

Princeton coal high in carbon low in sulphur.

SIMILKAMEEN

Knockers always lurk on the trail of successful men.

Manufacturing facilities are unequalled in and near Princeton: Coal and water power in unfailing supply—Electric power may be generated from the rivers, having 35 feet fall per mile—Resources in mining and agriculture backbone of country—Irrigation necessary.

Vol. X. No. 37.

PRINCETON, B. C., WEDNESDAY, SEPTEMBER 8, 1909.

\$2 a Year in Advance

FRESH WATER PORT

Strenuous Work Expected in Coquihalla Pass to Secure Location Line.

Vancouver City Council Knocks Proposition for Joint Terminal on False Creek.

Vancouver city council will turn down the proposal of the Great Northern and three other roads for a joint terminal station on 61 acres of mud flats on False Creek. C.P.R. 'influence,' like yeast, is causing things to rise around that terminal site. Owing to obstruction it is not improbable that the Great Northern with its allies will seek a fresh water terminus along the Fraser.

Three survey parties are said to be in the vicinity of Hope and Coquihalla Pass working like beavers. The Great Northern is locating west of Hope, the C.P.R. is running a preliminary down the Coquihalla and a Grand Trunk party is feeling its way through the gap somewhere. If this report be true there is every probability of the big presidents locking horns. In the mixup it is almost certain the C.P.R. will make a job for the G.N. in its legislative parts and strike a bee line for Princeton coal fields.

The railroad payroll is increasing every day in the vicinity of Princeton. The big cut in the care of the Austro-Italian gang is delivering earth over the temporary bridge on the station flat.

A large consignment of Swedes arrived last Friday to work on the railway grade west of the town station. They are all stalwart fellows and good workmen.

A rumor is afloat that a contract has been let on the V.V. & E west of town. As there is neither circumstantial, corroborative nor prima facie evidence to sustain that rumor, it must be considered a mere 'rumor without foundation.' As a matter of fact no rightofway has been bought nor any cleared or cross sectioned, necessary forerunners of the actual work of construction.

SPY OUT LAND FOR EARLY INVESTMENT.

A. A. Cruickshank, Sam Cawley and J. Johnson, all of Chilliwack, were in town last week on a short visit. It was their first sight of Princeton and were much pleased with its appearance and natural advantages. 'You will have a big city here in the near future,' said Mr. Cruickshank, and his opinion is worth having, in view of the fact that he has been a successful investor. In Chilliwack his presence and sound judgment of land values have put him in a position to write

six figures in lawful money after his name. He and his associates will keep in touch with Princeton through the Star. They were shown some of the mineral deposits of this section by Billy Wilson.

RICH IN MINERALS: CLEANEST TOWN.

W. E. Duncan, M. E., of Merritt, was in town last week on mining business. He expects to establish a branch office here in connection with his firm, Duncan & Anthony. He is consulting engineer for coal capitalists investing in Nicola. Mr. Duncan comes from Cardiff, Wales, where he was, metaphorically of course, bred in, and fed on, coal. He has been all over Canada and many other parts of the world but has seen no district to compare with the Similkameen-Nicola in variety of mineral wealth. In his opinion great mining and other development will come with the railway. He thinks Princeton a pretty place and the cleanest in the interior.

BRICK TO SATISFY ALL LOCAL DEMANDS.

Groves & Cain have recently burned a kiln of 40,000 brick which are said to be of excellent quality by those who are good judges. A good quality of brick has for a long time been a necessity here and now no order, however big, will be turned away. The plant and the material are capable of answering any immediate demands and the experience of the makers ensures a good article. Messrs. Groves and Cain came from Nelson and will permanently locate here. Their first delivery of brick in town was made to the Vermilion Forks Co. for a chimney for new offices. For large orders reduced quotations will be made.

DAYS OF CAVORTING CAYUSE NUMBERED.

