecurity of transportation.

Another Car Blown Up.

Cleveland, July 31.—The blowing up of another Euclid Beach suburban car has demonstrated that the danger point is not yet passed in connection with the street car strike in this city. The plan to release the military force early next week will probably be abandoned and the soldiers retained indefinitely.

Contrary to previous reports, eight passengers were aboard the car wrecked, and that they escaped serious injury is considered almost miraculous. The explosive used was unusually powerful. The heavy car was lifted fully two feet from the track by the explosion. The flooring was blown upwards and over the tops of the seats.

The authorities are unable to get the slightest clue to the identity of the perpetrators of the outrage.

The cars are now moving on every line of the Big Consolidated system.

THE ALUM BAKING POWDERS.

Names of Some of the Principal Brands Sold in This Vicinity.

The recent discussion in the papers of the effect upon the human system of food made with alum baking powders and the opinions that have been published from noted scientists to the effect that such powders render the food unwholesome, have caused numerous inquiries for the names of the various alum powders.

The following list of baking powders containing alum is made up from the reports of State Chemist Nicholson of Nebraska, the city chemist of St. Louis, the food commission of Minnesota, or other reliable authority:

Baking Powders Containing Alum.

K. C.....Contains Alum
Jaques Mfg. Co., Chicago.
CALUMET .....Contains Alum
Calumet Baking Powder Co., Chicago.
HOME .....Contains Alum
Home Baking Powder Co., San Francisco.
WASHINGTON .....Contains Alum
Pacific Chemical Works, Tacoma.
CRESCENT .....Contains Alum
Crescent Mfg. Co., Seattle.
WHITE LILY.....Contains Alum
D. Ferrera & Co., Tacoma.
BEE-HIVE .....Contains Alum
Washington Mfg. Co., San Francisco.
BON BON.....Contains Alum
Grant Chemical Co., Chicago.
DEFIANCE .....Contains Alum
Portland Coffee and Spice Co., Portland.
PORTLAND .....Contains Alum
Beno & Bailis, Portland.

In addition to these, it is learned that many grocers are selling what they call their own private or special brands. These powders are put up for the grocer and his name put upon the labels by manufacturers of alum powders in St. Louis, Chicago, Kansas City, Tacoma, San Francisco and elsewhere. The manufacturers, it is said, find their efforts to market their goods in this way greatly aided by the ambition of the grocer to sell a powder with his own name upon the label, especially when the grocer can make an abnormal profit upon it. Many grocers, doubtless, do not know that the powders they are thus pushing are alum powders which would be actually contraband in many section if sold without disguise.

It is quite impossible to give the names of all the alum baking powders in the market. They are constantly appearing in all sorts of disguises, under all kinds of cognomens, and at all kinds of prices, even as low as five and ten cents a pound. They can be avoided, however, by the housekeeper who will bear in mind that all baking powders sold at twenty-five cents or less per pound are liable to contain alum, as pure cream of tartar baking powders cannot be produced at anything like this price.

Capture of Calamba.

Manila, July 29.—Brigadier General Hall, with 1000 men, has captured Calamba, on Laguna de Bay. The loss to the United States forces is four killed and 12 wounded.

Calamba is a town of nearly 12,000 population located on the eastern shore of the bay, 30 miles southeast of Manila, and is much farther south than the American troops have yet penetrated on land.

The force which captured Calamba consisted of 400 Washington volunteers; 450 of the Twenty-first infantry; 100 Fourth cavalry and two guns of the First artillery.

Three members of the Washington regiment waded from canoes through the swamps, often shoulder deep, while a group of Filipinos concealed in hay stacks were shooting at them until the tinclad "Napidan" commenced using her guns.

On the American side two members of the Fourth and two from the Twenty-first infantry were killed and several wounded.

Will Be War in San Domingo.

Cape Haitien, July 31.—Advices received from the Dominican frontier say the insurgents have cut the teregraph wires in the neighborhood of Santiago de los Caballeros and also near Moca.

The insurgents in the west part of Santa Domingo await the arrival of Jiminez, under whose leadership they expect to attack Santiago.

Luetgert Dies in Jail.

Joliet, Ill., July 29.—Adolph L. Luetgert, the wealthy Chicago sausage maker, who was serving a life sentence in the penitentiary here for the murder of his wife, was found dead in his cell. It is not known whether he killed himself or died of heart disease.

Miners Move Westward.

Elkhorn, W. Va., July 31.—Two thousand miners have left here for western coal fields to get better wages. Many mines here are compelled to close. The situation is becoming alarming among operators owing to the rapid emigration.

Even the quiet waiter is frequently called to order.

HEAVY WINDS IN ALASKA.

WRECK AND RUIN THERE.

All Along the Western Coast—No Lives Reported Lost—Large Number of Boats Were Destroyed—Financial Loss Will Amount to Thousands of Dollars.

