Coal is King; i.e., sub-bituminous Princeton coal.

SIMILKAMEEN STAR

It is possible to know the mind by reading the face.

Railroad now at the door of Princeton, affording ample opportunity to invest before the certain rise in values—Western development cannot wait; the opportunity must be seized now if fortune great or small be won—Who will be among the fortunate Ones?

Vol. X. No. 34. PRINCETON, B.C., WEDNESDAY, AUGUST 18, 1909. $2 a Year in Advance

SILVER-LEAD ON WHIPSAW

Strong Ledge, 22 Ft. from Wall to Wall, Contains Carbonates Impregnated with Silver and Lead.

Railway Transportation Required for that Section, which is Bound to be Large Tonnage Producer—Mining Camps Dot District—Country Rich in Natural Resources.

Float Led to Discovery.

Mining, which includes prospecting, is probably the most alluring occupation followed by man. From the smallest piece of float to the most highly mineralized ore in place there is intense interest for the man with the 'mineral eye.' It was a small piece of float on a fork of the Whipsaw emptying into the Similkameen which caught the eye of Billy Knight, senior of Knight & Day, prospectors, and from that small beginning what has all the earmarks of a great mine has been discovered. It is no surprise to anyone acquainted with this section of country that a mine should be found there, for Copper and Kennedy mountains and Friday creek with vast and valuable ore bodies are all contiguous and in the same mineral field. The whole of this section extending to Roche river may be termed a vast mining camp awaiting transportation for ore already on the dump or ready to be produced within a very short time. The natural resources of this locality are considered exhaustless in waterpower, coal and other minerals, there being also an abundance of timber for any or all purposes.

In Great Schist Zone.

Knight & Day have located what is believed to be one of the richest strikes of silver-lead ore ever made in British Columbia. Samples of the ore contain lead sulphides and iron oxide or carbonates, assaying 60 p.c. lead, 26 ozs. silver and $1.60 in gold. The ledge is well defined and is 20 feet wide, the country rock being schist. This is part of the famous schist belt which extends some 50 miles north and south along the east slope of the Hope range of mountains and carries the gold-platinum ores in the north and the copper-gold ores in the south. The ledge has been exposed at intervals for 500 feet by open cuts with the silver-lead now in the centre. The lowest exposure of the ledge in the gulch would give a depth of 130 feet. But another hundred feet of depth could easily be obtained by stripping and a tunnel commenced right on the ledge. The trend of the lead is slightly west of due north and south, dipping south-westerly

Three claims, the Lucky Pair, C.O.D., and Day & Knight, have been located by the discoverers. Other claims have been staked by various parties, thus the foundations of a mining camp are laid, the future of which is largely dependent on the amount of capital forthcoming for development and operating purposes. From Princeton Whipsaw camp is distant about 22 miles via the Hope trail. It has a good trail leading from the Hope and is about two miles south of it.

Resembles Some Big Mines.

Mr. Knight has a wide experience in the mines of the western states and also in this province. He is partner in the celebrated Transvaal group of Highland valley, besides having other mining interests throughout the country. If any man should know a mine when he sees one it is Mr. Knight and in all his experience he has not seen anything that starting from the grass roots, bore all the ore characteristics together with proportions and extent that the group on the Whipsaw does. All his other mining propositions fade into comparative diminutiveness alongside this group. He is familiar with the world famed Bunker Hill mine of Wardner, Idaho, on which he was engaged making open cuts, and so far, the Whipsaw property has a remarkable identity with it.

Railroad is Necessity.

The low cost of production of ore that can be mined very largely with pick and shovel will appeal to the investor with limited capital. Transportation facilities are indispensable in every camp, for without them, the most cheaply produced ore, however rich, would be valueless. The railroad is within a few miles of Princeton, and on reaching here must be extended to the outlying camps for tonnage. An easy route is available from here to Ashnola, where Great Northern people are interested, from there to Whipsaw camp is neither difficult nor far. In any consideration of railroad construction Whipsaw must command attention. It is a shipping proposition today.

