Vol. ix. No. 38.

PRINCETON, B.C., WEDNESDAY, SEPTEMBER 16, 1908. \$2 a Year, in Advance

REPAIRING THE ROADS.

Geo. Goldsborough has been doing a lot of necessary work on the main trunk road toward Hedley with his gang of skilled roadbuilders. The cribbing on the riverside and the revetment work on the upper side of the road near Holmes' flat are of substantial workmanship and will preserve the roadbed. The "loop" below Bromley's has been cut out and a troublesome piece of road thus done away. Foreman Goldsborough will put in a bridge at the "36" on the Hope trail, something that travellers will appreciate. Foreman Gibson has started work on the Five-Mile road with a gang of practical men in this line. G. Murdoch is building a road to his ranch by which a much lighter grade will be obtained than by the old route.

OPTIMISM THAT COUNTS.

L. A. Manley, of Manley & Swanson, proprietors of the Great Northern hotel, was in town a few days recently on a business visit. He has large interests in various parts of the country, at present making his headquarters in Coleman, Alberta. He reports the wheat crop at Pincher, in that section, as averaging 45 bushels to the acre. Coalman is noted for coal and its product, coke. Business is good. The people are prosperous. He predicts similar conditions, only on a larger scale, when the payroll reaches Princeton. With the vast diversified resources tributary to it the outlook is very encouraging. Mr. Manley suits action to his word. The enlargement of the Great Northern to double its capacity, with good accommodation for all classes of travellers, proves that Messrs. Manley & Swanson have an abiding faith in the town. Other improvements and other investments will be made by the firm as the times warrant.

LABOR DAY AT HEDLEY.

The Labor Day celebration at Hedley was a grand success and was witnessed by visitors from all over the district and as far away as Spokane. The rock drilling contest proved the most interesting event, being won by Griffin and Trimble, 30 5-16 ins., \$150; second, Bowerman and Connolly, 24 15-16 ins., \$50; third, Carlson and Waddell, 23 1/2 inches. The last team was unfortunate in having much broken steel. In baseball Hedley won 5, Princeton, 0; Hedley, 7, Nighthawk, 0. In the horse races Garrison's Baldy showed a clean pair of heels to them all and brought back to Princeton a nice bunch of prize money. Dame Fortune smiled on a couple of the boys and all things considered Princeton made good at the sports.

Messrs. Avery & Avery report that all the houses on their list for rent have been taken. Inquiries for others have been received.

RECO, SOON A MINE

Trials of Patience and Ingenuity in Developing This Mine.

Tunnel Would Greatly Assist in Development and Production on Copper Mountain.

Development work on the Reco, Copper Mountain, is still in progress after about two years of continuous work. The difficulties and obstacles encountered are but a repetition of the history of all mining effort in advance of the railway. Discouragement in unforeseen natural conditions of the ground that might have been obviated with the aid of machinery and disheartening delays arising from various causes were met with in the work on the Reco. But the perseverance and energy with which the superintendent, J. E. McCauley, has prosecuted the work leaves no room to doubt that a great mine will be found if the indications are trustworthy and he carries out proposed operations.

The tunnel on which Mr. McCauley has concentrated his hopes and most of his labor is now driven 230 feet. The country rock was of almost impenetrable hardness, defying steel in a very provoking way. Good ventilation was also a hindrance to progress.

In another 10 or 12 feet Mr. McCauley expects to tap the lead of the Reco which outcropped 175 feet farther up the mountain. Mining men and others who have visited the Reco speak in very hopeful terms of the prospect. Some think it will prove to be the means of adding much fame and substantial prestige to the whole of Copper Mountain as a mining region.

Now that water power has been secured the feasibility of driving a large working tunnel under Copper Mountain as its view presents is admitted generally. No engineering difficulty stands in the way. And to finance the undertaking would seem to be a comparatively easy thing when the mineral zone tapped is almost sure to be exceedingly remunerative. The tunnel proper would be 2600 feet in length from the Similkameen river at Ashnola and it is estimated to cost \$250,000. The installation of electric power and Burleigh drills would be necessary. Of course a detailed estimate would be made by an engineer and all the data gathered to make it an absolutely safe investment. Mr. McCauley will be pleased to enter into communication with owners of mining property on Copper Mountain with a view to getting this tunnel completed and in operation as soon as possible.

