BIRTHS

TIBBETTS—To Mr. and Mrs. H. H. Tibbetts of Princeton, at the Princeton Hospital, 28th March, a son.

"The FIRESIDE PHILOSOPHER"
By ALFRED BIGGS

True love asks nothing in return.

* * *

Wise men are at home anywhere.

* * *

An ounce of example is worth a ton of precept.

* * *

Universal honesty would bankrupt locksmiths.

* * *

Associate with those who know more than you know.

* * *

Fussing over small matters destroys ability to tackle big ones.

* * *

Those who boast of many friends are generally advertising themselves.

Mr. S. R. Gibson, at a meeting of the Similkameen Historical Society in St. Paul's church Friday night gave an interesting account of a visit to historic spots near Chilliwack.

HEDLEY

R. R. Wilson, M. E., of Vancouver and C. H. Campbell of Greenwood are making an inspection and report on the group owned by the Golden Eagle Mines, Ltd.

Mr. George Crockett and Mr. Iver son of Vancouver were business visitors in town Monday afternoon.

Dr. Victor Dolmage of Vancouver is making a report on the Stemwinder Mt. mines.

Miss Hazel Lambert returned to Penticton on Tuesday morning after spending the winter with Mrs. F. Mahoney.

Mr. W. Foster of Oliver was a business visitor during the week.

Mr. and Mrs. H. McLellan of Penticton were the guests of Mr. and Mrs. E. Brent on Sunday.

Mr. Wallace Rolls has resigned his position as chief clerk in the Pacific Mercantile and left Saturday morning for Toronto, Ontario, where he has accepted a position wih Ames &Co., financial brokers.

Mr. Mick Rainbow of Kelowna visited Hedley on Sunday.

Mrs. A. Magner and son Charlie returned home on Sunday after visiting in Fenticton.

Miss Freda Knowdel of Oliver is the guest of Mrs. Frank Mahoney.

Mr. Leslie Dye, while splitting wood for Mrs. Bardshaw. had the misfortune to chop hs finger off, and is now a patient in the Princeton hospital.

Joe Dennis is a patient in the Princeton hospital. suffering from pneumonia.

The many friends of Nick Pickard hope that he will progress favorably as a patient in the Princeton hospital.

Mrs. J. Wirth has returned to Hedley after an absence of several years.

Mr. Neil McLeod of Vancouver is renewing old acquaintances in Hedley.

CAWSTON

A tennis court is being built on the shool grounds by the Cawston Badminton and Tennis Club, assisted by the school board.

Miss Jean Manery returned from Vancouver.

Louis Asich was in Penticton on Friday.

THREE MONTHS FOR LIQUOR VIOLATION

John Sidonio Found Guilty Oh Bootlegging Charge

OWN DEFENCE

Lost Licence for Home Brewing a Year Ago

JOHN SIDONIO BATTISTA will serve three months for bootlegging. Resident in Princeton for some two years he was on Wednesday found guilty by Stipendary Magistrate P. E. Rowlands of a violation of Section 28 of the Government Liquor Act.

His defence, self-conducted, was that he sold only a small amount of liquor to keep off relief, as "the government had been good to him."

Const. E. A. Jarvis, conducting the crown case, produced evidence to show that a great many people visited the Sidonio place on Fenchurch avenue; that liquor wan manufactured on the premises; that a good deal more liquor was bought on his permit than he could show that he earned; that police, on a raid, found a big supply of intoxicants on the premises; and that they actually saw a customer pay over money to the accused for liquor purchased.

There was such an array of choice blends adorning the court room that newspaper men were excluded.

By the charge, the Crown undertook to prove that John Battista, commonly known as John Sidonio, kept for sale, without licence, intoxicating liquors. Police evidence, and that of Sidonio, was the only testimony called.

A number of local men, however, were mentioned in the evidence as "number 1" etc.

Under Observation.

It is possible that federal agents will lay further charges for illicit manufacture. Sidoni lost his licence for "home brewing" a year ago when he appeared in police court here.

Before raiding the premises 21st April, police had kept a long vigil on the premises, dating from 4th March

Const. Lees—

Const. R. A. Lees said that on 4th March he watched the house between 11 p.m. and 2 a.m., and saw nine men enter; on 11th, between 10:30 and 2: seven men and one woman; 17th, 10:30 to 12: 13 men; 18th, 7 to 1: 13 men; 18th, 7 to 1: 15 men; 24th, 10 to 2: 11 men; 25th. 9 to 12, 12 men.