Messrs. Knight and Day have lost no time in preparing for development of their property. A good trail has been made to it and quarters for the winter are now being built. They are progressive prospectors and more will, no doubt, be soon heard from them in their work of developing and proving the property. Samples of the ore may be seen at the Star office.

DIED A TRUE HERO.

The appalling misfortune whereby 11 persons were burned to death in the Okanagan hotel, Vernon, had for one of its victims, Archibald Hickling, nephew of Arthur Hickling, managing director of the V.F.M. Co., Princeton. Having saved two from the flames, a girl appeared at an upper window screaming for help, which the deceased heroically strove to render, exclaiming, 'I'll save her or I'll die.' The girl was saved by his efforts but he fell into a pit of flame from which he never emerged.

SALE OF THE NICKEL PLATE.

Great Mine and Daly Reduction Co's Works in New Hands.

The sale of the Daly Reduction Co's stamp mill and the famous Nickel Plate mine at Hedley has at last been consummated after a period of suspense and anxiety through fear that the deal might be dropped and the non-progressive methods of the old regime continued. It means much for Hedley and will benefit the whole Similkameen. A smelter may now be looked forward to with some real and tangible basis of expectancy.

The purchasers are men interested in the United States Steel Corporation and the price paid is said to be $6,500,000, but no official figures are, as yet, available.

There are indisputable evidences of the Great Northern magnate, J. J. Hill, being interested in the deal, which makes the bargain, so far as the Similkameen public are concerned, all the better.

TOWN AND DISTRICT.

Ernest Waterman is expected back in two or three days from the coast, coming over Hope mountains. He was interviewed in the Province and stated that his mission to the coast was to purchase a plant for the coal mine, which will enable them to produce 400 tons daily.

Indications of an approaching boom may be found in the arrival recently of the piledriver and that other attraction the niggah minstrels. 'Waiting, still waiting.'

Rev. Mr. Conn killed a rattlesnake a little this side of Hedley recently with seven rattlers. Like St. Patrick, he would banish not only snakes but all other evil. 'More power to him.'

Dr. Whillans of Hedley was in town Monday.

WANT BETTER ROUTE

Great Northern Engineer Looking for Shorter and Easier Way.

Five or Six Miles of Tunnel Proposition at Head of Eagle Creek—V.,V. & E. Progress.

It is well known that the chief engineer of the V.,V. & E. and other Great Northern officials have a particular dislike for the Coquihalla route as now surveyed. It is with a view to avoiding this route that Engineer Kennedy with two assistants, Black and Hogeland, left on Thursday for the head of Eagle Creek, a tributary of the Tulameen river. From the head of this creek to Unknown Creek there is a long divide, which, if favorable for tunnelling, it is said, would save some thirty miles of heavy construction from the head of Coquihalla Pass to Hope. The party is piloted by L. Gibson who knows the country well and is an experienced packer.

Pile driving is proceeding rapidly on the bridge across the Similkameen, due to the clocklike work of the machine and every man knowing his business and doing it. In another week or ten days the bridge will be ready for the horse dump cars extending the grade onto the station yard flat.

More men have arrived recently and a big push is noticeable all along the line. It is believed that the raillayers will be here on schedule time, Oct. 1st.

SPOKANE INTERSTATE FAIR.

EDITOR STAR—Sir: While there is already abundant evidence that we shall have the greatest display of minerals at the Spokane Interstate Fair on Sept. 20 to 25 inclusive that was ever shown at the grounds it still remains for a number of districts and mines to be heard from.

The opportunity which will be afforded the miners to have their exhibits examined by several hundred of the most prominent mining engineers on this continent or any other should be all the inducement required to call out a display from every mine in the Northwest.

Will you not urge the miners of your locality to get busy and get out the best display possible, and if a party cannot be sent with the exhibits, pack them carefully at the proper time and send them in with such maps, photos and descriptions as will best advertise the mines. The exhibits will be viewed by five hundred mining engineers and many thousands of eastern people.

