16th Year No. 24 PRINCETON, B.C., FRIDAY, JUNE 11, 1915. PER YEAR : $2 Cash Single Copy 5c.

FAVORS PUTTING PRISONERS TO WORK

Interned Aliens Might Be Employed on Trans-Provincial Road.

The council of the Princeton Board of Trade went on record at their meeting Monday evening as advocating as great an expenditure as can be arranged for the completion of the road following Onemile from Princeton to Nicola. This they considered more essential than the proposed new road from Princeton to Granite Creek. They urge a survey being made of a road following Summers creek from the point where the road terminates to Mizzezula lake, as far as possible this year, with a view to final completion at a later date. Also the building of a good pack trail from the end of uncompleted road from Tulameen to Summit Camp, following the road survey.

Another project the council favors is the putting to work on the Trans-Provincial road a bunch of the interned aliens now held at Vernon, and the establishing of an internment camp near here. The local board has the support of the Penticton board in this matter. At Vernon 300 German and Austrian prisoners are on road work, the Dominion government defraying the cost of confinement and food, and the Provincial government pay-25 cents a day.

A vote of thanks was tendered R. W. Moeran upon resigning the the presidency of the board and congratulations extended upon his decision to volunteer for active service with the forces.

Baseball Smoker was Good

Everything went "free and easy" at the baseball smoker Wednssday night. During the evennig talent was displayed and stunts pulled off that would command fancy prices on the Pantages circuit. The walls of the Princess Theatre echoed with songs and stories they never heard before. Dr. Campbell fully sustained his reputation as an efficient chairman, and Alex Ward refereed the boxing bouts with with skill of a Siler or a Muldoon. About 100 were present. There were fast three round boxing bouts between Boling and Huey, T. Broomfield and Prosser, Muir and Algard, C. Bromfield and Ward. Schisler and Ray. Others contributing to the program were: Capt. Cole, Sam Gibson, H. T. Rainbow, C. Broomfield, Mr. Kearns, B. J. McKenzie, "Peanuts," Geo. Cawston, A. L. White, Frank Bailey, "Shorty" Simpson, Lawrence Lavalley and F. J. Smyth. The baseball committee wish to thank Dignan Bros. for the use of the theatre and those who supplied the various refreshments.

LOCAL ITEMS

H. H. Avery, Jr., and Chas. Moore had several good days' fishing at Chain lake.

Anson Potter, the jeweler, is now in his new location in McDonald & Rowe's store.

Fflueger's trolling baits. Triple and fly hooks for river and lake fishing at A. L. White's.

Mrs. A. E. Howse of Nicola is here on a visit with her son and his wife, Mr. and Mrs. F. A. Howse.

E. E. Emmons, who is operating a placer proposition five miles above Tulameen, was in Princeton during the week.

Mr. and Mrs C. A. Saunders, who have been residing at Copper Mountain for some time, expect to leave shortly for a trip east.

This sign appears in a Bridge street window: "The war is being settled abroad. Please don't start anything here except business."

The 54th battalion many be sent to the front after only two or three week's training at Vernon. Three of the Princeton recruits, Matthews, Dickie and Ray, are leaving today for Vernon. Moeran will go a few days later.

J. M. Wright arrived home Monday from Hope, where for the past two months he had charge of the West Yale Review. Hope, with its several railway lines and ideal smelter location, has a brilliant future, Mr. Wright believes.

Last Sunday afternoon the members of the Princeton Odd Fellow and Rebekah lodges marched to the cemetery and laid flowers on the graves of their departed brethren. The ritualistic memorial service was conducted. Rev. J. A. Gillam, of the Presbyterian church, assisted in the service.

Mrs. Swanson was stopping at the Seattle Hotel, in Seattle, on the night of May 29th, when the scow load of dynamite in the bay was set off. The hotel faces Pioneer square, close to the waterfront, and received the full impact of the shock. Mrs. Swanson says the noise of the explosion was simply indiscribable, and this was followed by a shower of broken glass. Thousands of dollars worth of plate glass and other windows were broken. It was first thought an earthquake had occnrred, and it was not until the following day that the real cause was known.

Dominion Day Meeting

There was a poor attendance at the meeting called last Tuesday to discuss the proposition of holding a celebration on Dominion Day. The few present did not consider the gathering a representative one, so adjourned until Saturday evening at 8 o'clock. Princeton has held a celebration on Dominion Day for the past 20 years, and many of the old timers are anxious not to have the day passed up this year. It is to be hoped that there will be a better attendance tomorrow evening.

