

# SIMILKAMEEN

Series of Coal Strata 60 feet deep beneath Princeton,

Liberty! The cry of the infant, twin sister of light and progress

Princeton Coal Field has a radius of 300 miles in which to market its product—Copper Mining will be leading industry of Similkameen—Placer mining capable of great expansion along river flats and benches—Princeton, with its coal, iron, &c., will be Pittsburg of west.

Vol. X. No. 12.

PRINCETON, B. C., WEDNESDAY, MARCH 17, 1909.

\$2 a Year in Advance

## TOWN AND DISTRICT.

### People Passing to and fro and Current Events Here and There.

Railway rumors are persistent that the Great Northern and C.P.R. are running preliminary survey lines up the Skagit country, intending to tap the Similkameen by the back door.

Be a booster, not a clam.

C. Snowden arrived back in Princeton last Wednesday after a few months' sojourn at the coast. He saw no climate or country he would exchange for the Similkameen, in fact he is satisfied that this country will top them all when 'she begins to spring herself.' Coast cities are all active and making huge progressive strides.

Miss Lowndes, teacher of Pianoforte and Accompanist, will be in Princeton next Tuesday, 23rd inst.

Mrs. Pyman, wife of our respected time regulator, will arrive on today's stage.

Luke Gibson was the first to bring in a fine specimen of galena ore from his property in the Skagit section, to be exhibited at the A.-Y.-P. He has a valuable mine and only requires transportation to begin shipping. Mr. Gibson has had many tempting offers for his galena claim but he is not anxious to sell now.

Sorn Nelson, Grand Forks, is in town sizing up the general situation for investment. He had the misfortune to be recently burned out of his hotel.

H. H. Avery, jr., arrived on Monday's stage from Butte, Montana. He had many inquiries from parties who are looking toward the Similkameen for investment and location.

### ORE SAMPLE FOR A.-Y.-P.

Pouwels & Bonriver came in town from their Roche river mining property last week. They are still developing their claims at that point with most encouraging results. Their ore is among the most likely in value of any in that section and they will have a good sample for the A.-Y.-P. They report travel very difficult between camp and Whipsaw.

### PREMATURE REPORT.

The report that one of our well known and highly esteemed fellow townsmen abroad was about to marry a millionairess turns out to be a little premature. It is true that he is engaged but beyond that there is nothin' doin'. The fiance was leading the simple life, in that fiduciary state of mind which longed for a better half and true helpmeet. When he is married and his hand with a firm grip on the purse he promises not to forget his poor tillicums in Princeton. May he live long and die many years after his wife, thus giving him unfettered use of the money for charitable purposes and the payment of long overdue accounts in this section.

## MINERAL MEN MEET ZINC IS DUTY FREE

### Preliminary Steps Taken to Ensure Good Exhibit at A.-Y.-P.

#### Similkameen Hitherto Unrepresented at Great Exhibitions Now has Opportunity.

Under the auspices of the Board of Trade a well attended meeting was held Monday night in the court house to discuss the matter of a mineral exhibition from Princeton and district at the Alaska-Yukon Pacific Exposition to be given at Seattle, Wash., from June 1st to the end of October in the present year. President McDougall occupied the chair.

R. L. Broadbent, Mineral Collector for Canada, was present and gave a concise statement of the object and scope of the mineral exhibit he has in charge. He had one purpose in view to secure a good representation of minerals from all districts in the province. He expressed some surprise at the non-representation of the Similkameen in former exhibits of which he had charge at St. Louis, U.S., Liege, Belgium, Christchurch, N.Z., and other places. He explained that his duties were limited to the collection and arrangement of the minerals entrusted to him. The Dominion would pay freight charges on mineral exhibits sent from the nearest railway station to the Exposition, said exhibits to become the property of the Dominion for permanent exhibition in the National Museum at Ottawa. Regarding special or loan exhibits of gold and platinum nuggets he had no definite instructions. The Mines Department did purchase valuable and unique natural mineral specimens and he had no doubt the authorities would take precautions for the safety and return of special exhibits, but urged correspondence with Mr. Brock, of the Geological Department regarding this matter.

He advised the collection of hand samples for exhibition owing to the difficulty of procuring larger specimens at this season of the year, when snow prevented access to the higher altitudes. The samples would be appropriately labeled and distinctively set apart as coming from this section, avoiding all chance of confusion with other district exhibits. Cubic foot ore samples will be welcome. Coal samples should be arranged in pyramidal form, the blocks being 24, 18 and 12 inches square, hand-pick dressed. Marble, building stone, cement and mineral pigments would be received and given due space. Copper sulphides in solution from Roche River was shown the Collector, who thought it

(Continued on page 3.)

### Uncle Sam says B. C. Zinc is on Free List, which Helps Some.

#### Princeton District Contains Large Deposits of Zinc Ores as Yet Undeveloped.

Concerning the duty on zinc recently removed by the United States, and which is of special interest to owners of zinc properties in Princeton district, the Nelson Daily News has the following in its issue of the 9th inst.:

"Advices received from New York announce that by a decision of the Supreme Court of the United States the duty is taken off zinc ore imported into that country. This is the biggest thing that has happened for the benefit of the Kootenay mines for many years, not excepting the lead bounty, and the result of it will be the immediate resumption of shipping of zinc ore from the mines which have quantities of it stored, activity in the mining of the ore and rapid development of the numerous zinc properties in this country, where the zinc deposits are large and important.

