Fishing, Hunting, Bear, Sheep, and Alpine scenery

WHIPSAW IS MECCA FOR INVESTORS IN SILVER-LEAD

MINES AND MINING.

C. Cunningnam, of Seattle, and E. J. Field, of Spokane, arrived in town last Monday and went up to Whipsaw. They will inspect the silver-lead camp, being the guests of Day & Knight. Mr. Cunningham is a large individual mine owner and is interested in Alaska coal.

C. M. Snowden panned out two nice gold nuggets of about 60c. and 40c. value besides many grains of platinum and fine gold worth about $1.50 from six pans of dirt taken from the Tulameen. Some day the well known placers of this district will yield their treasures to the modern dredge owned and operated by enterprising people.

E. Jacobs, of Victoria, B. C., mining authority and special correspondent for several mining journals, arrived in town last Saturday and will visit Voigt Camp, Copper mountain and Leadville.

Charlie Day and E. P. Galliac went up to Whipsaw camp last Saturday to the Knight & Day mineral properties. Work will be resumed on the Lucky Pair on which considerable development and exploratory mining has been already done. The indications on this silver-lead proposition are very promising and has attracted the attention of experts.

It is characteristic of periods of financial depression, that large and small investors turn from real estate and commercial investments to mining, and at the present time conditions are particularly favorable for a revival of general public interest in the industry, especially as some of the most important British Columbia properties are on the dividend paying list.

Jas. E. McCauley is working on the Trachite, Copper mountain, and has splendid showings of ore. He has done a lot of work in recent years on the Reco.

LEADVILLE CHUNKS

Leadville, June 16.—I am sorry to report that the work on the Indiana Adit has crossed off the ore. The fissure at the surface is branched and the men followed a joint crack instead of the main fissure, result now, no ore.

Work is progressing on the Treasure Mountain property satisfactorily.

Mr. Taylor, of P. Clark's company, has men cleaning out the pits on these properties.

Reilly and Jensen have a good prospect in the Carbonate. The lime gangue shows some argentite 87 percent silver besides galena and zinc blende.

John Blackburn has had his prospector, W. Waddell, helping J. C. Reilly to cut out a trail up Sutter creek, a distance of three miles, to the North Star claim, one of the Ross claims now held by Clark. W. Waddell will continue the trail on from there to Ranger basin.

The officials aud citizens in general are pleased with the progress being made by the road gang working towards Leadville.

We are all coming down Dominion Day.

SCHOOL MATTERS

The approach of the annual school meeting and the necessity of filling a vacancy on the board of school trustees, together with the engagement of two new teachers, will cause all interested in school matters to take notice. The public school is always increasing in the number of pupils and its importance is enhanced from this and many other matters of detail in management. Strict economy without impairing the usefulness of the school is necessary, and whether this is effected in the purchase of needful supplies or the salary of a teacher, the taxpayer will appreciate any effort to lighten his burden. From the public schools report issued this year the following are a few of the salaries paid in places similar to Princeton: White Rock, monthly salary, $56.66; Rosedale, principal, $70.00; second, $55.00; Sandon, $70.00; Greenwood, $70, $75, $125 to B. A. male principal; Hatzic, first, $60, second, $55; Keremeos, $70; Kaleden, $60; Okanogan Falls, $60; Fairview, $70; Tulameen, $73; Coalmont, $85. The attendance of scholars at Princeton is about 85.

Miss Elsie M. Wier, of Tulameen, has been engaged for the ensning year for the first division at a monthly salary of $75, and Miss Jennie E. O'Brien, of Alberta, will teach the second division at a salary of $70 per month. Both have first class B. C. certificates. Compared with last year the saving in salaries will amount to about $125.

D. B. Falkner, inspector Canadian Bank Commerce was in town on official business this week.

R. S. Ross, formerly on the staff of the bank of Commerce, here, was in town Monday renewing old acquaintanceships.

Miss F. Waites, of Reading, Eng., sister of Mrs. N. McFadden, is visiting her now.

Miss Olding, formerly teacher in Nelson public schools, has gone to the coast prior to resuming her profession at Grand Forks.

Apple trees loaded with young fruit and all shrubs and vines in splendid bearing condition is the state of the garden belonging to Hugh Hunter. Vegetables are also in the pink of condition.