Railway Rumblings

The K. V. trains will be carrying mail within the next week or two.

Way freight and freight in carload lots is being handled over the Kettle Valley.

The Great Northern and Dominion Express Companies are established in Princeton.

Commencing July 1st there will be a daily train service over the Great Northern Orovillo-Princeton branch.

The fare from Princeton to Vancouver via. the Kettle Valley is $11.60. From Princeton to Merritt, $2.75. Princeton to Penticton, $2.80. Princeton to Midway, $8.20.

The distance from Spences Bridge to Merritt is 40 miles. From Merritt to Penticton 140 miles. From Penticton to Midway, 135 miles. Princeton is an equal distance from Merritt and Penticton, being 70 miles by the Kettle Valley from each.

L. W. Mickel handles the station work for both the Great Northern and Kettle Valley lines. It is said that courtesy, civility and prudence are assets that have raised many a man to positions of importance and responsiblity. All these traits will be found in the successful station agent, and Mickel has these traits.

The passenger service on the new Kettle Valley line is quite satisfactory for present requirements. The roadbed is good, the coaches are new and clean, and the standard sleeper attached provides every comfort and convenience for the traveling public. Trains both east and west arrive at Princeton at noon and stop 40 minutes for lunch. This gives passengers time to come up town for their meals. Later on a lunch counter may be opened at the station.

MINES AND MINING

The New York Mining Age says that work will soon begin on running a railroad spur from Princeton to Copper Mountain, a distance of 12 miles up a very easy grade. Plans for a concentrator have already been completed. Over 6,000,000 of ore has been developed in the past few months by systematic diamond drilling.

PRINCETON AGAIN WINNER OF GAME

Local Ball Team for Second Time Slips One Over on the Copperites.

When the Princeton and Copper Mountain ball teams met on the diamond here last Sunday afternoon, the local baseball fans witnessed the most interesting game that has been played in Princeton for years. The most fanatic fan could not predict the winner till Micky Osborne, the third man up to bat in the ninth inning, put a high one out into right field. Then everyone knew the game was over and that Princeton had won, for Pearson was playing right field.

Umpire Feasendon called the men to action at 2:15. Copper Mountain, having their choice, took the field—and the rooters cleared their throats.

Avery and Boling both got next to the ball the first thing, but Copper Mountain couldn't stand for any runs so soon.

When Rayner got into the box, Priuceton stock went up, for he wound up like a veteran, and it was "one, two, three, you're out," for the first three men up to bat. In the second inning Kearns scored a run for Princeton, and the score remained one to nothing until the fourth inning, when Boling scored for Princeton and Morris for Copper Mountain.

The main feature in the game came in the fifth inning. Marston came up to bat and made a good, clean three base hit, and forgot to stop running till he got home. They say that his first name is Homerun instead of Len

In the sixth inning the visitors took a new lease on life, when Condin, Leighton and McDonald each scored a run, making the score 6 to 4 in favor of the Mountain. In the eighth Dignan and Kearns made the round trip for Princeton, and Leighton got another one for the Copperites, leaving Princeton with only six, while Copper Mountain had seven.

Then there had to be something done, so the rooters came to the front with their special line of complimentary stuff, and Potter and Avery made a score apiece. Copper Mountain still had a chance. But the Princeton battery tightened up and fanned the first two men up to bat, and Osborne finished the game by knocking the ball out into Pearson's territory.

The friendly rivalry during the game was very keen, and some of the players heard a lot of new things about themselves that they had never heard before, when such men as Norcross, and Young, and Wigmore, and Ward got to rooting. Even Kit Summers went crszy for awhile.

The lineup was as follows:

PRINCETON		COPPER MT.
Rayner	Pitcher	Daly
Waddell	Catcher	McDonald
Marston	1st Base	Crane
Dignan	2nd Base	Morris
Kearns	3rd Base	Osborne
Boling	Short	Leighton
Pearson	R. F.	Tremlett
Potter	C. F.	Hooper
Avery	L. F.	Condin

LOCAL ITEMS

E. S. Silcox is home from the coast.

Chester F. Lee has returned from Seattle.

F. A. Howse arrived home from Vancouver Wednesday.

There will be service at the Church of England next Sunday at 11 o'clock.

Keremeos strawberries are now on the market, retailing at 20 cents a box.

