

With the Railway comes Coal Mining and the Payroll

SIMILKAMEEN

The competent person does not talk of himself: He is content to let his work speak for him.

Progress and development hinge on the one great need of the country, transportation—It is almost an absolute certainty that the V., V. & E. will be in operation here before the close of the year—Investment will never be more favorable than now—Come and see.

Vol. X. No. 23.

RAILROAD DIVISIONS

Princeton a Junction and Divisional Point Make a Sure Payroll.

V., V. & E., Through Great Northern, Acquires Valuable Acreage From V.F.M. Co.

A deal of more than ordinary significance has recently been consummated between the Great Northern and the Vermilion Forks Mining Co. represented by Ernest Waterman, manager. It consists of the purchase of 13 1/4 acres of land on the west boundary of the townsite, near the proposed Tulameen tunnel, by the railway company. Such large ground space at this particular point, in connection with extensive free grants of land already given by the V.F.M. Co., is an index of future requirements on an extensive scale.

It is undoubtedly the intention of the Great Northern to make of Princeton a divisional point in the transference of its traffic. This will necessitate car repair shops, roundhouse and all the accessories of a sub-terminal point. The area of ground already acquired by the railway gives an importance to Princeton which can hardly be overestimated. It means a large payroll to begin with and gives that stability so much desired by the investor and homebuilder. Then there can be no doubt of a junction with the main line by a branch tapping the southwestern coal and ore deposits. These are all considerations that give value to all town properties and cause those rising tendencies which denote progress and development.

As was anticipated the Vermilion Forks Co. advanced the price of their lots on 1st June from 10 to 12 per cent. more than formerly. The demand for real estate is steady and prices are firm. Individual owners are not at all zealous in pushing sales. The time, and other conditions are not favorable for large deals but a better opportunity for men with small means to secure a home lot or one for business will never be presented again. It does not require acute foresight to predict a general rise in all land values as the means of transportation and development draw nigh.

Grading will shortly begin on the spur leading to the V.F.M. Co's coal mine shaft. When this is completed the rails will enable the delivery of machinery and required equipment for loading railroad cars with coal.

R. Holloway, an old Cariboo newspaperman is dead at Victoria, 76 years old.

Nearly a million dollars worth of lots was realized at sale of Prince Rupert lots.

HOPE TO OTTER FLAT

Wagon Road, in All Likelihood will be Built at Once to Summit.

Surveyors in Field to Locate Road to Great Silver-Gold Camp in Hope Mountains.

Col. Robert Stevenson, who has been somewhat in the limelight owing to his energetic handling of the Hope-Tulameen wagon road proposition and his recent adventure in Seattle with a robber, returned last Wednesday from the coast. He looks, and is, fit for the strenuous exertion required in attending to his mineral properties scattered all over this section. He has made good for the Similkameen in keeping its vast resources before the public through the powerful agency of the press and in pressing his road scheme before Premier McBride, civic corporations and by large petition to the government.

Many old friends were pleased to meet and welcome back Col. Stevenson after an absence of six months from the camp. Asked by one of the Star staff regarding construction of the wagon road from Hope to Summit Camp, he said that the Minister of Public Works, Hon. Thos. Taylor, would send a survey party as soon as the snow was off to locate the road. If the surveyor reported favorably con-

Continued on 5rd page.

TULAMEEN NUGGETS.

From Our Own Correspondent.

Tulameen, May 26.—M.G. Blair of Vancouver is expected in this week. He has purchased property here and intends building a summer cottage, so that he can bring his family in for the summer.

D. Courtney arrived in town tonight, bound for the Platinum Belt.

The G.N.R. surveyors are to start up the Tulameen River this week. Punk Davis is acting as guide.

The Henderson boys succeeded in landing two four-pound beauties out of Otter Lake this week.

E.E. Rice returned to the city this week and will go up to work for the Similkameen M.&S. Co. on Bear Creek.

