Princeton coal is the housekeeper's friend; it is clean.

SIMILKAMEEN

STAR

Keep ahead rather than behind the times: Never lag.

Princeton is favored with natural resources and position to become a great manufacturing and industrial center—Cheap fuel and water power are almost without limit—Large cement works to be established in the coming year—Best location for a smelter.

Vol. XI. No. 45. PRINCETON, B. C., WEDNESDAY, NOVEMBER 2, 1910. $2 a Year in Advance

COAL MINE INCREASE

Princeton Mine will Enlarge Output of Tonnage Next Year.

One Hundred Tons Now will be Increased to Five Hundred Daily In 1911.

The Nelson Daily News says that Managing Director Arthur Hickling of London, head of the million dollar Princeton Coal & Land Co, states that the present output of 100 tons per day will be increased to 500 tons per day next year with a plant of that capacity. The company recently entersd into contract with the Nickel Plate mine at Hedley to furnish 10,000 tons of coal. The coal, according to Mr, Hickfing, is a high grade lignite, with excellent steaming qualities. Coal mining operations are being directed by the resident manager, Mr. Ernest Waterman, a pioneer of the district.

Mr. Hickling considers that Princeton will become an important center as the railway development of the province advances. He considers British Columbia a good field for British capital.

THE NEW GOLDFIELDS.

Steamboat Mountain, which premises to be one of the big goldfields of the world, is abont fifty miles southwest of Princeton, in what is known as the Hope or Cascade range of mountains. Free milling gold in large quantities is in evidence and from a mining standpoint the ore is in a formation which needs no concentration or smelting plant to treat it. A 200-stamp mill is to be erected on one of the properties. The mineralized belt has been traced to the international boundary. Assays run from $15 to $200 per ton. The original discoverers have refused $150,000 bond for eight claims. By extending the present Roche river trail Princeton could be readily put in touch with the goldfields and made an outfitting point tor them.

OSOYOOS COAL CO. AT WORK.

Remarkable Outcrop of Coal—Property is Rich in Resources.

The Osoyoos Coal Co. has begun development of their property on what is probably the biggest outcropping of coal in the country. For over three hundred feet the surface has been plainly exposed of a seam of coal which has a thickness of about fifteen feet. It is certainly a phenomenal showing and is a marvel for coal experts.

On Friday last a party was shown over the property by W. C. McLean, who with Wm. Gosnell, president of the company, is directing development of the mine and work in hand. Mr. McLean has a tunnel all in coal driven about one hundred feet, which will be continued some distance farther, the proposition being to block out a large amount of coal in readiness for actual mining.

A lot of coal has been taken out and will be hauled to Princeton for trial shipments to outside points and for local consumption. The coal is of the same excellent quality that is being mined at Princeton and is classed by some geologists as sub-bituminous By analysis the thermal qualities of this coal are equal to the high grade coals supplied to the larger markets

The Osoyoos Coal Co. may well be pleased with the result, so far, of their investment. No one, however pessimistic, could deny the existence of a great wealth of coal, which transportation must sooner or later prove beyond all doubt. A wagon road will shortly be completed to the mine, the distance from Princeton being about 4½ miles.

The surface rights are included in the property consisting of 1920 acres, much of which is heavily timbered with merchantable pine, and the agricultural possibilities must be reckoned with also as the soil is productive and will be eagerly sought in the next few years.

LUMSDEN-BURGESS.

At South Vancouver on the 26th ult.. the marriage of Mr. James D. Lumsden to Miss Mary E. Burgess was solemnized in the presence of a large number of friends and relatives. The bride is a well known and popular young lady in Vancouver. The groom requires no introduction, having been a resident of Princeton for the past three years, during which time he has been identified with every movement having for its object the advancement of the town, besides he is an accomplished musician and stands high in fraternal circles. The happy couple left Vancouver on a honeymoon trip extending to California aud Toronto, and on their return will occupy the pretty home at the corner of Lime St. and Billiter Av. Star extends hearty congratulations.