A daughter was born on Sunday, June 6th, to Mr. and Mrs. Jas. Drummond.

G. A. Bigelow, a San Francisco mining man, arrived in Prlnceton yesderday.

Robt. Strachan, district mine inspector, was over from Merritt during the week.

Alex Dixon left yesterday for Vancouver and may decide to enlist while there.

For bargains in Refrigerators, Screen Doors and Garden Hose go to A. L. White's.

This is an age of politeness. Even the horses for the army must have good manners.

The Keremeos Cattle Company have fenced about 3,000 acres of pasture land near Princeton.

Rev. and Mrs. Griffiths have gone to Vancouver, where Mr. Griffiths will astend the Synod.

The government should get after the mosquito. He sends in his bill without using the war stamp.

H. Whiting has been appointed government weed inspector for the district between Princeton and Cascade.

Mrs. John Dignan has returned from Penticton. Mrs. Mold and two childred returned with her and will remain for a short time.

The Rev. Dr. J. Knox Wright, district secretary of the Canadian Bible society, will be in Princeton on Tuesday, June 15th. He will hold a public meeting in the court house at 8 p. m., to whieh all are invited. The bible society is doing an excellent work in supplying the soldiers of the empire with pocket editions of the bible, besides carrying on its great work in ordinary lines. He asks the interest and support of all.

Heavy Draft Horses

AND MILITARY HORSES

Wanted for Canadian Government.

Heavy draft horses weighing up to 1550 pounds suitable for artillery and transporf will be purchased. Such horaes must have good shoulders, deep in the girth and back ribs, short backs well ribbed up and active. Horses with white strips in face will not be rejected.

Riding horses. Age, rising 5 to 10 years. Weight, 1050 to 1250 pounds.

Horses must be of solid color. They must be in at least fair condition as to flesh, sound, of good conformation, free from blemishes or vice, artillery horses broken to harness rnd saddle horses to ride. Horses will be inspected by

Mr. R. F. Bevan

Government Remount Officer.

PRINCETON—Thursday forenoon, June 24th.
HEDLEY—Thursday afternoon, June 24th.
KEREMEOS—Friday, June 25th.

BUSINESS LOCALS

For good dry wood call on Neil Huston.

For Sale—Lots 3 and 4, block 13, Kenley Avenue. Small house on same. Apply to Chas. Willarson.

COMING EVENTS

Ratepayers' and Electors' Association—Next meeting Monday, June 21st.

Government horse buyers in Princeson Thursday forenoon, June 24th.

RELIGIOUS SERVICES.

Churce of England—Sunday, June 13. Service at 11 a. m.

Presbyterian church—Sunday school in the court house at 11 a.m. Evening service at 7.30 p.m. All are cordially invited. Rev. J. A. Gillam, pastor.

FOR SALE

New Taylor safe. Cost $131 at Penticton. Price, $65.

Two gasoline store lamps, $4 each. Cost $10 each. Perfect condition.

Pressure tank and guage, $5.

About 50 feet hollow tubing, $2.

Air pump for pressure tank, $1.

About Float.

Float is not a periodical. It is a book containing 86 illustrations all told, and is filled with sketches and stories of western life. It tells how a gambler cashed in after the flush days of Sandon; how it rained in New Denver long after Noah was dead; how a parson took a drink at Bear Lake in early days; how justice was dealt in Kaslo in '93; how the saloon man outprayed the women in Kalamazoo, and graphically depicts the roamings of a western editor among the tenderfeet in the cent belt. It contains the early history of Nelson and a romance of the Silver King mine. In it are printed three western poems, and dozens of articles too numerous to mention. Send for one before it is too late. The price is 25 cents, postpaid to any part of the world. Address all letters to

R. T. Lowery

GREENWOOD, B. C.

Synopsis of Coal Mining Regulations.

COAL mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district inwhich the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal sub-divisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon: If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.—58782.

Socialist Capitalist

J. H. Hawthornthwaite, Capitalist.

At least that is the way it should appear in the rating of Bradstreet, if the report of his holding in a Nanaimo coal company, published in the Daily Sun, is to be believed.

The Sun says that he has 55,000 shares in the firm, and we can take it for granted that they are worth at the least ten dollars per share. That would make him worth half a million at the very least, but just imagine if these shares were worth $100 each, what our dear Socialist friend is worth—to say nothing of the other property he owns in B.C.