A big band of cayuses was driven last week through Princeton, en route to Vancouver. They were all colors, sizes and shapes, some of them looking fit to kick the horns off the moon, and others sly and sleepy enough to indicate lurking deviltry when wanted to work. Our horse editor knows the cayuse from the sole of his foot to the highest point of his hurricane deck. He has shoved him up hill, pushed him down, swam rivers with him and rode near three hundred miles on emergency before breakfast (on the fourth day.) Withal, one cannot help liking the handy brute. But his days are numbered for the chug-chug is here and some uncanny, wingless birds are in the air.

The new sidewalk is much appreciated by citizens. The question is often asked: Why not have a sidewalk from bridge to bridge on the east side of Bridge Street? It would be a good idea to repair all the old sidewalks and crossings.

LOCAL AND GENERAL

Heat Wave Runs Mercury up into Nineties—Hot and Dry Spell.

Times Improving with Advance of Railway Construction—Crops Are Big.

Dry, hot weather has parched the ground and burnt hill grass a light brown. Running fires with heavy volumes of smoke rolling high were observed lately on Kennedy mountain and Tulameen way. Too much care cannot be exercised now in setting fires for clearing ground, camping or even lighting a cig or a pipe.

J. Dalby of Victoria was a visitor to Princeton this week. He owns 300 acres of meadow land near Princeton which he will improve and put in productive shape. This land is bound to be a great source of revenue with the assured market for hay here.

Grain harvesting is now in full swing and better crops were never known.

Mrs. A. J. Marlow returned via Hope Pass on Monday night from a very pleasant visit at the coast, including the A. Y. P.

It is authoritatively stated that the north pole has been discovered by a good Yank. Aud still the heat is scorching.

Rev. Mr. and Mrs. Conn returned Monday, the latter from a much enjoyed visit to friends in Hedley and the former from the Presbytery meeting at Armstrong.

F. G. Benson and C. M. Rodman, representing the Norris Safe & Lock Co., arrived last week on a 50 h.p. Winton touring car. They left Quilichena at 8 o'clock in the morning coming via Merritt, arriving here at 6 p.m., about 100 miles. This is good going over a road that resembles waves of the sea in a 60 knot gale. Mr. Benson is patentee of a pocket screw driver and pencil guard which he is about to put on market.

After about a month of enjoyable and interesting visit Mr. and Mrs. Thomas will goodbye to their sons next week, returning to England. They have made many friends here who will be glad to hear of their safe return.

Jas. Reith, recently returned from El Paso, Texas, where he had been for his health, received congratulations of many friends on his improved condition after a long and serious seige of illness. He is visiting his brother on Five-Mile.

County court will be held in Princeton on Saturday, Oct. 9th.

Another of those ludicrous errors which 'adorn' the Star occasionally was made in last issue—the word 'septuagint' being

made to do duty for 'septuagenarian.' A proofreader is certainly needed on the staff. But our friendly critics take the sting out of error by their good natured puns at our expense. Who would not be an ed. on a frontear weakly!?

Owing to the regular meeting night of Board of Trade falling on Labor Day it will be postponed for one week to next Monday night.

J. E. McCauley of the Reco, Copper Mountain, has returned from Spokane and is hard at work with his gang.

It is understood that the change in supply referred to last week, affecting this missionary field, will consist in Hedley and Keremeos being served by the missionary already stationed at the latter place, and Princeton, with outlying camps will constitute another field.

Deer killing may be practised up to the 15th Dec., not Nov. 15, as erroneously stated in last issue.

Charles Graham of Nanaimo is expected to arrive this week, having accepted the position of coal mine superintendent for the Vermilion Forks Co. The work of developing and operating the mine will begin shortly.

Messrs. Uhler and Cox arrived from the coast Monday and went up to their mine on Five-Mile. They predict a turn in the tide for this district and expect mining men and capital will come in increasing numbers and quantity as soon as the railway is carrying passengers.

Charley Carlson, M. K. French and F. Wampole were in Coquihalla Pass last week on a cruise of investigation.

Hanning and Johnson are developing a fine body of ore on the Independence group, Bear Creek.

Much interest still centers around the new find on the Whipsaw. It will take some time to prove the ground and put it in shape for capital. Messrs. Day and Knight, Fitzgerald and Fearless are open cutting on their claims.