It is stated that the Princeton coal sold throughout the southein portion of the province this fall is a very much superior artlcle to that sold last year.—Grand Forks Gazette.

R. H. Carmichael, manager of the Eastern Townships Bank, returned this week from Keremeos and Grand Forks. At the latter place he met Martin Burrell, M.P., who wished to be remembered to all his friends here. Mr. Burrell regrets his inability to visit Princeton before parliament opens but will do so at the first opportunity.

LOCAL AND GENERAL

Gold and Platinum Dredging a Probable Industry in Near Future.

Petition to Connect Nieola and Okanagan with Princeton by Direct Roads.

A petition is being circulated by Percy Rowlands to be sent to the government for the completion of the Onemile road to Nicola and also that of Fivemile to Trout creek and the Okanagan country. Needless to say, the petition is being well signed.

Vancouver parties have staked ground covering miles of the Similkameen and Tulameen rivers near Princeton. Experimental work will be carried on during low water this fall and winter and if successful gold and platinum dredging will be prosecuted on a large scale,

Deer are not plentiful as yet, the mild weather enticing them to remain in the higher altitudes. Hunters are, however, plentiful. Last week the Missess Freeman armed with rifles and their brothers, also armed with rifle and kodak, were in the hills, but the elusive mowitch were not to be taken with snap or shot. Better luck next time.

J. O. Coulthard has everything in readiness for the Owl Skating Rink and is only awaiting the arrival of Jack Frost to open up. In catering to the amusement loving public Mr. Coulthard has spared nothing to make the Owl convenient, comfortable and attractive. On special occasions orchestral selections will be given, affording rythm to the swiftly moving feet of the skaters. Season tickets are going rapidly.

The lights exhibited in front of buildings are not only of good service to pedestrians but give the town a cheery aspect on dark nights. A light on the square at the junction of Bridge St. and Vermilion Av. would be a blessing and convenience.

Board of trade meeting next Monday evening at 8 o'clock.

G. H. Broughton, P.L.S., has surveyed the townsite of Granite for the government, it having been held as a crown reserve for many years.

The boarding house at Cardiff opened on the 1st of November.

W. G. Norrie and wife left on Monday for the coast on their way to Queen Charlotte island, where Mr. Norrie has charge of a coal mine.

John George, manager of the British Columbia Portland Cement Co., of Princeton, was in town this week. He has already interested local capital in the enterprise, which he is confident will be a success. The plant will cost about $250,000. He states that he knows no part of the world where a more favorable location for such works could be found, as the rock, clay and coal are there to be found all in one locality.—Vernon News.

Peter Swanson leaves this week for the coast going from there to Chicago where he will meet Mrs. Swanson returning from a visit to Scotland.

A. Kellett, superintendent for J. W. Stewart & Co., V.,V & E. contractors, was in town last week looking over the work of construction. A large force of men is employed on the line being built eastwards from Abbotsford.

Bert Irwin has just cleaned up a nice little swag on a real estate investment of $300 in Vancouver, his return netting $1500 cash. The same thing will be done in Princeton next year.

The Canadian Northern and V.,V. & E. are applying for union station grounds at Chilliwack.

C. O. French went down to Spokane last Monday on a business trip.

D. McCurdy, the esteemed postmaster at Similkameen and father of D. McCnrdy, jr., manager in Princeton for O. H. Carle, was a visitor here last week.

W. C. Lyall came up from Hedley on Saturday and is spending Thanksgiving holidays with his family.

BIRTH OF THE NEW ERA.

New Era is the name of the latest exchange to be received in Star's sanctum. It is printed at Chilliwack and has a healthy look, being well patronized with real, live ads. In politics it will be independent, so it says, with the qualification that it will not be neutral. The New Era has the same size of page as Star and presents a very neat appearance. Chilliwack is one of the most progressive towns in B.C. and the New Era reflects that condition in its bright and healthy pages.

THE NEW LIQUOR ACT.