The next question is as to where he got the money to purchase that stock—and also all his realty holdings. If he is as good a Socialist as he claimed to be a few years ago—and the Socialists put him into the Legislature—then why does he not cut up some of this coin and help the Socialist party along? The Socialist party is always hungry for money—in fact it is money that not only makes the mare to go but the Socialists as well—and it is now up to James to come through with some of that hard-earned (?) coin he has, so that the Socialists here that are out of work, can be assisted—and most of them spend their time dodging work if they cannot get a good job at the expense of the labor unions—and help out some of his fellow Socialists who are content to let the oppressed workers do the work while they argue the question on the street corners at night, and sleep to one o'clock in the day?

We have heard Hawthornthwaite talk about "our masters." We have heard him denounce capital in all its ways and its attitudes. We have seen him rumple that manly brow of his, and in stentorian tones demand that the capitlists class be done away with. He has poured forth a flood of eloquence, picturing how the poor men who have to work for a living were being ground under a mighty octopus that was crushing us out of existence. With tears in his voice he has pictured the way in which the wives and children of the "wage slaves" are treated, and has yelled his head off in regard to the people who regard themselves as class conscious.

Now all is changed. James no longer gets on the Socialistic platform. In fact, he even has not to get his daily bread from the labor unions, like men we have here—and the union men have to toil day and night to keep some of these so-called Socialists in luxury and fine linen -and they are lucky if they are not betrayed at that—all Jim has to do is to go clip his bonds, collect payments on real estate that he has sold, and we pity the poor Socialist that would try to separate Jim from the coin he is credited with having at the the present time.—Vancouver Truth.

The Army-Worm

The Army-worm probably above all other kinds of insects which increase in enormous numbers periodically, causes wide spread anxiety among farmers when it appears suddenly in a locality, and in a very short time completely destroys fields of oats and other grains.

The Entomological Branch of the Department of Agriculture has just issued Bulletin No. 9, on the Army-worm, prepared by Mr. Arthur Gibson, Chief Assistant Entomologist, who has charge of investigations of insects affecting field crops. In this publication of 34 pages a full description is given of the remarkable outbreak of this notorious caterpillar which occured in easteen Canada in 1914. The recent outbreak was the most severe of any which occured in Canada, and the damage caused is estimated at $300,000, five-sixth of which took place in the province of Ontario. The value of the trenching method of control was amply demonstrated. No matter how big the advancing army of worms were, it was shown that crops could be saved from their ravages. In the bulletin the insect is described in all its stages, and methods of controlling it are given. A full discussion is included on the life-history and habits of the worm, its food plants, natural enemies, etc. The bulletin has 19 useful illustrations, several of which show clearly the digging of proper trenches and the results obtained in controlling the worms. Copies of this bulletin may be obtained free of charge on application to the Chief of the Publication Branch, Department of Agriculture, Ottawa. Enquiries relating to injurious insects should be addressed to the Dominion Entomologist, Department of Agriculture, Ottawa.

PRINCETON, JUNE 11, 1915.

LONG live the King!

IT is seldom that a smelter is advised to quit smoking.

AS a mowing machine the grasshopper is a wonderful success.

IF Napoleon could drop into France this month, he would think that Waterloo was only a street riot.

THE opening of the Kettle Valley railway this week ushers in a new era of prosperity for this wonderful province,

THE firing of cannon will produce rain. We are pleased that we are not very close to the blazing cannon, otherwise Noah would soon have to bring his troopship into the Boundary.

IT is not manly to send anonymous or threatening letters to anyone. In addition the offense is a serious one, punishable by a long term in jail. Come into the open when you have anything to denounce. Do not bluff in the dark.

Stimulates Copper

The war situation has not only stimulated copper production in British Columbia, but it also has given impetus to the lead industry in the province, according to advices received from Ottawa, Canada, which state that the Dominion has been commissioned to furnish 30,000 shrapnel and high explosive shells daily. Already 50,000 pounds of lead, in addition to immense quantities of copper, have been used in the manufacture of these munitions, and the demand for both metals is increasing rapidly.

An important conference was held at Ottawa last Saturday relative to the need of establishing copper refineries to treat the output of the Dominion mines, as the ammunition manufacturers now have to get their refined material from the United States. At the conference were Major General Hughes, Colonel Bertram and Colonel Carnegie of the shell commission; Dr. Wilson, head of the dominion department of mines, and W. D. Matthews and R. D. Warren, heavily interested in copper mining properties, and it is believed they will arrange for the establishment of smelters immediately.

