THE PRINCETON STAR

Twenty-second Year—No. 42 | PRINCETON, B. C., FRIDAY, SEPTEMBER 9, 1921 | PER YEAR: $2.50 Cash Single Copy 5c.

NEW DIRECTORY JUST TO HAND

Wrigley's Book for 1921 Contains Mass of Information Covering Province

Volume IV. of Wrigley's year book of British Columbia is just being delivered and a copy has just reached this office.

The 1921 issue comprises 1316 pages, about fifty pages more than last year's edition. The first thirty-four pages contain a review of the many industrial and tourist attractions of the province, the personnel of the British Columbia government, together with a list of all officials of the various departments of the government, both at Victoria and throughout the province, with short stories giving the jurisdiction of the various departments. The names of all Dominion government officials throughout the province are also given in this section, and the book contains a number of scenes and views of interest to all readers. There is a descriptive article on the Kettle Valley railway line through the interior; also a story on "Motoring in British Columbia," with accompanying maps of the Georgian Circuit, motor roads in the Okanagan and also in the Kootenays. The Okanagan map shows Princeton well "on the map," and also the proposed highway from this point to Hope, with the completed and uncompleted portions well defined.

The gazetteer portion of the book describes 2,209 cities, towns and villages, showing business firms, citizens, farmer, fruit-growers and others; it also includes a list of trade-named articles manufactured or represented in British Columbia.

A classified business directory embracing a standard index of the business interests of the province listed under 682 classifications, is contained in the directory.

The work of collecting and collating the information outside of the cities is largely under the direction of the company's secretary, Frank H. Horn, whose work has made him one of the most travelled and best known men in British Columbia.

WHY THE PRAIRIES ARE TREELESS

It is impossible to say what the exact causes are which operating for centuries, have produced this result (lack of trees on the prairie) but it is generally thought by those who have given some attention to the subject, that a large part of what is now prairie was not originally so; in fact there is direct evidence to show that at least some districts which are now treeless were originally well timbered. Undoubtedly the chief agony which little by little, has caused the prairies to encroach on the timbered area is the frequently recurring prairie fire. It is well known to those familiar with the country that, if fires are kept out of a district for a number of years, small bluffs of poplar spring up all around the sloughs and low places, which if not disturbed gradually extend till eventually a formerly treeless district becomes well timbered. From this it would seem that had fires not been so prevalent in the past, the timbered areas would be much more extensive than they are at present. The fact still remains, however, that there are immense tracts of land absolutely treeless which can only be utilized to their fullest advantage after a certain measure of protection is afforded by the presence of belts or plantations of trees.—Norman M. Ross, Dominion Forest Nursery Station, Indian Head, Sask.

SEPTEMBER ROD AND GUN

Rod and Gun in Canada, the popular Canadian sportsman's monthly magazine, appears in a new and improved size with its September issue. The many improvements include a larger size of page together with a coated paper that adds considerably to the appearance of the stories and illustrations. This number is rich with stories, articles and anecdotes dealing with wild life in the various parts of the Dominion. The Great Mackenzie Basin is the title of the leading article, which is written by F. H. Kitto and tells of his 12,000 mile trip from Edmonton, north along the Mackenzie through to the Pacific coast and then east to Edmonton. In addition to this article, this number includes thirteen stories and articles which together with the usual departments makes an interesting issue of Canada's outdoor monthly. Rod and Gun in Canada is published monthly by W. J. Taylor, Limited, Publisher, Woodstock, Ontario.

FISH AID FOREST PROTECTION

The policy of restricting methods of fishing on Dominion Forest Reserves to those of angling and trolling is producing results in the improved fishing to be found in the lakes in the vicinity of the summer resorts. There is no doubt that good fishing doubles the attractions of any summer resort, and the fact that the development of recreational use of the forest reserves is a means of securing public sympathy and support for forest protection is not overlooked in the administration of these resorts.—Annual Report, Director of Forestry, Ottawa.

If you have the goods, tell the people by advertising.

HEDLEY NOTES

Mrs. R. E. Baxter and son have returned from Victoria and Vancouver.

* * *

Mrs. G. P. Jones and son left on Sunday afternoon for Vancouver.

* * *

Miss I. Boyd was home over Labor Day from Kelowna.

* * *

Mrs. J. Jamieson and daughter arrived home Monday from a three weeks' visit to the Coast.

* * *

Quite a number of Hedley people spent Labor Day at Princeton. All report having a good time.

* * *

Mr. and Mrs. B. W. Knowles spent Monday in Princeton, taking in the dance at night.

* * *

Messrs. Percy Wright, Robt. Boyd, J. Jamieson and J. Fraser were down from Coalmont for over the week end.

* * *

Mr. J. A. Robinson left on Wednesday for Moose Jaw, Sask., on business.

* * *

Mrs. M. J. Meher is down from the mine and is at present visiting friends in Keremeos for a week.

* * *

Mrs. W. W. Corrigan returned home Monday after a week's vacation with her brother, Leo Brown, of Keremeos.

* * *

Misses Anderson, Johnstone and Mercer arrived on Monday, and opened school on Tuesday with a good attendance.

* * *

Mrs. J. W. Wirth, who has been the guest of Mrs. Geo. Bowerman for the past few days, left Monday for Allenby.

* * *

Mr. T. R. Willey, who has been home from Coalmont for the last ten days, has again returned to work. Mr. Willey had the misfortune to hurt his leg at Coalmont some two weeks ago.

* * *

The Hedley Gold Mining company closed down over Labor Day in order to give the men an opportunity to attend the stampede at Princeton, which many of them did.

* * *

The residents of Hedley are reminded several times a day that Mr. Dunc. Woods is working on his claims, by the reports of his blasting. Each day adds better reports regarding this valuable property.

