Vast coal and water powers for industries and lighting

AID THE PROGRESSIVE

B. C. Government will Help Farmers and Producers in Enterprises.

Cooperative Companies Encouraged by Loans Up to 80 Per Cent. of Capital.

The Department of Agriculture has taken prompt steps to make available to the fruit growers and farmers of the province the benefits which are provided under the legislation of last session.

Not only has provision been made to permit a loan to cooperative companies of eighty per cent of their total capital, but the department has gone furher and has arranged to place at their disposal the services of an expert, who will give them the benefit of his long experience. The appointment of R. Robertson, of Vancouver, will give general satisfaction, because he is generally credited not only with the expert knowledge, but with the organizing ability as well, to make a success of any marketing proposition.

This bill, the provisions of which do not seem to be generally known, is so drastic as to merit a rather extended reference. Under it twenty-five or more persons in any locality may organize for the following purposes:

(a) The manufacture of cheese, butter, cider, jams, pickles, and spray mixtures, and the drying and canning of fruit and vegetables;

(b) The keeping of swine, and the manufacture and sale of the various products resulting therefrom;

(c) The dealing in poultry, eggs, milk, cream, and all other agricultural and horticultural products and in supplies required by patrons of such associations;

(d) The dealing in flour, feed, fertilizers, spray materials and their accessories and in foods of all kinds for farm stock, for the purpose of supplying the same to the patrons of this association:

(e) The erection and maintenance of a cold-storage plant and the sale of ice; and

(f) For any purpose which may be approved by the Minister, having for its object the development of agriculture.

Dairy Associations.

Provision is made that dairy associations may, by complying with certain conditions, come under the operation of the act.

The conditions with which any such association must comply are set out as follows:

(a) That the district within which it proposes to operate is competent and fitted for its support, and that there is a reasonable prospect of the same being a financial success:

(b) That the association has acquired the necessary plant and buildings for carrying on of its operations, or a site upon which to erect such necessary plant and buildings;

(c) That the acquisition of such plant and buildings or that the plans of the buildings and the nature and cost of the proposed plant and equipment have been approved by the Minister; and shall transmit to the Minister a statement verified by the statutory declaration of its president, secretary, or manager, showing:

(d) Number of members of the company or association:

(e) The amount of stock paid up, which must be at least twenty per cent of the subscribed capital:

(i) All mortgages or charges (if any) standing against the property of the association:

(g) Such other information in its possession or power as may be called for by any regulations framed under this Act or which the Minister may require.

The loan in each case is to be for twenty years, with interest at 4 per cent and with provision for a sinking fund to permit of its payment at the end of that period.

Under such an act it is evident that great care must be exercised to prevent abuse almost as great as the neglect of which complaint has hitherto been made. An irresponsible minister or executive might invoive the province in a financial tangle that would do much to defeat the good objects which the statute seeks to obtain.

While we regard this as improbable, yet the Lieut.-Governor-in-Council will doubtless seek the advice of advisory boards in each district, whose duty it will be to see that the department is properly advised with respect to local applications. We understand Mr. Robertson will hold a number of meetings in the Okanagan Valley, and doubtless the conferences then held will result in some definite plans being evolved. We regard the whole movement as a significant forward step in the development of the co-operative spirit in British Columbia. By it the people of the whole province, through their representatives, come to the aid of the one industry which has received the least aid from the fortunate circumstances in which our people today are found.—Fruit and Farm.

DOMINION DAY.

A meeting of citizens was held in the courthouse last Monday evening to provide for the annual celebration on Dominion Day. There was a fairly representative attendance and every thing augurs well for the success of the celebration. C. E. Thomas occupied the chair and B. L. Smith was secretary. Committees were appointed as follows: Finance—C. Summers, N. Huston, G. G. Lyall, S. Gibson, J. Gellatly. Dance—S. Gibson, Eric Anderson, Len Huston. Race—C. Summers, N. Huston, J. Gellatly. Sports—W. H. Russell, R. W. Moeran, K. C. Brown. Drilling—W. Wilson, C. Willarson, T. Dignan. W. Martin was appointed marshal. The meeting adjourned to meet again on Thursday evening.