Chief License Inspector Campbell and Chief Bunbury of the provincial police in town this week and visited the various hotels of Princeton district. Mr. Campbell is making his first inspection under the new Liquor Act and is firmly enforcing the terms of it. The new law is proving irksome to some who enjoyed the wide latitude afforded under the old law. But the new act is framed in the interests of all classes and once it becomes readily interpreted, with proper administration, it will be found satisfactory to all concerned. Mr. Campbell is a very capable officer and has several well merited promotions to his credit since first accepting service for the government.

NOTES AND COMMENTS.

A deputation of six hundred farmers has gone from the wheat provinces to Ottawa asking the government to assist in lowering the tariff between the United States and Canada. It is evident that the old battle of free trade vs. protection is to be re-fought in the next general elections in Canada and the United States. And the sooner all political parties take the common sense view of it that it is a fundamental right of man to buy in the cheapest market without let or hindrance the sooner will come prosperity for all classes. If the Anglo-Saxon countries would adopt free trade it would not be long until the rest of the world would follow. Universal free trade means universal peace—the poor, all who labor, should aim at free trade.

Sir Wilfrid Laurier came into power some fifteen years ago riding the free trade horse. He is still riding the same old nag, but is no nearer the goal than when he first mounted. He has had time enough to 'make good' and has failed. Now is the opportunity of the Conservatives. Although it will require some courage to throw overboard the jonah of protection, yet it will be much better than to remain waterlogged. The hour is here, where is the man?

Probably no form of leisure or of enforced idleness can be more profitably spent than in reading books, magazines and papers. It is one of the necessities of our present day civilization that every man and woman should be conversant with the current topics of the day and 'well read' on the social-political problems which touch us through the ordinary affairs of life. A public library is one of the best, if not the best, mediums for dispensin information. It has been demonstrated long ago that as a resort for young men or strangers temporarily disengaged it possesses all the requirements for improving mental equipment and adding to the store of useful knowledge. Some attempt toward the establishment of a library or reading room in Princeton should be made at an early date.

Merritt is grasping vigorously with a hospital proposition costing $20,000.

NOTICE.