The trail to Champion Creek is to be repaired, also a new bridge across Bear Creek and the Summit trail repaired. L. W. is all right.

Wm. Flager is to go to work on W. H. Armstrong's property at once. As soon as he gets things in shape he will put more men on.

Ed. Tingley, the road mogul, was in town this week.

W. J. Henderson is very glad to get back to the Tulameen climate. He is improving a little.

OPENING EXPOSITION

A.Y.P. Formally Opened with Great Eclat Before an Immense Crowd.

President Taft Touches Button at National Capitol and Wheels Begin Revolving.

Seattle, Wash., June 1.—[Special] Promptly at noon today President William H. Taft pressed an electric key in the Capitol at Washington, and the Alaska-Yukon-Pacific Exposition was formally opened to guests from every part of the world.

The opening exercises were conducted in the presence of a quarter of a million of people. The enormous crowd stood silent and awed as the solemn words of invocation were uttered by the Right Rev. Bishop Edward J. O'Dea, bishop of Seattle. Not a flag or strip of bunting was displayed from the thousand flag staffs and domes; the entire exposition city awaited with suppressed eagerness the touch of the President's hand. With the first stroke of the bell announcing the arrival of high noon, the deep sounding whistle from the University power house taken from the Russian gunboat that announced the transfer of Alaska to the United States years ago, gave response to the flash from Washington, and every wheel of the exposition machinery was set in motion.

The address of welcome was delivered by Director-General Nadeau, followed by Hon Sir J. Bryce, British Ambassador to the United States, Hon. Jas. J. Hill, President of the Great Northern Railway Co. and others.

Invitations to the editors of B.C. have been issued in which all the courtesies usually extended to the press will be available on presentation of credentials.

THE PUBLIC SCHOOL.

The enrolment of the public school is 40, as against 26 last year, an increase of over 50 per cent. Inspector Miller visited the school on May 19 and found it in a reasonably satisfactory condition. He made some recommendations as to the time table and arrangement of work, &c. which are being carefully carried out. The usual public examination will be held on Wednesday, June 30, as the law now requires school to be kept up till the end of the month, instead of till the last Friday, as formerly. The school keeps on growing in spite of the natural falling off after the recent entrance examinations. The daily attendance for May averaged 26.38, an increase of almost 20 per cent. over the same month last year, when there were no examinations.

RAILROAD OFFICIALS

Inspect Bridge Sites and Grade on Quick Trip Over the Line.

No Definite Time Stated for Tracklaying to Begin—All Depends on High Water.

Chief Engineer Hogeland of the Great Northern, J. H. Kennedy, C.E., and J. Porter of the firm of Porter Bros., tie and bridge timber contractors, were at the Great Northern Hotel last Thursday night, having driven from Keremeos on a hurried inspection of the grade. Mr. Hogeland gave close attention to the four bridge sites which the V., V. & E. requires in crossing the Similkameen river between Princeton and Keremeos. The steel for these bridges is now in course of delivery and will be ready for tracklaying when it begins.

Of the day and date when the tracklayers will commence to lay steel west of Keremeos no man seems to know. It is not likely that anything will be done before the water subsides in the river and that depends on the amount of snow in the mountains and the time it takes to melt it, which depends on the heat of Old Sol, which depends on the concatenation of the planets, which depends on the wireless orders from Uncle Jim, who depends on himself and does about as he pleases with governments and people. The grass is growing nicely on the grade made more than a year ago and it looks as if the Great Northern would have a big bunch of hay to market after high water. Probably the next excuse for delay will be too low water to float timber for bridges. In face of all probabilities it has been stated by one of the high contractors that tracklaying begins on the 10th inst., sure, and that construction west of Princeton will be pushed on immediately over the Hope mountains to the coast.

TOWN AND DISTRICT.

Governor Dewdney was registered at the Great Northern recently.

Mr. and Mrs. Marlow gave a dance party last Friday night which was, by general consent, the best this year.

Seven feet of snow on Hope summit turned a gang of trail repairers back to town.