The moving pictures at the Princess draw good houses and showgoers generally are pleased with the inexpensive entertainment provided. The repetition by request of 'The Battle Hymn of the Republic' showed the striking adaptation of illustration to a hymn that is still a great inspiration to all who love freedom and liberty. The Princess is popular because it caters to public tastes.

Showers of rain and blessing—the hills never looked prettier in their garment of purest green.

CROP PROSPECTS FINE SAWMILL SOON TO CUT

TOWN AND DISTRICT.

The first cement to be made in East Princeton will be next week.

The Similkameen Lumber Co., Limited, will begin the manufacture of rough and dressed lumber as soon as the machinery can be started up Waddell and F. Layton are the practical members of the company and will operate the mill now located on China creek. Lumber is in considerable demand and the complaint of builders is the lack of immediate delivery for their special requirements. A sawmill is needed.

Mrs. W. S. Stains arrived last Saturday from the south and will become a resident of Princeton with her husband.

Wilson Bros. have nearly finished the eight roomed cottage for Kirkpatrick & Malone.

Strings of trout weighing 5 and 6 lbs are caught in a few minutes on some of the creeks.

Messrs. Hog, Bunbury & Co. real estate brokers of Kamloops, are establishing agencies of the parent business in towns in the interior and the first named gentlemen arrived in Princeton yesterday for that purpose. Both gentlemen are extremely well pleased with the outlook in this section.

B. E. Williams and wife, from Twisp. Wash., arrived in town Monday and will take a look around with the object of becoming settlers and investors.

Constable Pritchard is giving citizens very general satisfaction in keeping the streets free from incapables and disorderlies. A town with a reputation for decency and orderliness is always attractive to homeseekers and all respectable persons.

There is a special charming fragrance to the lilac which brings back memories of 'down on the farm' and old home. Mrs. Hagerman has put us, the agricultural editor, under many thankful moods for boquets of lilacs grown on her well cultivated ranch on Onemile.

Farmers are all pleased with the prospect of heavy crops.

CELEBRATION NOTES.

Ten more long days and then the 'big days,' July 1st and 2nd.

They're coming—tillicums, sweethearts and wives.

The boys and girls are not forgotten in the program. Good money for the winners and fame for the swift.

Princeton lacrosse team is practising for the big event. They are an enthusiastic bunch and will give a good account of themselves in the field of sports.

Conductor S. R. Gibson is giving his best services to the band and some inspiriting national music will be heard Dominion Day.

The first Wednesday half holiday will not be forgotten as a social and economic stride toward the betterment of all classes of laborers. It will also not be forgotten by the Married Men in their noble defence of their 'homes,' and their 'fields' strewn with 'dead ones' dying for that great civilizer and developer of young humanity—baseball. The Singles played fast and furious ball, smiting their foes hip and thigh, finally closing the score at 16 to 5. Among the players were the former professionals, Dell Young, Harry Avery, Home McLean, Bert Russell, Col. Sellers, Jes Rash, Jack Waddell, Slim Frazier, Bitter Root, Tim O'Brien, Pete Pascoe, Sam Gibson, Thorpe, Hughie, Waddell, jr., Bolin, Johnson, Bromfield. The spectators enjoyed the game fully and were in nowise slow with appreciation. The Married Men want another game and will probably get it. These games are good practise and will put some players in condition for the big event on Dominion Day.

TEN YEARS AGO.

(From The Star, 1903)

At the regular meeting of the board of trade a letter was read from Aulay Morrison, M. P. for New Westminister district, promising to do all in his power to facilitate the railway subsidy petitioned for. The settlement of the Indian reserve smelter site at Hedley wherein the Daly Reduction Co. agreed to accept 148 acres as sufficient for their proposed large reduction works was commented upon.

F. P. Cook and Henry Woodward were in Princeton recently. The latter is over 80 years old and remarkably active.

A. D. Worgan of Allison was in town Monday evening attending the conservation meeting.

Geo. Goldsborough, Perley Russell, F. P. Cook, Judge Murphy and Jim Wallace were elected delegates to the Conservation convention at Fairview.

The Misses Hagerman arrived home from Greenwood last Thursday.

Geo. W. Aldons, C. O. French and Neil Henderson were the committee of arrangements for Dominion Day celebration. The event was a grand success.

M. K. Rogers, of the Nickle Plate Co., Hedley, has arranged with the Indians and the Dominion government for the reserve on which he will erect a smelter.

J. A. Schubert is a probable candidate for political honors in the coming elections.

The attendance at the public school is 14.