Very respectfully yours,

L. K. ARMSTRONG,

Spokane, July 31. Secretary.

The Similkameen Star.

J. M. Wright.

LET THERE BE PEACE.

The recent meeting of King Edward and the Emperor of Russia is a matter of unusual moment in view of the war cloud, now thickening and again dispersing, yet forever hanging over Europe. Our King has well earned the title of 'Peacemaker,' and there is no doubt that his influence to perpetuate peace and harmony of the European nations was exerted upon the visiting monarch. The Czar has relinquished his despotic powers recently, giving constitutional government to his poor, downtrodden subjects. He has at last opened his eyes to the fact that the nearer a ruler lives to his subjects and the greater freedom they enjoy in self government is the surest protection from bombs a czar can have. No bodyguard required for that monarch who treats his subjects as if they were his equals, possessing all the rights and liberties of the law that he does, and subject to the same moral and physical infirmities that he is. Such a monarch will always command the love of his subjects and his life never stand in jeopardy of any political assassin. Our own good king moves among his subjects with perfect freedom from any fear of the bomb thrower and this immunity is the result of that consciousness of having given no provocation for violence. There will always be the maniac and the fanatic to threaten, and even take, the lives of prominent personages, but they are not to be confounded with any other in enormity. If the Star may be permitted to humbly suggest to the crowned heads and other rulers of Europe it would urge upon them the necessity for frequent visits and an annual conference. It seems that much of the friction and estrangement in Europe is due to the cold hauteur of the rulers. This spirit cannot exist where there is familiarity and association. Europe armed and still arming beyond all reason is an awful commentary on the statesmen and rulers concerned. The best thing to be done is to arrange a conference and call a halt in this mad and ruinous expenditure on armaments No man in all the Old World is more capable of bringing about an entente cordiale among the nations than King Edward the 'Peacemaker' and the hope is entertained that he may turn his attention to the noble cause of pacifying Europe, and with it the world at large. Canada can ill afford to be plunged into the vortex of never ending debt for the mere show or awe inspiring effect of a large fleet of tubs of war trailing their smoke up and down her coasts and the ocean wide. Every cent of Canada's revenue is required in development of her vast natural resources—she has no time for building a navy which in a few years must be consigned to the scrap heap or find a last resting place at the bottom of the deep blue. Statesmen, politicians and diplomats can no longer be trusted to carry out a wise policy, owing to a subtle something called influence. The King is our only hope to avert the impending naval craze which threatens to financially swamp the country.

NOTES AND COMMENTS.

One of the most encouraging features of the present slack business period is the cheerful optimism and buoyancy of nearly all engaged in business in Princeton. They are firmly grounded as to the future of the town. The fact that here must be the terminus of the V.,V. & E. for at least the next eighteen months gives assurance of trade expansion resulting from increased population and a permanent payroll. Nearly every business institution in town reports increased receipts, in one case 25 per cent., in another almost double in comparison with former years. While it is hard for the fixed residents of the town to realize the progress and improvements made or to grasp the realities of trade expansion, yet these facts are patent and most glaring to visitors.

A decrease in cigarette consumption of forty-five millions is the result of enforcing the law regarding their sale to youths under sixteen throughout Canada.

It is a well rooted policy of this paper in commenting on matters of public interest to avoid personalities in an offensive sense. In condemning the management of the telephone line the desire to remove unfair treatment of certain applicants for telephone accommodation and the further desire to make this line a credit to the Liberal government, alone actuated the Star. It would be a great mistake for any newspaper to condone or tolerate the acts of any public servant who so far demeaned his position as to injure the business interests of those with whom he is unfriendly and on whom he seemingly delights to vent his anger or jealousy. Such narrow minded individuals should not be allowed to hold the position of a public servant. There comes a day of reckoning for all such sooner or later.

NOTICE.