THE BOARD OF TRADE

Big Budget of Correspondence Increases Labors of the Board Scribe.

Incorporation of Princeton Subject of Enquiry—Road to Cemetery Needs Grading.

The Board of Trade meeting Monday evening was well represented and matters of importance were discussed and disposed of. Routine business being dismissed the following communications were read by Secretary Marlow:

From Duncan Ross, M.P., referring to telephone agency; from Secretary R. H. Cosgrove, of the Spokane Interstate Fair, inviting exhibits; from F. W. Groves, C.E., M.E., P.L.S., urging necessity of a good mineral exhibit at Spokane Fair; from News-Advertiser, requesting copy for booklets; from C. S. Stevens, re telephone; from J. O. Coulthard, resignation from the Board for cause; from F. C. Fry, Secretary of the Canadian Agency, Limited, 6, Princess St., London, E.C., inquiring for information with a view to placing capital in Princeton district; from Heaton's Agency, Toronto, requesting information about Princeton for publication in a handbook.

On motion communications were ordered filed to be dealt with later by the executive committee and the assembled Board.

The subject of incorporation of Princeton was again revived, upon which the secretary was advised to communicate with the Provincial Secretary respectfully requesting such information as deemed proper for the preliminary and subsequent steps necessary in so important an undertaking.

On motion the Secretary was further advised to indite a few words to D. Ross, M.P., expressing regret that he did not treat the Board with due courtesy by not accepting its recommendation regarding a telephone agent here, after the Board had been invited to make an appointee.

The question of a road to the burial ground was relegated to the Secretary with instructions to write L. W. Shatford, M.P.P.

Board adjourned.

Information to the effect that active operations will soon be resumed on the United Empire mining property has reached this office within the past few days. The United Empire Co. has a large extent of ore and coal opened. The object of the present work is, it is understood, to place the mine in a shipping condition at the earliest date rendered possible by the completion of the V.V. & E. railway.

OCTOGENARIAN KILLED.

The accidental death of Henry Woodward, one of the earliest settlers in Nicola, at the advanced age of 87 years, will be learned with sorrow by a very wide circle of friends. The deceased gentleman was residing at Kamloops and while passing along the railroad was struck with a train and instantly killed. At the inquest no blame was attached to the train hands or anyone. Deceased was quite deaf and despite warnings continued to walk on the track until the fatal occurrence. He leaves a large family, of whom Mrs. F. P. Cook of this town is a member, and who has the sympathy of many friends.

"WESTWARD HO!"

The September number of "Westward Ho!" is not only up to the expectations which the sanguine publishers have created but far exceeds them. Its short, crisp, and pointed romances are all that could be desired. "The Remittance Man," a tale of Medicine Hat; "The Mission of Roses" and "An Old Fashioned Colonel" are, with several others, fascinating, and best of all, elevating and calculated to draw out and inspire all that is best in the reader. The September articles are lucid and concern present problems, industrial developments and the future potentialities of Western Canada, to which the publishers seem intensely devoted.

ACCIDENT ON TRUNK ROAD.

What might easily have been a very serious accident occurred to a load of Princetonians returning from the Hedley sports. In making the "loop" below Bromley's the curve proved too short for high speed, overturning the heavy rig and spilling the occupants like a "quart of mussels." Nearly all were more or less injured, the most serious case being that of "Bobbie" Stevenson, whose life was threatened by very severe contusions and a dislocated shoulder. He was taken to Hedley and is reported to be making rapid recovery. The team attached to the rig broke loose and ran full tilt into a gig occupied by Hughie Campbell and Angus Lamont. Hugh lit like an autumn leaf on the ground but Angus was not so fortunate and received a few bruises. Thus were these three old tillicups, all nearly seventy years old, thrown out of their rigs and escaped with their lives. Many friends throughout the province will be glad to know that these old Cariboo goldiggers are still in the flesh after their untoward adventures.

C. A. Shaw, P.L.S., has gone up the line of the V.V. & E. to do some important work for the Great Northern, after which he has some long delayed work at Welldo.

NOTES AND COMMENTS.

