\$2 a Year in Advance

COAL IN BIG DEMAND

Every Mine Taxed to Fullest Capacity to Meet Need of Prairies.

Vermilion Forks Co. Want Cars to Begin Shipping—Princeton Coal Equals Best.

Superintendent Graham, of the V F M. Co., has recently visited some of the coal camps of B. C. and Alberta and finds an enormous demand for domestic fuel in an ever increasing market. The prairie provinces, so rapidly filling with settlers, tax the coal output to the limit. Should the winter be severe Mr. Graham predicts a coal famine, so great is the demand now. The V.F.M. Co. will be ready to ship coal as soon as cars are available. Princeton coal will stand competition with any that Mr. Graham saw in his travels and is superior to most of that supplied to Spokane.

Mining operations are expected to begin shortly at the North Fork coal mines. Manager Fraser recently arrived and a small working force will soon be employed in building a road and otherwise making ready for actual coal production and coking.

Boniver and Fearless have finished their contract of extending the tunnel 50 feet on the Columbia Copper Co's mine, Friday Creek. This property is being developed in anticipation of shipping facilities next year.

PRINCETON STATISTICS.

For the information of parties desiring to know the business occupations represented in Princeton the following, subject to correction, is published for the guidance of enquirers abroad: 4 general stores; 3 hotels; 3 bakers; 1 restaurant; 2 fruit and candy stores; 1 drug and stationery store; 2 livery stables; 1 blacksmith shop; 1 bank; 1 butcher shop; 1 watchmaker, 1 tailory and renovating works; 1 plumbing and tinshop; 1 skating rink; 1 billiard hall; 2 barber shops; 3 laundries; 2 brickyards; 1 harness and shoemaker; 1 confectioner; 1 photographer, non-resident; 1 surveyor, non-resident; 1 doctor; 1 newspaper and 1 second hand store, coming. It will be noticed there is an opening for a lawyer and an architect.

CAPITAL IS WANTED.

Tobacco chewers are known to have weakened eyesight, and no wonder. A dog running along the street the other day caught a volume of expectoration in his right eye from a chewer. At first the poor brute shook his head till his ears cracked like the flipper on a horses fidd-

dle, then he yelped and just as the copperas got its work in he stood stiff for a second and then commenced turning a series of revolutions and corners the like of which was never witnessed before. Spitting is prohibited by law in certain places Star would make it an offence to squirt tobacco juice within seven miles of any living creature. It is the copperas which affects the eyesight of chewers. Note how highly mineralized everything is in this country, even the trees are copperized. Capital is required to develop our great mineral resources. Advt.

WANTS POTATO MARKET.

EDITOR STAR—Sir: I do not know whether you have a board of trade in Princeton or not, so I take the liberty of asking you to be kind enough to either let me know if there is such a body in your town, or, if not, to direct me to somebody who can answer the following questions:

In the Similkameen Star of the 17th ult. I read: 'First carload of potatoes was landed in Princeton last week.' Now, I should like to know: Who bought them? What are they worth? Where did they come from? This will show if it is possible for us to ship potatoes to the Similkameen. Thanking you in anticipation, I am yours truly,
A. MULLER.

Bridsville, Dec. 4, 1909.

[There is a board of trade—see ad. in Star. We respectfully suggest correspondence with advertisers in this paper as to possibility of selling potatoes here. Perhaps some reader will furnish all the information required.—ED.]

SEEKS WIDER FIELD.

Dr. Whillans was in town Sunday bidding goodbye prior to leaving Hedley for the coast. He was the first doctor to locate in Princeton and among the earliest in the rush of fortune hunters to these parts a decade ago. For several years he has been physician at the mines and mill of the Daly Reduction Co., now the Hedley Gold Mines Co., besides having a lucrative practice in the town, to which he removed from Princeton some seven or eight years ago. Dr. Whillans is an earnest and successful practitioner, enjoying the loyal confidence of a large clientele throughout the Similkameen and carries with him the sincere respect of the people generally and the best wishes of many staunch friends. His family will reside in Victoria this winter while he expects to make a trip to the Orient or the Antipodes, making Prince Rupert the ultimate objective point. Dr. McEwen takes over his practice pro tem.

One week from next Saturday is dear old Christmas.

Next Tuesday is the shortest day in the year.

Divine service at 11 and 7:30, Sunday.

LOCAL AND GENERAL

Festive Season now Draws on and Santa will have Joyous Time.

Concert to Procure Organ for Public School—Holidays Bright with Hope.

An emergency meeting of Excelsior Lodge, L. O. L., No. 2102, will be held in Oddfellows Hall, tonight at 8 sharp. C. L. Cummings, W. M.

E. P. Galliac, of the United Empire, arrived from Spokane Sunday.

Frank Bailey was in town last week from Nicola and went to Hedley.