Thirty days after date we intend to apply to the Chief Commissioner of Lands for a license to prospect for coal on the following lands:

Starting from a post placed at the N.E. corner of Lot 43, thence 80 chains W., 80 chains N., 80 chains E., 80 chains S. to point of commencement.
July 18, 1909. W. B. BAILEY, Locator.

Starting from the N.E. corner of Lot 43, thence 80 chains N., 80 chains E., 80 chains S., 80 chains W., to point of commencement.
July 18, 1909. W. E. DUNCAN, Locator.

Starting from the S.W. corner of W. E. Duncan's coal claim, thence 80 chains E., 80 chains S., 80 chains W., 80 chains N. to point of commencement.
July 18, 1909. R. W. REID, Locator.

Starting from the S.W. corner of Lot 706, thence N. about 40 chains, W. to the Tulameen River, thence up the Tulameen River and S. 80 chains, E. 80 chains to the Similkameen River, N. 80 chains more or less to point of commencement and containing 289 acres more or less, and formerly known as Lot 243.
July 18, 1909. FRANK BAILEY, Locator.

NOTICE.

Sixty days after date I intend to apply to the Chief Commissioner of Lands for permission to purchase 289 acres of land described as follows: Starting from the S.W. corner of Lot 706, thence N. about 40 chains, W. to the Tulameen River, thence up the Tulameen and S. 80 chains, E. 40 chains to the Similkameen River, N. 80 chains more or less to point of commencement and containing 289 acres, being formerly known as Lot 243.

LOCAL AND GENERAL

Gordon Murdoch will shortly begin work on the pack bridge at Ashnola.

Dr. Blair, of Portland, Ore., was in town Saturday on mining business. It was his first visit to Princeton and was much impressed with its appearance and possibilities. The Dr. is a very probable investor in Princeton district.

The death of Gustaf Johnson at Nelson on Tuesday, 10th inst, removes a resident of Princeton for the past three years, he having been employed in the brewery for about that length of time. He died from heart failure. The deceased was about 50 years of age, of a kindly disposition and had numerous friends. He was a member of the Order of Eagles, by whom the last rites of burial were administered.

A close season has been declared for bear which will extend from July 15 to Sept. 1. During this time their fur is not of any appreciable value.

Just Arrived—A large and varied selection of Stetson hats at the A. E. Howse Co's.

H. McCallister has bonded his mine on Granite Creek to coast parties.

Bear are plentiful in the berry sections of the mountains.

F. P. Cook, postmaster and government telephone agent at Granite Creek, was in town Thursday.

When it comes to soliciting money for advertising the mineral resources of this district it is surprising what a long, poor hardup story some people can tell. Yet, when a flimflam darkie show comes to town a dollar is so much old paper and the whole population digs up. There must either be cheaper shows or more interest taken in developing the town if we are to progress as we should. Would it not be a good plan for the Ladies Aid and Board of Trade to argufy this matter and if possible come to a helpful conclusion?

Critics of the colored minstrel show held last Friday night think there was too much of a muchness and rather more of a same sameness than are necessary to make a fellow laugh. Those coons might suit some audiences.

The provincial government has put a bridge across Bear Creek and also over the Tulameen at the mouth of Slate Creek. Several culverts have been put on the road between Slate Creek and Otter Flat.

Ladies Aid will meet at the home of Mrs. Murdoch, Thursday, 3 p.m.

Joe Wigmore pulled in with the minstrel show and received congratulations on his promotion. Just the same, he is the funniest man around and handy with the silk on the overland flier between Hedley and Keremeos.

E. F. Thomson, a settler from U.S., has decided to become a resident of this district.

Messrs. Murdoch, Snowden and Petrie have gone a-huckleberry picking.

AMATEUR WORK FINISHED
ADDRESS - PRINCETON, B.C.

COPPER HANDBOOK

(New Edition issued March, 1908.)
SIZE: Octavo.
PAGES: 1228.
CHAPTERS: 25.
SCOPE: The copper industry of the world.
COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?