The rivers have risen once; extreme high water is not likely.

E. P. Wheeler, of Conconully, Wash., is here on mining business.

J. G. Shier was a visitor from Hedley yesterday.

A Lodge of Freemasons will be duly instituted Friday night.

The Similkameen Star.

UNIVERSITY AND MINING SCHOOL.

Certain newspapers made light of the Star's advocacy of the location of the Provincial University at Princeton. Those papers showed an ill-concealed jealousy of the reasons proffered for choosing this town; moreover, they did not advance anything but presumptuous bombast in favor of their own towns. In selecting a university site three conditions are essential, viz: healthful climate, convenience and proper environment. Without a shadow of doubt, the climate of Princeton is as healthy as any in the world, the seasons being so well defined as to relieve them of any monotony, and yet all possessing those equable qualities which prolong life and make it enjoyable. An absolutely healthy and invigorating climate is vital for the young student life. Convenience means centrality and adaptability for ease of communication. Railroad conveyance with postal, telephone and telegraph communications are admittedly requisite and all these will be supplied here before the end of the year. The moral, social and natural environment of Princeton is very favorable. The existence of so-called 'necessary evils' are subjected to a wholesome fear of the law and public sentiment here embodies all that is rational for the teaching and due observance of Christian belief and principles. The location of universities in or near large cities has been the undoing of many a young man, especially those of country birth and rearing. Then, there are the natural resources here which offer a wide field for investigation, study and research. All classes of mining, geological structure, experimentation with economic substances and the acquisition of knowledge first hand from mother earth have unexcelled facilities for pursuit by the student in Princeton district. A mining school in connection with the university must be maintained and equipped. If located in a mining section the advantages would be so obvious as not to require mention. Premier McBride cannot fail to appreciate the importance of suggestions made, and reliance must be placed on him to select the very best location, in doing this the merits of Princeton will recommend the construction of the University building here.

NOTES AND COMMENTS.

One of the immediate results of mineral exhibitions is the awakening of interest in men who never could be influenced in any degree except by 'ocular demonstration,' or seeing the real thing. Correspondence will follow the A.Y.P. exposition at Seattle. If mine owners and prospectors here would only realize the efficacy of a board or union through which they could advise and consult each other as to grouping, prices, conditions, etc., and appoint a secretary who would promptly attend to correspondence, better results would be obtained than by straggling and delayed answers of individuals to inquirers abroad. A local mining association would also be of great service in diffusing information about the various camps. United and harmonious action would always have the effect of inviting investors, whereas the difficulty of dealing with isolated and independent owners often repels capital and thus delays development and progress, an injury to every citizen of the district.

The attempt to commercialize Sunday by introducing baseball with all its attendant evils of gambling or betting, carousing, and 'so on, has been resented by the people of North Vancouver. Sunday law is very explicit in Canada, prohibiting all games where admission is paid to witness them. The law was framed to choke off the money grabbers who are not content with raking in the shekels six days in the week but must needs make a special haul on Sunday. When people become so greedy that they will not take a 'day off' in a week from money-getting then the law wisely provides for their case and applies force, if necessary, to make them obedient. Canadians do not relish the 'continental' Sunday so much in evidence in other countries and any lowering of the sacred standard of the day will not be tolerated by the intelligent mass of them. An eight-hour work day and a Sunday rest day is the natural and inherited right of every human being and will become universal with the advancement of civilization and christianity.

Admiral Lord Charles Beresford advises the colonies to provide for their own defence and create the nucleus of a navy all their own. Lord Charles is not a German-side nor one of those insane persons who has visions of Flying Dutchmen descending from the sky on defenceless Britain. It is about time the jingoes took a rest or were Oslerized.

Many a young fellow has taken his first drink at the military canteen, which is now to be abolished in Canada. Better late, &c.

NOTICE.