St. Michaels, July 31.—The most severe windstorm seen here in many years swept over this bay. Boats anchored in the stream were torn from their fastenings and either swept ashore or sent flying seaward, the direction of the wind being southeast.

Fortunately no lives were lost, as the majority of the vessels wrecked were small steamers, built in 1897, for the Koyukuk rush and which since early spring have been idle at anchor in the bay. Their owners in many instances have either gone to Cape Nome or Galvin bay, giving up all hope of selling or leasing their vessels.

The damage will amount to many thousands of dollars.

Beginning about 6 o'clock in the morning the velocity of the wind increased until it approached a hurricane at noon. Ocean craft and large river steamers tugged at their ponderous anchors, firmly rooted in the mud, but try as he would, the Storm King was uneaqual to the task and turned his attention to the smaller fry with great success, as the beach for several miles will testify.

The point of land on which the Alaska Commercial Company's plant is built got the full benefit of the wind and considerable damage would have occurred had not the greatest care been taken, and as it was, the company lost its lately acquired tug boat, the Anna Eva Fay, purchased last winter at Unalaska.

The stern wheel City of Paris, lately purchased by the Alaska Exploration Company, snapped her anchor chain and drifted rapidly to sea with two watchmen aboard. As soon as possible the St. Paul got under way and went to the rescue, overtaking the Paris about 10 miles out. Owing to the high wind and choppy sea it was difficult to get a line to the Paris but this was finally accomplished and the stern wheeler pulled back to port.

The tug Anna Eva Fay dragged her anchor opposite the Alaskan Commercial Company's wharf and drifted on the rocks a few feet astern of the river steamer Louis, which was firmly tied to the wharf. All efforts to get the Fay off were in vain and she pounded to pieces in a few hours.

The river steamer Dorothy, owned by James Deitrich, dragged her anchor and went ashore, but there are hopes that she can be saved. Along the beach several other small steamers and numerous sloops and Yukon river boats are total wrecks.

Among the wrecked craft is the steamer William McKinley. The river steamer Anna Wanda is smashed to bits. The May West and the Weseig are also on the rocks. One of the new barges belonging to the Alaska Exploration Company was blown to sea with a valuable cargo.

Captain Brant and mate, of the four-masted schooner Carrier Dove, while trying to row to the wharf, were washed ashore, but were pulled out, narrowly escaping drowning.

News of the storm at Cape Nome is anxiously awaited. The barrenness of the beach upon which the city of Nome is built and the high surf that continually rolls in will make the storm unusually fatal to shipping. With such a wind as prevailed here, none of the dozen vessels anchored off the city could have escaped.

Attack on Calamba.

Washington, Aug. 1.—General Otis makes a report to the war department of the efforts of the Filipinos to retake Calamba, as follows:

"Manila.—The insurgents in considerable force appeared in the vicinity of Calamba yesterday and were punished and driven off by Hall. Our casualties were one killed and seven wounded.

"Captain Simpson of the Sixth infantry struck a robber band in Negros on the 28th instant, killing 19.—No casualties."

Washington Boy Hurt.

General Otis cabled the list of soldiers wounded during the capture of Calamba July 28. Among the names is that of Fred L. Ballou of Company H, First Washington infantry. He was shot in the shoulder, but not seriously wounded.

Ready to Start.

North Dakota, Wyoming and Idaho are on the transport Grant ready to depart. Desire to delay until tomorrow to receive monthly pay permitted."

Railroad Wreck.

Denver, July 31.—A Times' Cheyenne special says:

A collision occurred on the Union Pacific near Wolcott between the eastbound overland passenger train and a light engine going west.

Engineer Marsh of the passenger train and fireman Konold of the light engine were killed and two mail clerks injured. Engineer Mack of the light engine jumped before the collision, and is said to have fled to the hills.

Decision Is a Compromise.

Denver, Aug. 1.—The state board of arbitration has filed its report on the investigation of the smelter strike.

The decision reached is a compromise between the demands of the smelter men and the concessions of the companies. The question of union or non-union labor is ignored.

Athletes Sail for Home.

Southampton July 29.—A portion of the Yale-Harvard athletic team, which competed in the inter-university sports at Queens club, London, have sailed for home on board the steamer St. Louis. They were given a hearty farewell by a large crowd.

Mrs. McKinley Improves.

Plattsburg, N. Y., July 31.—Mrs. McKinley continues to improve in health and spirits.

Will Thwart Russia's Plans.

Chino, July 31.—The Japanese alliance has been welcomed by England and Germany on the ground that it will reinvigorate China and enable her to resist the Russian advance.

The Spectator, in the course of an interesting article, asserts that Japanese reorganization of the Chinese army and navy and finances would be successful because the Japanese are more in sympathy with Chinese national feeling than the western nations.