HEDLEY LABOR DAY WAS BIG SUCCESS.

Labor Day celebration at Hedley is reported to have been a great success in numbers attending and in entertainment. There was a large contingent from Princeton who would uphold the name and fame of the 'old town.' As the Star is about to twinkle the 400th time a full report will be delayed.

In the Freeforali race at the Hedley Labor Day sports W. Garrison's racer won the chief event and \$100. Miss Lowe's horse, Keremeos, Miss Innis up, took first money in ladies' saddle horse race.

Hedley, with a composite team, won the baseball match, 20 to 4. Prize \$100.

Particulars of the other events were not available, our wireless still being out of tune.

The Similkameen Star.

J. M. Wright. SUBSCRIPTION RATE: One Year, \$2.00 Payable in Advance. Subscribers will confer a favor on this office by promptly reporting any change in address or irregularity in receipt of their paper.

DELAY INSTEAD OF PROMPT ACCEPTANCE.

The Vancouver City Council is hesitating and in doubt over the proposition made by the Great Northern for joint terminal facilities on False creek tide flats. It ought to be a question of easy solution for a body of business men who are supposed to be clearminded and decisive when a matter of such vast importance to the progress of the city is presented.

It is about time for citizens to consider some suitable manner of marking the historic entry of the rails within town limits, thus giving that connection so often predicted and sighed for. Is there no local poet to commemorate the event in immortal rhyme? And is there no bust to unveil, no orator to proclaim the virtues of the iron horse?

In selecting a location for an experimental farm in the dry belt it will be necessary to consider the adaptability of the place or section for giving lessons in the whole range of farming. Star ventures the opinion that no other section in the interior presents such and so varied natural features in proper relation and proportion for the experimentation and study of mixed farming.

That is a peculiar system or notion which requires a man to sign a receipt before receiving his money. It makes a falsifier of the signatory and leaves him in an awkward position. Still, it is the government way and that settles it.

Between now and the coming revolution in this district, caused by the railway, there is only one attitude for all: 'Labor and wait.'

NOTES AND COMMENTS.

In the agitation begun a few weeks ago for better police protection it has been said by an official that the editorial, 'Law and Order,' appearing in the Star, 'ought not to have been written.' Reconsideration of the article complained of serves only to verify the assertions and deductions therein made, therefore this paper has neither apology nor retraction to make.

A HOME CURFEW.

Every family should have a curfew bell and it should 'ring tonight' and all other nights if needed. The curfews are inexpensive and can be made at home. Take a piece of siding two feet long and whittle one end to a handle. Take the child that needs the curfew and bend it over a barrel. Now take the siding and use it as a clapper. Put it on hot, dividing the strokes evenly, and see that none miss. Three applications are warranted to cure the most pronounced case of street loafing that exists. The music is said to be more effective than singing: 'Where is My Wandering Boy Tonight.'—Selected.

'Myrtle,' asked her indulgent uncle, 'how did you manage to spend so much money while you were at that summer resort?'

'I lost the most of it at bridge, uncle,' answered the petted niece.

'At bridge! Why, child, you promised me that you wouldn't learn to play that game!'

'I didn't learn it, Uncle George. I didn't half learn it. That's why I lost so much money.'

The Young Doctor—Just think; six of my patients recovered this week.

The Old Doctor—It's your own fault my boy. You spend too much time at the club.

AMATEUR WORK FINISHED
ADDRESS - PRINCETON, H.C.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: \$5 in bookman with gilt top, or \$7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

MINES AND MINING.

Capitalists from Minneapolis have recently bought the Blair and Voght coal properties in Nicola. The properties consist of 800 acres lying to the north of the Nicola Valley Coal and Coke Co's property, and west of the Diamond Vale coal mine. The interests of the operating company will be in the hands of W. E. Duncan, M.E.

Big mining deals are in progress in Kamloops and that camp is looking better than in many years.

Barkerville is having a very hopeful season in mining transactions and there is an agitation for a railway to link it up with civilization.

The Granby will soon be able with its enlarged capacity to treat 5000 tons of ore daily. It will then be the third largest smelter on the continent.