"For about four years the duty on this ore, which has been asserted to be illegal, has been in dispute before the courts of the United States. Finally, the Supreme court has given its decision and the government of the states has stated that it will rest content under the importation of zinc ore free of duty. The duty was 20 per cent."

### PROHIBITION.

EDITOR STAR—Sir: British Columbia as a whole probably does not want prohibition. The old-timers who have done so much to make the province what it is, came here when there were no better amusements available than whiskey and poker. We who have entered into their labors should not criticise them too severely for tastes acquired when they were away from all the good influences of church and home. At the same time, few of them would wish their children to undergo the same temptations as they had to, nor would they deny the community's right to protect its young people from the danger of drunkenness, if it wants to.

This is no question of 'individual liberty'; the man who wants a drink will always be able to get it; the question is simply whether the people shall be able to do away with barrooms in places where they do not want them. That is a question of fair play.

There are already some municipalities in the Fraser valley where no liquor is sold, owing to the refusal of the local

authorities to grant licenses. The system works fairly well there: there are no barrooms to tempt the young, but those who are thirsty can get all the wet-goods they want from New Westminster. This state of affairs is not quite satisfactory to temperance people, but it is better than the open barroom, and few even of those who take an occasional drink themselves object to it.

SKIDDOO.

### MINERAL EXHIBITS.

R. L. Broadbent, of the Mines Department, Ottawa, arrived in town last Saturday in connection with the mineral exhibition to be made at Seattle, Wash., beginning June 1st. Mr. Broadbent has had considerable experience in exhibitions at Liege, Belgium; Milan, Italy; Christchurch, New Zealand; and at the Imperial Institute, London. Mr. Broadbent is sampling the interior of B.C. now and goes from here to Nelson, Revelstoke, Kamloops, Vancouver and the coast generally. His visit here is in behalf of the Department of Mines, Hon. Mr. Templeman, Minister, who is anxious that British Columbia should be properly and adequately represented at the A.-Y.-P. Any courtesy or aid given Mr. Broadbent will be appreciated by the Department.

### TRAVEL TO BE HEAVY.

#### Seattle Exposition the Magnet Drawing Many from Similkameen.

Steamships for sale or charter are reported to be at a premium on the Pacific Coast, and Alaska steamship lines are sending agents to the Great Lakes and along the Atlantic to negotiate for craft to be used this summer in carrying tourist parties from Seattle to Alaska.

The A.-Y.-P. Exposition, which opens in Seattle on June 1, is of course drawing hundreds of thousands to the West, and that many of them will take the opportunity of seeing also the magnificent scenery of the coast of British Columbia and Alaska is shown by the fact that excursion reservations on the regular boats are already made to the full capacity. Not less than half a dozen other large steamers are either now on the way to Puget Sound, or shortly will be, and these will handle the balance of the traffic. At least thirty large craft will be engaged all through the summer in carrying excursionists back and forth on the six day Alaska Coast trip.

The traffic officials of the Hill system of railroads and the Chicago, Milwaukee & St. Paul estimate that not less than 1,000,000 passengers will be handled over their systems during the Exposition period.

On the 1st of March the Exposition buildings were 90 per cent. complete.

Few Irishmen forget St. Patrick's Day—this is it.

### WHERE THE TAXES SHOULD BE SPENT.

It would be interesting to know the how, why, and wherefore in regard to the allocation of public monies after they have been voted by the local legislature. Upon what principle is the final disposition and expenditure of the money decided by the local member of the legislature? Is he privileged to spend the money where he likes, making the wishes of the taxpayers of secondary importance? It has become a notorious matter in politics that spending of public money is always associated with the wishes of the local vote manipulator, the prime consideration being its vote producing power. Sections voting unfavorably for the member, no matter how great its need, have a poor chance of receiving anything, the same principle applying to individual need of road or bridge appropriation.

What is wanted is some guiding principle or rule insuring to the taxpayer a proper and proportionate expenditure of his taxes for his own benefit in local improvement. In ordinary business transactions value is expected and demanded for money paid. Should it not be so with taxes paid? After deducting the cost of administration, of government, every taxpayer is entitled to his 'money back' in improvements giving him full value for his taxes. That is common law and ordinary justice.

Princeton taxpayers have been paying to the government for the past eight years at least \$1500 annually. How much of the total has ever been spent for their local benefit? How much road or sidewalk built or improved? It is believed that not \$300 out of about \$12000 has been returned to the taxpayer in Princeton! The revenue from poll tax, miners' licenses, coal leases and licenses, timber, land, &c. amounts to about \$16,000 annually from Princeton and vicinity. How much of that goes into new roads and bridges yearly in this section any man can roughly compute—it is a very small proportion. In view of the fact that Princeton district has been bled white while other portions of the riding have fattened at its expense, is it not about time for citizens to assert their rights, or will they meekly

submit to further wrong?

