WHIPSAW WHISPERS

Chloride of Silver Found in Wash, Indicates Strong Rich Lead.

Development Work on Lucky Pair—Zinc and Lead Abundant—Railway Wanted.

Charley Day, of Day & Knight, came in from Whipsaw last week where he and his partner have been working for the past six months on the Lucky Pair. The weather was fair, and considering the altitude, 5240 feet above sea level, there was not a great depth of snow, about three feet.

The tunnel on the Lucky Pair is now driven over 50 feet, the work being prosecuted with energy in order that the main ledge may be tapped as soon as possible. Some fine samples of chloride of silver were uncovered in the wash, indicating the approach to the lead.

Knight & Day have a big job on hand and are constructing the tunnel, 4x7 feet, with a view to permanency and future use in the operation of the mine. The tunnel will give a depth of 280 feet on the main lead.

No assays have been made of the ore recently found, but even a novitiate would have no difficulty in observing the highly mineralized character of it. The chloride of silver is heavily encrusted upon composite masses of ore; its pale blue waxen hue, easily cut with a knife leaves no doubt as to its identity. Chlorides thus found are indicative of rich ore beyond.

The S & M claims on Whipsaw are rich in silver, zinc and lead, large ingots of almost pure metal having been extracted.

Every day's labor in Camp Whipsaw is proving the oft ventured opinion that it is the 'richest in B.C.' With railway transportation its lead alone would be worth several millions of dollars.

CONTRACTS FOR RAILWAY

Construction will Begin as soon as Contracts are All Let.

Several varying reports about railway construction west of Princeton are in circulation. The most authentic is that work will begin as soon as the contracts are let and sub-let, which will be about the 1st of February. The big contracts will be let today.

J. H. Kennedy, chief engineer of the V. V. & E. railway, in an interview at Seattle discussed the question of grades over the Hope mountains between Princeton and Hope.

"Without taking into consideration the tunnel project, which will not be carried out in the near future, the Hill engineers have been succerrful in locating a line that will give a maximum grade of eight-tenths of one percent as against west bound traffic," said Mr. Kennedy.

"The maximum grade as against east bound traffic will, of course, be heavier. The figure for 20 miles of the distance is 2½ percent, and for an additional 15 miles it will amount to 1½ percent. On the mountain section going east should also be included the two mile section along Coquahalla lake, and constituting virtually a dead level for that distance.

"When the tunnel project is carried out, a project, by the way, that is not a pressing one, it will reduce the summit by 675 feet and accomplish a saving of 30 miles in the route, as well as cut off six miles from the length of the 2½ percent grade."

GRANITE CREEK NEWS.

(From Our Special Correspondent.)

Granite Creek, Dec. 22:—J. T. Johnson, Vice President of the Columbia Coal and Coke Company, ow[ned] [the] coal mine[s]

Regu[lar] [train] rated, with [Mail] and Express First January,

Pioneers Welcome New Order of Things but Look Askant at Engine.

The first regular train to arrive over the V.,V. & E. pulled into the station last Thursday. It carried quite a number of passengers, some of whom were anxious to accompany the first trip of a railway coach through the Jimhillkameen valley. The prolonged tootaloot of the whistle announced the arrival of the train as she sailed into the depot. So many false rumors about the first train arriving during the past ten days, aye, and for the past ten years, that many citizens did not bother to turn out to see this forerunner of great things. The few who were on the platform to welcome the train and its officials were delighted with the innovation, as one may perceive in the following paragraphs:

Ernest Waterman fairly danced with gleel, letting off a rollicking laugh or two, then very soberly he said in a sort of tremolo voice: 'I have waited about fifteen years for this train.' and one could almost see the trace of a tear in his eye as memory flitted over the abyss of time to the long ago when he first set foot in Princeton. He was a young man then. He is still young and only for those unwelcome harbingers of time which sometimes fleck the hirsute covering of the head, no one would think Mr. Waterman had passed through a long period of trial and suspense as resident head of the Vermilion Forks Co., owners of Princeton townsite.

C. ~~O.~~ French threw his hat in the air and said: 'This way for a cab, sir,' for the moment thinking he was in the big union depot at Chicago. Like many others he has been waiting for the train to bring in capi[tal] [that] he might begin [con]tinue[d] [to] [boom] [his] real estate

hills

Pete Swa[nson] having go[ne] As he ste[pped] countenanc[e] He has alw[ays] now that t[he] assurance [of] of the occa[sion] a cigar wit[h] hotel.