Superintendent Turner made an inspection trip over the district last week and found that road building is making good progress. With splendid weather and plenty of laborers a record amount of construction is going on. If the railway companies showed up as well as the provincial government there would be no chance for a public kick.

Three men were killed and five injured, some very seriously, in a premature explosion in a rock cut near Naramata on Wednesday, 11th inst. Those killed were: Pietro, Guiseppe, Callilo Allursio, and his brother, Dominico. They were buried after an inquest had been held by Dr. R. B. White. The injured men are in Naramata hospital.

R. Boeing of Hedley was in town Saturday.

TEA CONSUMPTION

Although it is difficult to give a close figure for the world's production of tea, this is said to be over 1,127,700 (long) tons. That this is not exaggerated will be seen from the following data for production: India 123,200 tons; Ceylon, 85,000; Java 22,700; Japan. 19,400; Formosa, 11,690; China (exportation), 53,600; Natal and Annam, 1,400 tons. To this is to be added at least 36,000 tons of compressed tea in tablets, which is put directly on the market by Chinese firms. There must also be taken into account the tea produced in China and Japan and consumed on the spot, this being estimated to be 5 pounds or less per head, so that for 342,000,000 inhabitants this figures at 774,600 tons. For this reason China and Japan do not figure higher in the export list. It is estimated that the total consumption of tea for the rest of the world is 300,000 tons.

More than a ton of bamboo poles are being used in extensive tests for concrete reenforcement by a Chinese student in mechanical engineering and naval architecture at the Massachusetts Institute of Technology. In China bamboo is plentiful and cheap, while steel is expensive, and this student believes that there will be an enormous development in the use of reenforced concrete if a practical method of reenforcing with bamboo is devised.

PHILOSOPHY OF LIFE.

The nobility of any country are the men and women of good character. Titles, like the spurious trade mark, cannot add worth to an imbecile or profligate.

So uncharitable and lacking in honor are the mass of people that we may accept the little good spoken of neighbors as being absolutely true and reject all that is reported to be bad of them.

The person who seldom speaks the good word about others has little that is praiseworthy to be said of himself or herself.

Never believe an evil report of anyone until you can verify it yourself. Gossip is always unreliable.

What we accuse others of is often the very thing of which we are guilty. Be sure you are clean and wholesome before looking for dark spots on your neighbors character.

To think aright is to live aright. When tempted with impure, lying, malicious, slanderous, jealous, proud thoughts, say 'get thee out, satan,' evil.

Sickness, ill health or disease are the result of sin and the origin of disease is an invention of evil mind—new medicines and new diseases are born almost every day.

To be prosperous, happy and healthy the mind must be kept clean and pure. Guard well the door of thought.

Optimism produces longevity of life; pessimism shortens years of existence and produces long faces. Be a booster. Knockers are not long-lived.

It is fatal to success to attempt to please everyone, as the man in the fable did. Even a newspaper editor cannot please the unique and varied tastes of myriad readers. The best he can do is to make certain of his ground, then stand on it, not heeding the whiffs of criticism lost on the circumpolar air.

Never borrow trouble for you cannot hand it back.

W. C. McLean and family have moved up to Ashnola into their summer home.

A communication to the Star from Fivemile is crowded out of this issue but will appear next week.

WATER ACT

Notice of Application for the Approval of Plans and Petition for Approval of Undertaking:

TAKE NOTICE that ASHAWOTA POWER COMPANY, Limited, will apply to the Comptroller of Water Rights for the approval of the plans of the works to be constructed for the utilization of the water from Similkameen River, which the applicant is, by Water Permit No. 28 authorized to take and use for power purposes.

Petition for the approval of the undertaking will also be made to the Honorable the Minister of Lands.

The plans and particulars required by subsection (1) of section 70 of the "Water Act" as amended and the petition and plans for approval of undertaking as required by Section 89. have been filed with the Comptroller of Water Rights at Victoria and with the Water Recorder ta Fairview and Nicola.

Objections to the application may be filed with the Comptroller of Water Rights, Parliament Buildings, Victoria

Dated at Vancouver, B. C. this 29th day of May, 1913.