One hears all kinds of reasons and excuses for the delay in constructing the V., V. & E. It is due to the Presidential elections; it is attributed to the "squeeze" Uncle Jim got while wrestling with the Northern Securities and his great competitor and enemy, Harriman; it is alleged that Hill wants legislation to enable him to go south into Washington after leaving Princeton; these and many other conjectures are given out. That some scheme for the benefit of the political grafter will be launched at the next session of the Ottawa house is very probable. If there is anything a grafter will smack his lips over it is a railway bonus and the idea is prevalent that the Great Northern is now only marking time on construction for the opportunity to obtain a subsidy as the C.P.R. does. Meanwhile the people in the Jimhilkameen Valley have to suffer for the delay.

If any place has been made the victim of vile political machinations it is Princeton. First, the provincial government and certain influential newspapers put obstacles in the way of Hill and the V., V. & E.; then the railway briskly began building and has now slowed down to an almost imperceptible pace, constructing about 80 miles in two years and six months. At the rate of progress mentioned it will be another year before the rails are laid this far and at least ten years before they reach the coast. The charter for the V., V. & E. put a time limit of five years on the construction of the road. It has about two more years to run and Mr. Hill will then have to get another one of those obnoxious extensions. He should be made to live up to the terms of his charter.

People in the Similkameen have waited with splendid patience and fortitude for the coming of the railway. Weeks, months and years have rolled by in anxious expectancy. Still it comes not. Every eye has been peering for some speck of hope on the distant horizon. As the thirsty traveller on the desert hastens to an oasis so do the people here welcome any sign of the railway's approach. Some green spot on the desolate waste of time has lured them on and on until in sheer disgust and disappointment

they rail at Hill and the federal government for not carrying out the wishes of the voter. Life in a frontier hamlet has enough of inter-necine friction and hardship without being frittered away in comparative solitude and inaction while waiting on some Wall-Streeter. If Hill cannot build the road any faster than he is doing then the government should take it in hand, complete it and own it, and that is what will happen if the Conservatives are returned to power.

The season for outdoor games, sports and races is about closed and citizens of Princeton are again reminded of the need of proper recreation grounds and race track. Without a proper place for these adjuncts of civilization there will be little hope of making them attractive or successful. The ground might be acquired by lease or purchase or, better still, by gift. Suitable locations near the town are to be found, two of which are especially suggestive. The Allison and Asp flats are the most eligible and would save any hill climbing. These grounds would require little grading and are exceptionally handy to town. There is another site in what is known as Hitchings' Hollow, a little more than a mile from town. This site is a natural amphitheatre and one of the most picturesque situations around. It remains with the citizens to provide a track and grounds for next year, which can and ought to be done without delay.

The Boundary Creek Times, as is well known, is the personal organ of D. Ross, M.P. Evidently the Times is chicken-hearted over the prospect of its remarkable chief being elected. It says: "Any back east editor who doesn't know that British Columbia will send at least five Liberals to the next Federal Parliament is not acquainted with the situation." In the words of Ross's hireling, Supt. Stevens, there is a "veiled suggestion" in this that he does not expect to be one of the five. That premonitory voice within which accuses him of many little meannesses has deprived him of the little courage he ever had. Mr. Ross is not deserving of victory after his treatment of true Liberals in respect of telephone and other matters. In Cariboo he threw down his staunchest friends that an eastern syndicate might have a certain contract. If a man will ambush his own friends it is safe to predict he will not 'make good' for his constituents or his party. Sooner or later he will bring the blush of shame to his closest friend.

Impressive, if not complimentary, is the speech of Hamar Greenwood, M.P. for York City, England, in which he says: "England suffers

today, and suffers grievously, from beer and bigotry. * * The beer lords and the State Church parsons are working hand-in-glove against the government, which is fighting for the well-being of the nation as a whole above the miserable interests of an unscrupulous trade and a privileged church."

NOTICE.

Certificate of Improvements.