* * *

Mr. James McNulty, who has been prospecting around Hedley for the past two decades, last week succeeded in finding what has been prospected for by himself and others for a number of years; being a body of very high grade ore, and almost a mountain of it in fact. We are told mining men that it is of higher grade and as much of it as the famous Nickel Plate mine. No doubt this is good news to everyone in Hedley, and the last few days has seen a rush to the ground to stake claims. At time of going to press we cannot give exact assay of ore, but are lead to believe it will run over one hundred and fifty dollars in gold per ton.

A Manitoba Burbank claims to have perfected a grubless apple that can be consumed in the dark without unpleasant results. He might now devote his attention to a seedless watermelon.

"COL." STEVENSON IS STILL ACTIVE

Sends Out Third Expedition This Season in Search for Platinum Deposit

"Colonel" Robert Stevenson was a visitor to Princeton this week and took in the two days' celebration, which he enjoyed immensely. Mr. Stevenson took Wednesday's Great Northern train for Hedley, where he is interested with Geo. H. Cahill in quite a number of mining properties, which he is at present negotiating to dispose of. With the power plant already on the ground, the colonel is confident the deal is likely to go through. Although he has owned this property for the past twenty-three years, he is confident that it is as good as any in that district.

For the third time this summer Mr. Stevenson has organized and sent out a party in search for his platinum deposits up the Tulameen river, and is confident they will get it this time; but should they be unsuccessful, he says there is another year coming, when another attempt will be made to find it. This party, comprising five men in all, left on Tuesday in charge of John Stevenson, son of the veteran prospector.

This platinum claim was located some forty-four years ago by the present owner, who states that he cut out a piece of this rare metal from the Serpentine Ledge as large as a goose egg. According to the colonel's story, soon after this the mountain slid in on the property and he has had a strenuous time ever since trying to locate it. Although "Colonel" Stevenson is a little over eighty-three years of age, he is still hale and hearty and as busy in mining matters as ever.

Labor Day Celebration

Keremeos Wins in Baseball---Splendid Program of Cowboy and Athletic Events

It is some considerable time since Princeton staged two such days of sport as was witnessed here on Monday and Tuesday. In the pre-war days the three valley towns each had their particular day to celebrate. Keremeos took the 24th of May, Princeton July 1st, and Hedley Labor Day.

This year owing to business conditions Princeton passed up the Dominion Day celebration and Keremeos filled the date with a second day's sport. For similar reason Hedley for the first time within the recollection of old-timers, failed to celebrate Labor Day and some of the more public spirited citizens in Princeton decided to put on a celebration with the worthy object of raising funds for the hospital which at the time was about to be closed for lack of support.

The result is a tribute to the ability of the citizens who worked on the celebration committee and the proceeds will be a determining factor in keeping the hospital open.

Two good games of baseball was perhaps the leading feature of the sports. On Monday the contest was between Coalmont and Princeton. Coalmont had difficulty in fielding a team, but being a good bunch of sports, they sent down the best they could muster and, while the score was one-sided, they put up a game battle.

DeMers and F. McMahon were the battery for Coalmont. Hayes, of Vancouver, took the box for Princeton and lasted six innings when he was replaced by "Trapper" Kirby, of Keremeos. The work of the latter was the feature of the game and was largely responsible for the thick coating of kalsomine which the visitors received. During his six innings on third base he accepted eight chances without an error and while in the box struck out four men out of eight up. The line up was as follows. Coalmont: J. McMahon, 2nd base; DeMers, pitcher; R. Pope, short stop; F. McMahon, catcher; Lafstensky, first base; Bryden, 3rd base; Campbell, right field; Doraldson, centre field; Marston, left field. Princeton: Charlton, first base; Kirby, third base; Burr, short stop; Avery, right field; Almstrom, catcher; Edmonson, centre field; Bones, second base; Lowney, left field; Hayes, pitcher.

The score by innings was:

Coalmont ..... 0 0 0 0 0 0 0 0 0—0
Princeton ..... 2 1 0 0 2 3 1 0 0—9

Tuesday afternoon's game was between Keremeos and Princeton. By this time the ball grounds were badly cut up and the diamond very slow. In this game Bill Fessendon who had umpired the previous one was assisted by Wallace Knowles, of Hedley. The first inning passed without a score on either side. In the second Allen hit G. Callahan, Kirby singled. E. Callahan flied to Edmonson in deep centre and there was a chance to retire the side on a triple play but J. McMahon fumbled Edmonson's perfect peg to second and failed to complete the triple play. Before the spasm was over Keremeos had scored three runs, more than enough to win the game. The batting order of the teams was as follows: Princeton; Charlton, 3rd base; J. McMahon, 2nd base; F. McMahon, catcher; Allen, pitcher; DeMers, 1st base; Avery, right field; Burr, short stop; Edmonson, centre field; Pleecash, left field; Keremeos: Buchanan, catcher; Cawston, centre field; M. Daly, first base; G. Callahan, short stop; Kirby, second base; E. Callahan, 3rd base; O'Donnell, left field; Ferguson right field.

The score by innings was:

Princeton ..... 0 0 0 0 0 0 0 1 0—1
Keremeos .... 0 3 2 0 0 1 0 0 —6

For a country town Keremeos has an exceptionally strong and well balanced team. Eddie Callahan on third and Kirby on second are particularly fast. The team has made the phenomenal record of 16 wins out of 17 games played during the season.

The bucking contests, steer riding and steer roping events were all well contested and furnished considerable amusement. The tug of war, which developed into a contest between seven men each from Keremeos and Princeton, was won by the latter, but only after a long and strenuous pull.

Following is a list of the winners in the various events:

Baseball—Princeton 9; Coalmont 0. Keremeos 6; Princeton 1.

Bucking contest—Maurice Daly 1st; Walter Caldwell, 2nd.

Steer Riding—Ernie Garrison, 1st; Wayne Sellers, 2nd.