April 28th at 2 a.m. one man came from the house in a state of intoxication.

On 31st March, between 11 p.m. and 2 a.m. 16 men entered; 1st April, 10:30 to 2, 7 men; 7th, 11 to 3, 15 men; 8th, 7 to 10 p.m., 8 men; 14th, 11 to 2, 19 men;

On 15th April he saw one man visit the house several times, each time taking two companions with him. Another man went in and out several times, being more intoxicated each time he emerged. He was questioned and told the constable he had paid Sidonio a dollar for a bottle of whisky.

Place Raided

On 21st April, betwen 9 and 11:45 a.m., thre men entered and left a woman at the front door. Later a man was seen leaving by the front door and was stopped by police. He told them he had bought three bottles of beer, two of which he had with him. These were taken form him and identified in court.

Police then entered the Sidoni house on a warrant. A trap door in the kitchen led to the basement. Here were found: an imperial quart of whisky, two of wine; a carton of bottled beer; several gallon containers. In one bed room was found a bottle, partly empty, and a case of beer in bottles. In a bureau drawer in another bedroom was found a partly filled bottle of rum and one of Scotch. In a cupboard in the kitchen was found a pint bottle of liquor.

In a rear room was a crock containing mash composed of figs, raisins, etc., fermenting; a 25 lb box of raisins, one of black figs, and two other cases. There was a beer bottle capper, and a supply of caps, a rubber hose and strainer, showing evidence of recent use.

After warning accused made a statement. He said the hose was for siphoning wine. Several empty bottles, recently emptied and having contained liquor, were found, as well as several used caps off beer bottles, in a coal pail in the kitchen.

To Keep Off Relief

Accused told the officers he knew he was breaking the law, but he wanted to keep off relief. He said he could make more money at this than in the mines.

Samples of the liquor were sent to the provincial analyst, who gave a certificate

(Continued on Page 2)

Hospital Day

By MISS A. KNOWLTON
MATRON, PRINCETON HOSPITAL

THE hospitals of the United States have set aside 12th May as "Hospital Day." On this day we commemorate the birthday of Florence Nightingale, one of the noblest women of the British Empire. She was the founder of nursing and best known for her work in the Crimean war, where she was revered and loved by the soldiers. We delight to honor her memory, and to the same great cause devote our efforts.

On Saturday, 12th May, from 2 p.m. to 5 p.m., you are cordially invited to visit e Princeton Hospital; note the improvements which have been made during the past year, and the efforts which are being put forward to serve the sick of this community.

During the afternoon the ladies of the Auxiliary will serve tea.

ZAGAR WAS FOUND GUILTY

BY a decision of His Honor Judge J. R. Brown in a special County Court session at Princeton to-day, Peter Zagar was found guilty on a charge of occasioning bodily harm, and paid a fine of $150.00 The alternative was three months in jail, and Zagaar at first indicated he would serve the term.

The case arose out of an incident in the Tulameen Hotel beer parlor, 17th March, when Zagar is alleged to have broken a chair over the head of L. Matonovich.

Defence contended aggravation over a two year period. Prosecution evidence was the same as in the preliminary hearing.

A detailed account will be given in next week's issue.

Communications

DENIES AUTHORSHIP OF COMMUNICATION

Editor, Star,
Sir:

I notice in the Star of 26th April that my signature has been signed to a letter from the Press Committee of the Tunnel Workers, explaining why they ceased work on 13th April last. I wish it to be known that I took no part whatever in the publication of this letter, and whoever was responsible for my name being added to the same had no authority to do so.

Yours truly,
ANDY VAYDO, JR.

Princeton, B.C.,
28th April, 1934.

SOME ROAD STATISTICS

Editor, Star,
Sir:

Here are the distances over three roads in the lower valley, all computed from Keremeos. Now that this section comes under the Kamloops office, Penticton having been made a sub-station, we should get a little consideration.

	* A	B	C	D
Via Fairview Road	14	15	19	31
Via Richter Pass	37	35	37	31
Via Yellow Lake	48	46	42	54

* Indicates distance from Keremeos to A, Morning Star Mine; B, Fairview; C, Oliver; D. Osoyoos.

Mr. Lucas hauled powder from Princeton to the Morning Star Mine via Richter Pass road—that sadly neglected trans-provincial highway—this year, in preference to going by Yellow Lake road. These are matters to be pressed upon our new engineers.