Public Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as 'The Companies Act,' letters patent have been issued under the Seal of the Secretary of State of Canada bearing date the 8th day of September, 1910, incorporating Robert Purves McLennan, merchant, James Albert Harvey, barrister-at-law, and Levi Webster Stone, broker, all three of the city of Vancouver Lytton Wilmot Shatford, of Hedley, merchant, and Reuben Cross, of the city of Spokane, in the state of Washington, one of the United States of America, for the following purposes, viz.: (A) To carry on the business of manufacturing, storing, shipping, vending and dealing in Portland cement and all kinds of natural and other cements and all articles into which cement enters or forms a component part, to dig, mine, or otherwise procure earth, marl, clay, stone, shale, slate, granite or other minerals necessary for the manufacture of cement and other products aforesaid; (B) To acquire by purchase, lease, location or otherwise deposits of limestone, shale, marl, clay, slate, granite, coal or other raw material entering into or used in the manufacture of Portland cement, lime brick, tile, terra cotta, whiting and concrete, and particularly to acquire by purchase from the owner thereof a certain valuable deposit of limestone, clay and shale situate near the town of Princeton on lot numbered 1525 of Kamloops division of Yale district, with the purpose of manufacturing the same into Portland cement, lime, plaster, brick, tile, terra cotta and other building material; (C) To buy and sell coal, manufacture and sell coke and other by-products and to deal generally in minerals and mineral products; (D) To acquire by purchase or otherwise, and to sell or lease oil and gas properties; to construct and maintain pipe lines, and to drill oil and gas wells and develop, operate, lease, or sell the same; to furnish, sell and supply both natural and artificial gas; to sell oil and engage in the business of refining the same, and generally to furnish, sell, supply and dispose of the product of said wells and properties; (E) To prospect for, seek, explore, win, open and work oil, coal, coke, lignite, limestone, sandstone, marl, shale, slate, granite, marble, brick-clay, fire clay, iron, gold, silver, copper and minerals of all kinds; (F) To crush, win, get, quarry, smelt, calcine, refine, dress, amalgamate, manipulate and prepare for market, ore, metal and mineral substances of all kinds, and to carry on any other metallurgical operations which may seem conducive to any of the company's objects; (G) To buy or otherwise acquire water rights, water powers or water privileges, construct pipe lines and mains, and establish waterworks with all necessary equipment; and to use, furnish, sell and supply water; to construct and establish a plant or plants with all necessary equipment, for the production of electricity by water power, or any other power, for heat, light or power, and to use, furnish, sell and supply the same Provided, however, that any sale, distribution supply, or transmission of water or electric, hydraulic or other power or force beyond the limits of the lands of the company shall be subject to local and municipal regulations in that behalf; (H) To buy, sell, manufacture and deal in materials, plant, machinery, implements, conveniences provisions, and things capable of being used in connection with metal lurgical operations, or required by workmen and others employed by the company; (I) To buy, sell, prepare for market, manipulate, import, export and deal in timber, lumber, railroad ties, piling, pulp wood, telegraph and telephone poles, fence posts and wood of all kinds, to manufacture and deal in articles of all kinds in the manufacture of which wood is used or forms a component part, and to purchase, sell and deal in real estate, timber, timber lands and timber berths; (J) To purchase and vend general merchandise of all kinds, and to build, acquire, possess and operate cement mills, lime kilns, brick kilns, marble works lumber mills, factories, grist mills, flour mills, elevators, machine shops blacksmith shops and machinery of all kinds, and to purchase, sell and deal in cement, brick, tile, lime, lumber, machinery, grain, flour and breadstuffs; (K) To build, acquire, own, charter or lease, navigate and use steam and other vessels for the purposes of the company; (L) To erect, use, sell and grant licenses under patent rights; (M) To purchase or otherwise acquire, hold, sell, assign and transfer shares of capital stock and bonds or other evidences of indebtedness of corporation and to exercise all the privileges or ownership including voting upon the stock so held; (N) To carry on any other business which may seem to this company capable of being conveniently carried on in connection with any of the above, or calculated directly or indirectly, to enhance the value of the company's property or rights for the time being; (O) To construct, improve, maintain, alter, work, operate, manage, carry out or control roads, ways water powers, reservoirs, dams, aqueducts, canals, sluices, flumes, wharves, docks, piers, operated by steam, electricity or other mechanical power, electric supply lines, bridges, wharves, booms, timber slides, booming grounds manufactories, warehouses, hydraulic works, electric works, houses, shops, stores buildings and other works and conveniences, which may seem calculated directly or indirectly to advance this company's interests; [P] To allot the shares of this company credited as fully or partly paid up as the whole or part of the purchase price for any property, goods or chattels purchased by the company, or for any other valuable consideration as from time to time may be determined; [Q] To sell or dispose of the undertaking lands, property, estate, chattels and effects of this company or any part thereof, for such consideration as this company may think fit either for cash or for shares, debentures or securities of any other company operating wholly or partly in the province of British Columbia and whether the objects of such company are altogether or in part similar to those of this company; [R] To amalgamate with any other company now or hereafter incorporated or to operate wholly or partly in the province of British Columbia which this company may deem useful to or calculated to increase its business, and to subscribe for, accept and hold shares in any such company; [S] To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, bills of lading, warrants, and other negotiable or transferable instruments; [T] To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of this company; [U] To distribute any of the property of this company among the members in specie; [V] To do all such other acts as are incidental or conducive to the attainment of the above objects or any of them, and to exercise generally all such powers as may from time to time be conferred on this company by Act of Parliament, charter, licence, or other executive or legislative authority. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of 'British Columbia Portland Cement Company, Limited,' with a capital stock of five hundred thousand dollars, divided into 5000 shares of one hundred dollars each, and the chief place of business of the said company to be at the town of Princeton, in the county of Yale, in the province of British Columbia.