The local lodge of Oddfellows are preparing to build on their lot corner of Fenchurch av. and Bridge st. The building will be 100x50, two story.

The cold, backward weather indicates high water. Snow is plentiful in the mountains and all that is necessary to make the rivers boom is hot sun for a few days.

MINES AND MINERALS

Creosote as a By-Product of Coal has Very High Economic Value

Miners and Prospectors Soon in Hills —An Active Season in all the Camps.

One million, four hundred thousand gallons of creosote could have been produced in Western Canada in 1910 if the coal that was converted into coke had been coked in by-product ovens. With the exception of the creosote produced from the by-product ovens at Syduey, N. S., and at Sault Ste. Marie, Ont., no creosote is produced in Canada. This valuable wood preservative is imported from Britain and the United States, but the high cost of the imported article has restricted its use very materially. In view of the steady and even rapid rise in the price of almost all classes of wood products the importance of creosote is readily seen. Some of the millions of tons of coal underneath Princeton might be converted into creosote.

Jensen & Reiley, who are working on the Christmas Box claim, in the Tulameen district, have uncovered what is said to be one of the best ore bodies yet ever found at the surface. Mr. Dornberg has arranged to work the Robertson and Connolly properties next to the Treasure Mountain group.

Jas. Kelly, of Tulameen, has sold the Gold Mountain mining claim to Spokane people. Mrs. Bresneham is interested in this section and will direct mining operations. Mr. Kelly has been located on Kelly creek for 18 years and has done a lot of placering.

H. W. Guthrie and W. Lowe are opening a livery stable and packing business at Tulameen.

Jas. McCauley, mining man, arrived in town this week.

Andy Anderson is working a bench on Granite creek.

J. Wheeler is placer mining near the old Pogue on Granite creek.

P. H. Kennedy has returned from Copper Mountain where he is interested in the Annie L. mining claim

DOMINION FORESTRY.

July 7-9 has been fixed as the date of the Dominion Forestry Convention to be held in the City of Winnipeg. From all the provinces of the Dominion, and from many of the states south of the line, there will assemble an exceptional gathering for the consideration of problems connected with the preservation and extension of the forest resources. Prairie planting and woodlot management will form a large part of the proceedings but other matters, particularly the ever pressing problem of forest fire protection, will be fully discussed. The sessions will be held in the hall of the Industrial Bureau, and the Provincial Government, the City of Winnipeg and other organizations will join in welcoming the delegates.

The railways are granting to delegates convention rates, and it is expected that through the far-reaching importance of the discussions of the Convention, and the added attractions of Winnipeg and the West at the beginning of harvest, there will be an unprecedented attendance.

Full particulars as to rates, program, etc., may be obtained from the Secretary of the Association, Mr. James Lawler Canadian Building, Ottawa.

DUKE OF CONNAUGHT.

The Canadian Club in London, Eng., recently received a visit from the Duke of Connaught, Governor General of Canada. At the banquet in his honor he spoke in part as follows:

'I do not know a prouder position,' His Royal Highness said, 'for any Englishman to hold than that of His Majesty's representative as Governor General of Canada. When my late brother asked me to accept this high position, and the offer was renewed, after his death by our present gracious sovereign, I felt doubt whether I could do justice to so high a position, but I had no doubt that I should find friends in Canada today, as I did forty-three years ago.

'Gentlemen,' the Governor-General went on, 'since I have been in Canada, the last year and a half, I have felt more and more that I had been able to gain the keen sympathy—I venture to say, affection—of the whole Canadian people (cheers). I am sure you will believe me when I say I have never spent a happier year and a half.'

'To those Englishmen who have not been there,' he declared, 'I say the sooner they go the better. Canada is moving by leaps and bounds.'

The Duke also paid a tribute to the enterprise of the Canadian railroads, but expressed the hope that the Government might see its way to promote great highways as well. He expressed deep gratitude for the sympathy shown the Duchess, 'who on two occassions had been at death's door.'

LOCAL AND GENERAL.

Wilson Bros. have the contract for building a cottage, 28x30, on the top bench overlooking town, for R. W. Moeran. They are also erecting a milk dairy and driving shed for Geo. Aldons on his ranch.