Since the Canadian privy council has contemplated establishing an embargo on copper, lead and zinc shipments into the United States from the Dominion the welfare of the metal industry is dependent upon the government providing treating facilities for the mine outputs, if the embargo is enforced, and Spokane men interested in British Columbia properties are watching development with anxiety. If the government arranges to take over the ores mines and hold them in store until the refineries are ready to operate the embargo will reflect beneficially, but if the prohibition on exportations is declared without some provision it probably will result in a suspension of work at many mines in the province.—Spokane Review.

Sympathetic Sheep

However stupid we may think that sheep are, they are not devoid of charity for one another. A shepherd was driving home a flock of sheep when he noticed that one of them lagged behind and bleated piteously. Then he saw another of the flock run back and walk with it until they overtook the rest. On examining the animal that had stayed behind, he found that it was blind, and must have called for help, an appeal which met with immediate response.

Western Float

In April the Rossland mines shipped 28,896 tons of ore to the Trail smelter.

Frank Pyman, formerly of New Denver has opened a watch repairing shop in Vancouver.

Last month Fernie had an epidemic of measles. That town seldom misses anything in the line of disease.

Mike Gaynor and Tom Johnson belong to the old Slocan brigade. They are now partners in the working of a rich silver claim on Siwash creek, near Princeton.

Bob Madden is thinking some of selling his hotel in Trout Lake City, and taking over the Kaslo hotel, at Kaslo. Evidently Bob has a longing for life in a city.

Captain John L. Retallack, of Kaslo, has gone to England with a contingent from Victoria. John is a little old for the firing line, but the outing will do him good.

G. O. Buchanan wishes to be considered a permanent resident of Kaslo. He owned the first sawmill on Kootenay lake, and 21 years ago he ran against Fred Hume for a seat in the legislature.

The old Freddie Lee mine in the Slocan, will be worked this summer by A. W. McCune. He is a man who made over a million out of the Payne. McCune does not say when the Mountain Chief mine will resume operations. It has been shut down 21 years.

It is 23 years since Hugh Kennedy rolled his blankets in Nelson, and hit the trail for the hills around Princeton, where he has been ever since. He worked on 49 creek before Nelson had a house, and was the locator of the May and Jennie group, made famous by the late "Dandy" Kelly.

Walter Moberly died in Vancouver last month aged 83 years. He came to B.C. in 1858, and was one of the most notable pioneers. In 1860 he explored the Kootenays, and reported favorably upon its future as a mineral district. He attended the meeting of the Old Timers in Nelson last year. His history in connection with the C.P.R. and other enterprises is well-known. He was the first surveyor-general in this province.

It is reported that Billy McClergue, of Sandon, now fishes at Bear lake from the lower deck of an airship. Billy has fished in that lake for 23 years, and all the old trout know him by sight, and the peculiar shape of his bait bottle. In the early days this noted fisherman used a pack train to carry his fish into Sandon. Some suppers those days.

According to Mr. Haggen, Editor of the British Columbia Engineering and Mining Record, a new copper company is about to commence operating in the Province, and will erect a plant cesting $3,000,000. Mr. Haggen does not mention the location of the proposed plant. He also predicts that an electrolytic refinery may also be established at a convenient point somewhere, possibly near the producing centres.

John McLeod, Nelson, fisheries inspector, was in town last week. He said that the man sentenced for catching trout at South Slocan was an Irishman. We knew he was a British subject or he wouldn't have been prosecuted. Foreigners have been fishing all winter in Slocan lake.—Slocan Record.

Alien enemies in the mining camps are enjoying unusual liberties. It is not likely that men who go about their work quietly and recognise that they owe something to the country which affords them a living will be denied employment. There is, however, a growing demand that alien enemies who make themselves obnoxious should be taken to detention camps and their positions given to men who are loyal to the country in which they live. The mining camps should not be allowed to become a refuge for enemies of the empire.—Canadian Mining Journal.

An interesting bear story comes from along the South Fork. It appears that a party who has been gathering up some old iron left around the old ruins of the Montezuma, came down to the Union depot at Zwicky one day last week trundling a wheel barrow, upon which he loaded some bacon. He proceeded to take his cargo up to the mill site but on the way was held up by a bear, who evidently was after the bacon. The party with the wheelbarrow grabbed the bacon and made a quick getaway, returning later on for the wheelbarrow. That vehicle, however, had disappeared, and it is presumed that Mr. Bruin quietly annexed it.—Kaslo Kootenaian.

