COUNTY COURT.

A sitting of the County Court was held at Princeton on Monday the 17th inst., in the Court House, his honor Judge Spinks of Vernon, presiding.

A number of cases called had to be adjourned on account of defendants being absent, and only two cases were heard which required any considerable time on the part of the court.

The first of these was a suit brought by A. E. Howse against Hugh Campbell, to collect the amount of a note past due. The defendant brought in as an offset a bill for storage on some goods purchased by plaintiff at a sheriff's sale and stored in a building of which the defendant had possession. Mr. Alex. D. Macintyre of Kamloops, handled the case for the plaintiff. The evidence went to show that when the goods on which the claim was made were bought, they were stored in an old work shop by permission of the owner, Capt. F. S. Scott, who agreed with Mr. Howse, the purchaser, that they could remain in the building until wanted.

Mr. Campbell claimed to have received a bill of sale of the shop in question and argued that the agreement made between the former owner of the shop and the plaintiff was not binding on him, and that he was entitled to storage charges. As it appeared that the defendant made but little use of the building and the goods stored were of little value, consisting of old machinery and second hand mining tools. the court appeared to think the claim for storage on the part of the defendant was not well grounded, and accordingly gave judgment in favor of the plaintiff.

The second case was that brought by Cook & Co. against the Rev. E. C. Hardwick to recover the amount of an account for $74.00, which was owing by the latter.

In this case Mr. Macintyre acted for the plaintiff, and a jury was appointed to consider the evidence.

The jury was made up as follows:—Jas. Hislop, C. Richter, S. Spencer, G. E. Winkler and R. S. Collin. Mr. Hislop was elected chairman.

The defendant brought a counter claim against the plaintiff and the evidence involved the transactions of the past three years. Mr. Hardwick, it seems, had at one time worked for Cook & Co., in the latter's store, and while there purchased some grain from the plaintiff, which the evidence went to show, had never been removed from the store. The grain appeared on the account, amounting to $12.00. Before leaving the store the defendant had entered into a partnership in a sawmill business on One Mile Creek, to which he turned his attention after leaving Cook & Co.

Owing to insufficient capital the sawmill company ran in debt and the partners were in danger of losing their plant. At this point Cook & Co., to whom they owed considerable money, came to their relief and paid off the creditors for the machinery, who were pressing for their account. To secure themselves, Cook & Co. took a provisional bill of sale of the mill property, agreeing to hand it back to the original owners when their account had been paid in full and the personal accounts of the different partners. The agreement was that the mill should be run in an economical business-like manner, and whenever possible the three partners should be given preference in the matter of work.

It seems that Cook & Co. gave Hardwick employment the first season, but after that refused to give him work, alledging incompetency as the reason.

On the same ground they had also refused the defendant several logging contracts, claiming that he was not in a position to fill them, and that by depending on him they would hamper the profitable working of the mill.

As the defendant claimed damages on account of not being employed while the mill was in operation, and for the refusal of the plaintiffs to give him logging contracts, the evidence turned almost wholly on the question of his ability to do the work.

He also claimed damages on several other counts but failed to support the claims with sufficient evidence, and they were therefore not allowed to go before the jury.

Messrs. Cook, Webb and Martin gave evidence as to the defendant's inability to do the work required.

The jury were only out a few minutes and returned with a verdict for the plaintiffs. Hardwick's claim for damages on the score of non-employment was thrown out, but the $12.00 for grain was allowed, as to the minds of the jury it had not been proved conclusively that the defendant had ever removed the grain in question from the plaintiffs' store.

Mr. Hardwick conducted his own case, and Mr. Macintyre represented case the for plaintiffs with much ability.

TO WORK ON MARSTRAND CLAIM

Mr. T. J. Swansbourough of this place, has taken a contract to drive a 25 foot tunnel on the Marstrand coal claim, situated about 1½ miles from Princeton up the Tulameen River.

