For Domestic Use Princeton Coal is Unexcelled.

SIMILKAMEEN STAR

Real Christianity is highest type of intelligence.

Climate and resources of Similkameen are ever increasing sources of attraction—Princeton is central and distributing point and will be terminal of railway divisions—V.,V. & E. will be ready for traffic in about three months—Invest early for the sure rise.

Vol. X. No. 36. PRINCETON, B. C., WEDNESDAY, SEPTEMBER 1st, 1909. $2 a Year in Advance

TUNNEL IS FEASIBLE

Engineer Discovers New Route for V.,V. & E. with Easy Grade.

Tunnel, Eight Miles Long, Saves 30 Miles, Making It 124 Miles to Vancouver.

J. H. Kennedy and his party returned last Wednesday from making an exploratory survey for a new route for the V., V. & E. It is understood that the expedition was entirely successful, due to the tenacity with which Mr. Kennedy has always held to this route and also to his sound judgment and ability as an engineer.

The new, or 'tunnel route' as it will be better known and described, diverges from the old located route at Otter Flat following the Tulameen river to the mouth of Eagle creek, thence along the creek for about 1 mile, where the tunnel begins and extends for eight miles to the Coquihalla. The tunnel will have a grade of about 1 per cent, which furnishes a complete solution of the problem confronting engineers with over a 2 per cent grade and a long, circuitous route via Otter valley and the Coldwater.

The tunnel route will reduce the distance between Princeton and Vancouver from 154 to 124 miles, a net saving of 30 miles. Its cost will not be less than $1,500,000, that figure being made possible by a recent invention which bores tunnels at the average rate of one foot per hour. It would take about 5 years to build boring from both ends and the middle. During its construction a temporary line could be built to accommodate pressing need of early connection with the coast. It is expected the line of the tunnel will be located immediately.

When built this tunnel will be the longest in America, followed by the Hoosac, 4¾ miles; Cascade, on N.P. railway, 9,850 feet in length. In Europe the Simplon is the longest tunnel in the world, being 12.4 miles long, and the Mont Cenis, 7.6 miles.

GRANITE CREEK NEWS.

(From Our Special Correspondent.)

Granite Creek, Aug. 30.—D. Tyrrell paid Granite a visit last week to look over some mining property in the interest of a coast company. He stated that it was his intention to return in a short while and put some men to work.

A. E. Faulds, M.E., of Vancouver, and Mr. Gray were in Granite for two days last week. They spent the time looking over the coal property and getting samples from different parts of the works. Mr. Faulds stated that work would be resumed at the North Fork mines in the near future. 'We still live in hopes.'

R. A. Lambert has finished the new flume and dam which takes the place of the one washed out during high water. He will soon begin to sink for bed rock, after which will come the harvest of gold.

Mr. and Mrs. Brookes returned to Tulameen on Saturday last. Mrs. Jas. Brown has moved for the balance of the season to the property of R. A. Lambert.

A social evening was recently spent at the Granite hotel. Dancing and other pastimes were kept up until a late hour.

Owing to dry weather the soup springs at Welldo can hardly raise a bubble.

Mrs. F. P. Cook is visiting at the camp of R. A. Lambert.

H. McCallister has recently returned from Champion Creek where he has been working.

ORANGE LODGE INSTITUTED.

The institution of an Orange Lodge in Princeton last Wednesday night by Provincial Organizer Whiteley marks a record for societies or associations in towns of this size, there being now three of the large fraternal orders located here. The Orange Order is a secret political organization which aims to support and defend the King and the Protestant religion. The first lodge of Orangemen was organized in Loughgall, Co. Armagh, Ireland, in 1795. The Order is about 300,000 strong in Canada and reaches out to all English speaking countries. A Lodge has been established at Keremeos and another will be established soon at Hedley. Following are the officers of Princeton Lodge: C. L. Cummings, W. M.; V. L. Tway, D.M.; Rev. J. Thurburn Conn, Chaplain; P. Russell, R.S. & F.S.; J. L. Huston, T.; W. W. Martin, L.; W. J. Kirkpatrick, D. of C.; D. Gerow, F. Prosser and R. Stevenson, Committeemen,

SEPTUAGINT TO MARRY.