Thanking you for your valuable space.

Yours truly,
E. A. MORRISSY.

Keremeos, B.C.,
1st May, 1934.

Vancouver Men Impressed With Gold Mt. Property

NEW INTEREST was focused on the Hedley camp with the visit on Sunday to the Gold Mountain mine of a party of about twenty-five prominent Coast business and professional men. They came to see what sort of a hole they had been putting their money into; and they left well satisfied with their investment—and distinctly enthusiastic about the Hedley camp and the Similkameen generally.

From the point of future development, their visit may ultimately be of real importance to this district, which abounding with natural resources, vitally needs the apprecative attention of the outside world.

GOOD SHOWING AT PROPERTY

Extensive Development Program in Hopes of Making Big Mine

AN attractive prospect, with a good chance of being a big mine, ultimately—this was the general verdict of a notable party of Coast business men who made a goodwill tour to inspect the Gold Mountain mine on Sunday.

Enough was seen to indicate two points; and a logical working plan for the property: which co-incides with the opinion of Mr. Arthur Lakes, consulting engineer for the property.

1. There is in sight, or may reasonably be expected to be found, sufficient ore of high recovery value to warrant as a preliminary measure construction of a 50 ton mill which would serve until the full possibilities of the property are definitely established.

2. Indications are of a considerable body of lower grade ore, the necessary condition for a big mine.

The course of action that accordingly suggests itself is to continue the present plan of preliminary investigation, which is thus vindicated; and to push on with a thorough and exhaustive exploration to block out the maximum of ore, at the same time working with the object in view of a large operation.

This is the course the directors will likely pursue.

The general phases of the operation have been more or less thoroughly reviewed in these columns heretofore, and this article will but briefly reconsider them, and intensify them in the light of personal observations from Sunday's visit.

History

The property was located in 1898 by H. C. Pollock, and after a considerable amount of individual effort he managed to interest capital in his showings. In 1905 a company was formed, known as the Pollock Mines, Ltd. It was capitalized at $1,000,000 terialize, and the effort was but the effort failed to maultimately abandoned.

Seven years ago John Mc Conville became interested in the Similkameen. In May, 1933 he and partner, C. N. Ecclestone, began work on the property, and interested Vancouver men. A company was formed, and in September a $35,000 development programme was launched.

General Classification

The geology of the Hedley camp is in brief:

Sedimentary rocks, principally limestones, impure limestones and argellites, with a westward dip, are cut by monzonite and granite (a later formation), in the form of dikes or sheets. Arsenopyrite is the principal gold bearing vehicle.

The Gold Mountain group is to the west of the Hedley camp, and the general geological features correspond, though, while the ore is similar to that of the Nickel Plate side, there are certain notable differences in its occurrence.

The sedimentary rocks are altered limestones, with some argellite, and the igneous rocks, porphyry, granite and (chiefly) diorite.

Indications are that there are a number of ore bodies: some fissures, some lenses. Three major showings have been exposed: on the Martin, the Pine Knot, and the Maple Leaf. Most of the work of former operators was concentrated on the Martin.

There are now good showings on all three claims, as well as several other surface indications.

Summary of New Operations

In addition to the five original crown grants, eleven additional claims have been staked. About 400 feet of new tunneling has been done including driving and drifting on the upper (No. 1) tunnel on the Maple Leaf and a new lower tunnel, now in about 80 feet. Prior to commencing this tunnel 1000 ft. of diamond drilling was done from the upper tuneel.

Several new surface cuts have been made, and a new showing found by sluicing from Henry Creek, fully 2000 feet from the main showings.

A mile of road has been built up the mountain side, camp buildings constructed including mess house, bunk house, stable, etc. A small compressor has been installed for drilling. Operations have been directed by Mr. Arthur Lakes, consulting engineer, and Mr. Frank Dol-

(Continued on Page 4)

Run of the Mine

Vancouver's business men obviously believe that climbing should be confined to social strata.

★

And from now on we may expect to find mining revolutionized. One idea is an automatic tunnel boring device (b-ore-ing.) The only thing that Mr. Cribb hasn't solved was how to train his robot to follow the lead. We might suggest the old fashioned expedient of tieing a bunch of carrots (karats) in front of its nose.

★

One caustic gem:
Business Man No. 1 to No. 2: "I see you are back on your old job again, walking he ties."