Japan, the article says, would abolish corruption and organize a formidable well-armed Chinese army, while the combined Chinese and Japanese navies would be able to prevent any invading army reaching China by sea.

Peru Enjoys Prosperity.

Lima, Peru, July 31.—President Pierola has opened congress.

The galleries were crowded with members of the ministry, officers of the law, diplomats and the general public when the president's message was read. The message says the relations of Peru with other countries are perfect, that the revolutionary movement is gradually succumbing and that Peru has made progress economically. The commercial movement of the year, it shows, exceeds that of the previous year by more than 10,000,000 sols and the public treasury condition shows much improvement.

The president also announced the acceptance by Peru of the Washington postal convention.

ALL AROUND MARKET REPORT.

Wheat Quotations, Wool Figures and the Price of Produce.

The following prices are paid for wheat delivered at the Spokane mills:

Wheat—Bluestem, bulk, 51c; sacked, 52c; No. 1 club, bulk, 47c; sacked, 49c; No. 1 red, bulk, 45c; sacked, 47c.

Fruit—Apples, 5c per lb; apricots, 15c per lb; bananas, 30c per doz.; black raspberries, 15c per box; blackberries, 20c per box; cantalopes, 50c apiece; carrots, 5c per bunch; cauliflower, 12½c per head; cherries, 10c per lb; currants, 25c per gallon; cabbage, 2½c per lb; cucumbers, 3 for 25c; gooseberries, 5c per quart; grapes, $1.50 per basket; green corn, 35c per dozen; green peas, 5c per lb; head lettuce, 3 lbs for 10c; lemons, 30c per doz.; new potatoes, 4c per lb; new onions, 2½c per lb; onions, $1.50 per cwt; peaches, 2 lbs for 25c; pineapples, 50c each; pears, 10c per lb; plums, 15c per lb; potatoes, $2.50 per cwt; radishes, 2 bunches for 5c; red raspberries, 20c per box; string beans—15c per lb; strawberries, $1.25 to $2 per crate; tomatoes, 25c per lb; watermelons, 10-35 cents each.

Lard—50c to 60c per 5-lb pail.
Hams—15c to 18c per lb.
Breakfast Bacon—12½c to 18c per lb.
Picnic Hams—10c per lb.
Salt Bacon—10c per lb.
Hay—Timothy, $13@$14 per ton; hay, $12@13; alfalfa, $11.
Corn—Whole, $1.40 per cwt.; cracked, $1.50.
Feed—Bran and shorts, $14 per ton; shorts, $13; bran, $15; rolled barley, $20; chicken feed, $1.00.

Wood (on car)—Fir, $3; tamarack, $3.75; pine, $2.75. Retail—Fir, $3.50; tamarack, $3.50 to $4; pine, $3 to $3.25.

Coal (retail—Roslyn lump, $5.50; Pennsylvania anthracite, $18; Colorado anthracite, $16; foundry coke, $16; Cumberland black, $17.50 to $20.

Poultry—Chickens, live weight, 15 @16 per pound; turkeys, dressed, 16 to 18c; spring ducks, dressed, 14 to 16; geese, live, 16 to 18c.

The following quotations are given on live stock and dressed meats:

Beef—Live steers, $4.00@4.50; live cows, $3.50@4.50; steers, dressed, 7½ @8c; cows, dressed, 6@6½c.
Hogs—Live, 5c; dressed, 6@6½c.
Mutton—Live, 4@4½c; dressed, 10c.

Wheat.

Portland—Wheat—Walla Walla, 57c; valley, 58c; bluestem, 59c.

Tacoma—Wheat continues dull and weak at 56c for club, 59c for bluestem.

Metals.

New York—Silver—Certificates, 60@61c; bar silver, 60⅝c; Mexican dollars, 48c.

London—Bar silver, firmer, 27¾d per ounce.

San Francisco—Bar silver, 60½c; Mexican dollars, 49½@50c.

New York—Pig iron warrants—Firm $17@17.95.

The firm that fixes the selling price for miners and smelters quotes lead at $4.35 at the close.

Final Session at The Hague.

The Hague, July 31.—When the international peace conference met for the final sitting it was announced that 16 states had signed the arbitration convention, 15 the other two conventions, 17 the declaration for prohibition of throwing projectiles or explosives from balloons, 16 the declaration prohibiting the use of asphyxiating gases and 15 the declaration for prohibiting the use of expansive bullets.

Two Boys Drowned.

Colorado Springs, Colo., July 28.—Donald Matheson and Robert Matheson, aged 12 and 10 years, respectively, were drowned while bathing in Big Sandy creek near Matheson, Elbert county, about 60 miles east of this city. The indications are that the elder boy was drowned while trying to save the life of the younger.

Secretary Hay, as is well known, is a devout Omar Khayyamite. It is not, however, so well known that his collection of editions of the Rubaiyat is second only in this country to that of Nathan Haskell Dole.