Jim Wron[g] has been so [ill] that he alm[ost] He crossed [the] [mountains] with the pi[oneers] [to] west 'some forty years ago.' [Of] the others he tramped 1500 miles acr[oss] the plains to Edmonton in the fall of '80, but was starved out of the country. Then across the Rockies before there was any railway, he finally drifted into Princeton with the flotsam and jetsam of the early days. It is years since he saw a railroad train—no wonder he stood gaping with a curious leer.

Among others on the platform, who by their presence emphasized the historic occasion, were: C. Carlson, J. O. Coulthard, H. Avery, Rev. Mr. Conn, L. G. MacHaffie and J. Chamberlain, Hedley; H. Vining and B. Bain.

Regular mail and express service will begin on New Year's day and the V ,Y. & E. henceforth becomes a living factor in the progress and development of the town and district.

CONCERT A SUCCESS.

The Organ Fund Concert held on Christmas Eve was an unqualified success. There were several factors leading up to the success of the concert: First, its philanthropic object, which appealed to everybody; second, the unflagging labor of the teacher, Miss Carson, ably assisted by a committee; third, the excellent program; fourth, the attractiveness of children and the cast of performers in general. It would be invidious to offer comparative comment or even criticism of any part of the program, but three or four numbers were of such outstanding worth as to deserve mention. [The] [drill] by girls; negro character [song] [and] [dancing] by Miss Gladys [Coulthard] by the young ladies [was] much appreciated. [Miss] Coulthard, [Mr.] Brown, [the]

An increasing number of mining experts continue to visit this section, all expressing very favorable opinion of natural conditions and the opportunities presented.

Much as the progress and change has been in the past year, still more will these be in outstanding evidence when the review for 1910 is published in these columns. Apart from the purely commercial progress and expansion of the town there will be civic questions of importance to be settled. Incorporation of the town, although not a live question now, must come prominently into the foreground as the people see the necessity for it and the population increases. Laying sidewalks and other street improvements demand immediate attention so that work could begin in the early spring. Waterworks, sewerage and electric lighting are the necessary concomitants of civilization and advancement and every well regulated community has them. STAR'S INCRE... ...ARS.

Standing on the ...old of the New Year, 1910, Star extends its very best wishes to everybody for a Happy and Prosperous New Year. The coming year will witness a momentous change in social and economic conditions, brought about by the advent of the railway. New energizing forces will be brought into play, new faces and new methods will stimulate those who have fallen into ruts to renewed life and activity. The wheels of progress are in motion and like the ocean tide will not wait on anyone. Prosperity is within the grasp of everyone who will boost and bustle, but the knocker will have to submit to the recoil which comes of all slander—he will be left in the race and be despised by his fellows 'Boost and bustle' should be the motto of every progressive citizen for 1910. Star now enters upon its eleventh year of publication. It has ripened with age and no longer betrays that freakish friskiness which characterized its early life. Of its struggles and vicissitudes, hopes and fears, it is not necessary to here dilate upon. Rather, let it be said, that having survived so many years of stagnation and depression, nothing can now kill it. It is one of the institutions of the country which will live because it imparts life and encourages legitimate enterprise. Its proprietor is progressive, being identified with commercial, real estate and mineral interests in the town and distric... The policy of the Star ...ill co...

THE ZINC PROBLEM.

Zinc Smelting by Electricity is the New and Cheaper Process.

There are some good zinc deposits in the Similkameen, those at Whipsaw being strikingly pure, and any information regarding treatment of zinc ores will be of interest to readers of the Star. Following is from Nelson Daily News:

"A recent mining convention in Nelson proved a most gratifying success and it is to be hoped that, as a result of it, the zinc problem, which has for years proved an obstacle to successful mining operations in many parts of the Kootenays will be overcome through the erection in this country of a smelter capable of treating this class of ore. Within the past few years the Dominion department of mines has directed its energies toward making a success of the smelting of iron ores by electricity and there is no reason to sup

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines.

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains. It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper miuing shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

THE ZINC PROBLEM.

From 4th page.

pose that the same satisfactory result cannot be secured through the application of the same agency to the treatment of the product of the zinc bearing mines of the Kootenays. If this is done mining in this province will be placed upon a better footing than ever before.

Of the feasibility to apply electricity to the treatment of zinc ores there seems no question It is only a question of securing the right system. No one should be in a better position to provide this than the experts of the mines department at Ottawa, who have made a study of the subject, particularly Dr. Haanel, the head of that particular branch, who is looked upon as an authority on the subject.