1-4 mile pony race—Ernie Garrison, 1st; Stanley Garrison, on Grace Norman's pony, 2nd.

Relay race—Roy Turner, 1st; Frank Garrison, 2nd.

1-2 mile open—S. Perkins' Roger, Harry Allison up, 1st; Ernie Garrison, Soucho, 2nd.

Steer roping—Aeneas Nahumption, 1st; Tommy Terabasket, 2nd; Time 1 min., 28 sec.

Auto race—B. Hill, 1st, 11 min. 10 sec.; Campbell, of Kamloops, 2nd.

Turnstake race—Chas. Richter, 1st; Frank Garrison, 2nd.

100 yards foot race—F. McMahon, 1st; A. Buchanan, 2nd.

Much credit is due the committees in charge of the different departments of the undertaking, for the splendid way in which the programme was carried out. Special mention must be made of the valuable work and initiative of Mr. Gust Vladetich, who undertook the task of financing the proposition.

The following is the financial statement:

Expenses

Bucking contest	$ 75.00
Steer riding	30.00
1-4 mile pony race	35.00
Relay race	75.00
Auto race	75.00
Tug of war	50.00
1-2 mile open race	60.00
Steer roping	40.00
Turnstake race	30.00
100 yards dash	15.00
Baseball game	100.00
B. Geary (supplying horses and steers	150.00
Pick-up men (T.Terabasket and F. Garrison)	35.00
Printing	28.90
Rope for tug-of-war	10.30
Joe Wigmore (announcer)	5.00
	$814.20

Receipts

Total cash from collections, receipts at gate, dance and booth	$1020.00
Donation from Baseball club.	20.00
Sports donation from Mr. and Mrs. Van Wagenen	10.00
Total receipts	$1050.00
Less expenses	814.20
Balance for hospital	$ 235.80

Princeton Paragraphs

Dr. Lee Smith was a passenger to the Coast on Wednesday's train.

Archdeacon Heathcote will preach at both morning and evening services at St. Cuthbert's church on Sunday.

Mr. J. A. Robinson, of Hedley, was in town Tuesday evening on his way to Moose Jaw, Sask., on business.

K. V. Telegraph Inspector C. K. Brown, of Penticton, paid an official visit to town yesterday.

Mrs. E. Barr Hall and children arrived home on Thursday morning after a very pleasant vacation spent at Half Moon Bay.

Mr. and Mrs. B. W. Knowles and Mrs. W. W. Corrigan, of Hedley, were in town on Monday and attended the dance at night.

Misses Johnson, Bentley, Carlson and Nelson all returned to Princeton on Monday from their vacations spent at their respective homes, and have resumed their duties at the public school.

Mr. J. F. Armstrong, of Victoria, chairman of the Board of Investigation of the Provincial Water Branch, arrived yesterday to hold a sitting of the Board in the court house this morning.

Mr. and Mrs. G. P. Jones and son, Gomer, motored up to Princeton on Sunday last. Mrs. Jones left on the afternoon train for a visit to Vancouver. She was accompanied by her son, who is returning to resume his studies at the Terminal City.

Mr. and Mrs. E. Waterman and family returned this morning from a pleasant vacation spent at Sechelt.

Government Agent Hugh Hunter was a visitor to Coalmont on Wednesday.

Mr. J. A. Brown, of Penticton, was in Princeton for the stampede.

Mrs. G. E. French left on Monday afternoon for a short visit with her sister in Victoria.

Miss McInnis, of Chemainus, arrived last week to fill the position of graduate nurse at the local hospital.

Mr. and Mrs. Wm. Noble, of Keremeos, were motor visitors in town on Wednesday.

A unique and interesting game of baseball is to be played at Keremeos tomorrow afternoon.

An informal reception will be held at the Parish hall on Saturday evening, September 10, to welcome Archdeacon Heathcote. Everybody welcome.

Miss Knowlton, of Vancouver, formerly matron of hospitals in Phoenix and Grand Forks, arrived last week and is now in charge of the local institution.

Mr. R. J. Gardner, of Grand Forks, accompanied by his wife and family, was a motor visitor to Princeton on Monday and Tuesday this week, and while here attended the stampede. Mr. Gardner is grand vice-chancellor of the Knights of Pythias Order of B. C., and while here made it a point to meet as many as possible of the members of the local lodge. This was Mr. Gardner's first visit to this part of the interior, and he seemed to be very favorably impressed with the future prospects of the district.

COALMONT NEWS

Mrs. Murchy is visiting her daughter, Mrs. R. V. Shaw, of this place.

* * *

Hicks Pollock left for a short visit to the coast on Saturday.

* * *

L. N. Marcotte and J. D. Prendergast retuned from Kelowna on Wednesday.

* * *

Mrs. R. Larkins, who has been visiting her sister, Mrs. L. Marcotte, left for Keremeos on Wednesday.

* * *

Supt. McLean left for the Coast on Saturday, returning on Monday morning.

* * *

Hugh Hunter, of Princeton, was a visitor here this week.

* * *

P. Russell made his regular trip on Thursday.

* * *

Owing to the mine being closed, many of the miners made the trip to Princeton to help celebrate Labor Day.

* * *

Owing to the breaking of the main shaft at the Mine terminal of the tram line, the mine was shut down from Saturday noon until Thursday.

* * *

Mrs. Black left for the Coast on Monday with her grand-daughter, Miss Shaw. Miss Shaw will attend St. George's School at Victoria.

* * *

The Coalmont school opened on Tuesday with a large attendance. Mr. Clotworthy, who taught here several years ago, is in charge.

* * *

Mr. Horstman, of the Union Bank, has left on his vacation and it is understood that he will report to a Vancouver branch upon its expiration.