A. E. Howse of Nicola arrived Monday on a business visit and will remain about a week.

W. C. McLean is offering for sale or rent his temperance hotel at Ashnola. With the ever increasing traffic to the surrounding mines and the trade generated by the construction of the great transprovincial auto road and tourist routes there is no doubt a hotel will be a good business venture at Ashnola.

In the police court presided over by Justices of the Peace Waterman and Thomas, the case of Orr for stabbing Phelps was heard on Monday. The prisoner Orr was given one week sentence and was defended by K. C. Brown.

LOCAL AND GENERAL.

Baby Carriage For Sale.—Apply Mrs. S L. Frazier.

C. E. Thomas and H. H. Avery have been appointed by the provincial government Official Members of the Board of Directors for the Princeton hospital, until the 30th day of April, 1914.

I. Knudson has recently put up a large bake oven, built by W. Martin, bricklayer.

N. Huston has added a new and comfortable bus to his livery and transfer business.

Two or three days of warm weather have filled the river banks with swift running water resembling that ancient and delicious food—peasoup.

Max Wilson is around again after an illness which confined him to bed for a few days.

N. L Thompson of New York was in town this week and gave a fine exhibit of moving pictures. Mr. Thompson is bidding for the Canadian rights of the Edison talking pictures.

J. Ayers, an oldtime and faithful employee of Thos. Ellis at Penticton was in town recently.

P. W. Gregory, P.L.S., has recently established the boundaries of Similkameen townsite. He will also survey all the preemptions on D'arcy mountain for the government.

Wm. Orr, the assailant in the recent stabbing affray was sentenced to one week in jail by Magistrates Thomas and Waterman in court held on Monday last.

The marriage of Dudley Herbert Edwin Cornell-Chads to Miss Laurel May Vayne Webster took place at Peterborough, Ont., recently. The groom is a son of Admiral Chads and will reside in East Princeton, having accepted a position in in the cement works.

Wilson Bros., builders and contractors, have the contract for improving and adding a small conservatory to the residence of E. Waterman, Fenchurch av.

Argentine Fraction mineral claim: situate in the Similkameen mining division of Yale district. Where located, Voigt mountain.

Take notice that I, George W. Aldous, Free Miner's Certificate, No. 60892B, intend, sixty days from date hereof, to apply to the Mining Recorder for a certificate of improvements for the purpose of obtaining a crown grant of the above claim. And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.

Dated this 20th day of March, 1913.

LATEST NEWS ITEMS.

The Ottawa Evening Citizen says: It was stated today in authoritative circles that when the naval bill reaches the senate the Liberal majority will move the same amendment as was moved by Senator Lougheed, now government leader in the upper house, to the Laurier naval bill of 1911, namely that the bill does not become law until submitted to the people for their approval.

Governor Tener of Pennsylvania approved the bill recently passed by the legislature providing for county systems of pensions for mothers under the administration of a commission of from five to seven women to be named by the governor for each county availing itself of the provisions of the law. The trustees are to investigate all cases and may recommend payments to any abandoned mother or widow who is unable to maintain her children at home. Payments are to be made monthly, and the combined maximum payment shall not exceed twelve dollars a month for one child, twenty dollars a month for two children, twenty-five dollars a month for three children, and five dollars a month for each additional child. For the purposes of the law an appropriation of two hundred thousand dollars is made. The mother's pension system has been put in operation in four states and has been advocated by many organizations of Pennsylvania men and women.

Three billion dollars for new U. S. roads and their maintenance, the same to be raised by national and state cooperation, is the proposal submitted to the joint congressional committee on federal aid in the construction of post roads. One billion would be used for construction and two billion for maintenance, both extending over a period of fifty years.

The strike in Belgium for equal man-suffrage has ended in most of the industrial towns of the provinces. A good many insurgent miners at first refused to descend the coal pits, notwithstanding the orders of the National Socialist Congress. Competent economists reckon the money loss caused by the strike at twenty million dollars, which the Socialist leaders declare to have been well lost if the country has thereby won equal suffrage.