Charles Graham, superintendent of the V.F.M. Co's coal mine, arrived over the V.V. & E. on Sunday, bringing his wife and three children from Nanaimo.

Miss Everett, of the Tulameen hotel, was recently scalded severely by the bursting of a hot water bag placed near her for the relief of rheumatic pains. The bag had been filled too full of boiling water for expansion, causing it to burst. Many friends of the young lady wish her quick recovery.

Canada's Revenue is heading for the hundred million mark this year.

An Orange Lodge will be instituted in Hedley on the 20th inst.

This is the season of the year when the knocker should lay down his little hammer and try and be happy. Never mind other people's affairs during Christmas-tide; just try and be happy.

John Ruskin said there was no room for a lie in this world. Yet truth has to struggle for a place; but surely it will prevail.

Christmas, with its regular crop of festivities, is drawing near. The unity with which Princetonians and their country cousins usually observe Christmas and New Year merrymaking event speaks well for the equilibrium of social conditions. Indeed it could hardly be otherwise in a community where everybody is obliged to work for a living and all are poor.

Perley Russell was recently at Friday Creek and reports about three inches of snow there. He saw many deer tracks in that section. The weather was very mild.

E. Waterman and P. Johnson are deer hunting on Kennedy mountain and are said to have good luck.

There are a number of accounts due the Star for subscriptions, printing and advertising, the aggregate amount of which would prevent the sheriff from paying an official visit to the 'devil,' if

settled promptly. Accounts are mailed monthly, which is an intimation to pay. Star pays cash for its labor and material, and it is impossible for it to carry those who are long in arrearages. Please pay.

The regular train service did not go into effect last Thursday as announced. No definite information is obtainable as to the time of regular operation. No station agent has arrived yet, although bills of lading received call for delivery of freight at Princeton.

Not enough snow for good sleighing. Balmy weather and many colds.

ORGAN FUND CONCERT.

A concert in aid of an organ fund to be applied to the purchase of an instrument for the public school will be held in the Oddfellows' Hall, Christmas Eve, 24th inst., beginning at 8 o'clock sharp. Miss Carson, teacher, has in hand the inception and management of the concert, besides training children in their several parts of the entertainment. A varied program of some thirty numbers will be presented. Miss Carson is deserving of every encouragement in her generous efforts to promote musical culture in the school children. After the concert dancing will be provided. Let there be a bumper house. Admission, adults, 50c.; children, free.

SANTA CLAUS HEARD FROM.

A wireless metaphorical message has been received from Santa Claus headquarters away up at the head of Granite Creek among the tall pines and the magnificent moss covered spruce. He says he has had a bad cold but expects to be in good shape for Christmas. He regrets that he has received no notice of the usual public Christmas tree for his beloved children. However, he will come on the swift winged Boreas with ten reindeer laden with good things for the children, which he will distribute at the homes of good boys and girls. Next year he may come in one of those things they call flying machine or 'aero.' Star advises him to stick to the reindeer and bells; they are more poetic or romantic and less liable to headers. God bless old Santa and all his dear little children.

OLD TIMER GRADUATES M.D.

Dr. Geo. R. Philp, well known here as plain Mr. Philp, in the employ of the A. E. Howse Co., has recently graduated as M.D. from Toronto University. In renewing his subscription to the Star he notes with gratification the progress of Princeton recorded therein. Dr. Philp is now conducting a series of scientific investigations at Lindsay, Ont., for the government as to the efficiency of an ozone water purification system now being installed in that town. The Dr. is largely interested in mineral properties in Nicola and Princeton districts and owns real estate on Vermilion Av. Star congratulates.

The Similkameen Star.

J. M. Wright,

Four weekly insertions constitute one month advertising.
No transient advertisement inserted unless accompanied with the cash.

NOTES AND COMMENTS.

The coming year of 1910, now a couple of weeks distant, will mark the new era of progress made possible by the advent of the railway. At present there are indications of coal and ore mining activity which will give employment to a large number of men and cause the disbursement of great sums of money for equipment and supplies. There are some mining deals of the first magnitude now being quietly carried into effect and others are in the primary stages of negotiation. Real estate is fairly active for this time of year and residential buildings are springing up on the back streets. The construction of the railway west of Princeton is an assured thing and means that this place will be the base of supplies and official headquarters. So that, the most hardened pessimist must admit that the prospects are good and the progressive situation one of inviting excellence rarely equalled. The investor and homebuilder could scarcely have better opportunities than are now presented in Princeton.

It is difficult to understand why an institution such as the board of trade has not a larger membership. It is the only means of presenting the requirements of the district in systematic form and with the endorsement of a body composed of the best business talent and most progressive citizens in every town, city or district throughout the country has an important influence on the government or any company or corporation with which it may have to make representations in behalf of the general public. It is the one body in Princeton which has accomplished things by resolution to the Dominion and Provincial governments. Yet, strange to say, it is knocked by those who have benefitted by its efforts toward the improvement of the town and the betterment of the whole district. There are farmers and mining men who should be active members of the board, protecting their own interests and influencing measures for the general good.