Hon. E. Dewdney has left for England on an important mission; one in which a host of friends in two hemispheres will wish him every happiness. He will take unto himself a wife from among the daughters of Japheth now resident in the British Isles. On his return he will spend a portion of the honeymoon in this section. Across the Atlantic ocean and across the sea of matrimony the Star bids him bon voyage. 'Governor' Dewdney is rising of seventy years of age, but he is vigorous and well preserved and like many of his old tillicums has good 'leather' in his constitution.

Constable Dinsmore left for Midway yesterday

The pack bridge at 12-Mile creek, on Hope trail, is reported to be in unsafe condition.

MINES AND MINING

Lead-Molybdenum with Other Values in Ore Found Near Whipsaw.

Tulameen and Summit Camp give Great Promise of Developing Into Mines.

Sam Spencer was in town Monday from the Marion group of mineral claims on which he has been working for the past month. At a depth of 22 feet he uncovered wulfenite ore, samples of which he produced. He is confident of having struck a mine that will compare favorably with the big mines in extent and value. The ore is high grade in lead and molybdenum with which are associated other mineral values. Wulfenite is composed of molybdenum 34.25 and lead 64.42. Tungsten in some form is usually found with this class of ore. The Marion group is in the same mineral field as the silver-lead strike recently made on the Whipsaw. The attention of prospectors has been directed to this field and many claims have been staked. A mining camp of undoubted prominence and worth is in the making here, requiring capital to develop and railway transportation to market the product.

Charley Connell brought down some very fine looking silver-lead ore from Summit camp last week, taken from the Celtic Chief. He has been doing some work on it recently and is much encouraged with the showing of ore, which runs as high as $400 per ton. Mr. Connell is in a position to ship ore as soon as transportation is afforded.

Wm. and Max Wilson have taken some exceptionally good ore from the Iron Mask, situated on the south fork of the Tulameen river, five miles above the falls. The ore is copper-gold, containing also values in silver and platinum. A large body of this ore is evidently in the dyke which is observed on the eastern slope of Hope mountains, extending many miles along the base of the range. Copper glance is found in the samples which may be taken to indicate concentration at depth. The recently discovered new route for the V.,V. & E. will give transportation within a few miles for the ore.

TOWN AND DISTRICT.

Labor Day will be celebrated next Monday and Tuesday in Hedley. It is a legal holiday.

Including the Board of Trade Princeton has ten organizations, viz: Oddfellows, Freemasons, Orangemen, Liberal Association, Conservative Association, Ladies Aid, Tennis Club, Fire Brigade, Gun Club, Board of Trade. This is going some for a town our size and denotes unity and progress.

Following in the wake of the agitation begun by the Board of Trade in July last for better police protection, Constable I. A. Dinsmore, of Midway, acting under orders of his chief, arrived last Wednesday to investigate the recommendations made by the Board. Thanks to Mr. Shatford and the efficiency of Constable Dinsmore a happy solution of the vexed question of better 'police protection' has been found.

Gordon Murdoch has begun work on the pack bridge at Ashnola and will employ several men for about a month in constructing it.

As a result of representations and the wishes of principals concerned it is expected that a change will soon be made in the supply of Princeton-Hedley Presbyterian missionary field.

GAME LAWS, IN BRIEF.

The shooting and hunting season is to open on the dates undermentioned and sportsmen are advised to observe them as wardens are instructed to enforce the law. The Game Protection Act states that it is unlawful to kill Mountain Sheep until the 31st Aug., 1911. Duck, Geese and Snipe may be shot after the 1st Sept. to 28th Feb. Grouse of all kinds, except Prairie Chicken, may be shot from the 15th Oct. to 31st Dec. Deer may be killed from 1st Sept. to 15th Nov.