★

They were discussing quietly, so he would not (?) hear it, his virtues. "And to think that he sank to such a degraded state as the hardware business "

★

Two downs and one to go. "I can't make it", says he. "Well, for gosh sakes, eat your candle, then."

★

They strained up the steep slope, and Red Riding Hood's big bad wolf never huffed and puffed any more. "Hey, Jack!" came a distressed call from below. Jack descended twenty hard-won feet, prepared to find the other ready to drop from heart-failure. But: "Have you got a match?"

★

And it would be hard to say who was the more puzzled—the horse or the rider.

★

And a new chant was added to the litany: "May the road to heaven not be a mining man's "fifteen per cent grade."

VISITORS ARE IMPRESSED

Like the Gold Mt. Mine and the Similkameen Also

SIMILKAMEEN people have known all along that Vancouver knows far too little about its marvellous air, its scenic grandeur, and the potential wealth of its resources. This truth was brought home on Sunday to a few more of the Coast goliaths, so that in spite of the characteristic niggardliness of the all-informing dailies, the excursion no doubt did a lot to popularize the valley.

The visitors at any rate seemed to enjoy themselves immensely; and a good deal of their pleasure was in the information they gathered.

As to the purpose of the trip, it was apparently achieved. The men, most of them directly interested, expressed themselves as well satisfied with the prospects of their investment. But they saw more than their own mine, and many of them got a new conception of the Similkameen, if not B. C.'s hinterland in general.

It will be of mutual benefit if more such excursions are arranged.

Included in the party were: P. D. Gordon, vice-president Gordon, Belyea; Gunnar Tornroos, B. C. Equipment Co.; H. R Malkin, W. H. Malkin Co.; C. E. Wilson, Wilson and Moore, Victoria. W. E. Burns. barrister; Arthur Lakes, M. E.; D. MacDonald, Standard Insurance; C. N. Ecclestone; F. A. Fu cher, insurance; H. A. Snowball and W. E. Burns, Jr., representing H. W. Clegg, the fiscal agents; G. A. Birks, Birks, Crawford & Co.; P. D. Bannerman, McLennan, McFeely & Prior; J. Allen, S. H. Lennard & Co., brokers; E. F. Cribb, Pacific Salvage Co.; R. L. Horie, Hawkins & Horie, surveyors; Sidney Norman, financial editor, The Sun; Alex. Shaw, financial editor, The Province; Tom Elliott, acting-secretary, B. C. Chamber of Mines; A. E. Sprange, secretary, Vancouver Stock Exchange; John C. Oswald, secretary Gold Mt. Mines; Geo. Walkem, ex-M.L.A. Stanley Burke, manager Pemberton & Son; J. A. Thompson, London Life Insurance Co.; J. E. Wilson president. W. J. Wilson & Co., Victoria; P. E. Ritchie, president Sullivan Machinery Co.

When Life Was Good

Dr. Dolmage At The Stemwinder Mine

DR. VICTOR DOLMAGE, noted mining engineer, is in Hedley, making a report on the Stemwinder Mt. mines. Dr. Dolmage is consulting engineer for the Hedley Amalgamated Gold Mines, who are opening up the property.

PRINCETON, B. C., THURSDAY, 3rd MAY, 1934.

Hospital Day

This is hospital week, and to comply with a request to publish the following, we cheerfully forego the pleasurable torture of an editorial. There may not be much to the verse, but there's nothing wrong with the sentiment. And as Sylvester has hung out the warning sign, and, since even the worm will sometimes turn, Perley may yet wriggle us into (additional) insensibility, it may not be impolitic to keep on good terms with the medical profession.

The Little Country Hospital

EDGAR A. GUEST

THE little country hospital is hidden out of view
And people seldom notice it as pleasure they pursue,
But let an accident befall—which is the fate of men—
The proudest man is glad to see the small-town doctor then
And in that little hospital which humble folk maintain
He'll find that hearts are merciful, and quick to comfort pain.
It isn't like a city place, with sections blocked apart,
Where every patient's listed as a number on a chart
And specialists for this and that convene to thumb him o'er
And ask a thousand questions of the ills he's had before.

For in the country hospital, which lacks all pomp and style
The surgeon on his morning round has time to chat a while.
And whether pain be in your groin, your stomach or your toe,
The cause of it the doctor there assuredly will know,
He will not shunt you round the place for rays of that and this,
He'll diagnose your case himself, and very seldom miss.
And whosoe'er shall tread the hall when you are free from pain
Will stop to speak a cheery word, and wish you well again.