Certificate of Improvements. Brooklyn, Lela and Key West mineral claims, situate in the Similkameen mining division of Yale district. Where located: Kennedy Mountain. Take notice that J. Edgar F. Burr, free miner's certificate No. B73354, acting for self and others, A. E. Howse, f.m.c. B10474; F. S. Burr, f.m.c. B0433; A. D. Cowles, f.m.c. B10710; H. I. Jones, f.m.c. B10726 and T. C. Revely, f.m.c. B7034, intend 60 days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements for the purpose of obtaining a Crown Grant of the above claims. And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements. Dated this 9th day of March, A.D. 1909.

HOPE TO OTTER FLAT. From First Page.

struction would immediately begin, so that by the end of the season the road would be complete to Summit Camp, 24 miles. Next season the road would be finished to Otter Flat, or Tulameen.

Col. Stevenson spent all of last winter in pursuit of this projected road, receiving very flattering endorsement of his object from the Princeton and Vancouver boards of trade, the Mayor and City Council of Vancouver, Tourist Association, the Reeve and Council of Chilliwack, and a largely signed petition.

There is no doubt in the mind of the promoter as to a feasible route being found. The road should have been built 25 years ago, then there would have been development and a busy camp where now roam the grizzly and the coyote, and where now the sweet scented skunk cabbage with the jungle of devil clubs and salmon berries afford food and cover for fowl and beast.

Col. Stevenson, or 'Bobbie,' as he is familiarly known among old tillicums, states that Summit Camp is 12 miles from the V., V. & E. at Coquihalla Pass and 3 miles from Railroad Pass. The ore averages \$140 per ton. A shipment of 1700 lbs. of this ore to the Tacoma smelter gave in returns 215 ozs. in silver, \$12 in gold, 70 per cent. in lead and 4 per cent. in copper. When the road is built the ore will stand hauling by wagon to Hope thence by rail to Tacoma or Ladysmith smelters. Along the proposed road is land suitable for a colony of settlers.

The Colonel denies that he changed his allegiance to King Edward for that of Uncle Sam. It would 'go hard' with the man who originated that yarn if he could find him. He suspects a land booster in the Yakima valley which he visited for the purpose of seeing its development, having passed through it some 40 years ago when there was not a white man to be found there. 'I have no time,' said the Col., 'for farming at 70 years of age. I and my family own a beautiful farm in Chilliwack, but I am too busy with mining matters to attend to anything else. I intend to play my last deal in mining right here. Two companies will be organized this season to develop and operate mines that I own and in four months quite a gang of men will be at work.' The Col. has not an enemy in these parts and all wish him good luck with his various undertakings.

BOARD OF TRADE, PRINCETON, B. C. Meets first Monday in each month. W. C. McDougall, A. J. Marlow, President, Secretary.

TOWN AND DISTRICT.

Board of Trade meets Monday night. Col. Stevenson recovered the money stolen from him at Seattle.

Tulameen had a big display of fireworks on the 24th, from the roof of the Otter Flat Hotel.

Divine services on Sunday at 11 a.m. and 7.30 p.m. Sunday school at 2.30. All welcome. Rev. G. A. Wilson is expected on the 13th and will preach.

John McDonald, an old Cariboo and Granite Creek gold hunter, is seriously ill in Kamloops hospital.

For the information of the Nicola Herald: Princetonians will celebrate Dominion Day, though possibly not as elaborate as in former years; they do not ride on pork cars, but they do ride swift horses, winning over \$300 in purse and asides at the Merritt meeting on Victoria Day, thanks to Jack Budd and Billy Garrison. Try again, Bro. Squibs.

A lot of local items and a letter from Okanagan Falls are crowded out of this issue but will appear in next.

Boost! Boost! Lay down your little hammer and be an optimist—be a man.