The spring time table of the C.P.R for Kootenay and the Boundary districts has been issued. There is no change on the Slocan branches. There is room for improvement between Slocan City and Nelson. The time could easily be lessened an hour. The train is run so slowly that occasionally the engineer has to stop five or ten minutes before taking a grade to avoid running ahead of time. Ranchers jump on and off the "blind" in going from one field to another. Last month a sportive black and white calf ran round the train three times in half a mile. People get on a train to go some place faster than they can walk, and not to see plow oxen whizz by them.—Slocan Record.

Fireworks out of Place

The storm at sea was increasing and some of the deck fittings had already been swept overboard, when the captain decided to send up a distress signal. The rocket was already lit and about to ascend, when a solemn-faced passenger stepped up.

"Cap'n," said he, "I'd be the last man on earth to cast a damper on any man's patriotism, but seems to me this here's no time for celebratin' an' settin' off fireworks."

THE WIDE WORLD.

King George is 50 years old.

Penticton will hold a big celebration on Dominion Day.

Theodore Roosevelt is expected in Vancouver next month.

Jack Thynne of Otter Flat has set out nearly 3,000 head of cabbage this season.

The Calgary-Spokane train has again been put on that run, This train was taken off last fall.

H. White, an Eburne blacksmith, recently shod a horse all around in 42 minutes and 12 seconds. It usually takes one hour.

The Ross Rifle Factory at Quebec, which is running night and day to supply arms for the Canadian and British forces, is in need of 1,000 skilled mechanics.

The town of Hope had a very disastrous fire last week, which wiped out a large portion of its business section. The estimated total loss is in the neighborhood of $20,000.

The first ticket bought on the Kettle Valley road out of Penticton, No. 0, was sold to T. McKenzie, of the Canadian Consolidated Rubber Co. It was from Penticton to Princeton,

All Italian residents of Canada liable to military service, born from 1876 to 1895, are being notified to be ready to return to Italy at first call. The Italian government will provide transportation.

The British government wants 30,000 skilled mechanics to work on munitions of war. It is believed that it will be possible to get quite a number of idle mechanics in this province who will be willing to go to the old country.

Extraordinary Discrimination

A report of extraordinary discrimination comes from Anyox, where the Granby company are operating their mine and smelter. The Prince George pulled into that port one day recently with five Britishers and ten or twelve foreigners who were looking for work. At the gangplank an official of the mining company inspected each arrival and decided the right of each person to go ashore. Along with the official was a provincial constable. Every British subject was refused entry ashore, and every foreigner was permitted to pass unquestioned. One of the Britishers started to argue the case, but the official warned him not to get fresh. "This is company property," the official said, "and we can keep you from landing if we want to."

WATER NOTICE

[DIVERSION AND USE]

TAKE NOTICE that Hugh Finnegan, whose address is Princeton, B. C., will apply for a licence to take and use water to irrigate 170 acres of land, or 170 acre feet of water, out of Finnegan Creek, also known as Johnson Creek, which flows Westerly and drains into Fivemile Creek about 13 chains from the North East carner post of Lot 935.

The water will be diverted from the stream at a point about 13 chains from the North East corner post of Lot 935, and will be used for irrigation purposes only upon the land described as Lot 935, Kamloops Division, (Fivemile Creek.)

This notice was posted on the ground on the 27th day of May, 1915. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Princeton, B. C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildigs, Victoria, B. C., within thirty days after the first appoarance of this notice in a local newspaper. The date of the first publication of this notice is June 4th, 1915.

HUGH FINNEGAN, Applicant.

"MADE IN CANADA"
Ford Touring Car
Price $590

No advance iu the price of the "Made in Canada" Ford will be made because of the additional 7½ per cent War Tariff. We as loyal Canadians will gladly absorb whatever increased duty we are forced to pay on such raw materials as cannot be obtained at home. The Ford is manufactured in Canada—not assembled in Canada.

The Ford Runabout is $540; the Town car $840; the Coupelet $850; the Sedan $1150—all fully equipped, f. o. b. Ford, Ont. Ford buyers will share in our profits if we sell 30,000 cars between August 1, 1914 and August 1, 1915,

We carry a large stock of Ford parts.