France and Paraguay.

Buenos Ayres, Aug. 2.—The French minister here has started for Paraguay in order to re-establish diplomatic relations between France and Paraguay.

MINES AND MINING CAMPS

METALS OF THE NORTHWEST.

Items From the Rich Regions of the Pacific Northwest, News From All the Principle Mining Camps—Personals—Mining Notes.

The bulletin of the American Iron and Steel Association has received from the manufacturers complete statistics of the production of all kinds of pig iron in the United States for the first half of the year 1899. The total production was 6,289,167 gross tons, against 5,869,703 tons in the first half of 1898, and 5,904,231 tons in the second half. The production of Bessemer pig iron was 3,778,937 gross tons, against 3,703,584 tons in the first half of 1898, and 3,633,800 tons in the second half.

Republic Notes.

The south drift on the No. 2 tunnel level of the San Poil mine, is looking well, and a recent sample from the face assayed $139.70 per ton, of which $21 was in silver. The north drift on the same level shows two feet of ore in the face, which gives good values.

The new tunnel on the North Star mine was started June 9th and is now in 198 feet and timbered from the mouth 50 feet. It is gaining four and one-half feet per day in good ground.

A large body of ore was encountered at the mouth of the Palo Alto tunnel.

The prominent properties at the head of Lambert creek that are being worked are the Belcher, Eastern Star and Columbia groups. On all of these active development work is going on. The district lies about 15 miles northeast of Republic and only about one mile north of the state wagon road leading from Republic to Marcus.

The Golden Harvest group will shortly be under development again. The company has been reorganized upon the assessable plan. The old corporation was the Golden Harvest Consolidated Gold Mining Company.

The shaft on the Liberty, in Sheridan camp, is 40 feet in depth. The ledge is said to be eight feet in width. Some fine specimens of ore are exhibited, and it is claimed that the values are also good. Some of the ore closely resembles that in the Zella M. While there is some gold in the rock, the larger part of the value is in silver.

British Columbia.

For the month of June the official returns from the Ymir mine are as follows: Total amount crushed, 2,000 tons (dry weight); gross estimated value of concentrates, $4,500; bullion, $16,500; shipments of crude ore, 46 tons.

At a point on the Kettle river, eight miles from the headwaters and 27 miles from Arrow Lake, via Fire valley, John Worth located a placer claim several months ago. John Lodge, who is an old placer miner, located a claim opposite the discovery, and during the winter cut a ditch 3,000 feet in length in order to obtain water. The diggings are on the bench. Quite a number of claims have been staked, and many men are getting ready to wash the yellow dust out. Seven dollars without saving any of the fine gold is the largest amount yet taken out in one day. The bedrock is from five to seventy-five feet from the surface, and indications point to pay ground, more especially for a hydraulic company. About three miles from the placer ground several gold quartz locations have been made. The placers are located about 90 miles from Grand Forks.

The latest big strikes in the wonderful camp McKinney are on the Balmoral, south of the Granite, and on the well known Pender. The Balmoral has a two-foot vein, and a recent blast showed the whole face literally covered with free gold. On the Pender another four-foot vein has been opened which pans free gold throughout its entire width, and shows a liberal sprinkling of visible free gold.

The Sunset mine, in Deadwood camp, is to be equipped with a $20,000 plant. James D. Sword of Rossland, representative of the James Cooper Manufacturing Company, has closed a contract for a 20-drill Ingersoll-Sergeant compound steam compressor plant, two 100-horse power boilers and a 100-horse power hoist with a sinking capacity to 1,000 feet. The Sunset, the B. C. and the Mother Lode will thus be equipped with the largest machinery plants in the Boundary Creek district.

Situated at the head of Hidden Creek, near Ymir, in a large basin, are a number of properties of merit and which have the indications of making mines. The distance is only about eight miles from Ymir and if the results continue as they have heretofore there will be two or three shipping properties from that locality.

The North Star and Sullivan mines, near Fort Steele, will soon be in shape to make large shipments of ore at slight expenses. The Canadian Pacific is building a branch right to their ore dumps, and inside of the next 90 days the output of both properties can be handled with little trouble. The Gem and Stoney, two properties adjoining the Sullivan group, will probably also be shippers as soon as the railroad is completed. The shaft on the Gem is just getting through the capping of the lead and is coming into ore identical in appearance with that of the Sullivan.

Sinking on the winze from the lower tunnel of the Evening Star, at Rossland, continues. The winze has now reached a depth of 15 feet below the lower tunnel. The winze is in ore all the way down.

On the Tamarac, near Ymir, a very nice strike of ore has been made at the 150-foot level.