If a policy of drift with the tide is to gain a foothold in Princeton it will not be long until the town will put on that sleepy aspect which so paralyzes the stranger and drives him to other and more congenial

places. All travellers have experienced that feeling of loneliness and gloom which spring from the unattractive conditions of a town. Sidewalks, water works and electric light are necessary for the convenience, comfort and health of the people. If these necessary and essential things for town life are lacking in Princeton the effect will be found in slow growth and a puny, struggling community. The most pressing need is for sidewalks on both sides of Bridge Street from bridge to bridge and the extension along Vermilion Av. to the railway station. Waterworks are promised in the spring.

The appointment of J. A. Macdonald, K.C., to the chief justiceship of the new court of appeal removes a pillar of the Liberal party to a more serene sphere and one, no doubt, more congenial to his quiet temperament. His loss to the Liberal party will be irreparable, for it was by his eminent respectability and clean life that he gave tone to the party and attracted to it men of like calibre. To know Chief Justice Macdonald is to know a gentleman of rare worth of character, whose presence is an inspiration and a blessing. The other members of the appellate court are W. A. Gallieher, Vancouver, and Justices Martin and Irving transferred from the Supreme Court. To fill the vacancies on the Supreme Court bench Denis Murphy, Ashcroft, and F. B. Gregory, Victoria, have been appointed. All the new appointees were stalwarts in the Liberal ranks, the inference being that partizan politics are necessary as a stepping stone to the bench, a condition that ought not to be.

So poor, disgruntled, discredited Bruce is tearing his own hair now instead of Premier McBride's. He takes defeat much the same as a kid takes a spanking: with awful howls and horrible faces. In his silly madness he says some nasty things about the country press—the identical press he was quoting by the yard before the elections. The country press said nice things about the 'Setting Sun' which were promptly reprinted by Bruce. The press enjoyed the fun and kept the columns of the 'Setting Sun' tolerably full of amusing literature, besides introducing it to public notice, which it could not of itself gained. Like a dog with the rabies Bruce snaps at his best friends who now 'shake' him and cut the courtsey of exchanging.

With all the religious bodies of Britain against the Lords their spiritual power is certainly at a minimum. But they are doomed because they are away behind the age of freedom and enlightenment.

NOTICE.

THE KETTLE RIVER VALLEY RAILWAY CO. will apply to the Parliament of Canada at its next session for an Act authorizing the construction of an extension of its line from a point on its authorized railway near Coldwater River, by the most feasible route, to the navigable waters of the Fraser River, in the Province of British Columbia, for an extension of time for the commencement and completion of its railway line heretofore authorized by the Parliament of Canada, and for other purposes.

E. C. MYERS,
Secretary,
Kettle River Valley Railway Co.,
Dated at Toronto the 30th day of October, 1909.

Assessment Act, 1903.

COURTS OF REVISION AND APPEAL, COUNTY OF YALE.

SEED GRAIN AND POTATOES.

By instruction of the Hon. Minister of Agriculture a distribution is being made this season of samples of superior sorts of grain and potatoes to Canadian farmers for the improvement of seed. The samples consist of oats, spring wheat, barley, peas, Indian corn for ensilage only, and potatoes. The quantity of oats sent is 4 lbs., and of wheat or barley 5 lbs., sufficient in each case to sow one-twentieth of an acre. The samples of Indian corn, peas and potatoes weigh 3 lbs. each.

Only one sample can be sent to each applicant, hence if an individual receives a sample of oats he cannot also receive one of wheat, barley, peas, Indian corn or potatoes. Applications on printed cards or sheets, or lists of names from one individual, or applications for more than one sample for one household, cannot be entertained. The samples will be sent free of charge through the mail.

Applications should be addressed to the Director of Experimental Farms, Ottawa, and may be sent in any time from the 1st of December to the 15th of February, after which the lists will be closed. Applications will be filled in the order in which they are received, so long as the supply of seed lasts. Potatoes cannot be mailed until danger from frost is over. No postage is required on mail addressed to the Central Experimental Farm, Ottawa.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: \$5 in book form with gilt top, or \$7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself its value to you?

THE STRATHCONA TRUST.

Lord Strathcona has given a large sum of money to be used in the improvement of the physical and intellectual capabilities of children while at school. He also hopes to foster a spirit of patriotism in the boys, leading them to realize that the first duty of a free citizen is to be prepared to defend his country—to which end all boys should, as far as possible, be given an opportunity of acquiring a fair acquaintance, while at school, with military drill and rifle shooting. His Lordship does not seek to make the military training compulsory, leaving that for parents to decide.