T. D PICKARD.
Agent of the applicant.

In the Supreme Court of British Columbia

In the Matter of Plans Cancellation Act and Amendments Thereto;

AND

In the Matter of a Subdivision of a Portion of District Lot 1824, Similkameen Division, Group 1. Yale District, in the Province of British Columbia:

TAKE NOTICE that an application will be made to the Presiding Judge in Chambers, on Wednesday, the 25th day of June, 1913, at the hour of 10:30 o'clock, or so soon thereafter as Counsel can be heard, at the Court House, Vancouver, B. C., on behalf of Clarence R. Briggs the registered owner of a portion of District Lot 1824, Similkameen Division, Group 1, Yale District, for an order that Plan numbered 998 registered in the Registry Office, City of Kamloops, in the Province of British Columbia, covering said portion of District Lot 1824, be cancelled, and that a subdivision plan be registered in substitution therefor.

Dated this 31st day of May, 1913.

W. J. BAIRD,
Solicitor for the Applicant,
Clarence R. Briggs.

To the Attorney General, the District Registrar of Titles and to all whom it may concern.

WATER NOTICE.

For a licence to take and use water.

Notice is hereby given that The British Columbia Copper Co Ltd. of Greenwood, B. C., will apply for a licence to take and use fifty cubic feet per second of water out of Whipsaw Creek, which flows in an easterly direction through public land and empties into Similkameen River near Ashnola, B. C. The water will be diverted at a dam near this notice and will be used for power purposes on the land described as the west bank of Similkameen River.

This notice was posted on the ground on the 28th day of May, 1913. The application will be filed in the office of the Water Recorder at Ashcroft, B. C.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

MINING BUSINESS BRIGHT

The upward tendency of metal prices together with ready money available for genuine mining propositions point to a revival of business in minerals of every description. With quite all the metalliferous mines working at high pressure and those of the coal mines operating at all with a tonnage product of any moment the whole industry is healthier in British Columbia than at any previous stage of its history. At the present moment there is not a discouraging or depressing factor in the mining outlook for the Similkameen district. The oldest producing gold camp in the district, Hedley, is verging on an era of expansion which is causing owners to speak most hopefully. Wealth computed in many figures has been divided among stockholders of the Hedley Gold Mining company and it is believed that some of the surplus is soon to be reinvested in the enlargement of the power and producing plants. In Princeton the coal mining situation is unchanged due largely to the circumscribed market and competition. When the Kettle Valley connects Princeton with the numerous Okanagan towns and the V.,V. &. E. gives a short line to the Pacific coast and the new Wenatchee field, then our coal will not have unfavorable or discriminative transportation as to rates and distances. The development and explorative work carried on by the Columbia Coal & Coke company so vigorously during the past three years has been stopped. It is not improbable that this property will be owned by one of the subsidiary companies of the big railways, and in fact it is learned from an authentic source that negotiations are pending and that vigorous coal mining may be expected soon at Coalmont. Whatever results it is the hope of everyone that this splendid coking coal may soon be converted into coke, thus encouraging and quickening the erection of a smelter for treatment of the abundant copper ores of the district.

The B.C. Copper Co. has been steadily at work for about three years proving and prospecting its bonded properties at Voigt camp and Copper mountain. From its president, Mr. Erb, it is stated that large ore bodies have been found and the values higher in proportion to quantity than any ore owned by the company. Five diamond drills are in full commission testing the ground under bond. It is reported that the company will erect a concentrator at or near Ashnola. Already water power is applied for to be used in some project, either concentrator or smelter, and for mining purposes. Kennedy mountain with its rich and extensive copper-gold ore deposits, Friday creek and Roche river camps showing splendid ores; Whipsaw rich in silver-lead and an undoubted producing camp as soon as wagon transportation is obtained; Fivemile and Onemile copper-gold ores in large and varied deposits; the United Empire coal mine now producing coal for the cement works at East Princeton; the Roany placer camp; the Lambert gold-platinum placers on Granite creek, now successfully dammed for fluming; and the hundred other ore mining prospects, placer diggings, and coal companies give the reader an idea of the vast mineral resources in this immediate vicinity. Leadville and the Tulameen and Otter valley districts are known to contain minerals in great variety. The development of Leadville mining camp is progressing at a rapid rate. Mining men with a reputation for success behind them are now interested in the district and the necessary capital follows them. Real estate in the larger cities is no longer characterized by that seductive class of speculation or gambling which marked the earlier boom and investors are now invading the somewhat exclusive mining circles. Wildcatters have been eliminated from the confiding investor and now mining is on as safe basis as that of the merchant or manufacturer. Now the 'goods' must be produced, in the past the money was produced and the mine found later, if ever.

NOTES AND COMMENTS.

