Vol. ix. No. 28. PRINCETON, B.C., WEDNESDAY, JULY 8, 1908. $2 a Year, in Advance

LOYAL CELEBRATION

Dominion Day Duly Observed with Sport, Pastime and Reunion.

Keremeos, Hedley, Granite, Tulameen and Surrounding Sections Well Represented.

Dominion Day, in Princeton, proved to be perfect in conditions which go to make a successful celebration. The weather may have been a trifle warm, tne programme may have been minus one or two items and the executive work of the various committees may have been deficient in some respects, yet on the whole, the occasion will be written down in the history of the town as one lovally observed and enjoyed. There was a goodly crowd, country cousins and neighboring townspeople coming in two and four-horse loads. Hedley and Keremeos showed their usual friendly spirit by the big contingents of prominent social and athletic personages representative of their respective towns, the same being true of Tulameen and Granite.

Future celebration committees may profit by experience of the past in many details, one of which will be strict adherence to the programme of events, Nothing will harrass a crowd more or give greater occasion to fault finding than the dilatory carrying out of the programme and, as in some instances, wiping out of some of the advertised events altogether.

Every credit is given those who bore the heat and burden of the celebration work; they were not assisted adequately. Dominion Day is the one recognized celebration day of Princeton and it must not be allowed to lapse or fall into in different administration. The first thing to be done is to provide suitable athletic grounds and race track. If the Board of Trade were alive these matters could be discussed and definite results obtained but since it is lifeless, agitation and organization will have to emanate from the citizens by forming a Sports Association. In the interest of legitimate and clean sport such an Association would be of much service, thereby contributing much to the amusement and enjoyment of the public by enforcing rules and regulating all matters in connection with sport and celebrations.

The baseball tournament for a prize of $100 cash was the leading feature of the first day's events. It was begun with a game between Hedley and Keremeos. There was little excitement or enthusiasm throughout this game as it was evident Hedley was outclassed, going down to honorable defeat with a score of 20 to 4, It was different when Princeton began to 'play ball' with Keremeos. The game was keenly interesting while it lasted, but unfortunately the Keremeosians retired at the end of the third innings, scoring one run to five for Princeton. Keremeos had two men hors de combat and this with Charleton s cannon ball pitching seemed to spread dismay among the visitors. There were some disputes as there always are, but the umpires acquitted themselves with general satisfaction to the spectators. The teams all played a gentleman's game and parted with the best of good feeling

Most of the races were on Vermilion avenue, which had been prepared for the purpose, with the exception of the half mile Great Northern stakes and the Ladies' race for the Rithet Cup. These took place at the One-Mile track, and were witnessed by a patient and good natured crowd.

The winners of the different events were as follows:

Tulameen Stakes, ¼ mile, free for all, J. A. Smith, Steptoe 1st; W. Garrison, Sanko, 2nd: W. Garrison, Grey Dick, 3rd.

Great Northern Stakes, ½ mile, free for all: J. A. Hancock, Rose Leaf, 1st; N. Knowles, Scamper, 2nd; W. Garrison, Sanco, 3rd; C. Allison, Johnnie, 4th.

Saddle Horse Race: ¼ mile W. Garrison. Dollie. won.

Pony Race, ¼ mile: J Jameson Pansy, 1st; W. Garrison, Rock, 2nd; A. Henderson, Dancing Kid, 3rd

Cowboy Race: G. Allison, Nettie, 1st; W. Richter, Johnnie Bull, 2nd.

Ladies Race: Miss Ethel Thynne, L. Gibson's two-year-old, 1st; Miss Marie Murdoch, Charlie Murdoch's Dan Patch, 2nd.

A side race, horse for horse, was won by W. Garrison who captured the horse run by W. Richter.

Rock Drilling Contest: Tim Griffin and Dan Kepler, 1st; Luke Gibson and J. A. Hancock, 2nd; J. Carlson and C. Birch 3rd.

In the dancing contests there was a lively interest taken in which many couples entered. Mrs. Daly, of Keremeos, Mr J. Love, of Hedley, and Mr. Chas. Lambert, of Granite Creek, were selected to act as judges in the waltzing contest in which the first prize was awarded to Mrs. Rotherham, of Hedley, and Mr. Sam Gibson. Mrs. W. Garrison and Mr. F. Garrison secured the second. For the best Two Step, Mrs. E. Waterman and T. Daly carried off first prize while Mrs. W. Garrison and Mr. F. Garrison received the second.

The hall was beautifully decorated with bunting, flags and evergreens, and lighted with gasoline, which with its large floor space, only gladdened the hearts of the lovers of the art and every one went home at a late hour feeling tired and well satisfied. The music was excellert, Messrs. Simmonds and Hill, of Hedley, being the musicians.