* * *

D. J. Buckley, our local druggist, put one over on his fienrds last week when he took unto himself a life partner, Miss MacPherson, of Chatham, N. B., and an old schoolmate of Doc's. They were married at Kelowna on August 30. Doc's many friends wish them much happiness and good for-

* * *

Keep your eye on Coalmont.

MORE HOSPITAL DONATIONS

Valuable Assistance Rendered Local Institution by Stampede Celebration Committee

The Board of the Princeton General hospital acknowledges with many thanks the receipt of the following donations: For August—T. Hughes, $1.00; E. E. Burr, $2.00; W. B. Ewart, $1.50; Rev. Herbison, $1.00; P. Russell, $3.00; C. Summers, $3.00; E. Waterman, $2.00; A. E. Wilson, $1.00; L. P. Harrison, $1.00. N. McFadden, $1.00 (str.) For September—F. Treherne, $1.00; F. Anderson, $1.00. Keremeos tag day, per Mrs Keeler, $43.50. Princeton Baseball club, per Dr. L. Smith, $20. Sports day celebration, $205.80. Sports day donation, per Mr. and Mrs. Van Wagenen, $10. Mrs. C. Hunter, 12 qts. black current jelly and 12 qts. red current jelly. Mr. Mansfield, 5 qts. canned raspberries.

HARLAND AND WOLFF WILL OPEN SHOPS ON THAMES

London, Sept. 8.—The Belfast shipbuilders, Harland & Wolff, will open ship repair works on the Thames on September 15, taking over all the repair work of the port of London authorities.

SITE OFFER TO BE OPEN TO NOV. 15

Council Will Ask Government, However, to Start Building by August, 1922

(Penticton Herald)

Another step has been taken by the municipal council towards granting the provincial government a site in Penticton for the erection of the government offices. At the meeting of the council on Tuesday evening Reeve Chambers reported that while in Victoria he and Clerk B. C. Bracewell went into the matter with the government officials. They found that the government desired a resolution from the council stating that the site at the corner of Main street and Nanaimo avenue was available for that purpose for a certain length of time. Upon receipt of this resolution action would immediately be taken in the matter.

Several of the councillors expressed the opinion that if the council granted the site it should have some assurance that the buildings would be constructed within a reasonable length of time.

Eventually is was resolved to give the government an option on the lots in question until November 15, and at the same time to state that the council desired assurance that building operations would be commenced by August 1, 1922.

The Knights of Pythias baseball team are preparing to take a trip over to Grand Forks on Sunday to take part in a tournament to be staged there the following day. It is expected that a number of members of the order outside of the team will join the party, who will make the trip by car. They will return on Tuesday.

SAVE GAS AND TIRE EXPENSES

These Two Cardinal Points in Cost of Operating Average Automobile

The bills for gasoline and tires are the two big items in the outlay for keeping the car running. They are then, the obvious first points of attack in any attempt to cut down expenses. Further, it is the duty of all car owners to make their fuel go as far as possible, because our supply of petroleum is barely enough for our demands now with still heavier consumption in prospect.

The price of gasoline has been reduced substantially within the last few months, but it still costs enough to be one of the most important items of expense to the average motorist. The clouds that issue from many car owners' exhausts these days, betraying a too rich mixture, would lead one to believe that gasoline is as cheap and plentiful as water. To get maximum gasoline economy is not difficult if the autmobilist will heed a few fundamental principles of automotive efficiency.

The first place to begin the campaign to cut down fuel expenses is at the carburetor. The average Canadian car owner drives with a mixture nearly twice as rich as necessary. The modern engine will run on a mixture ranging from about fourteen parts of air to one of gasoline to one containing only eight parts of air to one of gas. While it burns the heavier mixture, it does not operate with the snap and vim that it displays on the leaner fuel.

Practically all modern carburetors have an attachment for increasing and decreasing the amount of air injected into the mixture. It is a very simple matter to experiment with this adjustment, first making the mixture as lean as possible, and gradually turning back until exactly the right proportion of gas to air have been found for satisfactory operation.

As regards tires, there are three chief points in which many motorists are careless. These are: Under-inflation, scraping along curb stones, and bumping against obstructions of different kinds.

Insufficient inflation costs more than all the other abuses combined, it is asserted. By simply checking up once a week to see that the tires are properly inflated, the car owner would add amazingly to his tire mileage.

Tires should be pumped to the same pressure in summer as in winter. The expansion of the air in the tires in hot weather is so infinitesimal that it may be entirely disregarded and the pressure brought up to the figure recommended by the tire manufacturers.

Scraping along a curb is a common form of tire abuse. An evidence of the commonness of this practice may be seen by noticing the number of tires which are peeled or scraped on the outer side while the inner still is in perfect condition.

Bumping a tire into a curb, particularly when under-inflated, is a serious form of mistreatment, for it causes breaks in the fabric foundation which quickly bring the tire's usefulness to an end.

GERMAN DYE MAKERS MANIPULATE PRICES

London, Sept. 4.—A dispatch to Reuter's from Glasgow says:

"With reference to the recent announcement that German dye makers had formed a powerful combine with a view to the ousting of British dyes from the world markets by putting prohibitive prices on dyes unobtainable from British makers, new prices are now quoted for German dyes.

"From September 1, German dyes for silk goods are advanced 300 per cent., making the price now 1,200 per cent. over pre-war rates. German textile houses, anticipating the official declaration of peace, have flooded home consumers with offers to supply goods under British prices, and are emprasizing the favorable character of the exchange situation."

SETTLEMENT POLICY NEEDED TO FILL UP INTERIOR

Mr. B. Wescott, immigration agent, Canadian National Railway, Edmonton, who was recently at the coast, in speaking of the increase in British Columbia's population, shown by the latest census returns, predicts an even greater and more rapid increase in the future.