Dated at the office of the Secretary of State of Canada, this 9th day of September, 1910.

LOCAL AND GENERAL.

The marriage of Mr. Lee Stout to Miss Snowden, who was a recent visitor to her brothers Claud and James, was celebrated at Spokane on the 28th ult. The contracting couple left for Whitefish, Montana, where they will in future reside. Claud now feels that it is his turn to jump the broomstick. Star congratulates.

The Thanksgiving ball held in the I O O F. hall on Monday evening was the event of the season, a large number being present. Princeton orchestra again proved their ability to provide high class music and a pleasant time for all was thus assured. As the winter approaches the popularity of these occasions becomes more evident.

Public worship will be held in the court house next Sunday at 7:30 p.m. Sunday school 11 a.m.

Rev. A. E Bruce will preach in the school house next Sunday, Nov. 6th, morning at 11, evening at 7:30.

LIQUOR ACT, 1910.

NOTICE is hereby given that, on the first day of December next, application will be made to the Superintendent of Provincial Police for renewal of the hotel license to sell liquor by retail in the hotel known as the Tulameen Hotel, situate at Princeton, in the Province of British Columbia.

Dated this 12th day of October, 1910.

W. J. KIRKPATRICK.

NOTICE is hereby given that I will apply to the Superintendent of Provincial Police on the 1st day of December next for a transfer of license for the Allison hotel from G. Goldsborough and A. Worgan to G. Goldsborough.

Dated the 31st day of October, 1910.

WATER NOTICE.

Notice is hereby given that an application will be made under Part II of the 'Water Clauses Consolidation Act, 1897,' to record the right to take, divert, convey and use water in the Kamloops Division of Yale District, for ordinary, domestic and agricultural purposes:

A. The name of the applicant is Samuel R. Gibson.

B. The name of the lake, stream or source is Christina Creek.

C. The point of diversion or intended ditch head is about three quarters of a mile from the mouth of Christina Creek.

D. The means by which it is intended to store and divert the water is a ditch.

E. The number of cubic feet per second applied for is two cubic feet.

F The water is required for agricultural and domestic purposes.

G. The land on which the water is to be used is Lot 1402, and the number of acres to be irrigated is fifty.

H. This notice was posted on the 30th of September, 1910, and application will be made to the Commissioner on November 30th, 1910.

THE PHILOSOPHY OF LIFE.

The only thing that lasts, is eternal, is spirit. Matter dissolves, fades, vanishes. changes and decays.

No men living are more worthy to be trusted than those who toil up from poverty—none less inclined to take or touch aught that they have not honestly earned. —Abraham Lincoln.

Humility makes handsome the most homely face.

Is it any wonder there are so many divorces when bad housekeeping, poor cooking and infidelity are responsible for two-thirds of them?

A vain woman loves being away from home in a hotel where she can act as though her husband were a millionaire until it comes to the tips.

The person who hunts for trouble and finds it usually gets no sympathy when unmercifully drubbed.

As a rule the person engaged in a business knows more about it than the sap head critic who assumes to know it all.

It is much better to use your own brains than those of another—in other words, think and act independently if yon want to be useful and successful.

Love all, trust a few, do harm to none. —Shakespeare.

OIL BURNING SMELTER.

An experimental oil burning smelter plant for treatment of metalliferous ores has been erected at the Vananda mines on Texada island, and the scheme is now being tested under the direction of Thos. Kiddie, formerly connected with the Northport smelter. Mr. Kiddie stated that the plant was working successfully although some modifications of it would be necessary before a final decision as to its adoption was announced. The process is the invention of J. Anderson, of Chicago, and retains the blast principle, but obviates the use of coke. If half the merits claimed for it are true the present methods of ore reduction will be revolutionized. It is claimed it will reduce the cost of smelting by 50 per cent., thus rendering possible the reduction of low grade ores which under present conditions cannot be reduced at a profit.