RAILWAY IS NEEDED

Mining is Now at Standstill for Want of Delayed Ready Access.

Mine at Friday Creek Would Ship if the Railroad Were Built to That Point.

E. P Wheeler was in town recently, having come down from Friday Creek, where he has large mining interests. He is pleased with the result of operations this year and has now an unshaken faith that a great mine will be opened up there as soon as transportation is afforded.

A new crosscut tunnel has been started on the property, which is now in 48 feet, the next 20 feet being the distance in which the main vein of high grade boruite ore is expected to be tapped. After piercing the high grade vein it is intended to cut a granite dyke some 75 feet in width, then into a 300 foot dyke of low grade ore, from which tonnage will be produced for the coming railroads and smelters.

On the north side of Friday Creek a 7-foot vein of high grade ore has been exposed In running this tunnel 34 feet of low grade ore was cut that will average 4 per cent. From indications, the dyke is over 200 feet wide at this point.

Extensive development work will start as soon as a guarantee of transportation is forthcoming to carry the large bodies of low grade ore now in sight The lack of a wagon road to the camp and as far south as Roche river is one of the hardest propositions miners have to contend with in developing their claims, and will soon place the matter before the Mr Shatford, M.P.P, and ask for assistance in building a good wagon road to the district.

With easy transportation the Columbia Copper Mining Co., with which Mr. Wheeler is prominentlv identified, could furnish from 100 to 300 tons of ore per day when properly developed. A wagon road is built as far as Ashnola, which may be considered the gateway to all this section of country. But to get machinery beyond this point is almost an impossibility without a road.

REAL ESTATE FIRM.

H. H. Avery and son have, for the past year, been travelling around the newly opened parts of Canada, and after a careful selection, have decided to make their home here, because they think that Princeton has a brighter and more prosperous future before it than any other newly opened up territory in Canada. "Why!" said Mr. Avery, sr., "you have the prettiest townsite in the Dominion and everything to make one of the most prosperous cities in the world. Good climate, coal and timber lands, minerals, good water supply, stock ranches and the finest fruit lands in B.C. What more could a place want? Oh yes; and we will have a railway in here in less than a year." Messrs. Avery have lived in Nelson for the last twelve years and both are well known throughout the Kootenays. See their ad on 3rd page.

COKING AND NON-COKING COAL.

EDITOR STAR—Sir: Regarding the letter of Mr Waterman, re coal, in your last issue I wish to state that when Messrs. Weeks & Adams gave a contract for coal at Princeton they were not aware that it was procurable at Granite Creek. The Princeton coal was delivered here before they gave the North Fork coal a test. I took the contract to deliver them a ton for trial, which was the only North Fork coal they used. They pronounced it a far superior coal to that of Princeton. But their furnace was not adapted to a coal of such heating properties: It was too hard on the grate bars. It would have to be mixsd with some inferior quality, like the Princeton coal.

Mr. Weeks wanted me to take the contract to deliver them coal for the season from the mines here. They paid me $12 for the ton I delivered, which was a larger sum than they paid for the Princeton article. I think Mr. Waterman should not believe all the stories he hears but come and see our mines himself.

Yours truly,
W. H. HOLMES.

Granite Creek, July 4.

[It is right and proper that men should favor and defend the coal or any other product of their immediate locality. No good purpose can be served, however, by recriminative communications to the press. Rational people are very much pleased that the North Fork coal will coke and that the Princeton coal gives such eminent satisfaction for steaming and domestic purposes. There is a market for both when the railway is built to the mines.—ED.]

TOWN AND DISTRICT.

Miss Hunter of Nicola is in town, the guest of Miss Tree, Kenley Avenue.

Word was received by Government Agent Hunter yesterday afternoon that the home of W. H. Holmes, Granite Creek, had been destroyed by fire. Particulars could not be learned.

Telephone messages for Princeton have now to be sent to Hedlev and mailed from there to Princeton. The public telephone manager is certainly a whirlwind.

Mrs. Jas. Snowden and her mother, accompanied by Miss Myrtle Schisler, have gone on a visit to their old home at Welland, Ontario. They will return in about six weeks.

OUR COAL MISREPRESENTED.

It is unfortunate that a few persons in this world are so highly sensitive that they take offence on the flimsiest pretext and build up provocation where none was intended. Least of all one would not expect an educated, travelled person to manifest a weakness for controversy and publicity because an innocent remark could be construed into some cherished suspicion. Looking for trouble or argument is not usually a successful means of convincing others of the superiority of yourself or the thing you possess. These remarks are suggested by the appearance of an article in a coast newspaper reflecting rather unfairly on the quality of Princeton coal and which was dealt with in a letter in last issue by the Manager of the Vermilion Forks Co., who fully vindicates the fuel which has made this town and the Similkameen famous.