So, little country hospital, which humble folks support,
Which struggles for existence, since its funds are always short,
I pay this simple tribute now to all your tender care
In lessening the hurts and pains which mortals have to bear,
And pray for God's rich blessing on the men and women brave
Who give their every ounce of strength another's life to save.

showing that home-brewed specimens of beer contained 6.52 per cent and 6.76 per cent and wine 17.56 per cent alcohol.

Const. F. G. Hatherill—

Const. F. G. Hatherill, who is stationed at Coalmont said that early in March he relieved Const. Jarvis at Princeton. He made several watches on the Sidoni house

On 6th March between 10 p.m. and 1 a.m. he saw 14 men enter; 7th, 10:30 to 12, 6 men; 8th, 11 to 12, 7; they entered from the alley and left a woman standing in the alley. On the 9th, between 10:30 and 12, 9 men 10th, 11 to 1. 11 men; 21st, 9 to 11:30, 3 men. At 11:30 the man referred to as "No. 6" entered. Const. Hatherill and Const. Jarvis walked to the rear kitchen window. The blind was up. They were only two or three feet from the people inside. He saw a man receive 3 bottles of beer and pay over some money.

When the man came out he followed him. The man said he had bought the liquor, drank one bottle, and had two with him, which he surrendered. He said he had paid 40c for the beer.

At 11:45 police entered the Sidonio place by the front door. Witness repeated evidence of the search and Sidonio's explanation. He said he bought whisky at the liquor store and sold it for

LEGALS

COAL AND PETROLEUM ACT
NOTICE

TAKE NOTICE that I, William S. Wilson of Princeton, B.C., intend to apply to the Commissioner of Lands for a licence to prospect for coal and petroleum over Lot 116-s in the Similkameen Division, Yale District.

Dated this 26th day of April, 1934.

WILLIAM S. WILSON, Applicant.

WATER NOTICE

USE AND STORAGE

TAKE NOTICE that British Columbia Electric Power & Gas Company, Limited, whose address is 425 Carrall Street, Vancouver, British Columbia, will apply for a licence to take and use 150 C.F.S., and to store 2,000 acre feet of water out of Silver Hope Creek, which flows north-west, and drains into Fraser River, about 2 miles West of Hope, B. C.

The storage dam will be located at the outlet of Silver Lake. The capacity of the reservoir to be created is about 2,000 acre feet, and it will flood about 30 acres of land. The water will be diverted from the stream at a point about 4½ miles upstream from the Cariboo Highway Crossing being at the outlet of Silver Lake and will be used for power purposes upon the land described as about half a mile upstream from Cariboo Highway Crossing of Silver Hope Creek.

This notice was posted on the ground on the 19th day of April, 1934.

A copy of this notice and an application pursuantt thereto and to the "Water Act" will be filed in the office of the Water Recorder at Kamloops, B.C.

Objections to the application may be filed with the said Water Recorder, or with the Comptroller of Water Rights. Parliament Buildings, within thirty days after the first appearance of this notice in a local newspaper.

The territory within which its powers in respect of the undertaking are to be exercised is within a radius of 40 miles of the point of diversion.

A petition for the approval of the undertaking will be heard in the Office of the Board of Investigation at a date to be fixed by the Comptroller, any interested person may file an objection thereto in the Office of the Comptroller or of the said Water Recorder.

BRITISH COLUMBIA ELECTRIC POWER AND GAS COMPANY, LIMITED.
V. LAURSEN,
Soicitor for the Applicant.

The date of the first publication of this notice is the 28th day of April, 1934 M24

PROWLER ROUTED BY TELEPHONE CALL

★

"I wouldn't be without a telephone, said a Vancouver lady, following a recent nerve-wracking experience with a prowler.

One night when she was alone, with the exception of her two small children, she heard the door bell ring. This was followed by the crash of breaking glass. A man was forcing his way into the house. She rushed to the telephone and called the police. The prowler heard her telephone for help, took to his heels, and had disappeared when the police arrived soon after.

Sidoni Convicted

(Continued From Page 2)

25c a glass. He brought the quart bottles from the cellar and poured it into a small bottle, from which he sold it.

