SIMILKAMEEN STAR

Published in the Interest of Princeton and Similkameen District.

VOL. III, NO. 16. PRINCETON, JULY 26, 1902. $2. PER YEAR

LOCAL AND PERSONAL.

Messrs. A. R. and F. J. Barrow went out over the Hope trail on Sunday last.

Mr. Emil Voigt has a force of four men at work driving the tunnel on the Verde claim.

Messrs. Gallinger and Thynne drove down from Boulder Creek and made a short stay in Princeton last week.

Messrs. Wardle, Thomas and Day returned Thursday from doing assessment work on the Triangle claim on Copper Mountain.

Mr. Geo. Aldous left for Roche River on Tuesday last to do assessment work on a claim in which he is interested, adjoining the Red Star.

W. Wilson left for Hedley camp Wednesday to do assessment work on his claim the Crown Point, located in St. Mary's Canyon back of the Nickel Plate mine.

F. W. Groves, P. L. S., left Wednesday for the head of Five Mile Creek, to survey a ranch belonging to G. P. McAlpin. I. Laughead is assisting him.

Mr. and Mrs. R. H. Parkinson and Mr. L. M. Lamb returned to Fairview on Sunday last. While here Mr. Parkinson surveyed the Miss Dundas claim on One Mile Creek.

Mr. Ernest Thomas shows some very fine specimens of chalcopyrite from the Triangle claim on which assessment work has just been finished. Similar samples gave assay returns of 22 per cent. copper, $5.00 in gold, and $2.50 in platinum.

W. A. Davis and Neil Campbell have gone up to Copper Mountain to assist Robt. Stevenson in doing assessment work on the Jubilee. In working on this claim last season, Mr. Stevenson took out samples of copper glance that assayed $120.00 to the ton.

Mr. and Mrs. E. Waterman and Mr. A. Hickling were driven to Penticton this week by Mr. Chas. Richter. The party left on Wednesday morning. Mr. and Mrs. Waterman intend spending a week or two visiting different points in the Okanagan Valley, while Mr. Hickling will go through to the Coast.

Captain Brigman, one of the largest shareholders in the Mira Monte Mining Co., Ltd., has been visiting the district looking over the properties of the company. He expresses himself as highly pleased with what he has seen of the mineral riches of this section.

Mr. T. Robertson who has been prospecting for a month or more near the head waters of the Main Kettle River, paid Alexander Sharp, M. E., a short visit this week. He is returning to the Slocan to take his old place at the Slocan Star as assayer and surveyor.

RICH STRIKE OF GOLD ORE

On Claim Called the Porphyry Dykes Belonging to the Mira Monte Mining Co., Ltd.

ASSAYS OF $248.00 TO THE TON OBTAINED.

The big porphyry dyke above this place on the Tulameen River has long been a puzzle to mining men. It has attracted attention for a number of years, and has been staked and restaked periodically ever since the placer excitement that made Granite Creek famous; but assays from it were, as a rule, disappointing, and claims were usually allowed to run out.

It remained for the Mira Monte Mining Co., Ltd., to discover that the big dyke contained large chutes of high grade gold ore.

Messrs. Rogers and Silverthorne, who are members of the company, have been engaged for some time driving a tunnel on the Porphyry Dykes, which is one of a group of five claims they have located on the face of the big dyke where it slopes toward the Tulameen River.

The tunnel is now in 120 feet, and Mr. Rogers reports that several large leads have been cut, from one of which the phenomenal assay of $248.00 in gold was obtained. The gold is partially free milling, it being possible to crush the rock and pan considerable of it out; but most of it is associated with iron sulphurets, and will require to be treated by the cyanide process.

COAL ON SUMMERS CREEK.

Wm. Martin has been prospecting the coal lands on Summers Creek, which he located last year for Redding and O'Brien. He began work on a showing of "coal blossom," into which he ran a tunnel about 16 feet in length, and was rewarded by striking a seam of very good looking coal between 2½ and 3 feet wide. The claim on which Mr. Martin has been working is about 8 miles north of Princeton. His find demonstrates the fact that our coal measures are not limited to the basin between the Similkameen and Tulameen rivers, but extend for some distance north, between One Mile and China creeks.

ON THE HEAD WATERS OF THE SKAGIT.

Messrs. Richmond and James returned this week from a trip up the Roche River, during which they crossed over the Boundary line and descended to the head waters of the Skagit.

Mr. Richmond says he saw evidences of the presence of prospectors in that district many years ago.

The country is a very likely looking one from the prospectors' standpoint, but they saw nothing on their trip that they wished to locate, the isolation and lack of transportation facilities making only high grade gold properties desirable. Mr. Richmond says he is satisfied an extremely low pass exists between this country and Washington.

BEAUTIFUL SPECIMENS.