The ground was staked early in the winter of 1900-01 by Mr. Swansbourough, and sold by him to the present owner, who is a well known Vancouver brewer. The license for this claim was the first issued for coal ground in this section.

A fine large seam of coal is exposed on the river end of the claim, and it is on this showing the work will be done.

PROGRESS AT OLALLA.

Mr. W. C. McDougall, Manager for the Olalla Company, visited town early in the week.

Questioned as to the work being done on the Company's properties near Olalla, Mr. McDougall stated that one shift was working continuously on the Bullion group driving a tunnel.

The men were making progress at the rate of about 40 feet a month. They expect to strike the ore body they are driving for in another hundred feet. The tunnel will give a depth of 200 feet on the ore, and the intention is to drift both ways on it when reached.

No work is being done in the long tunnel which is in between 600 and 700 feet. It has been abandoned for the present, because the company wished to reach the ore body inside of two or three months, and the short tunnel was started higher up the hill in order to accomplish this purpose.

Work will be resumed on the lower tunnel later on.

The ore body on the Bullion is an immense one, mostly of a low-grade character, but containing chutes which assay from $17.00 to $124.00 in all values.

In driving the long tunnel Mr. McDougall says a large body of limy ore containing gold-bearing iron, was passed through. This ore will make an ideal flux for the higher grade copper ores found on the group, and from its self-fluxing character it is believed it can be profitably treated for the values contained, independently of the better grades.

The company propose to stope ore from the drifts that will be run from the short tunnel, by spring.

Mining Production Increasing.

The Dominion statistician, Mr. Johnston, has completed an exhaustive comparison of the mining production of the United States and Canada respectively. This shows that the United States has increased its entire output from 1891 to 1901 by 4.11 per head. Canada in the same period increased by 8.14 per head, mainly in gold, silver, lead, nickel, copper, zinc, pig iron and coal. This is nearly double the rate of increase of the United States. Canada's gold output is five sevenths of the entire metal production, against one-seventh in the States. In pig iron, Mr. Johnston, estimates in three years Canada will equal this year's proportionate output of the States, namely, $47 out of every $100 of the total prodnct. In nickel Canada outstrips the States and all other countries. In coal and other fuels Canada's increase is 1.20 per cent. against 75 per cent. in the States. Altogether it is quite a revelation of the wonderful development of Canada's hidden wealth.

LOCAL AND PERSONAL.

Al. Johnston is busy these days hauling lumber to Hedley City.

Born—On the 17th inst., at Granite Creek, the wife of F. P. Cook of a daughter.

On Sunday there will be service at Princeton at 7:30 p.m. Everybody heartily invited. Sunday school at 9:45 a.m. On the following Sunday service will be held at Hedley City.

W. A. McLean, Mayor of Ashnola, left for Hedley on Sunday, to attend to a contract he has for hauling ties for the Nickel Plate tramway.

A party consisting of Judge Spinks of Vernon, A. E. Howse of Nicola Lake and Alex. D. Macintyre of Kamloops, drove in Sunday to attend the sitting of the County Court. Messrs. Macintyre and Howse left Tuesday for their respective homes.

Mr. Chas. Richter drove Judge Spinks to Keremeos Wednesday for the holding of County Court there on the 20th. After the session of the Court they intend to hunt big horn in the Ashnola mountains for a week or ten days.

Mr. F. P. Cook of Granite Creek, spent several days in town attending court business this week.

A. E Howse has just received a carload of Lake of the Woods flour, the best in the world.

JOHN OLIVER'S ADDRESS.

Mr. John Oliver, M.P.P. for Delta, addressed a meeting of his constituents at Ladner on the 8th inst., regarding his course in the legislature last session and the condition of affairs generally in provincial politics.

Mr. Oliver is regarded as an honest, level-headed man, and his stand on various questions during the trying course of last session did him great credit.