On the property called Society Girl, near Moyie, East Kootenai, there is a tunnel being driven to crosscut the lead at a depth of 80 feet, on which three shifts of eight hours each are working. In the St. Eugene there are 18 men at work on the eight-hour shifts, 30 men engaged in building the concentrator and 15 on the flume. It is expected that the concentrator will be ready to run by September 15.

It is rumored that a deal is pending for the sale of the Trail smelter to the War Eagle people.

The work of erecting the stone foundations for the new compressor plant of the Center Star at Rossland is nearly completed.

MINING NOTES.

There seems to be much excitement in the Thunder mountain country, which is about 40 miles a little south of east from Warrens, Idaho. A large number of prospectors are outfiting daily at Grangeville for the scene of the new excitement. From the appearance of the ore it is an extension of the Buffalo Hump district, but yet differs from this in the one respect at least that phonolite has been found. The ore carries considerable free gold, which is plainly discernible with the naked eye, without the aid of a glass. Bill Keeler, well known to all old Coeur d'Aleners as the original locator of the Widow's placer claim, has made several locations which are promising. About 200 prospectors are now in the district. Warrens and Florence are almost depopulated on account of the rush to these new gold fields.

The mill at the Conjecture mine, near Lake Pend d'Oreille, is to be doubled in size.

Dixie camp, Idaho, is full of activity, and development work is being prosecuted with the greatest vigor. This young camp is certainly one of the most progressive in the section, and justifiably so, for it has many fine surface showings.

The famous Mariposa estate, territorially one of the largest gold mining properties in the United States and the first quartz property developed in California, is to be reopened and worked after a suspension of operations for nearly 35 years.

Charles T. Taylor and John M. Fulton of Reno, Nevada, have bought from Samuel Hunt, Orrin Bennett and S. D. Thacker the largest antimony mine in the United States, there being over 2,000,000 tons of high grade ore in sight. The price paid is unobtainable. The mine is located in Humboldt county about 70 miles north of Winnemucca.

On the Jumbo, at Buffalo, Idaho, the vein had run out of ore except for a few small stringers in the face of the tunnel, and the property was looking decidedly black, until a crosscut was started and run only a few feet, when a fine body of quartz was opened, and at last report they had cut six feet, with the farther wall not yet in sight.

Next after Palmer mountain in importance in the Palmer Mountain district, Gold Hill might be classed up with the best, which would include Douglass, Ellmeham and Little Chapacca.

A Complete Review of the Events for the Past Week in This and Foreign Lands—Summarized From the Latest Dispatches.

Paris authorities have approved of the designs of the Lafyette monument.

Don Carlos, the Spanish pretender, has left Venice ostensibly for Austria.

Sunday has been the hottest of the season at Omaha, 99 in the shade at 2 p. m.

Mr. Chamberlain is not prepared to explain situation on the Newfundland question.

It is announced that the Dreyfus court martial at Rennes will open on August 7th.

The C. H. & D. Elevator located in East Toledo, was totally destroyed by fire recently.

Lloyd Tevis, one of the wealthiest and best-known residents of San Francisco is dead.

Antone Baluah, an Australian miner, shot and killed himself Sunday at Juneau, Alaska.

About 200 messenger boys employed by the Postal Telegraph Company, in New York, have struck

The attempt to reopen the Globe smelter at Denver on the old 10 and 12 hour schedule, has failed.

William Armstrong, wanted in Chicago on the charge of jury bribing, has been arrested at Port Angeles, Wash.

Senator Shoup has recommended the appointment of William H. Savidde, of Boise, as census supervisor for Idaho.

H. E. Hutcherson, a former resident of San Francisco, was drowned near Ballard, Wn., while in swimming Sunday.

A sharp earthquake shock occurred in lower California, recently, with vibrations from southwest to northwest. No damage was done.

President and Mrs. McKinley will leave the middle of this week for their vacation at Hotel Champlain, three miles from Plattsburg, New York.

An unknown man fell 40 feet down the Colusa-Parrot shaft at Butte, Mont., Sunday. He was seriously injured, but physicians cannot at this time tell whether he will live or not.

The following are the census supervisors for Washington state: First District, Joseph R. McMillan, Fairhaven; second district, Austin Mires, of Ellensburg.

Dr. Allerdice, formerly of Prescott, Arizona, was found dead in bed at his room at the home of Charles Burton, 234 West Monroe street, in Chicago. In the room was found a bottle of morphine.

The dominion government telegraph *line* is now completed to Five Fingers, and is progressing so rapidly that messages may be sent over it from Skagway to Dawson in less than two months from date.

At the Saint Augustine Parish Athletic Club games recently, James Flannigan, of New York, broke the world's record of 16-pound hammar throwing by tossing it 161 feet 1 inch from a 7-foot circle.

By the disarrangement of the indicator on the hoisting apparatus of the West Colusa mine at Butte, one man was killed and eight others narrowly escaped. The dead man is William Thomas, shift boss.