Considerable activity is being exhibited in northeastern India in taking preliminary steps for the establishment of railway systems destined not only to connect Burma with India but also to link India with China.

Postmaster-General Samuel, in presenting the annual post-office budget in the British House of Commons, declared himself in favor of universal penny postage.

Gasoline Benzine or Carnations

Which do you prefer?

Nice to have people sniffing gasoline or benzine when you come near them.

Gasoline and benzine will clean soiled clothing, gloves, etc., but it will also explode and is most inflammable.

NYAL'S KLE-NEM will do all that Gasoline or Benzine will do in the way of cleaning but it will neither burn nor explode.

It also leaves a dainty odor of carnations.

Anyone who ever used Kle-Nem will never go back to the old fashioned way.

Kle-Nem is only a quarter a bottle.

DISPOSAL OF REFUSE

The Commission of Conservation at Ottawa has published some very useful suggestions regarding the disposal of garbage and refuse and says that it is a serious problem for the small city or town to solve. In such cases public incinerators are not always economical and the ordinary dump needs careful regulation to prevent it becoming a nuisance.

Burning or burying is the most desirable method of disposing of ashes, rubbish, manure, and garbage in cities. Of these, burning is the most sanitary, and no other means should be used in cities having a population of, say, 20,000, or more. Refuse incinerators are of two main types [1] the coal fired or, "low temperature," anb [2] the high temperature. The latter is designed to handle mixed garbage without the use of coal. Very few of these have as yet been installed, and their advantages have not been entirely proven. For the coal-fired incinerator a long-flaming coal of good quality is essential. This, of course, makes the cost of operation all but prohibitive for most small cities and towns.

In such cases other means of refuse disposal must be obtained. To simply dump garbage in an unrestricted manner on some vacant lot should be classed as a criminal offense, and punished accordingly. The practice of burying refuse, where it is carefully carried out, is usually found to be cheap and at the same time effective

The principle upon which refuse burial rests, especially as applied to garbage, is, primarily, a bacteriological one. The action ot the soil bacteria is to mineralize the organic matter in the refuse. In order to prevent the occurrence of putrefactive or other objectionable odors the mineralizing process must be carried out in the presence of sufficient oxygen or air. To secure these conditions the following points should be observed: [1] The garbage should not be buried too deep, nor should it be spread in too thick a layer on the ground. [2] The ground should be sufficiently porous and well drained to admit the air readily. [3] The garbage should be mixed with enough other refuse to prevent overloading the soil.

These conditions are obtained in different ways. In some cities the refuse is spread on the ground and then ploughed under. Another method is that of digging a trench, covering each day's collection of refuse with the soil, removed for the next day's supply. In any case, refuse that can be burned should be so treated and garbage and other organic waste can be more effectively handled by mixing it with other waste such as ashes, street sweepings, etc. It is claimed that 1.5 acres are necessary to handle each daily ton of garbage permanently. The soil can be reused at the end of two years.

A resurvey of 11 miles of Coquihalla pass by G. C. Clough has been ordered to make the grade tie with the C.N.R. and the K.V. bridge ai Hope. How long will it take?

Clarence Eklund, the wrestler, threw three men in his contest but stopped at the fourth, Victor Voigt.

Tomorrow, Victoria Day, all banks and business houses will close.

OSLER PHILOSOPHIZES

Sir William Osler, in addressing the religious meeting at Yale University recently, outlined new rules for practical daily life. He said:

'My method is the freshest, oldest, simplest and usefulest. Forget the past, forget the future. Life is a habit as hard or as easy to acquire as any other in life.

'I'm no genius; my friends have found that out, but take no thought for the future nor the past. When the load of to-morrow is added to the load of yesterday, many men falter in the way.

'The first two hours of a day determines that day. Quit tobacco and liquor. Bright eyes are the thing.

'The control of the mind as a working machine is the end of all education. That can be accomplished with deliberation. The most striking thing about America is its hurry. Europeans accomplish just as much without that everlasting rush.'