In his address he scores Col. Prior heavily for his duplicity in promising the electors of Victoria the Canadian Northern bill would pass, when he knew perfectly well the government had no intention of carrying out the contract.

Dealing with the Coast-Kootenay charter, Mr. Oliver recalled that a few years ago McLean Bros. had thought it necessary to go through the Fraser district working up meetings to endorse their application for a charter for a road that was to be entirely independent of any transcontinental road, and especially the C. P. R. With the backing of the district they got the provincial charter, but straightway went to Ottawa and had their company put under Dominion authority, after which the charter was sold to James J. Hill or his associates. Now the same McLean Bros. have come after another charter, but it is not to the people they appeal for support. Instead, they turn to the government, who, to save them the $600 that a private bill would cost, have had the charter put through as a government measure. Mr. Geo. McL. Brown, of the C. P. R., was very active in opposing Mr. Bodwell's application for a Coast to Kootenay charter, but he showed no anxiety about this McLean application. Was it because there was collusion between the McLeans and the C.P.R.? The contract now entered into had not one word about competition with the C. P. R., nor did it stipulate that the line should run south of the Fraser. Instead, it was aimed to kill forever the scheme to build south of the Fraser, and to give the bonus to a road leaving the C.P.R. only at Spence's Bridge. The government, he maintained, is simply a machine in the hands of the C. P. R., and in further evidence of this he quoted from the bill respecting the Columbia & Western land grant. In this bill, he maintained, the ministers had deliberately put a falsehood into the mouth of the Lieutenant-Governor, in making him send to the legislature a preamble stating that the C. P. R. have abandoned their right to build the fifth and sixth sections, when the records, with difficulty procured from the departments show that this is emphatically not the case. He had never expected to find ministers of the Crown in any British Colony, resorting to direct falsehood of this nature. When they brought in this bill with the glaring falsehood on its face they should have been impeached for treason.

TELEPHONE LINE NEEDED.

As the winter season closes in on us in the Similkameen, it seems to emphasize our isolation from the outside world, and the great disadvantages under which we work on account of our geographical position.

Through the summer season, while the Hope trail is open, it is possible to reach the Coast in two days when urgent matters demanding immediate attention make the trip necessary; but important business negotiations are often delayed, and sometimes entirely broken off through our inability to readily communicate with interested outside parties. During the winter months this means of egress is completely closed and only a mail once a week from Nicola Lake is received. It requires two weeks at present to get an answer to a letter from Vancouver or Victoria, and even by utilizing the telephone line from Nicola Lake to Kamloops, an answer is not obtainable in less than a week.

Working, as we are, under such disadvantageous circumstances, it seems to us the government might show its recognition of this important section by extending its telephone line from Nicola Lake to this place, thus affording us some measure of relief. By so doing we would be brought in closer touch with the outside world and would receive news at the same time as towns on the line of railway.

Mr. Galliher, the member for Yale-Cariboo, is said to intend visiting this section soon, and his coming will provide the people of Princeton with a good opportunity to bring this important matter to his notice.

NOTICE.

Notice is hereby given, that application will be made to the Parliament of Canada, at the next sittings thereof, for an Act to incorporate a Company, under the name of the "Vancouver and Coast-Kootenay Railway Company," to construct and operate a line of railway from a point at or near the City of Vancouver, thence southeasterly to the City of New Westminster, and across the Fraser River, thence easterly by the most feasible route, to a point at or near Midway, in the Boundary Creek District; from a point on the main line of the railway south of the Fraser River, to a point at or near the mouth of the Fraser River; from a point on the main line east of Hope, to a point at or near Nicola Lake; and from a point on the main line of the railway at or near the City of Vancouver, northerly across Burrard Inlet, at the most feasible point, to North Vancouver Municipality, thence westerly to a point at or near the mouth of the Capilano Creek.