He said that he had not made ber for a long time, and that he did not sell to everybody. He had turned three men and one woman away that night. He said to the police :"You write to Victoria. I will come at 8 or 9 o'clock tomorrow morning, or any time you say."

Const. Jarvis corroborated evidence of the two previous witnesses.

Gave Own Defence

Battista himself gave the only evidence in defence. He said that he was a miner. He made home brew when he had a permit, but had not made any since he lost it. He did not know he had to have a permit to make wine. He bought liquor at the liquor store, and gave it to friends when they came to see him.

Cross-examined, he said his full name was Sidonio John Battista. He had his liquor permit made out in the name of John Sidonio. He worked in the Wilson mine in March, and made $38.00, and $8.75 in April. This was all for some time. Const. Jarvis asked him to explain how with only this in wages he could buy $66. of liquor, as his permit indicated. He said he lost his permit to make liquor last year. He was in court but was found not guilty.

He said he had 150 bottles of home-brewed beer when he lost his permit. He drank from 1 to 12 bottles a day. Const. Jarvis asked him to explain how he could have so much left when his place was searched.

"What do you use to make your wine?"

"Only fruit."

"What fruit, for instance?"

"Figs, cherries, raisins, rice—"

"So you think rice is a fruit?"

Was Found Guilty

Const. Lees was recalled to refute Battista's evidence regarding his previous appearance in court.

He produced the police record which showed that on 6th April, 1933, on information laid by J. A. Brown, excise and customs officer, Sidiono was charged under section 201 of the Excise Act of Canada and was found guilty by Stipendary Magistrate L. A. Dodd, sentence being deferred.

In his summary Magistrate Rowlands sais that the police had made a clear case and had proven beyond a doubt that Sidonio was violating the act. He pointed out that the accused had made no effort to dispute the Crown's case.

He found him guilty, and ordered him to pay the minimum fine of $300 and $5.25 costs or serve three months in jail. Sidonio will be taken to Oakalla.

Similkameen Social and Personal

KEREMEOS

Miss Bertha Kalus of Penticton has been visiting Keremeos for a few days.

Mr. Walter Quaedvlieg has been visiting in Nelson.

Mr. and Mrs. W. Mattice are in Kamloops visiting Mr. and Mrs Guerney.

A sigh of relief is heard everywhere in the Similkameen when the river stopped rising, and moreso when it dropped about 2½ feet on Saturday last. Quite a bit of sand and gravel has been washed down the river during the last week. Some ranchers have been rather hard hit, losing several acres of their land. The landscape between here and Hedley is quite altered. Small and even some of the larger islands in the Similkameen river are almost gone. The train crew is busy repairing the foundation of the bridge near here, and replacing ties and rails on washed-out sections of the G. N. line. The water is said to have risen 12 feet in some places. And now it rains, and Saturday it simply poured, when we need sunshine badly.

SNAPPY SERVICE

ROLLS-ROYCE TO BUILD CAR WITH FORD V-8 ENGINE

Brewster & Co., Inc., a wholly owned subsidiary of Rolls-Royce of America, Inc., has started production in the United States of a new line of cars having a Brewster body mounted on a converted Ford chassis, with Ford V-8 engine.

One of the new models, known as the Brewster "cabriolet de ville" is on display at the Rolls-Royce showrooms, 32, East Fifty-seventh St., in New York.

Accoring to J. S. Inskip, president of Rolls-Royce, the car has been developed for a new market, Priced at about $3,500, it is offered in the "fine car field" at a price considerably lower than that at which such cars have hitherto been available. Most of the "luxury" automobiles are priced at $5,500 and above, he pointed out.

Mr. Inskip sad that the cabriolet model was now in production at the Springfield, Mass., plant of the Rolls-Royce Co., and that it contemplated building other models, including some of the sports variety.

Rolls Royce of America, Inc., manufactures at Springfield, Mass. under a licencing agreement with the Rolls-Royce Co. of England, a car virtually identical with the British Rolls-Royce except that it has the steering wheel on the left side. The Rolls-Royce sells on the average for about $18,000.—Canadian Automotive Trade. ***

Const. R. A. Lees has returned to Princeton with his bride.

Cool weather has greatly relieved the high water situation.

Copper Mountain

Mrs. Jack Parker of Corra Linn is the guest of her parents, Mr. and Mrs. D. A. McKinnon.

Mr. Sidney Brown has gone to Anyox.