The millions of acres of undeveloped farm lands in the interior have to be cultivated, he said. From now on all mediums and agencies of publicity in the province should concentrate to increase the population of the land, the cities at present being overcrowded in proportion to the rural districts.

Last year the resources department of the Canadian National Railways, says Mr. Wescott, located 2500 families along their lines in central British Columbia. The Land Settlement Board and Soldiers' Settlement Board have done valuable work in this respect.

HUNGARIANS AND AUSTRIANS CLASH

Vienna, Sept. 8.—Fresh fighting between Austrian regular troops and force of about 2,000 Hungarians near the border village of Kirschlag was reported here yesterday. Determined attacks by an irregular Hungarian force were reported to have repulsed with slight casualties to the defenders

THE WOMAN VOTER

It is probable that more than a million, possible that more than a million and a half of women may vote in the coming federal election. For the majority of these it will not be a new experience to be to the polls and mark their ballots. Many voted in the last war election, more in the recent provincial elections, and some have been voting for years in municipal affairs.

While it is generally admitted that as a question of political justice women should not be deprived of political privileges that are claimed by men as individuals, there is no longer the conviction that the change will produce a social or political revolution. Those who feared and those who hoped for this are alike doomed to disappointment. Women do not take part in politics as a group. They do not cultivate a class consciousness in political matters. They form in Conservative, Liberal and Farmers' associations, or become members of organizations of men and women. In either case they are added to the existing political forces and divide on party issues in about the same proportions as men. In most cases the family is the political unit. Only those women who have no close family relations, or those whose political individuality is emphatic but not strong enough to carry the rest of the family in its train, can be reckoned as separate individual forces in the political struggle.

This is what men of insight expected. They were not distressed over the prediction that woman suffrage would divide families and cause domestic strife. Families are no more divided in politics than they were under manhood suffrage. The voting strength of the family has been doubled. Women are naturally as partisan as men. Vain is the idealistic dream that in some way the influence of women would destroy partisanship in politics. Women are not less personal than men in their outlook on the world, and the prediction that they would be more likely than men to vote and work for an abstract principle rather than a candidate has no basis in human nature. It is not to the discredit of women to say that they are as loyal to their friends, as distrustful of their enemies as men are, and they will doubtless stand by their comrades and leaders as most men do who interest themselves in political fights. In short, women bring to politics all those qualities of comradeship, discipline, loyalty, passion, prejudice, combativeness and conscious devotion to the good old cause that has made democracy more or less successful wherever it has been tried.

THE WAR ON TUBERCULOSIS

A keener interest throughout the civilized world in the war on tuberculosis was evidenced by the international congress recently held at London. Delegates from forty nations were anxious to learn from one another's experience and to co-operate in combatting the disease. An international union for the prevention of tuberculosis was formed and it will co-operate this year with the League of Red Cross Societies.

Among the subjects particularly discussed was the prevention of the spread of the disease. It is not hereditary and if infection from existing cases could be more effectively restricted a great lessening of the extent of the disease would result. The possibility was even suggested of making people immune to infection by inoculation with tuberculosis vaccine in early childhood and at intervals afterwards. Dr. Armand Delille of Paris, however, told of what was actually being accomplished by the "Grancher system" in protecting children from infection in families where one member was afflicted with tuberculosis. The method of treatment was not described in the published report of the congress but Dr. Delille stated that it was exceedingly successful, it had stopped the disease in all families in which it had been applied; thousands of children had been saved, and the treatment was inexpensive.

Santatorium treatment for patients suffering from the disease and the prevention of infection as far as possible, are the lines on which present-day efforts are chiefly directed and they contain great possibilities, but the day is hoped for when medical science will discern a more direct way of treating and curing the disease.

Sir Alfred Mond, minister of public health, said that the British government had been helping tuberculosis ex-service men after sanatorium treatment by training them in occupations suitable for such patients. Five hundred places were being provided for this training. The idea was not only to restore the patient but to keep him afterwards in an occupation and surroundings that would lessen as far as possible the danger of a relapse.

THE EAGLE EYE OF THE FOREST AIRPLANE

The use of airplanes in forest protective work is bringing to light some valuable features that had not been anticipated. Most forest fires are caused by the carlessness of human beings. If prospectors, hunters, campers, fishermen, and others who go into the woods for business or pleasure could be educated to be always careful with their camp fires, their matches, and their cigarette stubs over half the load would be lifted from the shoulders of the fire fighters. This is the reason why the fire warning poster is probably the most important single factor in forest protection. And here comes in a little psychology in which the airplane figures. When a man camps at a place where a warning against the careless use of fire is conspicuously posted he is careful to put out his fire, but when he camps at a spot where he seems to be outside the range of human touch or observation, he is apt to grow careless and fires are likely to follow in his trail. One of the Dominion Forestry Branch inspectors, in reporting on his first week's experience in observation from an airplane records this fact that men camping in the woods or out from the city for a few days or a week-end are suddenly and effectively reminded of what they ought to do by the appearance of an airplane high above them, attending strictly to its business of patrolling the forest. This impression is deepened when the men realize that they and their camp have been seen from the airplane. Of this they are certain, when they see a message fluttering down to them through the air. They naturally watch where the paper falls and, if possible, get it. They find it a message reminding them that as citizens of Canada, they should assist the Forestry Branch and the Air Board in protecting their own property—the forest—by being careful with fire. As preventing fires is much more economical and effective than fighting fires, this feature of airplane patrol is of great importance

SETTLEMENT POLICY NEEDED TO FILL UP INTERIOR

Mr. B. Wescott, immigration agent Canadian National Railway, Edmonton, who was recently at the coast in speaking of the increase in British Columbia's population, shown by the latest census returns, predicts an even greater and more rapid increase in the future.

The millions of acres of undeveloped farm lands in the interior have to be cultivated, he said. From now on all mediums and agencies of publicity in the province should concentrate to increase the population of the land the cities at present being overcrowded in proportion to the rural districts.