In the whirligig of recent events the spectacular reached its highest point and sentiment its most servile phase when the kaiser received the homage of the petty German kings and princes, bowing and kissing, and uttering the honeyed adulation of slaves. Another 25 years of the kaiser's military regime will prepare the way for the republic and the peace of the world.

It is said that the adoption of the cash payment system throughout the world would reduce litigation cases by two-thirds and the number of liars to a small fraction. Is cash or credit best?

B.C. Portland Cement Co.
United Empire Coal Mining Co.

These Companies will Shortly Operate on Extensive Scale and Establish Permanent Payroll.

EAST PRINCETON

The manufacture of cement will begin in a few weeks. A permanent payroll and a growing town with electric light system, waterworks and cement paved streets, will result from the industries now in formative stages. According to the history of progress in this province investments made now in East Princeton real estate must double and treble in a short space of time. This is the experience in other towns, why not the same in East Princeton? Two railways will serve transportation.

Information as to prices of Lots and Terms given by C. R. Briggs, Gen. Agent, 615, Hastings St. W. Vancouver, or apply D. G. McCurdy, East Princeton.

RELIGION THAT PROVES ITSELF

At the annual meeting of the Mother Church, held this week, it was stated by the clerk, in his report, that the number of persons admitted to membership in the church during the year just closed was greater than ever before in any year of its history; also, that the number admitted at the semiannual admission of members on May 30 of this year was the largest number received at any time since this church was formed.

The full significance of these statements cannot be understood except by those who realize that no one is solicited to join this church, and but few join it until after they have been healed of disease of some kind, or have experienced such a moral or spiritual regeneration as has completely changed their whole outlook upon life. What effect, therefore, such facts as these will have upon those persons who have been unwilling to admit the stability and inherent strength of the movement founded by Mrs. Eddy, is something with which we have no occasion to be concerned. All we need to know is that we have proved for ourselves in Christian Science the word of the prophet Isaiah that "the Lord's hand is not shortened, that it cannot save; neither his ear heavy, that it cannot hear," and that divine Love is ready to heal mankind when mankind is ready to be healed. Jesus said that to understand God is life eternal, and so long as Christian Scientists endeavor to prove the truth of these words, so long will the healing of all manner of diseases continue to win adherents to and strengthen the cause in which they have enlisted.

Mrs. Eddy, when she formed the Church of Christ, Scientist, declared that its object was to "reinstate primitive Christianity and its lost element of healing" (Manual, p. 17). That this lost element of healing is being reinstated, is proved by the verbal testimony of thousands at the Wednesday evening meetings each week, in addition to the testimonies which with their message of hope and healing enrich every issue of the Sentinel and Journal. And not only this, but the better idea of God which Christian Science is inculcating, is shown in a letter received at this office, from which we quote as follows:

"The Bible is a new book to me, for Science and Health truly opens up the Scriptures. In the struggle with bad health I would often ponder the Master's words but at times I would think that perhaps it was God's will for me to suffer out my life, that this was possibly the only way for me to gain a home in heaven; but I am thankful to know that God is too just to send suffering on His children. What a grand thing it is to understand God, instead of merely believing on Him!"

It is comparatively easy, therefore, to deduce from these premises a logical explanation of and reason for the steadily increasing membership of the Church of Christ, Scientist; namely, that through the apprehension and application of the teachings of the Master, as interpreted in the light of the text-book given us by our revered Leader, mankind is being freed from the bondage to sickness and sin which has so long been accepted by the Christian church as a part of the divine plan for the salvation of the children of men; and that it is the high privilege of every Christian Scientist to spread abroad this healing truth, to become a living epistle which may be known and read of those with whom he comes in contact. Nor should we ever forget, in our gratitude to the giver of "every good gift and every perfect gift," to be thankful for the Leader through whose untiring labors for mankind the Scriptures have again been opened up to us, and the promise of the Master, "He that believeth on me, the works that I do shall he do also," has become a demonstrable truth. Remembering this, we may well recall our Leader's counsel to "avail ourselves of the blessings we have, and thus be fitted to receive more,, (Science and Health, p. 3); and for the new year upon which we are entering, take for the church which she founded and nurtured the message of the apostle Paul to the church at Colosse: "Let the peace of God rule in your hearts, to the which also ye are called in one body; and be ye thankful." —From Christian Science Sentinel. Archibald McLellan, Editor.

RELIGIOUS SERVICES.