Mr. Paulding of the Princeton Department Store paid Copper Mt. a visit on Sunday.

A number of the young people had an enjoyable hike to the Crusher on Sunday.

Visitors to Princeton during the week were: Mr. and Mrs. J. T. Langridge. Mrs. T. Mahon. Mrs. T. McGhee. Mr. D. A. McKinnon, Miss Florence McKinnon. Miss Marguerite Corsi, Mr. W. Harrison, M. John Corsi, Master Bobbie Muir.

There was heavy traffic on the Mountain on Sunday—two cars and three trucks.

CAWSTON

Miss Sine Nielson of Penticton is visiting her parents, Mr. and Mrs. N. M. Nielson.

Mr. and Mrs. J. Westman and son Billie of Wingdam arrived in Caws on Saturday, and expect to make their home here.

Mr. A. Prentice, who has been ill for some time, is much improved and able to be out of doors.

Miss Edna Woodin returned to Penticton Saturday, after visiting friends for the past two weeks.

Mr. and Mrs. N. Nielson and little grandson Bobbie Weitzel went to Penticton Wednesday.

Janet Hammill, formerly of Cawston, has been granted a visa and is in the United States legally, as a citizen.

The Skin of Youth At Any Age

Feed the skin and tissues *beneath* with rich, emollient *Melba Tissue Cream.* It supplies, as does nothing else, the nourishment needed by every skin past the first blush of youth.

Melba Tissue Cream penetrates. It prevents lines and wrinkles, counteracts ageing and drying effects of exposure and, used as a massage, is unmatched in correcting sagging lines. Use it daily.

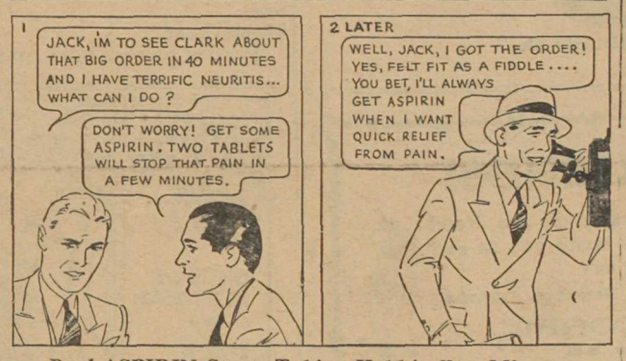
Quick Relief Now From Neuralgia



Real ASPIRIN *Starts Taking Hold in Few Minutes*

Now comes *amazingly quick* relief from headaches, rheumatism, neuritis, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And thus is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

STAR SPORTS

Vice President Team Won Golf Opener

VICE-presidential golfers had much the better of matters in the annual opening match at the Princeton golf links Sunday. President Ernie Gray, however, had some satisfaction in beating vice-president Ernest Waterman to gain the sole victory for his side.

The ladies' medal play event was won by Mrs. V. G. Field. Monthly medal play is on this Sunday.

Vice President		President	
Coles	1	Harris	0
Forsyth	1	Wallace	0
Sorenson	1	S. Ewart	0
Field	1	Hooper	0
Waterman	0	Gray	1
	4		1

Rhodes' softballers settled an old score on Sunday when they met and vanquished the Telephones 14-9 in the season's opener Sunday. It was an exhibition affair.

YOU CAN'T BEAT

FORD V-8

PERFORMANCE

POWER FOR EVERY NEED

Let us show you how good the new Ford is. Claims are a waste of breath. Tests alone tell the facts. Hill for hill; mile for mile (measured mile), hour for hour, we challenge any car under $4000 to beat Ford V-8 performance and economy. $4000 is the next lowest priced V-8. Get the facts before you buy.

Pine Knot Tunnel

The lowest working is a tunnel on the Pine Knot, which is in some 350 feet. Here they have driven on the vein, and have exposed a large body of very friable ore, giving in some cases exceptional asays, running as high as $75.00 a ton.

This is chiefly old workings, some new drifting having been done.

An intriguing feature is the rapid oxidation. Action of water has decomposed mineral salts, and they hang from the roof in a soft jelly, crystallizing as they de-hydrate. In time some wierd effects would be produced.

Work on Martin

A great deal of work was concentrated by the former operators on the Martin, and shafts, tunnels or cuts are to be found at every few feet. Most of the timber is in remarkably good shape. This work was done in 1904 and while too much can not be said for the efficiency of those early workmen, an interesting point should not be overlooked: the arsenic in the ore—it is pungent to the nostrils as fresh ore is broken—exercises a remarkable preservative effect.