Last year the resources department of the Canadian National Railways, says Mr. Wescott, located 2500 families along their lines in central British Columbia. The Land Settlement Board and Soldiers' Settlement Board have done valuable work in this respect.

THIS IS WHAT HAPPENS WHEN A MOTOR STARTS

Many motorists entertain little conception of the tremendous forces that are released when they start the engine of their car.

Recently a noted English scientist brought some interesting facts in this connection that are well worth knowing, serving to increase the appreciation of the average man who drives a car for the marvellous mechanism which he uses in such a matter-of-fact way.

For instance, it was calculated by this scientist that a piston with a stroke of 5 1-2 inches and an engine speed of 4000 revolutions a minute is moving at a rate of 72 miles an hour.

In the course of a 200-mile journey the piston, weighing slightly less than a pound, has to travel up and down in its cylinder 585,000 times. At the top and bottom of each stroke it has to stop and start again in the opposite direction. If anyone will take a weight of one pound and quickly move it forward and backward over a distance of 5 1-2 inches, he will find it rather tiring.

Engine valves are also reciprocating parts and therefore have difficult work to perform. A valve spends much of its life red hot, and has to life 3-16 inch or more in 1-400th of a second, returning again at the same speed.

Springs are used to return most valves, and as the speed of the valve is six miles an hour, naturally a very strong spring is required. Some exhaust valves are equal to a weight of 100 pounds, and this 100-pounds load has to be lifted by the cam from a standstill to a height of 3-16 inch at an average speed of about six miles an hour.

FROM FAR AND NEAR

(Oroville Gazette.)

Numerous parties of tourists provided with camping outfits have passed through town during the past week. These tourists come from all over the country, north, east, south and west. A car from Fort George, B. C., was cheek and jowl with a car from Montana in front of the customs office one morning during the week, while around the corner was a car from Missouri, while cars from different parts of the state, Oregon and adjacent states were to be found upon the streets. These people will tell friends of the attractions of a motor trip through Oroville to the north, or out of the north into Washington, arousing such a desire in others to make the excursion that the number of tourists passing over this route is going to increase from year to year. Good roads and beautiful scenery with ideal camping places on the road are what attracts these summer vacationists, and this is what the auto traveller will find on the northern route through Oroville.

FORESTRY AND PAPER MAKING

I (this sheet of paper) was made out of a green tree. If that tree had been burned, I would be just a cinder. If I am more than useful than cinder, please help to keep my beautiful green brothers from being turned into ashes.

HOW WOULD IT DO

To livenup
To push things
To boom your town
To advertise your business
To renew your subscription.

BANK OF MONTREAL GRAIN CROP REPORT

Below will be found a brief synopsis of telegraphic reports received at the head office of the Bank of Montreal from its branches. The branch managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts shown:

Prairie Provinces

Edmonton District: Ideal harvest weather. Practically all wheat and large percentage of oats and barley cut. What little wheat has been threshed shows excellent samples. Slight frosts in some districts, but no damage reported. Average crop now practically assured.

Calgary District: Conditions ideal past week and threshing reported commenced in few places. Red Deer reports fifty per cent. cutting done. High River and Calgary nearly all.

Lethbridge District: Harvesting in full swing in the south and practically completed in other districts where crops are light; threshing general next week.

Regina District: Weather conditions good. Wheat cutting practically completed; threshing started. Yield hardly up to expectations. Oats estimated 60 to 70 per cent. cut. Yield good; other grains satisfactory.

Saskatoon District: About 75 per cent. wheat cut. Threshing begins next week and should be general by 10th. Oats and other grains and hay will be satisfactory. Labor shortage reported.

Winnipeg District: Threshing in full swing; cutting not quite finished in the north. Grain being marketed early and rapidly.

Province of Quebec

Harvesting of cereals is practically completed. Yield light in most districts. Root crops and grass pasture have greatly benefited from recent rains.

Province of Ontario

Weather conditions on the whole have been good. Harvesting is practically completed and farmers are now busy plowing. Fall and spring wheat crops proved to be of poor quality and below average. Rye only fair, straw short. Corn is very heavy crop, in excellent condition. European corn borer has made an appearance in one or two districts. Haying now finished, light in localities, but on the whole about seventy per cent. usual crop. Root crops excellent with exception of potatoes. Apples prospect for better yield improved. Peaches, pears, plums light but of good quality. Tobacco in good condition. Pasture good but more rain needed.

Maritime Provinces

Cereals will be a light crop. Late oats have been benefited through recent rains. The weather has been beneficial to the potato crop and roots, but reports indicate a light yield. Grass pasture in fairly good condition, but more rain is needed Heavy apples windfalls are reported from some districts in Nova Scotia. Reports from Prince Edward Island indicate that recent weather has been favorable and all crops have improved. Potatoes are estimated to yield from 60 to 70 per cent. average crop.

Province of British Columbia

Weather favorable to development of root crops, which are in good condition, but potato yield estimated only 75 to 80 per cent. of normal. Grain cutting completed in most districts and threshing has commenced. Satisfactory yield on the average. Indications confirm previous satisfactory estimate of Okanagan fruit yield. Early varieties moving. Late apples, pears and stone fruits sizing good quality. Pasturage improving.

CANADIAN FORESTS PUBLICLY OWNED

The methods of handling forest lands in Canada differ radically from those customary in some other countries. In Canada the different governments sold, and still sell, the timber to the lumbermen and lease them the land on which the timber grows. In some countries a large percentage of the timber land is owned outright by private interests. In Canada 93 per cent. of the timber land is owned by the provinces or the Dominion. The provincial and federal governments collect in stumpage dues and ground rents a revenue of between nine million and ten million dollars per year. No matter whether the forests are owned by the state or by private corporations every citizen is interested in their conservation because of the money their utilization circulates, but Canadians have this additional incentive to care for the forest that 93 trees out of every hundred cut down bring some revenue directly into a provincial treasury or the Dominion treasury.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and must make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LAND.

