Slocan Mining Review.

Sent to any address for $2.00 per ann. If you see it in the "Review," it's so.

No. 31. VI. I. SANDON, British Columbia, Thursday, Mar. 28, 1907. Single Copies 10c.

TO BEGIN ON APRIL 8th.

Celebrated Harris-White Case Now Ready For The Full Court.

The next stage in the famous case of a Sandon mine in which over half a million dollars have been absorbed in costs, and in which several millions dollars worth of ore are involved, will be the adjourned hearing before the full court on April 8th. For some reason the venue has been changed from Vancouver to Victoria, and all parties have been notified. The array of legal talent will be headed on the Harris side by S. S. Taylor, of Taylor & O'Shea, Nelson, and E. P. Davis, of Davis, Marshall & McNeil, of Vancouver, and on the Bryon N. White side by R. E. Lennie, of Nelson, and E. V. Bodwell, of Vancouver.

The Court adjourned in November of last year after giving Mr. Harris the necessary order to do certain work to determine the existence of a black fissure and the continuity of the ore at a point held barren by the White company. To do this work W. E. Zwicky was appointed by the judges, and Harris deposited the necessary funds for its completion in the Bank of Montreal at New Denver. This work has now been completed, and its import well understood here, but whether the legal gentlemen, judges and experts can all agree and finally put an end to the litigation we do not presume to guess.

The latest rumor, which appears to have foundation, is that Superintendent Zwicky and Foreman Clark have been subpoened by the Star company to give evidence for the Crown as independent witnesses, and show when, how and why the work was done.

Laid to Rest.

All that was mortal of the late Nicholas McKian was lowered into their last resting place in the Garden of Sleep at Kaslo on Friday last. The procession to the graveside was a very lengthy one, and was perhaps the longest ever witnessed in Kaslo. The popularity of the deceased miner drew crowds from the surrounding country, all anxious to pay their respects to one who, though dead, will ever be held dear to memory. The funeral was pathetic beyond expression, for not one, as the last good-byes were said, but felt that a loss has been sustained for which there is no compensation.

The obsequies were performed by the Rev. Father Jeannotte, who delivered some comforting words to the sorrowing assembly. The chief mourner was James McKian, a brother of the deceased. Sandon Miners' Union were in charge of the arrangements, and a large number of members were present.

Local and General.

Picked up by Butting in Everywhere.

W. S. Storey, representing the Ogilvie Milling Co., was here yesterday.

Stan. Langille came up from Whitewater on Monday. He reports that the old burg is lively in mining and commercial circles.

Rev. W. G. and Mrs. Brown are en route to Athelstan, Que., but they will stop over at Lethbridge for a week. Writing from Revelstoke, March 20th, to the editor, he hopes that we "will be able to escape the weakness of so many newspaper editors who wait to see which way the wind blows and then blow with it, instead of having principles for which to live and trying to educate the people." We appreciate the gentleman's kind words and advice, but with reference to the latter, we can assure him our task is hard, as the average reader thinks he knows it all.

Geo. T. Moir writes us that he has arrived at Phoenix and is being kept busy with inward freight and an average of 55 cars of ore going out. Mrs. Moir and children at the time of writing were still in Nelson, owing to the illness of little Eva, who contracted a cold whilst travelling, which developed into pneumonia. We are pleased to report that the critical stage has been passed and that the family will join G. T. in a few days.

Hugh Niven, the popular proprietor of the Hotel Slocan, Three Forks, made a trip into Sandon Saturday. When Hughie graces our streets with his presence we know that summer is nigh.

Charlie Farrell has been out into the world. He returned Sunday from a trip to Nelson, Kaslo, Whitewater and other large commercial centres. We believe our auburn-haired friend is going into the real estate business. Some say matrimonial.

Rev. Rutherford was at New Denver conducting Divine service last Sunday. Next Sunday services will be held in the Methodist church here.

Fred. Ritchie was a guest at the Reco on Sunday. He is in from Victoria.

W. E. Hodder, Kaslo's ex-mayor and prince of boosters, was up to our city getting pointers on Saturday.

Charles Scott, was a visitor from Nelson on Saturday. The object of his visit was to look after the estate of the late Pat Hayes, who was killed in a snowslide a year ago.

R. E. Lennie, the well-known K.C. of Nelson, was here on Monday in connection with the Star-White case.

A travelling artist of apparent great ability hit the camp Monday. His name was Hughes. He could draw a speaking likeness of any person quicker than we could draw a conclusion or Red Hurlburt a glass of beer. He was no good on drawing to a four flush and he withdrew Tuesday.

Have you caught on to the smelter problem yet? A slight error was made in the ninth line last week. Read 50 ozs. silver, not 59.

Charlie Schneider, the heaviest brakeman in the world, has been transferred from Nelson to the Sandon-Nakusp run. He arrived on Monday night and immediately purchased a meal ticket at the Reco. Poor Bennett!

Mark well our prediction. More ore will be shipped from the Slocan this year than at any time since 1900.