Joshua L. Carlisle, of Butte, was found dead in a creek in Missoula gulch It is supposed that he had a fit and fell in. He was a well-known music teacher, and an old timer in Butte. He leaves a mother and two sisters.

Four hundred pressers employed in the garment trade struck work for higher wages, and organized a union. They claim their number will be doubled soon and that 700 more garment workers will strike for higher wages.

Chick Davis, of Wilmot, Ark., the negro murderer of William Green, a respected farmer, was overtaken in a corn field today and snapped both barrels of his gun at the pursuing party, and was then fired upon by them and instantly killed.

Late arrivals from St. Michael, Alaska, report that there are at St. Michael about 40 small river steamers for sale. They are the property of unsuccessful prospecting parties that wintered on the Koyukuk and other branches of the Yukon.

Three negroes were lynched near Saffold, Ga., and the mob is hunting for five more who are believed to have been members of a gang that robbed J. E. Ogiltree, agent of the Plant system at Saffold, afterwards binding him and assaulting his wife in his presence.

A coroner's jury at Portland, Oregon, recently brought in a verdict that Clara Fitch, whose dead body was found in Cycle Park recently, was murdered by strangulation, and charging Frank McDaniel, who was with her when last seen. McDaniel stoutly protests his innocence.

W. Banning was found insensible on the bluff overlooking Granite creek, three blocks west of the Republic bank in Republic, Wash. His skull had been crushed in two places, evidently with a ragged rock, as both places had cut through the crown of his hat. There was evidence that he had been slugged.

After a terrible struggle in the surf "Jack" Hogan, a life-saver at Fire Island beach, lost his life in attempting to rescue Albert C. Hubert, a newspaper correspondent, from drowning. Howard B. Bliss, of Cranford, almost lost his life while assisting Hogan. He too, risked his life freely to save that of a stranger.

A jury has for the second time acquitted Avolina Arredondo, the murderer of President Idarte Borda of Monte Video. Among the arguments brought forward in prisoner's behalf was one that it was not proved that the president's death was caused directly by the shot, as no autopsy had been held on the body.

The board of inquiry of the Immigration Bureau have refused to allow the Filipino band to land from the Transport Indiana. The musicians were imported for the Omaha Exposition, and were under contract to F. M. Bailey for a term of six months. On examination the board ascertained that there was not an actor among them all and they were classed as contract laborers.

The American Writing Paper Company, a new trust with a capital of $42,000,000, has taken charge of its newly acquired property.

The Oregon volunteers have turned over all their rifles, what little ammunition they had left, their cups, knives, canteens, haversacks, etc.

Fishermen found the body of Torssol Giero, a Frenchman, in an eddy in Kettle river above the big dam near Cascade, B. C., Tuesday.

It can be stated positively that a majority of the cabinet is now in favor of a change of military rule, both in the Philippines and in Cuba.

A message from Honolulu says: Mauna Loa is still in eruption, three streams of lava flowing down the mountain, and one was within 10 miles of Hilo.

The amalgamation of 28 large plumbing manufacturers of the country has been perfected under the title of the Central Foundry Company, with a capitalization of $15,000,000.

Baron Russel of Killowen, lord chief justice of England and a member of the Venezuelan arbitration commission, entertained his colleagues of the commission at dinner recently.

The name of the First South Dakota soldier who died on the transport Morgan while on his way from Manila is not First Lieutenant Jackson, but First Sergeant Jay L. Rundell.

The Arkansas Valley smelter has reopened. All the furnaces will be running before the end of the ewek. The old schedule of hours is in effect, but wages have been increased.

The Oxnard Sugar Company of Ventura, Cal., has purchased the Patterson ranch, consisting of 5576 acres. The price is reported to be half a million. The land will be planted with sugar beets.

Henry Novals, a negro, who attempted to assault Miss Rosaline Davis of Hattiesburg, Miss., was captured near Bond, Miss., and later identified by the young lady. The mob tied him to a tree and shot him to death.

A. Finley, third officer of the steamship Garonne, now being fitted up at Seattle for a transport, has received word from England that through the death of his father he is heir to an estate amounting to nearly $1,000,000.

President Zelaya of Nicaragua has gone to meet General Terencio Sierra, president of the republic of Honduras, in the Gulf of Conchagua, on the coast of Salvador, with the object of making an offensive and defensive treaty between Nicaragua and Honduras.

The rumors regarding the formation of a China-Japanese alliance are semi-officially denied, and it is asserted that the envoys recently sent to Tokyo were appointed simply to prove the friendly relations between the powers.

Emperor William has elevated Herr Von Bulow, minister of foreign affairs, to the rank and title of count. His elevation is a recognition of his services in securing the Caroline islands for Germany.

$100 REWARD, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure *is the only positive cure now known* to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

LATE TELEGRAPHIC NEWS.