The Star has conscientiously compared the North Fork or Tulameen coal with that of Princeton based solely on what information could be obtained on the ground. Its article was copied into the coast paper and gave rise to what in the light of the published analyses of last week, was an unwarranted 'fling' at Princeton coal. More important still the Dominion geologist in this section states that the classification, lignite, as applied to Princeton coal does not do it justice He says that while his department recognizes only the standard classifications, anthracite, bituminous and lignite, there should be some better way of describing a coal which technically may be termed lignite, yet having a commercial value equal to either of the others. In the United States the term 'sub-bituminous' is applied to coal being lignite in character but possessing qualities rendering it little, if any, inferior to the best domestic or steaming coal

By one expert it is believed that anthracite will be found in the Princeton coal basin. So far, however, neither anthracite nor bituminous or coking coal has been discovered. On two things, however, all impartial persons are agreed. And those are the cleanliness and non-destructible heat producing factors which make the Princeton coal peculiarly preferable for domestic purposes. Some coals warp and burn out stoves and if strong in certain gases are very destructive of stovepipe, making them unsafe and requiring continuous attention to avert fires.

Princeton coal has sufficient merit of its own without attempting to borrow any by knocking its nearest neighbor. The North Fork coal is beyond all doubt a coking coal and the Star wants to be on record as giving it the fullest measure of credit in that respect. Princeton coal is non-coking. But in saying that license is not given any promoter or M.E. to 'blackeye' it. It will be a duty of ours to parry any such attempt and in doing so will strike above the belt and not try to belittle a neighbor's article. The columns of a newspaper are too valuable and life is too short to engage in long drawn controversy as to the overtopping qualities of some particular coal or other mineral. What this district needs is men of generous mould, constructive, not destructive knockers. All energy and effort are required to build up, and make known the splendid resources now awaiting the enlivening touch of capital.

NOTES AND COMMENTS.

Would it not be the proper caper for a committee of citizens to meet and hold an inquest on the late unlamented Princeton Board of Trade? There are one or two fine maps and some railway guides that might be sold at auction. Then there is the deposit in the bank of some $50. That could be applied to the liquidation of celebration bills now overdue. Whatever is left could be used in holding a wake, and burial obsequies in the cemetery of oblivion.

The telephone for public use is silent and thereby hangs a tale. The question now is: Who's to blame? And they will all proceed to blame the other fellow.

Princetonians now having business or other messages to send over the telephone line will have to journey twelve miles to Granite Creek or twenty-five miles to Hedley. And the manager refuses to give a phone to a large mercantile house through personal pique. But there is no remedy until the elections are over.

The provincial government is in such good financial standing, having surplus revenue and general prosperity all around, that a step forward in the encouragement of mining and the discovery of mineral should be made. The Star has humbly advocated free assays for prospectors and now urges that the elementary education necessary for good prospecting be given by a lecturer in the various mining camps of the province. What say you, prospectors?

Watchmaker and Jeweller.

NOTICE.

IN THE MATTER OF THE RAILWAY ACT AND IN THE MATTER OF THE VANCOUVER, VICTORIA AND EASTERN RAILWAY AND NAVIGATION COMPANY

NOTICE IS HEREBY GIVEN that at the expiration of four weeks from the first publication of this notice, the Vancouver, Victoria & Eastern Railway and Navigation Company will apply to the Board of Railway Commissioners for Canada at Ottawa, under Section 222 of the Railway Act to authorize the construction of a branch line of railway to the Vermilion Forks Mining and Development Company's coal mine on lot 1822, Group 1, in accordance with the plan, profile and book of reference showing such branch line which has been deposited in the Land Registry Office in Kamloops on the 7th day of May A D. 1908.

Dated this 8th day of May, A.D. 1908.

A. H. MACNEILL,
Solicitor for the Vancouver, Victoria and Eastern Railway and Navigation Company.

The first publication of this notice was in the issue of this paper of the 20th day of May. 1908.

NOTICE.

NOTICE is hereby given that thirty days after date I intend to apply to the Supt. Provincial Police, Victoria, for renewal of retail liquor license for the Ashnola Hotel, Ashnola B. C.

HUGH CAMPBELL.

LOCAL AND GENERAL

Do horseowners ever think what a nuisance bells are around town?

The United Empire people are anxious to see the railway so that shipping could begin.

Engineer Kennedy while here last week cross sectioned the railway line below Allison for rock work to be done by subcontractor Ericson. It is expected he will begin at once.

Grading between Hedley and Keremeos will not be completed for two or three months as there are 60,000 yards of filling to be done.