ANOTHER NEWSPAPER.

Nicola Advertiser, Vol. I, No. 1, is the latest exchange received at the Star office. It is published at Middlesboro and will no doubt, serve the interests of that place and the whole country with credit to all parties. It has a good, live patronage from advertisers and as a consequence its pages are plump with local news and other reading matter. It contains eight pages the same size as those of the Star and is altogether a neat and thrifty looking newspaper.

MONEY LOOSENS UP.

Charley Willarson arrived last Wednesday from a short vacation at the coast, during which he saw the A.Y.P. and many other attractions. Vancouver is undergoing a marvellous transformation, Mr. Willarson says, and is destined to be the 'Frisco of the north. He expresses unabated faith in Princeton district and looks for a revival in mining and commercial circles. Since the great panic when many 'rubes' buried their money in the ground, money is beginning to loosen up, in fact it is so loose and elusive that one can hardly hold it while taking a holiday. Mr. Willarson returned alone, contrary to rumors which gave rise to a high social flutter. Better luck next time.

WHERE TO LOCATE EXPERIMENTAL FARM.

As it looks now Princeton is not likely to get either the proposed university or the mining school, the reason assigned being that it is too far from the capital. This reason could not possibly apply were the V.,V. & E. constructed to the coast. Well, if Princeton cannot make its claim good in the eyes of the commissioners appointed to select a university site, it ought not to deter citizens from making effort to acquire some of the good things going the 'rounds.' It has been decided by the Dominion government to establish another experimental farm in this province. An effort is being made by certain newspapers and public bodies to get the farm located at the coast, in the wet belt, in which the present one at Agassiz is located. It is difficult to find any other reason for locating a second farm in the wet belt than that of hoggishness on the part of those referred to. All the experimentation necessary to test the soil and humid climate west of the Cascade range may be done and is effectively done at Agassiz. It would be folly to waste money on another farm that could not demonstrate anything further than the one in use by reason of the similarity of climate, soil and general conditions.

Princeton is situated in the dry belt, which extends all over the interior. Its soil and climate present a totally different phase of agricultural conditions and possibilities to that of the coast with its much less acreage. Farming, including fruit producing, is dependent on irrigation here and the lessons to be learned regarding this important adjunct of soil cultivation can best be imparted by practical demonstrations in the dry belt. Princeton district offers unequalled advantages for location of the experimental farm. The railroad is here and the town is geographically central. The Board of Trade can help in this matter.

REFORM IN OUR LEGISLATIVE BODIES.

In the coming session of parliament it is sincerely hoped that legislation looking toward complete change in the constitution of the Senate and of radical reforms in the House of Commons will, at least, be discussed, if not enacted. Any tyro knows that the system of making senators is a most precarious one. Under the existing custom as soon as a new government takes up the reins the work of changing the party complexion of the senate begins. From being all tories, now it is being turned into a grit debating society. Nothing that the House of Commons may now do in which party and political supremacy is involved, but will be sanctioned by the Senate. The same thing would obtain with any other party in power. It is to eliminate the dangers of collusion and compact during crises, when the welfare of the country may be sacrificed for the advantages of party, that the alarum is now sounded for reconstitution.

Canada is now putting on the robes of nationhood and she can avoid the evils which have harrassed other countries through lack of properly constituted governing bodies. Human nature is such that the purity and efficiency of any public servant, be he a leader or humble employe, often fails when the temptation to take from the public what he would not dare to take from private individuals and corporations. Why does it cost nearly double to run, say a government telephone line, that a private owned one does, and why are the business methods of any government inferior to those of the corporation or individual? Simply this: the government official generally holds his position through favoritism, just as the senator does, and not upon merit. He knows that the people, the public, are long-suffering and do not oust servants for the first or even the hundredth offence; he wastes time and money if he does not actually steal and these lead to lax, careless and dilatory business methods. No commercial enterprise could thrive if conducted like some of our governmental departments. And here lie some of the chief reasons for opposition to government ownership of public utilities.