Some of the finest specimens of copper ore yet seen in Princeton, were brought in last Monday from the Red Star claim on Roche River, by Messrs. Laughead and Hitchings. One specimen, which will weigh about 50 lbs., is on exhibition at A. E. Howse's store, and the other, which is a trifle smaller, may be seen at the Tulameen Hotel.

The copper is in the form of black and red oxide and chalcopyrite. The specimens will run in the neighborhood of 50 per cent. copper.

The Red Star claim, from which they were taken, belongs to Messrs. Pouwels and Bonnevier, who are now busy driving a tunnel on it.

Mr. D. Coutney is working on his claim, the Tulameen, which adjoins the Porphyry Dykes group belonging to the Mira Monte Mining Co. Mr. Coutney states that he has uncovered a large contact lead which gives good assays in gold and also carries platinum in valuable quantities. He is satisfied the rich gold lead on the Porphyry Dykes from which the large assay was obtained, runs through the Tulameen claim.

THE HOLDFAST.

French Bros. have returned from doing assessment work on the Holdfast claim on Kennedy Mountain. They ran an open cut 21 feet long and 7 feet wide. The lead on the Holdfast is traceable for a distance of 600 feet, and from surface indications is in the neighborhood of 100 feet wide. It adjoins the Magnetic on the north, and appears to be a continuation of the big lead on that claim. Assays from the Holdfast show 5 per cent. copper and $2.40 in gold.

BRING IN YOUR SAMPLES.

The mineral museum at Victoria, which is supposed to show representative ores of the different mining sections of the province, is said to have no specimens worth mentioning from this district. This is not as it should be. The Similkameen can show some of the finest samples of ore in B. C.

If prospectors will bring in specimens to the STAR office, arrangements will be made for forwarding them to the capital. Samples weighing from four to five pounds are the most suitable.

HOTEL ARRIVALS.

HOTEL PRINCETON.

J Thynne, Otter Valley; R B Dickson, One Mile Creek; Geo Goldsbrough, Vancouver; Thos Arnott, Greenwood; Geo Wardle, Copper Mt; W K Richmond, Ashnola.

DRIARD HOTEL, NICOLA LAKE.

H C Holden, R Spinks, Kamloops; J Schulst, Anaconda, Mon; H Goodisson, Quilchena; M P Stewart, J W Johnston, Jas Haddock, wife and child, Ashcroft; W Blewett, Baker City.

HOTEL JACKSON.

T A Rogers, Granite Creek; A Gallinger, Boulder Creek; T G Matthews, New Westminster; Judson Post, Grand Forks; S Spencer, Five Mile Creek; A Lamont, Ashnola; Capt Brigman, Oakland, Cal; John Caff, 20 Mile.

HOTEL TULAMEEN, PRINCETON.

Walter Ross, Phoenix; F Bailey, A B Roberts, Aspen Grove; F W Groves, Kennedy Mountain; T R Robertson, Kettle River; I Laughead, Roche River; Neil McLennan, Jno Riddell, Boulder Creek; Geo McCoskery, Summers Creek; H W Brainard, Notch Hill.

NOTICE.

THIRTY days from date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal on the following described lands:—

Commencing at Initial Post, thence running 80 chains north, 80 chains west 80 chains south, 80 chains east, to point of commencement.

Said land is situated on the north bank of Whipsaw Creek, and joining the Scott Ranch, containing 640 acres.

F. E. WILSON.

THE COKE FAMINE.

The Boundary country is suffering from a lack of coke caused by the coal miners of Fernie going on strike. Commenting on the matter the Midway Dispatch says:

"A serious result has followed upon the strike of the coal miners at Fernie. Those employed at Michel have gone out in sympathy, and between the two the output of coke has about ceased. In consequence the smelters at Grand Forks and Greenwood have had to suspend operations, while the Granby people, for the first time in five years, have been obliged to lay off their miners at Phoenix. Several hundred men in all are affected. So the agony multiplies and all because there is no statute on the provincial books compelling the arbitration of industrial disputes. While directly the coal miners and employing company may not suffer much through the strike, yet indirectly the whole country suffers. The railroads find their traffic receipts reduced, business men have their sales contracted, and hundreds of miners and smeltermen are thrown out of employment. A feeling of great uncertainty is engendered that will take months of prosperity to eradicate. Compulsory arbitration is designed to meet just such cases as exists in southeastern British Columbia, and the local government can do no better than follow the example of New South Wales and adopt the New Zealand law. Anything that will lessen disorder and ensure industrial peace is to be commended.

VARIETY OF RESOURCES.

The finding of rich gold ores between this place and Granite Creek is another discovery that goes to prove the great variety of mineral wealth in this district.

