Princeton coal once used always used; cook's delight

SIMILKAMEEN

STAR

Spirit is real, unchanging, eternal: Matter is unreal, dying.

Competition of two great lines of railway will ensure Princeton alternative routes east and west and competitive freight rates—Investments made now will double in value soon—Possibilities in minerals are, beyond question, the greatest in the west—Watch expansion.

Vol. XI. No. 31. PRINCETON, B. C., WEDNESDAY, JULY 27, 1910. $2 a Year in Advance

STRUCK RICH LEAD

Whipsaw Again Makes Good with Big Silver-Lead Ore Body.

Assays $39.60. is Self-Fluxing and Easily Mined—Camp Wants Shipping Facilities.

Whipsaw looms large in the eyes of claim owners in that camp and its reputation is making it the Mecca of mining men and prospectors. The bright hope of the camp lies in the fact that all the work done so far goes to prove a vast ore body. From the very grass roots the underlying carbonates are impregnated with silver-lead, gold and copper values To the person possessed with a 'mineral eye' there are the natural evidences of latent and superficial miuing resources which lead on to discovery and development. As a mining camp the perspective of Whipsaw is such as to attract capital and encourage industry.

How Lead was Found.

Knight & Day have been almost continuously at work for a year on their claim, the Lucky Pair, and the portion of Whipsaw where they are situated is in no small degree beholden to them for tracing and finding the lead which they have so perseveringly searched for. After drifting 230 feet they decided that the lead had split and that the best part was lying to the right of the tunnel. Turning at a point 50 feet from the mouth of the tunnel the lead, 8 feet wide, was struck after ten feet of drifting had been made. They will now straighten the tunnel and drift on the ore body. The lead is exposed by open cuttings on the surface at intervals extending for 1800 feet and varying in width from 8 to 20 feet. The surface ore is oxidized and may be easily mined with pick and shovel.

Values Total High.

Without any selection the ore assays 33 p.c. lead, 11 60-100 ozs. silver, gold $3, or a total value of $39.60 per ton. The ore consists of iron sulphides and galena, the gangue being lime and quartz.

Three leads were struck in driving the main tunnel, none of which appeared large enough to warrant development. Work on the surface has exposed another lead further ahead. The main tunnel will be driven to tap it at a later date.

By drifting 200 feet along the lead a depth of 300 feet can be obtained and held for 1000 feet, the apex being practically level for that distance.

Since the first of last September Knight & Day packed in their supply of provisions, built a cabin 14x18, a cellar 8x8 and blacksmith shop, ran 230 feet of excellent tunnelliug, besides various open cuts on the surface. It is such work, combined with calculating energy, that counts. And, still Knight & Day say they have only just begun to develop their properties.

After a rest, which they well deserve, Knight & Day will resume development work, laying a track and using a car, discarding the primitive wheelbarrow for the modern appliance. Whipsaw is an ideal mining camp, easy of access, plenty of wood and water for all purposes, lacking only a wagon road with which to haul ore and supplies. If a wagon road were constructed, the Lucky Pair could be shipping 40-dollar ore next winter to the smelter. It is understood that an appropriation is forthcoming for this needed road.

Camp is Active.

Ben Baker adjoins the Lucky Pair on the north with his claim and has the lead traced 400 feet with open cuts.

Dick Fitzgerald has fine showings and is driving a tunnel on the Molly Reilly.

Billy Fearless is working like a Trojan on his claim and has a tunnel in 12 feet He expects to reach the lead in another 20 feet.

Sam Spencer is running a tunnel on his property and is reported to have got the lead.

Jim Wright will shortly start a gang on the Silver Lode and will drift to the main lead which cuts his claim in two.

Tuck French and Jack Crowley are working on claims which give every promise of becoming mines.

L. McMullen has done assessment work on his claim and has shown the lead for 150 feet.

Billy Knight brought down a hundred pounds of ore, which may be seen at the Star and he invites inspection of it and also of the mine.

PRINCETON HORSE FAIR.

Editor Star—Sir: The Similkameen district is acknowledged to be one of the best districts in the province for raising horses, and it seems to me that an annual horse fair at Princeton would not be at all out of place. No doubt the horse breeders of this country would take this matter up with the keenest interest. If the matter were given due publicity on the outside I feel perfectly confident that we would have large numbers of interested parties visit the capital of the Similkameen.

I would suggest that the proposed fair be held not later than the end of September so as to ensure the Hope trail being open.

Yours faithfully,

FRANK E. GROFFMAN.

Princeton, July 26, 1910.

John George, promoter of the cement works on Onemile, left on Monday for the coast, going out via Nicola. He expects to return in a couple of weeks.