As formerly suggested in these columns: Canada is too much governed. There are too many legislators and too many political bosses. By reducing members of parliament and senators one half and paying them a fair day's wage for a fair day's stipulated work, as is done with any workingman, there will be some hope of getting value for the money the people put into government. In the senate and commons a few of the members do the work the remainder drawing pay for —nothing. The people are not receiving value for the cost of legislation; the same thing permeates every branch of public service from the fountain head down. Sir Wilfrid Laurier knows the necessity for legislative reform. Will he dare to make a step in this directihn?

J. D. Lumsden leaves for the coast and A Y.P. tomorrow on vacation.

Go to Tink's for fruit and vegetables. *

Work is being pushed all along the line of the V.,V. & E. The steel is this side of Hedley and will be at the first bridge out on Friday. No delay in grading is anticipated and a month from today will find the rails here, according to schedule.

Rudolph Gorsulowsky has been engaged brewer-manager of Princeton brewery having entered upon his duties last week. He was selected for the position from among 32 brewers and comes with highest recommendations. He learned his profession in Dantzic, Polish Germany.

R. Stevenson returned Monday from Summit camp, where he had escorted Mr. and Mrs. J. P. McConnell, who were delighted with all they saw. The latter arrived in Princeton yesterday and go to Nicola in a few days.

Board of Trade meeting next Monday night. Non-attending members and those in arrears should endeavor to be present.

Dr. Whillans of Hedley was in town Monday.

Mrs. Hagerman has shown the Star branches of several varieties of currants grown at her home in One-Mile valley which could hardly be beaten in any part of the world. There were scarcely any vacancies left on the branches for the large clusters which studded them. The Hagerman farm is well worth a visit at this time of year, it being the only way to form an adequate opinion of the great productiveness and beauty of it.

W. H. Holmes and family are camped near town while the former is engaged on road repairing.

NOTICE.

Notice is hereby given that thirty days from date I intend to apply to the chief commissioner of lands for a license to prospect for coal on the following descrit ed land, viz: Commencing at a post placed 10 chains east of the N. E. corner of Lot 933, Kamloops Division of Yale District thence extending north 50 chains, west 80 chains, south 50 chains, east 80 chains to point of commencement.

THE PHILOSOPHY OF LIFE.

The forked tongue of slander is never so happy as when it is besliming some person whose wholesome character is the envy of the vicious.

'Philosophy of life' is putting into practise those virtues which emanate from the heart—practise, or believe, what you preach if you would have followers, or converts.

It is the only way some people can get even the faintest notice—knock.

True criticism is known by its ability to build better and dig deeper than the person or thing criticized.

It is not only very bad manners but a sign of lack of culture to talk or write of oneself, except in business or love affairs.

The editorial 'we' and 'I' are obsolete—anything that savors of egoism is not employed where literary style has precedence over intrusive vanity.

Obedience is a lost art—only henpecked husbands and dull babies are obedient.

One may size-up the brains beneath by the style of the hat.

Better to reserve opinion than blurt out something that will stamp you as both ignorant and blunt.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper miuing shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

MINES AND MINING.

A twenty ounce gold nugget was recently mined by J. C. Catlip of Granite Creek, near Barkerville. The nugget was valued at $359

J. J. Grant, a Portland, Ore., contractor, is abont to build a big ditch ten miles in length for Mr. Dubois, on Quesnel River, Cariboo. He will require three portable sawmills to cut lumber for flumming. The gold to be recovered is plentiful, and must needs be as the ditch will cost upwards of $150,000.

It is reported that a B.C. Copper expert and mining engineer will shortly visit Copper mountain.