Its fame rested primarily on its placer deposits. When the richest of these had been worked out, prospectors began to turn their attention to mineral in lodes, with the result that large bodies of copper-gold ores were located, many of which will yet make highly profitable mines.

Following the copper excitement, the interest of both home and outside investors was centred on our coal measures and three diamond drills are now at work proving the size and grade of the coal seams known to exist between the Tulameen and Similkameen rivers.

Only recently it was discovered that some of our copper ores contained platinum in valuable quantities, and as if to cap the climax, we now find big leads of gold-bearing porphyry within a few miles of the town.

It would be difficult to point to another district in B. C. possessing such a variety of mineral wealth as the Similkameen. If our legislative fossils could only be awakened to our great need for transportation facilities, or the people of the coast cities aroused to the fact that they are losing great business opportunities by keeping this rich section isolated, it would not be many months before a road would be building from Vancouver to Midway.

EDITORIAL COMMENTS.

Bro. Lowery of the New Denver Ledge remarks: "Millions in Klondike gold will go to Seattle this year simply because the Canadians are too slow to get their mint in operation. The Dominion government is more alive to holding office and feeding pap-suckers than it is to the great interests of this rich country."

Speaking of the Canadian Pacific Railway Company, the Canadian Magazine for July says: "For the six months ending December 1901, the earnings on the common stock were 13.37 per cent., of which 5 per cent. was paid in dividends. The earnings since that date have been considerably greater, and with a good crop in the West, will equal more than 15 per cent. for the year 1902." What an excellent argument in favor of government ownership of railways the above facts furnish?

The STAR received last week a letter from a Hamilton subscriber, Mr. Fred Miller. Mr. Miller states that there are a number of people in his city interested in companies operating in this district, and that they look to the local paper for reliable news concerning them. Residents of a community such as this are too apt to lose sight of the valuable work done by their home paper in giving outside investors the facts regarding the country's resources, and the opportunities for investment.

Subscribe for the STAR and get the latest mining news—only $2.00 per annum.

NOTICE.

THIRTY days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal on the following described lands:—

Situate on One Mile Creek, about 2½ miles north east of Princeton and joining C. Summer's coal claim on the north, commencing at No. 1 post,

And running 80 chains south, 80 chains east, 80 chains north, 80 chains west, back to post, in all 640 acres.

The Olalla Company.

Says the Vernon News:

"A letter from A. A. Watson, the well known assayer of this city, in the current issue of the Engineering and Mining Journal deals with what is referred to as unfair criticism of the Olalla Copper Mining and Smelting Company, in an April issue of the same periodical and continues:"

"I have personally examined the claims owned by the Olalla Company, and reported upon them, as has also Neil Cachrane, a mining engineer of Rossland, B. C. Our reports were favorable, and may be obtained, I think, by application to the company.

"Personally, I consider that the development work to date on the Olalla claims has brought to view some of the most valuable properties it has been my privilege to examine. From present appearances the Olalla property will furnish a large tonnage of pay ore, and with the company owning its own smelter, situated as it will be in a most favorable position (having in mind extent of site, water power, and proximity of mines), it should earn large profits. In view of subsequent development, I see no reason for altering in the least degree the opinion I expressed after a technical examination last year.

"As regards the capitalization of the company ($8,000,000, I consider it, in view first of the character and quantity of ore the company has, and secondly, of the extent of its plans, that it is quite conservative.

"The company's plans involve the construction of a local road of over 60 miles from Princeton to Penticton, and the construction of a smelter of large capacity for the treatment of its own and custom ores. It should be remembered that the original vendors of the property accepted a portion of the company's stock in payment in full for the properties. The price which the company places upon its first issues is certainly an evidence of sincerity of purpose, as well as of wisdom, and it will issue sufficient money to enable it to bring its properties to a profitable basis, which is exactly what the shareholders desire and expect."

The Colorless Newspaper.

This is it.

Every true newspaper man on this broad continent, and every newspaper reader who takes the trouble to analyse his own opinions on the subject, will heartily agree with the conclusion of the New York Evening Post that "colorless newspapers are not good property." In the anxious effort to offend nobody (an ambition impossible to attain under any circumstance) they disgust everyone, for to suppose that the public likes blind flattery and time-serving is but to underrate the general intelligence.

Happily there are multiplying instances of newspapers that are highly successful in the business as well as in the influential sense, though entirely and absolutely independent, ready at any time to speak their minds freely in the face of party or of local prejudice. Their owners have made the fortunate discovery that there is money in courage, ability, and—it may be said newspaper individuality. People will not long be imposed upon by "editorialene" any more than by repeated newspaper fakes or exaggeratipn of primarily unimportant facts.

Abiaham Hayard heard a cabman under his window in 1870 rebuke a newsboy for foisting upon him a fraudulent Echo.