"Freddie B" and "Rambler" mineral claims, situated in the Similkameen mining division of Yale district. Where located: On Five-Mile creek. Take notice that L. Luke Gibson, Free Miner's Certificate No. B9468, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above claim. And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.
Dated this 12th day of February, A.D. 1908. 8-16

LOCAL AND GENERAL

C. A. Jackson, dentist, arrived in town yesterday and may be found at the Tulameen hotel.

Teacher Cochrane left for the coast last Thursday to bring his family here. He has secured a house on Fenchurch Av. During his absence the rod of instruction or correction will be held by H. H. Avery, jr.

C. S. Stevens, telephone superintendent, was in town yesterday. Will he do the right thing and give the A. E. Howe Co. connection as formerly? What is his mission here if not to do this?

Mr. Fish, brother of the late G. W. Fish, arrived last Wednesday via Nicola. He was coming to visit his brother and only learned of his death at Nicola. Mr. Fish expresses heartfelt gratitude to the ministering friends of his brother during illness and to all who contributed by presence or in any wise to the respectful interment.

W. C. McLean of Ashnola has moved his family into town to enable the children to attend the public school.

C. V. Semerad of Greenwood has become a citizen of Princeton, having removed with his family here last week. He will engage in railroad work with his team.

Hugh McGuire has rented the blacksmith shop owned by G. Murdoch and will conduct the business in future.

C. Y. Prosser received word on Monday that his brother was seriously ill at Keremeos with what is supposed to be typhoid fever. In Mr. Prosser's absence customers of the Similkameen Saddlery Co. will please leave their orders with Tink French at the billiard room who will forward them to the Hedley branch of the Co. where they will receive prompt attention.

STRAYED on my premises one bay horse branded C on left hip. Owner may have same by proving ownership and paying damages. If not claimed in 30 days will be sold. ERNEST RICHER.

Watchmaker and Jeweller.

Ladies and Gentlemen: Do not fail to send me your watch or jewellery for repairs. I can guarantee the work to be done right at low prices. If you are in need of a Watch or Jewellery let me know and I will deal with you according to the old saying: Honesty is the best policy.
Yours truly,
J. B. HADDAD,
Watchmaker and Jeweller.
Headquarters, Vancouver: Branch office at Nicola.

FIRE ALARMS, &c.

Four sharp taps on the bell, with slight pause between each four, will indicate that the fire is in Ward I. Two sharp taps, with pause between each two, will locate the fire in Ward 2.

Continuous moderate ringing of the bell will be used for meetings of any kind, for public demonstrations or for giving the correct time daily. Tolling for the dead will be one stroke of the bell with measured intervals of ten seconds.

POINTERS.

A piece of zinc placed on coals of hot fire will clean out the stovepipe. The vapor produced carries off the soot by chemical decomposition.

Try turning a pan over your flatirons while they are on the stove. It is an excellent way to save fuel, as you can keep them hot with one half the fire.

For cholera infantum mix salts with water as strong as will dissolve. Give six drops, and two hours later give six drops castor oil. Continue for 48 hours. If in the last stage, take a kettleful of red oak bark, pour on water to cover and boil one hour. Take out bark and boil water till thick as syrup. Dip a cloth in this and cover the chest and bowels. Continue for 48 hours and it will cure the worst case.

Try sifted coal ashes for scouring pans and steel knives.

To stop a leak use yellow soap, whiting and a little water.

Hot milk is one of the best stimulants for persons suffering from hunger or extreme fatigue.

Always roast fowls with the breast down. Why? Because the juices will then run into the breast.

It is useful to remember that wet tea leaves applied to a cut or wound will stop the bleeding.

Princeton, April 29, 1908.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference
Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: \$5 in book form with gilt top, or \$7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

WRITE NOW to the editor and publisher,

HORACE J. STEVENS,

550 SHELDEN BLDG., HOUGHTON
MICH., U. S. A.

MINES AND MINING.

The Boston Commercial in a review of the metal market does not predict 15-cent copper until after the presidential election. Practically, there is no surplus copper now. Within twelve months it is expected that the demand will exceed the supply and the metal will be selling at 16 or 17 cents before the end of next year.

The Golden Zone in Camp Hedley has been bonded to G. P. Jones, superintendent of the Nickel Plate mine for \$60,000.

The Mining Exhibit at the Spokane Fair will be a great attraction but it cannot possibly be complete without an exhibit from Princeton. Spokane is our best and wealthiest neighbor.