THE WEEKLY GRIST

Grain and Vegetable Crops All Good, Small Fruits Yield High.

Progress All Around and Only White Livered Pesslmists Picture Picayune Panic.

For Sale—A few household effects. Apply at the railway station. †

Some fine strings of trout have been caught in both rivers recently but young anglers complain that they are smaller than in former years. Fish stories are in order now and a reasonable space will be allowed in Star for publication.

Lost—A Waterman Fountain Pen, with gold bands. Finder please return to Star Office. Harry Pringle.

Boosters can build a city in a desert. Knockers can't build a city anywhere.

Lost—A small pocket morocco covered memorandum book, between the Great Northern hotel and the McDougall ranch, Onemile. If the finder will leave the same at the Great Northern hotel he will be suitably rewarded, and oblige John George.

C. J. Wilson, inspector for the P. Burns Co, was in town last week in connection with his regular visits.

Go to the New and Second Hand Store for bargains in tents. A. L. White. *

J. Roberts, representing a big Chicago firm of coal mining machinery manufacturers, was in town last Friday. He was in consultation with the manager of the Vermilion Forks Co. and was also at the Columbia Coal & Coke Co's workings near Granite Creek. It is understood both companies are putting in machinery for mining.

E. Waterman, resident manager of the Vermilion Forks Co., left last Thursday for Washington points.

Dr. Simmons, dentist, of Greenwood, B.C., will be in Princeton Friday or Saturday for a few days, prepared to do dental work for all in need of it.

The Presbyterian pulpit was filled on Sunday evening by John George, a lay Methodist preacher, ex-M.P.P. and prominent business man, who is identified with a large manufacturing project here. Mr. George spoke of the necessity for the New Birth in the salvation of sinful men and impressed hearers with his sincerity and earnest style. A large audience turned out to hear him. No doubt opportunity will again be given to hear him.

Who says panic? The man who started the panic yarn is a fit subject for examination by the anthropological association. Crops, on the whole, are good and there is no financial stringency anywhere. Some people are always in a quagmire of thought and see the proverbial wolf and panics without cause.

L. L. Work, banker, of Oroville, was in town recently on a holiday trip.

W. C. Brown, returned from the coast Monday. He speaks very laudably of the auto service between Nicola and here.

Chas. Camsell, Dominion geologist, was in town last week on his way to Tulameen from Hedley.

NEW MINING COMPANIES.

Operate in Princeton District in Mining. Smelting. Etc.

In next issue of this paper will appear the advertisement granting a license to an extra provincial company under the Companies Act, 1897, named 'The Princeton Coal and Land Co. Limited.' The head office of the Company is situate at No. 15 Great Saint Helens Street, City of London, England. The amount of the capital of the Company is £200,000, divided into two hundred thousand shares of £1 each. The head office of the Company in B. C. is at Princeton and Ernest Waterman, agent. The Company will carry on business as land owners, coal masters, coke manufacturers, smelterers, proprietors of works for the supply of water, gas, electricity, bankers, &c. The promoters of this company are virtually those of the Vermilion Forks Co. and the above name will in future be adopted for the purposes cited in the advertisement.

Notice is given in the last B C. Gazette that the 'Princeton Collieries, Limited (Non-Personal Liability),' has been incorporated under the Companies Act, with a capital of $2,500,000, divided into two million five hundred thousand shares of one dollar each. The company is empowered to purchase, lease, hire, discover and hold mines, mineral claims, leases, prospects, mining lands and mining rights of every description, and to carry on the business of a mining, smelting, milling and refining company in all or any of its branches; also to acquire by purchase or otherwise timber lands, leases or licenses to cut timber. The company is organized and promoted by Andrew Laidlaw of Spokane.

Certificate of incorporation has been granted to the 'Princeton-Chilliwack Coal Company Limited, with a capital of $50,000, divided into five hundred thousand shares of ten cents each. Some of the objects of the company are to prospect and explore mines and ground supposed to contain minerals or precious stones; to search for, win, quarry, assay, crush, wash, dress, reduce, smelt, refine and market metalliferous quartz, ore and other mineral substances. It is understood that W. and M. Wilson of Princeton, and Chilliwack parties are the promoters of this company.

The Similkameen Star.

NOTES AND COMMENTS.