WITH POWER to construct and operate branch lines, from any point on the main line of the proposed railway or branches thereof not exceeding in any one case thirty (30) miles in length; and with power to construct, own, and operate, wharves, docks, elevators, and warehouses, in connection therewith; and to own, construct, and operate steam and other vessels, on any navigable waters; and with power to construct, own, maintain, and operate, a suitable ferry from the most convenient point on the mainland of British Columbia, to the most convenient point on the Island of Vancouver, so as to make connection with the City of Victoria, or to connect therewith by the same; to construct, operate, and maintain, telegraph and telephone lines, along the route of the proposed railway or its branches, and to transmit messages for commercial purposes, and to collect tolls therefor; to generate electricity for power and lighting purposes, and for all rights, powers and privileges, necessary, usual, or incidental to all or any of the aforesaid purposes.

OVER 15,000 CUBIC YARDS.

Work Done by Porter Bros. in Phoenix—Stripping for the Granby Mines.

Since Porter Bros. began their contract with the Granby mines, in the middle of the summer, they have stripped an immense area of the surface of the Knob Hill and Old Ironsides claims—removing over 15,000 cubic yards of material. This is undoubtedly by far the largest amount of stripping ever done for one mining proposition in British Columbia.

When it is remembered that now the ore body is exposed for a space of 750 x 250 feet, or not far from 2,000,000 square feet, not counting the space still in process of stripping on the upper part of the hill, some idea of the magnitude of the operations projected by the Granby Co. for the immediate future can be gained. When the gigantic ore crusher, now in process of installation, is in shape for use, it will be no trick at all to quarry out thousands of tons of ore daily and send it down to the crusher over the 1000-foot tram now being built. Mr. Williams' statement a couple of months ago at the Snowshoe banquet to the British editors, that the Granby mines were expected soon to be in a position to ship 5,000 tons of ore per day, appears to be coming true sooner than most persons realize.—Phoenix Pioneer.

Hints on Sharpening Drills.

A recent booklet, issued by Hendrie & Bolthoff of Denver, Col., contains the following practical hints :

"It is advisable, in shaping bits, to make as sharp a tool as the character of the rock will admit. Bevel the edge to a little sharper than 45 degrees angle. This will give strong edge and corners. Make the bit square along the cutting edge, but leave long taper—60 degrees—from bevel of the cutting edge, back on the body of the drill.

"When you shape your drills, leave on the forge until all are finished, then heat to cherry red, but not back on the body of the steel ; dip in clean water, moving slowly down, then out, leaving heat enough in body of drill to toughen the bit by starting temper to straw color. Check color by coiling in slack tub. This method will give a tough, hard bit.

"Among other things not to do are. Heating drills two or three inches on body of steel. Dressing bit with crowning edge. Throwing steel into slack tub while it is yet red, for the body of the steel is hotter than the edge. If this method is followed it is liable to make water checks and spoil the steel.

"It makes too much work for the miner, for in putting down his holes a bull bit cushions on the pulp, taking off the effective force of the hammer or machine. A bit with good clearance passes through the pulp, and the full force of the blow is carried to the cutting edge of the bit.

"A bit should cut and not pulverize. The corners do the work.

"In tempering do not hold the drill still at one depth in the water, as this will cause water line and danger of the bit jumping off."

Subscribe for the STAR, only $2 per annum.

A shoot of ore with an iron gangue has been encountered in the Mother Lode, in one of the upper quarries, known locally as the sulphur ore quarry, from the ore having sufficient sulphur in association with iron and silica to facilitate the extraction of its copper values. As an insufficiency of iron in the gangue of the ore is one of the chief drawbacks the local smelters have to contend against, the news of the discovery was received at the B. C. company's smelter with much satisfaction, especially as the shoot of "irony" ore was stated to be from four to five feet in thickness.

RICH ORE IN THE LE ROI

Another Good Strike Made in the Big Producer.

A report comes from Rossland that another rich strike has been made in the Peyton tunnel, one of the minor workings of the Le Roi mine. A crosscut tunnel run to pick up the ore near a fault crossing the original workings broke into three and a half feet of high grade ore, fully up to the standard of ore previously mined in the workings.