SEALED TENDERS addressed to the undersigned, and endorsed "Tender to Complete Jetty at Steveston, B. C.," will be received at this office until 4.00 P. M., on Tuesday, June 17, 1913, for the completion of the Jetty at Steveston, at the Mouth of the Fraser River, New Westminster, B. C.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of C. C. Worsfold, Esq., District Engineer, New Westminster, B. C.; F. W Aylmer, Esq., District Engineer, Chase, B. C., and on application to the Postmaster at Steveston, B. C.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, pavable to the order of the Honorable the Minister of Public Works, equal to ten per cent (10 p. c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

SMILES

At the annual fair that is held at a small town in Russia a man observed a gypsy and a Pole haggling over the sale of a horse. When the transaction was over he asked the gypsy how much he had got for the animal. The gypsy opened his hand and showed a ten-ruble note—worth about five dollars.

"But isn't that very cheap?"

"No," said the gypsy. "The horse is lame."

The man then sought the Pole, to whom he said: "You have given ten rubles for a lame horse."

The Pole smiled knowingly and remarked: "He is as sound as you or I. I saw he was badly shod, and that was all."

The inquirer returned to the gypsy and reported what the Pole had said. Then, with a significant wink, the gypsy whispered:

"He's as lame as a two-legged stool! I had him badly shod on purpose to make people believe that that was the cause of his limp."

When the Pole was told this, he seemed for a moment taken aback and hung his head; then he heaved a sigh and shrugged his shoulders.

"Ah, well," he said. "It's all right; it was a bad ten-ruble note."

"Swivelton has a sorry habit of nodding while in church, hasn't he?"

"Yes, and I understand he did the same thing one day while sitting in an auction room and when he woke up he found the auctioneer had sold him a cheap, second-hand bicycle for $150."

The teacher was addressing his pupils on the subjects of laziness and idleness.

He drew a terrible picture of the habitual loafer—the man who dislikes to work, and who begs for all he gets.

"Now, John," said the teacher to a little boy who had been inattentive during the lesson.

John was instantly on the alert.

"Tell me," continued the teacher, "who is the miserable individual who gets clothes, food and lodging, and yet does nothing in return?"

John's face brightened.

"Please, sir," said he, "the baby."

Colonel G—— '- a fine commander, but not a muscian. He sent for the chief musician of his regimental band one day and delivered this scathing criticism:

"I notice a lack of uniformity about the band which must be regulated. Yesterday morning they were out in parade, and the largest man in the band was playing a little bit of an instrument—flute or something of the kind—and you had the big drum played by a small man. That sort of thing doesn't look well and must be attended to. I want the small men to play small instruments and the big men the big instruments. And another thing—I want the trombone players to slide their instruments in and out in unison. It annoys me to see them all out of step with the hands."

Save One Ton of Coal in Every Six

The Economizer will do it.

While the cost of living has undoubtedly been growing greater, at the same time it is true there are some inventions that will offset this increased cost of living, and the careful housewife takes advantage of these inventions.

On every Gurney-Oxford range there is an Economizer which controls not only the drafts but also the entire combustion or burning of fuel to create heat.

This Economizer will save 1 ton of coal in every 6 that you would use with the ordinary range.

The Economizer is a simple device, absolute in its control. By merely moving the lever you can obtain any degree of even heat in the oven. This insures the satisfaction of always having light, delicately crusted bread and biscuits.

The kitchen fire ceases to be a worry if the Economizer is on your stove.

The Gurney-Oxford is the final result of experimental thought. Science has given it a Divided Flue, a new Special Grate, and a Broiler attachment.

This Gurney-Oxford range is primarily a a saver of money, time, and energy.

FOR SALE BY

The A. E. HOWSE CO., L'D,

SWIMMIN' TIME

I'll be just more than glad when it gets warmer, so
I can give the two finger sign to all the gang and go
Across the meadows with 'em for a good old fashioned swim;
Can throw my clothes off on the bank or hang them on a limb
An' then go divin' with a flop from the old divin' log,
As happy an' bare naked as a big old daddy frog.
I don't mind takin' soap along an' havin a good scrub
When I can do it in the crick, but I despise a tub!