Sir Wilfrid Laurier, now on tour of the great west with his colleagues Hon. Wm. Pugsley, Minister of Public Works, and Hon. G. P. Graham, Minister of Railways, has won the good opinion of all classes irrespective of political allegiance. His distinguished services to the country as statesman and nation builder, coupled with a long parliamentary career of untarnished purity, certainly warrant the high esteem and regard with which he is held. Not only has he united the diverse interests of a people spread over the width of a vast continent, but he has created a national sentiment of patriotism which is as heartily endorsed and accepted by French, American and the dozen other nationalities in cosmopolitan Canada, as by the pure loyalist Anglo-Canadian stock. Moreover, in Sir Wilfrid's prestige as a Frenchman, one may trace, to a large extent, the cordial relations existing between the English and French nations today. He has always set an example of friendly, courteous disposition toward all, be they Protestant or Catholic, Liberal or Conservative, English or French. As premier of Canada and the leading citizen of the country Star extends welcome to him and wishes happiness, length of many years to come and prosperity to both he and his amiable wife. This earnest of personal regard for Sir Wilfrid will appear all the more genuine when it is stated that this paper, once Liberal and in perfect accord with that party is not now in harmony with it.

Saturday Sunset recently issued a very notable edition devoted to the growth and progress of the city of Vancouver. The striking frontispiece well illustrates the towering heights of some of the buildings now covering ground that only a few years ago produced towering firs. The writer recollects seeing a fir nine feet in diameter and nearly four hundred feet long near the present Vancouver hotel, a section of which was sent to the Chicago exposition. With this little digression, however, Star congratulates the Sunset on its enterprise in producing such a superb edition, and its theme is really worthy of such a splendid effort.

The Western Canada Irrigation Association will hold their fourth annual convention at Kamloops on August 3rd, 4th and 5th. Irrigation is a subject which interests every farmer and fruitgrower in the dry belt. Immense irrigation works are being constructed in many parts of western Canada and the United States and in Egypt the damming of the Nile will revolutionize the land of the Sphinx and big desert. The splendid results attained by irrigation with the certainty of crop make it a subject of interest to all land cultivators in a dry climate. The Kamloops convention will be addressed by expert irrigationists and everyone interested is invited to be present.

Vancouver is an ambitious city. Not content with being the terminus of transcontinental and transoceanic routes, the metropolis of the west, and a dozen other big things, it now aspires to become the seat of university learning, and to still further add to its importance will give an Exhibition beginning on Monday, August 15th and continuing five days. The formal opening of the Exhibition will be on the following day, Tuesday, by Sir Wilfrid Laurier. The Exhibition will be an inducement for many to visit Vancouver and see the great strides of progress it has made during the two dozen years of its existence. No doubt it will many times repay a visit from the dwellers of the Similkameen, who might also send some mineral, agricultural and fruit exhibits. Don't forget the date.

Some people say prize fighting is no worse than football. There is no comparison between them. In the one brutality and 'punishment' are the basis of the prize and the man who can endure the most pounding is winner. Football has nothing of the prize ring about it and is clean sport, the percentage of accidents in it being slightly above the average of sports. Prize fighting is not sport, for money is the beginning and end of it. It is hoped that the end of prize fighting has come at last and that revolting public sentiment will put it in the category included in 'cruelty to animals.'

The Liberal Association of Merritt, of which the postmaster is a member, is urging upon the Dominion government the necessity for a separate building for the post-office and telephone exchange. Merritt is progressive. Now it will be in order for some one or two with their little hammers to knock the project and write to Ottawa that there is no necessity for the buildings.

Princeton is now the goal for big coal companies.

WATER NOTICE.

Notice is hereby given that an application will be made under Part V. of the 'Water Act, 1909,' to obtain a license in the Yale Division of Yale District.

A. The name of company in full: The Tulameen Power Company, Limited. The head office, 1006 Government St., Victoria, B C. The capital, how divided, thowing amount paid up: $10,000, divided into 200 shares of $50 each, of which $4000 is paid up.

B. The name of the lake, stream or source, South Fork of the Tulameen river.

C. The point of diversion, a short distance above the head of the falls and about a mile from the mouth of the said South Fork.

D. The quantity of water applied for, thirty cubic feet per second.

E. The character of the proposed works: Dams, flumes, pipes, penstocks and necessary power stations.

F. The premises on which the water is to be used: Land immediately surrounding the falls on South Fork of Tulameen river.

G. The purposes for which the water is to be used: Power purposes.

I. If the water is to be used for power or mining purposes describe the place where the water is to be returned to some natural channel, and the difference in altitude between point of diversion and point of return: Below falls at a point about 100 feet lower than point of diversion.

J. Area of crown land intended to be occupied by the proposed works, 160 acres.

K. This notice was posted on the 6th day of June, 1910, and application will be made to the Commissioner thirty days after said date.

L. Give the names and addresses of any riparian proprietors or licensees who or whose lands are likely to be affected by the proposed works, either above or below the outlet. None.

Signature, THE TULAMEEN POWER COMPANY, Limited.

COPPER
HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?