THE GRIPPE.
 An ache in the back, a pain in the head,
 That's the Grippe!
 A choke in the throat and a yearning for
 bed—
 That's the Grippe!
 A river of heat then a shiver of cold,
 A feeling of being three hundred years
 old,
 A willingness even to do as you're told.
 That's the Grippe!
 An arrow of pain now in this place, now
 that—
 That's the Grippe!
 A feeling of doubt as to where you are
 at—
 That's the Grippe!
 A stupid sensation—of course, wholly
 new—
 A foolish depression—why should you
 feel blue?
 A doubt as to whether this really is
 you—
 That's the Grippe!
 Strange visions at night, that deprive you
 of rest—
 That's the Grippe!

A taste in your mouth and a weight on
 your chest—
 That's the Grippe!
 A tired sensation that runs through your
 veins,
 A queer combination of hiches and of
 pains,
 A rapid admission of absence of brains.
 That's the Grippe!
 A marvelous weakness comes on in a
 day
 That's the Grippe!
 A petulant wonder "How long will it
 stay?"
 That's the Grippe!
 A season of fever, a season of freeze,
 A quivering weakness that's felt as you
 sneeze—
 Say, if ever there was a cussed disease,
 It's the Grippe!

**COPPER
 HANDBOOK**

(New Edition issued March, 1908.)
 SIZE: Octavo.
 PAGES: 1228.
 CHAPTERS: 25.
 SCOPE: The copper industry of the
 world.
 COVERING: Copper history, geology,
 geography, chemistry, mineralogy,
 mining, milling, leaching, smelting, re-
 fining, brands, grades, impurities, alloys,
 uses, substitutes, terminology, deposits by
 districts, states, countries and continents,
 mines in detail, statistics of production,
 consumption, imports, exports, finances,
 dividends, etc.

The Copper Handbook is concededly
 the
**World's Standard Reference
 Book on Copper.**

The miner needs the book for the facts
 it gives him regarding geology, mining,
 copper deposits and copper mines
 The metallurgist needs the book for
 the facts it gives him regarding copper
 milling, leaching, smelting and refining.
 The copper consumer needs the book
 for every chapter it contains. It tells
 what, and explains how and why.
 The investor in copper shares cannot
 afford to be without it. The Copper
 Handbook gives statistics and general in-
 formation on one hand, with thousands
 of detailed mine descriptions on the
 other, covering the copper mines of the
 entire world, and the 40 pages of con-
 densed statistical tables alone are worth
 more than the price of the book to each
 and every owner of copper mining shares.
 PRICE: \$5 in bookform with gilt top,
 or \$7.50 in full library morocco.
 TERMS: The most liberal. Send no
 money, but order the book sent you, all
 carriage charges prepaid, on one week's
 approval, to be returned if unsatisfactory,
 or paid for if it suits. Can you afford
 not to see the book and judge for your-
 self of its value to you?

BOUNTIES FOR ANIMALS.
 Coyotes, Big-Horned Owls and Golden
 Eagles to be Exterminated
 if Possible.

Notice is given in last week's issue of
 the B.C. Gazette that, from May, 1909, a
 bounty of \$3 will be paid on every coy-
 ote killed within the province, on a cer-
 tificate of a justice of the peace that such
 animal was killed by the person claiming
 the bounty, and that the skin of such
 animal was produced by him. The govern-
 ment agent, or other official paying
 the bounty, shall punch a hole in the left
 ear of the animal, the hole to be not less
 than one quarter of an inch in diameter;
 and any such hole in any ear of any skin
 shall disqualify any such skin from the
 bounty.

Notice is also given that from May 1,
 1909, a bounty of \$2 will be paid for the
 destruction of each big-horned owl, and
 of \$3 for the destruction of each golden
 eagle within the counties of Cariboo,
 Yale and Kootenay.

Both legs of each golden eagle, upon
 which bounty is claimed, must be pro-
 duced intact to the provincial game war-
 den, A. Bryan Williams, J.P., of Van-
 couver, by the person claiming the
 bounty.

Every person applying for bounty shall
 furnish the provincial game warden with
 an affidavit to the effect that the bird
 upon which bounty is claimed was killed
 within either of the aforesaid counties.