Mr. Shatford, M.P.P., probably never had the matter presented to him except by parties antagonistic to Princeton and who do not own a foot of ground in the town. These parties make the absurd argument that the government ought not to make any improvements for taxpayers in unincorporated, company owned townships. They say the government rightly spends money only in townships where it holds real estate. Such foolish, puerile argument is not worthy of men supposed to have common sense. Why should the people in a township be more highly favored than residents of any other township? Absurdity of absurdities! Hedley is partly owned by the government, but that is no reason why its citizens are more entitled to their taxes being spent in their town than those of Princeton. The taxpayers of Princeton were promised sidewalk and street improvement prior to last election. How much of that promise has been realized? Fair play and fair treatment is all that is desired by the people of this section and Mr. Shatford will, no doubt, accord these without delay.

At least one year's revenue should be spent in Princeton and vicinity during 1909. Sixteen thousand dollars well spent will go a long way in improving foot and traffic travel here. The roads to Copper Mountain, Roche River, Hope Summit, completion of Onemile to Aspen Grove and Fivemile to Summerland and the proposed Stevenson road to Summit City are all necessary and require special aid. Some work should be done on all these roads if not altogether finished this year.

### NOTES AND COMMENTS.

As all the world knows, 'Dunc' promised Grand Forks the home city of his conqueror, Mr. Burrell, M.P., a fine postoffice building prior to the general elections last fall. The Liberal organ which boosted Duncan vociferously through the campaign has just awakened to the fact that some one is a deceiver, to put it in as mild language as possible. It says: "If it (The Sun) was unwittingly made a party to a campaign dodge merely intended to mislead the people, it has enough independence left to cut loose from present party ties, even after eight years' association with the Liberals." The foregoing illustrates the damage to Liberalism all over the riding caused by the dogmatic and unreliable Ross. The same thing happened in Princeton. Dunc emphatically and definitely said he would remedy postal and telephone grievances here, but he didn't rem.

worth a cent, and honest, honoring voters turned him down hard.

DRY FARMING.

Series of Articles, Beginning with the Orchard.

In preparing the soil for future planting, as soon as a crop is harvested double disc the ground, overlapping half the disc. This serves several purposes as it not only forms a mulch and prevents evaporation, but it puts the soil in fine condition to allow the rain to penetrate down and in the case of a stubble field it mixes the stubble with the soil and as soon as a rain comes it starts the stubble decomposing and also germinates weed seeds. Should a heavy rain come before discing it will be necessary to disc again before ploughing; the next process is ploughing, which should be done when the soil is moist and as early as possible. The depth of ploughing depends on what tools are going to follow the plough. If you have a sub-surface packer, plough seven or eight inches deep, following immediately with the packer; if you have no packer do not plough more than five inches deep and follow the plough closely with the harrow; if a heavy rain should come before the winter sets in, it will be necessary to again go over the ground with the harrow. Then first thing in the spring, as soon as the soil will permit, disc and harrow; the field is then ready for seeding. Ground not ploughed in the fall should first thing in the spring be double disked. Ground should always be disked before ploughing, especially in the spring as the surface of the soil after lying all

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: \$5 in bookram with gilt top, or \$7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

DRY FARMING.

winter is more or less solidified. If this is ploughed without being first disked, the surface breaks into coarse pieces, which lie at the bottom of the furrow. This condition retards capillary action and allows too much air to mingle with the soil, inducing rapid evaporation. On the other hand the disc by its rotary motion pulverizes the surface into the most minute particles. These under the action of the sub-surface packer or repeated harrowing with the teeth slanted back, forms the fine sub-surface necessary to hold the greatest amount of water, most favorable for capillary action, and the best condition for the growth of all plants. The plough should be closely followed by the packer or harrow and the ground is then ready for planting.

The Crow's Nest Pass Coal Co. are going to build 1,000 new coke ovens and make other important improvements to their plant.

The Rossland Miner prints a letter from Spokane, saying that that city has the mining fever, and any good proposition can be financed there. The Paulsen building, recently erected at a cost of \$1,000,000 by a working man who made a fortune in mining, has inspired others to try it.

The Princeton Livery AND Feed Stables HUSTON BROS. PROPS

C.

NOTICE.

In the matter of the Land Registry Act, re lot 7, block 1, plan 55, Princeton.

Whereas proof of the loss of Certificate of Title Number 9712 to the above mentioned lands, issued in the name of David Miller of Vernon, B. C., has been filed in this office; notice is hereby given that I shall at the expiration of one month from the date of the first publication hereof, issue a duplicate of said Certificate of Title unless in the meantime valid objection be made to me in writing.

Dated at Land Registry office, Kamloops, B.C., this 22nd day of December, 1908. W. H. EDMONDS, District Registrar.

NOTICE.

Notice is given that thirty days after date I intend to apply to the Chief Commissioner of Lands and Works for a license to prospect for coal on the following described lands: Commencing at the south-east corner of Lot 95; thence north 80 chains; thence west 80 chains; thence south 80 chains; thence east 80 chains to point of commencement.

WILLIAM S. WILSON, Locator. Dated Feb. 14th 1909.