Mr. Jack McConville—a character if there ever was one, eh—was anxious that we should see one tunnel in particular that the general party passed up. It exuded an oozy muck that was red with iron stain, but this only heightened the contrast. It was a remarkable example—so pronounced by Mr. Tom Elliott — of fissure contact and sheer zone, revealing much information, and an 18-foot expanse of beautiful ore.

Maple Leaf

Present owners have up to the present concentrated efforts on the Maple Leaf, at the top of the hill.

The tunnel started by the former owners high up the hill has been extended, cross cut and drifted on. Ore of excellent width has been uncovered, and many attractive lenses revealed, some carrying high values.

This tunnel undoubtedly gives the best idea of the possibilities of the mine, as the work is more thorough. Even here, however, the one idea has been to explore rather than to mine, and no effort has been made to exhaust promising enticements.

Diamond drilling was done last winter, and careful records kept along a definite plan designed to verify theories regarding the lay of the ore. Mr. Lakes was well satisfied with results, and on this basis additional development work was undertaken.

One pleasng feature was the discovery of a spring at considerable depth. It is now controlled and harnessed for use: a valuable asset.

About four hundred feet down the hill a new large tunnel has been started—a fine appearing piece of work It is in about 85 feet, aiming to strike the vain at this additional depth. It will likely be the working tunnel for the preliminary production programme.

A showing that occasioned much interest and that is being regarded with considerable importance was an unexpected vein on the dike, over two feet in width, of which there is no trace on the surface.

Sluice Showing

An interesting showing that may or may not mean much, and which most of the party passed up is several feet south of the other workings, at about the same elevation at the topmost tunnel. Here some years ago Mr. Dollemore diverted Henry Creek, and used the water to prospect the hillside. An interesting quartz showing was revealed.

This is at least two thousfeet from the other showings. Whether it is a continuation of the some ore body or a new one has not been established.

Development Plans

As far as can be gathered, Mr. Lakes is well satisfied with indications to this point but prefers to proceed cautiously. In fact, there is an obvious feeling among the more excitable of the shareholders that he is over-conservative—which is perhaps an excellent failing.

Development work will be continued along the lines now being followed, endeavoring to prove up a large ore body. Mr. Lakes indicated that conditions being exceptionally favorable, the ore could be mined at $3.00 a ton. Thus anything carrying .2 or over in gold could be profitably handled. It was obvious that Mr. Lakes based his hopes on a large low-grade property, with just enough riches in the lenses to add the necessary 'cream'

From point of community stability there is nothing more desirable.

It was learned that Mr. Lakes will shortly spend several days at the property, investigating certain technical points. Meanwhile, it is generally felt that Mr. Dollemore is making an excellent job of it.

Additional stock has been issued to take care of the proposed development work, including the mill, if and when it is decided to proceed with this unit.

Good Location

From point of accessibility and economy of operation the mine is well located. The steep hillside makes tunneling easy, and it will be a comparitively simple matter to obtain depth, once large scale operations are undertaken. An aerial tramway would ideally solve the problem of getting the ore to the mill, and the Great Northern railway passes the mill site. There should be ample timber and water.

TWO STAR SERVICE

Printing

Advertising

Printing saves time, adds convenience, and increases sales. It is cheaper by far to have it than to do without it. Never hesitate to have it printed. This is a finding that efficiency experts will pass on to you.

The advantages of buying your printing locally, as applied to you, are many and obvious. Besides, in spending your money at home you are helping your local business unit, and yourself.

We are equipped to handle all your work, and we guarantee satisfaction.

Printing That Talks
Advertising That Pulls
Service That Counts
A Paper That Is A Community Force

We are slowly but surely buliding up—for you—one of the finest typographical services to be found in any community of corresponding size anywhere. Your patronage will help to improve this service—and you will benefit.

THERE IS NO NEED TO SEND ANY PRINTING ORDER OUT OF THIS COMMUNITY

There is no business that can afford to be without advertising. The day is long past when advertising was considered a privilege or a luxury. Business after business has proven this. Salesmanship to-day is an exact science, and advertising is its biggest agent. Because it increases business all around the cycle advertising costs no one anything, and yet it makes money for all.

The newspaper ranks first among advertising mediums, the local paper first among newspapers.