A cyclone struck the eastern portion of Laporte, Ind., and wrecked the boot and shoe store of Butterworth & Co. and leveled other buildings east of the city. It is feared that the families of Jacob Morton and William Stolek, who live on the Kankakee marsh, have been killed.

A bad wreck occurred three miles east of Clark's station near Reno, Nev. The first section of No. 3 eastbound passenger left the rails and was piled up crossways of the track. Engineer Real was killed and his fireman badly hurt, and a number of others of the train crew were shaken up.

It is reported that the revolution in San Domingo is progressing favorably.

Fire at Tupper Lake, N. Y., in the Adirondacks has destroyed a hotel and 15 buildings.

Almost the entire German press issued memorial editorials, the occasion being the anniversary of the death of Prince Bismarck.

General Otis has informed the war department of the arrival at Manila of the transport Valencia. There were no casualties enroute.

President McKinley will give a reception to Admiral Dewey at the White House when the latter arrives in Washington.

The revenue cutter McCulloch has sailed for St. Michael, Alaska. Major E. W. Clark, special treasury agent stationed on the Pribyloff islands, was a passenger on the McCulloch.

Serious forest fires are reported between Clallam and Neah Bay, Wash. Recently there has beeen no telegraphic communication between those points.

The United States transport Hancock, having on board the Nebraska regiment and two batteries of the Utah artillery, have arrived in San Francisco.

The one mile match race between Arthur Zimmerman and Eddie C. Bald at Vailsburg, N. J., for a "guaranteed purse" of $1,000 and a percentage of the receipts, was won by Bald.

Champion Walter D. Mansfield has again broken the world's record for long distance casting. In the accuracy event he made 95 per cent and 85 per cent in the delicacy event.

It is admitted in administration circles that upon the assumption of office by Secretary Root, General Miles will again become a leading factor in the management of military affairs.

Paul Corcoran, the Shoshone county dynamiter, has beeen convicted at the recent term of the district court at Wallace, conveyed to the penitentiary and entered upon his term of service.

Two automobiles beat the Paris-St. Mole express train in a race between those cities, a distance of 226 miles, making the best time ever recorded for an automobile, covering the distance in seven hours and 48 minutes.

The effect of Judge Thornhill's decision in the Iowa court will result in the release of James Doyle, El Paso county's millionaire prisoner. James Burns will comply with the conditions imposed on him by the court and Doyle may go free tomorrow.

One of the biggest quartz discoveries in the history of Idaho has been made on Badger creek, which empties into the Boise river about three miles this side of Twin Springs. The discovery was made by a prospector named Frank Bryant at a point on the creek three miles from its mouth.

The accident on the Erie railroad growing out of the landslide a mile east of Luckawaxon, N. Y., was not as serious as at first reported. Only the fireman and engineer of the derailed engine of the westbound Chicago express, which turned over on the track, were killed, though a number of the express, the vestibuled train for Buffalo and Cleveland, which left New York, were injured.

Despite the wild utterances of Sir Charles Tupper and Sir Wilfrid Laurier in the Canadian parliament at Ottawa regarding the Alaskan boundary dispute and the alarm which these speeches have caused in official circles in London, everyone at the White House, D. C., at the state department, and in cabinet circles generally, laugh at the very idea of a possibility of war with Great Britain on this or any other account.

Open a Bank at Honolulu.

San Francisco, Aug. 1.—The first and only national bank outside of the continental boundaries of the United States is about to be established in Honolulu.

Colonel W. G. McFarland, who was chamberlain to Queen Liliuokalani, has arrived from the islands to perfect the organization of the bank and later to return with gold coin, representing the stock subscribed for it by San Francisco and New York capitalists. A charter for the bank has already been procured from the United States by Perry S. Heath, assistant postmaster general, but it can not be used until congress places the Hawaiian situation under the territorial laws of this country.

Three Noted Passengers.

Liverpool, July 31.—Senator Wolcott of Colorado, Israel Zangwell, critic and novelist, and Tod Sloan, jockey, have sailed for New York on the Cunard line steamer.

Dr. Amos Williams Patten, of the Hyde Park Episcopal Methodist church, in Chicago, has been chosen professor of the new chair of Biblical instruction at Northwestern University.

Alfred Harmsworth of the London Mail is as great a devotee of the automobile as is James Gordon Bennett.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package

CORCORAN FOUND GIULTY.

MURDER IN SECOND DEGREE.

The Leader of the Burke Union Found Guilty—He Was Sentenced For Seventeen Years at Hard Labor in the Penitentiary by the Judge.

Wallace, Idaho, July 29.—Paul Corcoran is guilty of murder of James Cheyne. After deliberating all night, the jury filed into the court room and announced the verdict:

"Guilty of murder in the second degree."

Which meant that Paul Corcoran, leader of the rioters, must spend at least 10 years in the penitentiary to atone for his part in the outrages at Wardner on that eventful Saturday, April 29.