Well, anyhow, soap ain't so good as some old fashioned mud
That kids can waller in. It seems to get into their blood
An' make 'em glad, an' then they dive an' then come up as white
As anything! I'll bet I won't come home till it is night
The first day when I get a chance to dive an' swim an' float.
It's just the water in a tub that gets a feller's goat.
Ma doesn't do a thing but grab my hair an' rub an' rub
An' get the soap into my eyes—I do despise a tub!

I wish I was baldheaded, like my father! Bet I know
Why all his hair come off his head. His mother long ago
Would get her fingers into it when he was in the tub
An' fill his eyes an' ears with soap, an' then she'd scrub an' scrub!
Why, every little kid I know, his mother acts that way!
That's why so many kids just hate to think of Saturday.
Say, I'll be glad when it gets warm an' sunburn's on my nose.
An' I can dive an' wade an' feel the mud between my toes!

PEACE PROBLEM

Secretary of State Bryan explained to the Senate committee on foreign relations last week his plan for avoiding war between nations by giving their passions six months or a year in which to subside before proceeding to hostilities. Mr. Bryan proposes that when a situation arises where two or more nations, having exhausted all the expedients of diplomacy, are virtually on the edge of war, an inquiry into the merits of the case may be made by an international commission of inquiry which shall study and report upon the case, the parties involved pledging themselves meantime not to go to war with each other within a period of six months or a year; as may be determined in the treaties the secretary of state proposes to negotiate.

Synopsis of Coal Mining Regulations.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1. an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-division of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five per cent per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lease may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secrstary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands

W. W. CORY
Deputy Minister of the Interior.

N. B.—Unauthorized publication of this advertisment will not be paid for.

Cheap Footwear

¶ is rather an expensive economy, for as a rule, you not only suffer in comfort, bnt in appearance as well.

¶ Wearing qualities also are inferior to the better shoe and you seldom feel that you have had just returns for the original cost.

¶ ***INVICTUS*** shoes are not cheap shoes. They are made from selected leathers, by skilled workmen, on foot-form lasts. Their style is distinctive and their comfort so perfect that your feet are forgotten.

¶ They give the utmost of wear and are worth many times their cost in the satisfaction you receive.

§ A better shoe man never wore.

§ The best good shoe, ***Invictus.***

Gasoline Benzine or Carnations

Which do you prefer?

Nice to have people sniffing gasoline or benzine when you come near them.

Gasoline and benzine will clean soiled clothing, gloves, etc., but it will also explode and is most inflammable.

NYAL'S KLE-NEM will do all that Gasoline or Benzine will do in the way of cleaning but it will neither burn nor explode.

It also leaves a dainty odor of carnations.

Anyone who ever used Kle-Nem will never go back to the old fashioned way.

Kle Nem is only a quarter a bottle.

THE WIDE WORLD.

The Pennsylvania Senate has concurred in the House amendments to the joint resolution proposing an amendment to the constitution permitting the state to borrow fifty million dollars for good roads. The proposition will be voted on by the people at the November election. The resolution to amend the constitution of Pennsylvania to give the right of suffrage to women has passed the Senate by a vote of 26 to 22.

The steamship Makura arrived at Vancouver, on Friday of last week, with four hundred immigrants from Australia, the great majority of whom contemplate settling in this province.

Missouri proposes to conserve the vast undeveloped water power within its borders for the use and the profit of the people generally.

The first Chinese Republican Parliament was opened on the 8th ult., the Senate and House of Representatives being jointly inaugurated in the lower chamber, while a salute of one hundred and one guns was fired near the city wall. Enormous crowds were present.

The Shriners of the Pacific Northwest already have plans well under way for a reunion that is expected to attract between 5,000 and 10,000 members to the Pow Wow.

William J. Bryan, speaking at a dinner given in honor of the foreign members of the international peace conference arranging for the celebration of 100 years of peace among English speaking people, declared that the new peace plan offered by President Wilson to all nations is the latest and longest step toward peace.

RELIGIOUS SERVICES.

Special notice.—Anglican service will be held on Sunday next at Hedley. There will not be any service held in Princeton.

Christian Science lesson-sermon subject next Sunday: 'Soul and Body.' The Lord is in his holy temple: let all the earth keep silence before him.—Hab. 2:20.