Provision made for insurance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

IN THE SUPREME COURT OF BRITISH COLUMBIA

ADMINISTRATION ACT

In the goods of Hattie McBride, deceased:

Take notice that by order of His Honor J. R. Brown, Judge, made the 24th day of August, 1921, I was appointed administrator to the Estate of the said Hattie McBride, deceased, and all parties having claims against the said estate are hereby required to furnish same, properly verified, to me on or before the 2nd October, 1921. And all parties indebted to the said estate are required to pay the amount of their indebtedness to me forthwith.

Dated 2nd September, 1921.

JAMES R. BROWN,
Official Administrator.

WHAT WAS DOING HERE TWENTY YEARS AGO

From the Similkameen Star of September 7th, 1901

Morton Revsbach of Yale, is again in the city.

George Freeman has returned from Summit City camp.

Mr. and Mrs. Keller, of Osoyoos, visited town on Wednesday.

W. Yates has returned to Hedley from a lengthened trip to Victoria and the sound cities.

Miss Colina Black, arrived on last Saturday's stage to take charge of the school, which she opened on Tuesday.

Andrew Laidlaw, of Greenwood, and Fred W. Burns, of Nelson, registered at the Hotel Tulameen on Monday.

Rev. George A. Cropp, of Nicola Lake, preached to an exceptionally large attendance at the school house last Sunday.

Mr. and Mrs. C. Æ. Shaw and Lieut J. Edwards Leckie, of Greenwood, passed through town Wednesday en route to Summit City camp.

A number of Indians from the Nicola valley passed through town en route to Hope, on their annual berry-picking and trading expedition.

A. Murchie, photographer of 518 Cordova street, Vancouver has been spending the week in town, making his headquarters at the Hotel Jackson.

J. H. Jackson left for Hope yesterday morning en route for Harrison Hot Springs, where he hopes to effect a cure from poisoned oak, from which he has been suffering for the past month.

Alexander Sharp, M. E., arrived in Princeton yesterday. He will take charge of the interests of the Vancouver Coal Syndicate which has extensive holdings on the Similkameen and Tulameen rivers. Mr. Sharp intends doing exploration work on the properties.

The question of placing an organ in the school house for use of all church denominations is being mooted. The instrument would go a long way to making the services more attractive. A committee of ladies has the matter in hand and will doubtless be successful in raising funds if a canvas is made.

Charles E. Thomas, J. P., held court early in the week, when Charles Squakim was brought before him on information of Percy Rowlands, charged with assault. His Worship assessed the Indian $10 for being drunk, an additional fine of $5 and costs was also imposed making a total of $18.50. When Charley dug up, after some rustling on the outside, he was overheard to remark. "By Yesus, but I'm poor."

The offices of the Similkameen valley Coal company, the local syndicate which recently put through the deal in Toronto for a portion of its holdings in the Similkameen district, has received word that the amount of cash payment has been deposited in the bank in Toronto, and will be available when the property has been accepted by the Toronto people's expert who will leave for the Similkameen early next month.—Tribune, Nelson.

Mrs. Chas. Richter arrived at Keremeos on Tuesday evening from Kelowna, where she has succeededin gaining strength rapidly under the care of Dr. Blythe. She left for Loomis, Wash., on Thursday morning on a two weeks' visit to her parental home. Mrs. Richter's health has improved wonderfully, and her many friends in Princeton will be glad to hear of her recovery. Her husband met her at Penticton, and will accompany her on her trip to her old home at Loomis.

FOREST PROTECTION ADVICE FROM THE CLOUDS

Even old woodsmen, who might be supposed to be prejudiced in the opposite direction, testify that the printed notice, the fire warning bill or poster, is the most important weapon with which to fight forest fires. Keeping in close touch with every part of its vast field the Forestry Branch of the Department of the Interior now prints a completely different set of posters each season, so as to keep the warnings as attractive and striking as possible. This season two new forms of notice have been added, the first is composed of stickers to be placed on the wind-shields of automobiles entering Dominion forests and the other of slips or tiny hand bills to be dropped by the men of the forestry air patrol as they fly over camps and picnic parties. One of these latter bears the words "Citizens! Help the Forest Service to protect your property by being careful with fire in the woods. Co-operative Aerial Patrol—Forestry Branch-Air Board."

PRICELESS PLATITUDES

A fool is a man who is wise—too late.

It is more profitable to emulate than to envy.

Love has failed when we espy nothing but faults.

Some drink so many healths that they drink away their own.

The test of your worth is if you would be missed from your place.

Absence will strengthen friendship if the last recollections were kindly.

Don't insist on having your own way unless you know where the road ends.

W. E. Chapple, Secretary of the United Farmers of B. C., has been granted two months leave of absence from his duties owing to ill health.

Portable gasoline pumps up to ten horse power and capable of forcing water through 1,500 feet of hose are now used in fighting forest fires by Canadian federal and provincial forest services.

Green Forests are an investment which gives big returns.

The shareholders include, directly or indirectly, every citizen in the Province.

Dividends are shared directly by every individual who resides in British Columbia.

Each tree is worthy of preservation, and means employment to someone, sooner or later.

No timber substitute has been found, but timber provides substitutes for many articles.

The Lumber trade is called the barometer of British Columbian prosperity.

Keep the mark set high; destruction of the Forest spells loss for everybody.

PREVENT FOREST FIRES!

KEREMEOS NOTES

Several telephones are being installed this week in the new homes.

* * *

Mr. P. B. Freeland, district mining engineer, was in town on Friday.

* * *

Mr. E. F. Corbett, manager of the Bank of Commerce, is sporting around these days in a new Ford.