Anglican service at Hedley—11 a.m. and 8 p.m.

Christian Science lesson-sermon subject next Sunday: 'Is the Universe, Including Man, Evolved by Atomic Force? Touching the Almighty, we cannot find him out: he is excellent in power, and in judgment, and in plenty of justice: he will not afflict. Job 37 : 23.

TRAINING THE CHILD

Luther Burbank thinks that the training of children should be in many respects like the training of plants. He says:

"Do not be cross with the child; you cannot afford it. If you are cultivating a plant, developing it into some right ways. Let the children have thing finer and nobler, you must love it, not hate it; be gentle with it no abusive, be firm, never harsh. I give plants upon which I am at work in a test, whether a single one or a hundred thousand, the best possible environment. So should it be with a child, if you want to develop it in music, let them have pictures, let them have laughter, let them have a good time; not an idle time, but one full of cheerful occupation. Surround them with all the beautiful things you can. Plants should be given sun and air and blue sky; give them to your boys and girls. I do not mean for a day or a month, but for all the years. We cannot treat a plant tenderly one day and harshly the next; they cannot stand it. Remember that you are not training only for a day, but for all the future, for all posterity.—Michigan Grange Bulletin.

After months of careful experimenting, Mr. Charles E. Saunders, Dominion cerealist, has succeeded in producing a new kind of wheat, which, it is believed, will be worth millions of dollars in Canada. The new variety, which is known as "Preludo," was obtained by cross-fertilization, of the most hardy grades, and will not only grow in the northern districts of Canada, but will ripen from eight to ten days earlier than any of the others. By producing grain that will stand the cooler climate of the north, Mr. Saunder's success will make it possible to grow wheat on millions of acres in the Northwest and other districts where the land has been previously undeveloped because no wheat plants could stand the coolness.

Synopsis of Coal Mining Regulations.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1. an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applitcant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-division of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5, which wtll be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five per cent per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quanity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lease may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secrtary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY
Deputy Minister of the Interior.

Cheap Footwear

¶ is rather an expensive economy, for as a rule you not only suffer in comfort, bnt in appearance as well.

¶ Wearing qualities also are inferior to the better shoe and you seldom feel that you have had just returns for the original cost.

¶ ***INVICTUS*** shoes are not cheap shoes. They are made from selected leathers, by skilled workmen, on foot-form lasts. Their style is distinctive and their comfort so perfect that your feet are forgotten.

¶ They give the utmost of wear and are worth many times their cost in the satisfaction you receive.

§ A better shoe man never wore.

§ The best good shoe, ***Invictus.***

The A. E. HOWSE Co. Limited,

SCIENCE AND INVENTION

In a magazine article published a few years ago, Thomas A. Edison is reported to have expressed the belief that "inventiveness" can be taught if the pupil has ambition, energy and imagination. Recently, Dr. Alexander Graham Bell in a public address on the evolution of the telephone, told how his father encouraged his sons to invent and particularly how he, Dr. Bell, before reaching the age of sixteen, had made some important discoveries in sound which, however he found were not original but had been described by Helmholtz; also how he and his brother had completed a talking machine which would pronounce the word "mama" so plainly that when operated in the hall of the apartment house caused some of the tenants to open their doors to find out whose child was crying. Dr. Graham Bell told of many interesting experiences leading up to the telephone production and repeated his frequent assertion as to the important part played by his familiarity with the science of sound, telling how the sound and electrical features of the telephone inspired some one, Maxwell, probably, to describe the great invention as the result of a cross-fertilization of the sciences.

Two Austrian watchmakers have built a clock which receives its motive power from a current of air blowing upon a turbine-shaped wheel. The clock is so simply built, that the current of air produced by a stove or kitchen range is sufficient to make it go. The air is brought to the clock by a pipe fixed upon the wall. A very strong current is reduced by a certain clever contrivance which regulates the speed of the works. This clock serves at the same time as a ventilator. The one built as a sample is installed in a restaurant at Unymarkt and works satisfactorily.

Quite an extensive scheme is on foot to use water-power from the Weser and other streams so as to operate three electric stations and distribute current over an area of 2,500 square miles, reaching a population of 600,000. The total cost of the enterprise figures at $2,000,000 and over. Dams are to be erected across the streams at Eder Munden, and Helminghausen for supplying the three turbin plants at these points, and all these plants together with their sub-stations will be inter-connected upon the same network of power lines.