Messrs. Avery are excavating on a lot on Fenchurch Av., on which they will erect an office. They purchased the lot adjoining on the N. W. corner of Bridge St and Fenchurch Av. from A. Bell for $1000, a frontage of 50 feet on Bridge and 150 on Fenchurch. This property is considered very eligible for situation.

The Oddfellows. after their installation ceremony last Thursday night at which a large number of brethren attended, sat down to supper at the Tulameen Hotel.

C. P. Charleton, accountant of the A. E. Howse Co., Nicola, was in town on a business and pleasure visit during the celebration. Mr. Charleton is a baseball pitcher of more than local fame, having had some tempting offers from abroad. He prefers to remain amateur.

Dr. Curtain of Nicola, was a celebration visitor to Princeton.

Mrs. Revely, of Hedley, was the guest of Mr. and Mrs Hunter the past week.

C. Æ. Shaw, P.L.S., has gone to survey land near Hope for American parties.

C. O. French is prospecting in the hills about 30 miles west of town. He may uncover another townsite.

Mrs. Paul is visiting with Mrs. F. P. Cook.

Strawberries are selling at 25c per lb.

A resolution asking that there be but one polling day for all Canada has been passed by the Princeton Liberal Association.

Watchmaker and Jeweller.

Ladies and Gentlemen: Do not fail to send me your watch or jewellery for repairs, which I guarantee for one year. I pay the postage on all goods bought from me and charge coast prices. Good watches at low prices and guarantee them for five years. Yours truly,

SHORT AND PITHY.

Are you one of those 'wise' persons who knows it all and cannot learn anything from anybody?

A lie is self-condemning for it makes the author look and act guilty.

No woman would like to have her husband behave as do other men at whom she makes eyes.

Truthfulness must be a great virtue for notice how low a person sinks in the estimation of others when the reputation of "liar" is acquired.

Deception cannot last. It will unmask itself because it is wrong—murder will out.

Truth is mighty and must prevail. No one need fear the outcome if truth is on their side.

The mills of the gods grind slow but sure. Secret wrongdoing is sure to be discovered no matter how cunning one may be.

Most husbands would rather mind the baby occasionally than mind his wife semi-occasionally.

The world may owe you a living, but try and collect it and it will have as many excuses on tap as a man who is asked to pay a bill.

COPPER HANDBOOK

(New Edition issued March, 1908.)

SIZE: Octavo.

PAGES: 1228.

CHAPTERS: 25.

SCOPE: The copper industry of the world.

COVERING: Copper history, geology, geography, chemistry, mineralogy, mining, milling, leaching, smelting, refining, brands, grades, impurities, alloys, uses, substitutes, terminology, deposits by districts, states, countries and continents, mines in detail, statistics of production, consumption, imports, exports, finances, dividends, etc.

The Copper Handbook is concededly the

World's Standard Reference Book on Copper.

The miner needs the book for the facts it gives him regarding geology, mining, copper deposits and copper mines

The metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting and refining.

The copper consumer needs the book for every chapter it contains It tells what, and explains how and why.

The investor in copper shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

PRICE: $5 in buokram with gilt top, or $7.50 in full library morocco.

TERMS: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

WRITE NOW to the editor and publisher,

THE PUT-IT-OFFS.

My friend have you heard of the town of Yawn,
On the banks of the river Slow,
Where blooms the Waitawhile flower fair,
Where the Sometimeorother scents the air,
And the soft Goeasys grow?

It lies in the valley of Whatstheuse
In the province of Letterslide;
That tired feeling is native there,
It's the home of the listless Idontcare,
Where the Putitoffs abide.

They smile when asked to advertise,
And say they will do it tomorrow,
And so they delay from day unto dav,
Puttingoff cycles up and leads them away,
And they soon have to starve, beg or borrrow.

DECIDEDLY FRIENDLY.

Ranter—I thought this paper was friendly to me.

Editor—So it is. What's the matter now?

Ranter—I made a speech at the banquet last night, and you didn't print a line of it.

Editor—Well? What further proof did you want of our friendship?

TWENTY-FIVE CENTS A MONTH or THREE MONTHS FOR FIFTY CENTS will bring the STAR to your Address every week. Why not subscribe and be in touch with this great mineral district. Every man in Princeton postal district should be a subscriber to his home paper, THE STAR.

FIRE ALARMS, &c.

Four sharp taps on the bell, with slight pause between each four, will indicate that the fire is in Ward 1. Two sharp taps, with pause between each two, will locate the fire in Ward 2.

Continuous moderate ringing of the bell will be used for meetings of any kind, for public demonstrations or for giving the correct time daily. Tolling for the dead will be one stroke of the bell with measured intervals of ten seconds. ad.