* * *

Several car loads of Keremeosites motored to Princeton to attend the celebration there on Labor Day.

* * *

Miss Brett arrived on Saturday to take up her duties as one of the teachers here.

* * *

Mrs. H. B. Armstrong has a party of nurses visiting her from Vancouver for their holidays.

* * *

Mr. Dick Loudon, who is studying medicine in Seattle, is here on a visit with his brother and sister for a few days.

* * *

The flower show and exhibition held here last week was a great success. A full account of prizes will be given in next week's notes.

* * *

Don't forget the big ball game here on Saturday afternoon between the High school girls and the senior team.

* * *

Mr. J. Ramsay and family, accompanied by Miss K. Walker, spent Labor Day taking in the sports at Penticton.

* * *

Mr. Harold Smart is again back behind the desk in the Bank of Commerce, after spending his holidays at his home in Salmon Arm.

* * *

Mr. and Mrs. Geo. Clark motored to Princeton on Monday with Mrs. Clark's sister, and remained until Tuesday night for the Labor Day sports.

* * *

School opened here on Tuesday with a change of new teachers, Prof. Towel still remains as principal, with Miss Brett as intermediate teacher, and Miss Walker as primary.

* * *

Miss Joan Hardy left on Tuesday for Victoria, where she will again enter the St. Margaret's School. Her many friends here wish her every success.

* * *

Mrs. Clifton returned home on Friday from Grand Forks, where she has been under the doctor's treatment for the past month. Her mother, Mrs. Spraggett, accompanied her home.

* * *

Miss P. J. Smith, district V. O. N., after spending a delightful holiday at Vancouver and Victoria, returned to her duties here again on Saturday. She was very warmly welcomed back by her many friends, who had missed her smiling countenance for the past two months.

* * *

Several commercial men were in town on Wednesday calling on the business men.

* * *

Mrs. G. Willis left on Tuesday for the coast cities. She was accompanied by her mother, Mrs. E. M. Daly.

* * *

Mr. Ditmars and family arrived on Thursday from Vancouver. They will spend some time on their fruit ranch here.

* * *

Mr. DePfyffer, of the Bank of Montreal staff, is visiting his home in Kelowna for two weeks holiday. While away, Mr. Mendth is taking his place.

* * *

Mrs. B. Verchere, who has been visiting her sister, Mrs. Geo. Clark, left by motor on Monday for her home in Mission City to resume her duties as teacher there.

* * *

A gay party of about fifteen children and several grown-ups motored over to Penticton on Mr. Innis' truck on Labor Day and took in the races, returning in the "wee sma' " hours of the morning.

* * *

Mrs. Tweddle left on Wednesday's train for Vancouver with her daughter, Kathleen, whom she will place in school there. It is her intention to go over to Victoria where her daughter, Mrs. Pendleton, will undergo an operation for appendicitis in the Jubilee hospital.

REFORESTATION ON FOREST RESERVES

The supply of trees for reforestation on the Dominion forest reserves was obtained largely from the nursery stations at Indian Head and Sutherland, Saskatchewan, but, in order to develop such work on the forest reserves convenient to the places where planting is to be done and in order to give training in forest nursery and forest planting work to the staffs on reserves where planting is necessary, small nurseries have been started on several of the reserves. These reserve nurseries will not be increased to large dimensions, so as to be general sources of supply, but will be developed to serve the full requirements of the reserves on which they are situated.—Annual Report, Director of Forestry, Ottawa.

Western Farmers Building Silos

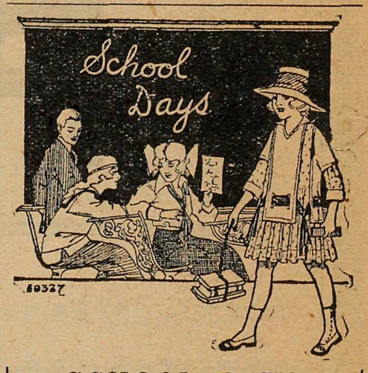
It is to be anticipated that before many years have elapsed almost every farm in the Canadian prairie provinces will have its silo. The growth of the dairy industry would naturally bring this condition about in course of time, but the movement is being expedited by the success farmers are having in growing sunflowers. Small fields of from three to thirty acres have been planted in various parts of the three prairie provinces of Canada. The yields are proving more satisfactory than the farmers generally dared to hope, and each acre yields on an average from fifteen to thirty tons of ensilage.

Many farmers have erected silos on their farms during the summer to take care of this crop, but most of them have under-estimated their requirements and will have more crop than they can put in their silos.

Sunflower silage is due for a more extensive trial this winter than it has had before. The results in previous years have been very satisfactory but only comparatively few farmers have grown the crop for silage previous to this year. If in its more extensive use the crop proves to be as satisfactory as it has already proved in the few cases where it has been tried, it is safe to say that in a few years the farm without a silo will be an exception in Western Canada.

Since last year's results have become known, considerable interest has been shown in silos and ensilage in Western Canada and several hundred silos have been erected during the past summer. Typical of this movement is the Cardston district in Southern Alberta, where eight silos have been erected this year and where about fifty acres of sunflowers were planted. The crop has proved so successful that it is predicted that one hundred silos will be built in the district next year and more than a thousand acres of sunflowers planted.

Similar plans are being made in other parts of Western Canada, and the already rapidly growing dairy industry promises to grow much faster with the general acceptance of the sunflower as a silage crop. Another evidence of the value of sunflowers as a forage crop will be the big gain in finished steers. Many of the larger livestock raisers are growing sunflowers and erecting silos for this purpose. Thus will be considerably increased the finishing areas of Canada, which hitherto, have been somewhat restricted, compared with the large feeding areas throughout the country, and the livestock industry in the West will be placed on a sound basis.



SCHOOL DAYS