The verdict, while not unexpected, has created great excitement here. It means that the Miners' Union has been hopelessly beaten after one of the greatest legal battles ever fought in American courts. It means more than this, for it is the signal for the vigorous prosecution and severe punishment of the maddened mob that blew up the Bunker Hill & Sullivan mill just three months ago.

At the later session of the court Corcoran was sentenced to imprisonment for 17 years in the penitentiary.

Court then adjourned until September.

The New Recruits.

Washington, July 28.—Returns received by Colonel Ward, the officer in charge of the recruiting service, show that 617 recruits were enrolled for the volunteer regiments yesterday, making a total enrollment to date of 5409.

WANTED

50 MINERS.

Wages, $3.00 Per Day.

WAKEFIELD MINES, Limited.

NOTICE TO WORKINGMEN.

Owing to a reduction in miners' wages caused by the enforcement of the eight hour law, the miners are all idle and the mines have shut down. Therefore all workingmen are hereby warned to keep away from the Slocan and Kootenay country, British Columbia, until present troubles are amicably settled between mine owners and miners.

Sandon, B. C. June nd. 1899.

W. L. Hagler, Secretary Sandon Miners' Union
J. M. M. Benedum, Pres. Silverton M. U.
L. Knowles, Secretary, Silverton Miners' Union.

IF YOUR SUBSCRIPTION IS DUE OR IN ARREARS A BLUE CROSS WILL BE FOUND IN THIS SQUARE. SUBSCRIPTION ARE PAYABLE IN ADVANCE. PRICE, TWO DOLLARS A YEAR.

EDITORIAL OUTCROPPINGS.

The New Denver Ledge poses as an upholder of the Miners' Unions in their demand for the maintainance of the old scale of wages for the altered shift, but it shows not the least hesitation in striking an underhanded blow at the Silverton Miners' Union at the request (or command) of one of the members of the Mine Owners' Association, whose humble servant the Ledge proves itself to be.

The main desire of the Unions, at this present juncture, is to maintain the existing scale of wages, i e $3.50 per shift. Their employers are combined with the avowed intention of forcing down the wages to $3 00 per shift. As a result we have had a lockout in the Slocan for several weeks. But matters have not progressed as the mine managers wished or expected, Instead of becoming meekly submissive or wildly antagonistic, either of which courses would have suited the managers, the miners simply went to work for those willing to pay them their just wages, or occupied themselves in quietly minding their own business. All this time, the mine managers have been reviewing the situation and a good many of them now recognize that they had deceived themselves in their first wild rush to join the Mine Owners' Association, Possibly too, they see the axe in the hands of the back East or Old Country stockholders, and know that they are imperiling their jobs in depreciating any longer the value of their employer's property.

But the mine manager has much the same repugnance to being called a traitor as a true miner has to being called a scab, which is the same thing, and so he dares not break abruptly his irksome connection with the M. O. A.

Acting under circumstances perhaps like these, two managers of properties in the Silverton district, the Wakefield and the Bosun, gave contracts for work to be done in their mines. Each of the managers in question gave verbal promises to the men engaged by their contractors that they should be paid $3 50 for every shift worked. By this they secured the services of good miners in their mines.

Then, in order to discourage the Unions in other camp and also to impress upon their co-signers in the M. O. A. ultimatum that they were not scabbing on their own account, they instigated articles in their press to the effect that these miners were receiving less than Union wages. At least the Nelson Miner quotes the management of the Wakefield as authority for such statements.

The men employed at these mines would not pose as scabs nor would the Union allow them to do so. It is only by presenting an unbroken front that they can hope to win.

Another important feature of the matter is this. The taking of contracts tends to lower wages. When the system is in full swing, the competition becomes keen and the mine-manager secures cheaper and cheaper labor. Thus the contracts given in the Wakefield and the Bosun, although liberal ones, were the thin edge of the cheap labor wedge. Contracts are always renewed on slightly less favorable terms for the contractors. At the Royal Canadian a few days ago the contractors could not renew their contracts so as to ensure a day's pay for their men. So it would have been at the Wakefield and at the Bosun.

The Union asked, through the men at work, for a written as well as a verbal guarantee of the Union wages. In default of this the men were called out.

And the hypocritical Ledge, the friend(?) of the miners calls their action an "Unjustifiable Interference."

The Ledge is a confirmed straddler, with never heart encugh to avowedly take one side of any question. Its office at present is overshadowed by its neighbor, the home of the Northwest Mining Syndicate. It condemns the Miners' Union because they have "deprived their members of employment."

The contractors interested cheerfully threw up their contracts and are not looking for sympathy. The managers of the mines in question must either honestly hire their men or honestly abide by the rules of the Mine Owners' Association. The Miners' Union will not be an accomplice to any halt measures.