"If you goes on selling me battles as haven't been fought," he said, "I'm d——d if I don't kick you."

When newspapers owners are given to understand that such will be the the indignant attitude of the public toward insincere or flabby writing on the editorial page, as well as toward invented or hysterical or namby-pamby news in the other columns, they will encourage more than they do now the free expression of well-considered views.

And when the public makes up its mind that its most efficient servant is an absolutely honest press—honest in the smallest things of local interest as well as in matters of nationally important policy—and gives up the bad habit of stopping its individual paper (or threatening so to do) whenever it locates an item that does not suit its particular and personal view, so soon will a great improvement in the press be certain of accomplishment.—Ex.

Notice of Assignment.

Pursuant to the "Creditors' Trust Deeds Act, 1901"

Notice is hereby given that Edgar Moir Allison, of Princeton, in the District of Yale and Province of British Columbia, ranchier, has made an assignment of all his personal property, real estate, credits and effects, which may be seized and sold under execution, to Herbert Webb, of Princeton, aforesaid, store manager, for the purpose of paying ratibly and proportionately, and without prefe rence or priority, all his creditors.

Said assignment was executed by the assignor and by the assignee on the 12th day of July, 1902.

A meeting c f the creditors of the said Edgar Moir Allison, will be held at the office of J. Charles McIntosh, Barrister-at-Law, Bridge Street, Princeton, on Thursday, the 31st day of July, 1902, at the hour of three o'clock in the afternoon.

All creditors are required to file with Herbert Webb, the assignee, full particulars of their claims and the nature of their securities, if any, held by them, and notice is hereby given that af ter the third day of September, 1902, the assignee will proceed to distribute the assets among the creditors of those whose claims or debts he shall have received notice, and that he will not be responsible for the assets or any part thereof so distributed to any creditor of whose debt or claim he shall not then have received notice.

Dated this 14th day of July, A. D. 1902.

Coronation Preparations.

Bring back Richard Harding Davis from unsteady Martinique,
Where he's writing up Mont Pelee for a thousand bones a week;
Call off Kipling from his lashing of the backward dogs of war,
Train him down, until he's equal to his record speed once more;
Buy a rhyming dictionary for the laureate to read,
Get the scented pink notepaper and the tinted ink he'll need;
Hale from out the wilds of Kansas Mr. William Allen White,
Who can take the British journalist and show him how to write;
Line them up, with pad and pencil, in a glittering array,
For without them you can never have a coronation day.

Get the Lord of the Coal Cellar and the Keeper of the Snakes,
And the Lord High Grand Past Master of the Shovels, Hoes and Rakes.
Bring the Curator of Dachshunds and the Master of the Goats,
And the Lord High Head Inspector of the Royal Overcoats;
Take the Reverend High Butcher and the Honored Grocery Man.
And the Honorary Keeper of the Palace Coal Oil Can,
Tog them out in robes of honor that it took ten years to make,
With trainbearers by the hundred marching proudly in their wake.
Stand them up to make the borders of the wide and rose-strewn way,
Which will lead unto the palace on glad coronation day.

Mr. William Waldorf Astor, with his accent, will be there,
With a coronet of diamonds worth ten million on his hair,
Princess Blank and Duchess Dashleigh, Lady This and Madam That,
Each in jewel-set tiara or an acre picture hat,
All in gowns well calculated to make every other dame
Scorch and wither up in envy's cruel, all-consuming flame.
Give them place in all their glory when the great parade goes by,
Let their splendor fill with beauty every wonder-stricken eye,
And when you have got together all that marvelous array,
Well, perhaps, you'll need King Edward on the coronation day.

—Portland Oregonian.

Editors in some of the Western States have a unique way of prodding up delinquent subscribers, as the following will indicate: "If you have frequent headaches, dizziness, fainting spells, accompanied by chills, cramps, corns, bunions, chilblains, epilepsy and jaundice, it is a sure sign you are not well, but are liable to die at any minute. Pay your subscription a year in advance, and thus make yourself solid for a good obituary notice."

The land is situated in Otter Valley.

GEO. McCULLOUGH.

Nicola, May 22, 1902.

Notice of Forfeiture.

To WM. HOPKINS and THOMAS GRAHAM.

You are hereby nocified that I have expended the sum of ($100.00) one hundred dollars in labor on the April Fool mineral claim, in Ollala Camp.

In order to hold said claim under provisions of Section 24 of the Mineral Act, such being the amount requlred to hold satd claim for the year 1901. And if at the expiration of 90 days of publication of this notice you fail or refuse to contribute your portion of the expenditure required under Section 24, together with all cost of advertising, your interest in said claim shall become vested in the subscriber.

Dated at Keremeos this 2nd day of June, 1902.

Jun-7 By HALLIBURTON TWEDDLE.