Two machines are now at work in the new strike and the shipments therefrom will be substantially increased. The Peyton tunnel is a side issue to the Le Roi workings, but it is an exceedingly profitable one. Five cars have been shipped recently, the first of which carried average values of $70 per ton and the balance something over $30 per ton. The cost of production, including smelter charges, is approximately $8, so that the ore yields a handsome margin of profit.

Lacked One Brick.

The late distinguished architect, Richard M. Hunt, says the New York Times, used to relate that in his younger days, while supervising the erection of a brick building, a recent arrival from Cork applied for a job and was employed as a hodcarrier after being instructed that he must always carry fourteen bricks in his hod. One morning the supply of brick ran out, and do his best the new man could find but thirteen to put in his hod. In answer to a loud yell from the street one of the masons on the sixth story staging yelled down:

"What do you want?"

"T'row me down wan brick," said Pat, pointing to his hod, "to make me number good."

It Didn't Matter Anyway.

The following explanatory note accompanied a young man's wedding gift to a friend: "My Dear Girl—You will find in the box a thingamajig, which has something to do with eating. It's a cross between a harpoon and a hayfork. It may be for spearing pickles or stacking chopped cabbage. Anyway, you will be so happy that you won't care."

A number of young girls in Hoboken, N. J., have been praying in church for husbands. Their prayers have not yet been answered, but some of their neighbors who have been out hustling in the meantime have been much more successful.—Great Falls Leader.

Notice of Forfeiture.

To ALEXANDER ALLAN, of Rossland, B. C.

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the Mineral Act, being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the Cracker Jack and the O. I. C. Fractional Mineral Claims, situate on Twenty Mile Creek, in the Osoyoos Mining Division of Yale District, British Columbia, together with all costs of advertising, your interest in said claims shall become vested in your co-owner Louis Hedlund, of Hedley City. Free Miner, who has made the required expenditure. The amount due by you in respect of each of the said mineral claims, not including costs, is $56.66⅔.

Dated this 25th day of October, 1902.

LOUIS HEDLUND.

Notice of Forfeiture.

To SIDNEY M. JOHNSON, of the City of Greenwood, British Columbia:

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the "Mineral Act," being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the "June Bug" mineral claim, situate on Copper Mountain, in the Similkameen Mining Division of Yale District, British Columbia together with all costs of advertising, your interest in said claim shall become vested in your co-owner C. M. Snowden, of Princeton, Free Miner, who has made the required expenditure.

The amount due by you in respect of said mineral claim, not including costs, is $51.25.

Dated this 20th day of Sep., A.D., 1902

C. M. SNOWDEN.

Notice of Forfeiture.

To SIDNEY M. JOHNSON of the City of Greenwood, British Columbia:

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the "Mineral Act," being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the "Lone Star" mineral claim on Copper Mountain, in the Similkameen Mining Division of Yale District British Columbia, together all costs of advertising, your interest in the same shall become vested in your co-owner, James Snowden, Free Miner, who has made the required expenditure.

The amount due by you in respect of the said mineral claim, not including costs, is $45.62½.

Dated this 20th day of Sep., A. D. 1902

JAMES SNOWDEN.

Notice of Forfeiture.

To GEORGE H. COLLINS, of the City of Greenwood, British Columbia.

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the "Mineral Act," being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the "Little Pittsburgh," "Whale," "Bullon Beck" and "Florence" mineral claims, situate on Twenty Mile Creek, in the Osoyoos Mining Division of Yale District, British Columbia, together with all costs of advertising, your interest in said claims shall become vested in your co-owner, Thomas Bradshaw, of Fifteen Mile Creek Free Miner, who has made the required expenditure.

The amount due by you in respect of each of the said mineral claims, not including costs, is $25.62½.

Dated this 15th day of August, A. D. 1902.