John Cory was a caller from Three Forks Monday. Mr. Cory is working hard on the petition now going the rounds for the completion of the wagon road to New Denver.

A minister declares that hell is a place of strong drink, tobacco, baseball, theatres and peek-a-boo shirt waists. O, Death, where is thy sting?

There is talk of forming an amateur dramatic society in town.

Johnny Harris expects a carload of experts in on Monday night. He needs them in his business.

Percy Johnston has joined the crew at the Sovereign.

Col. R. T. Lowery, the little man with a big sting, was Sandon's star visitor Saturday. The veteran journalist is still in the ring, but at present slightly under the weather and generally frazzled. Try a rest, colonel. A few months in your beloved "cent belt" should rejuvenate the silvery threads working through your "upper stope." The colonel always retires to his couch at ten, like the rest of the good young men, and is never known to look on the red or squint at an ace in the hole. "Bob" is our nomination for King's printer.

DIED.—On the 17th inst., at Eagle River Ranch, Malakwa, B. C., Sarah, the beloved wife of E. R. B. Baynes, leaving nine children to mourn her loss.

The deceased lady was the wife of the the eldest son of Church Missioner Baynes of New Denver, to whom we extend sympathy.

Mrs. C. E. Anderson, wife of the newly appointed hospital nurse, arrived with family of two from Vancouver on Tuesday.

We desire to call attention to announcement already made of Evening Concert to be given at New Denver on Easter Thursday in aid of the Anglican Church funds. We hope the boys generally (including Sandon, Three Forks and Silverton) will give their warm support, and thus add an additional smile to the countenance of Missioner Baynes and to encourage him in his good work.

High mass will be sung at New Denver next (Easter) Sunday. Rev. Fr. Jeannotte will officiate. Visitors from Sandon and other points will be there. To-day being Maundday Thursday, the customary service was held at Sandon this morning.

The fishing season opened last Monday. We heard of one sucker being caught at 1 a.m.

James Cronin has been on a trip to England. He will arrive back about the middle of April.

F. L. Sizer, an M.E. of continental reputation, will arrive on the 1st of next month to inspect the Star for J. M. Harris. The latter is responsible for the statement that he will arrive in a special car accompanied by his own cook.

Rev. and Mrs. Rutherford remove next week to New Denver.

We still have good skating ice at the rink, but the prospects for another hockey match are nil owing to most of our players being over the hills and far away. The present affords a most favorable opportunity for Kaslo to challenge.

Lest in your scramble for the almighty dollar and a stack of blues you forget, we rise to remark that next Sunday is Easter Sunday. How the time does fly. Last Sunday it was Palm Sunday, a few more weeks and it will be Xmas again. The year gone and nothing done.

Mr. and Mrs. Harry Drever left this morning for Vancouver. Their departure will be mourned by a large circle of friends.

John Battoni, the Italian who was so badly injured in a slide a couple of months ago, is around on crutches.

With the Whitewater mines shipping regularly and the South Fork properties adding their quota to the Sandon and Cody output, the K. & S. railway will be taxed to their utmost for facilities this spring.

Nelson's Benzoin Cream will heal March chaps.

The Canadian Pacific Railway Co. announce the usual reduced rate of fare and one third for the Easter Holidays March 28th until April 1st. Tickets will be on sale at all stations Port Arthur and west, March 27th until April 1st. Final limit for return, April 2nd. For full particulars, rates, folders, and tickets apply to local C.P.R. Agent, or write J. S. Carter, D.P.A., Nelson, B. C.

Our New Feature.

J. J. Fingland, assayer and chemist, has undertaken for us to classify, and as far as possible valuate, any mineral or rock specimens we may furnish him. Mr. Fingland holds certificates from the West of Scotland Technical College for geology, mineralogy and mining, and his practical experience includes an extended and valuable research among the ores and rocks of this mining division. He also occupied the position of assayer at the Brockman concentrator, Roseberry, B.C., for some time, and he left that position to commence business on his own behalf at Sandon, having succeeded to the business of F. H. Hawkins.

Any person is welcome to utilize the privilege which we have announced and to forward specimens for identification, and this and other pertinent information will be published in the REVIEW as soon as possible after the receipt of the specimens.

As a rule mineral specimens can best be forwarded to their destination by mail at a reduced rate of postage. Sometimes it is necessary to send such material by express. In every case all charges must be prepaid, and the package addressed to the "Review, Sandon, B.C." All kinds of rocks and ore are invited to be supplied and answers will appear in the paper attached to the initials of correspondents names. These answers will include a certain amount of advice as to the necessary conditions for profitable working of different ores, the character and extent of the market for same, and other general information which will help to bring about the development of deserving ore deposits.

J. B. New Denver:

Your specimen appears to be decomposed spathic iron. The dense black color is due to the presence of manganese.

W. J. M. H., Kaslo.

The yellow mineral in the larger specimen is chalcopyrites. This when pure contains 33 p.c. copper. Your specimen, however, contains so much gangue that it will not contain 1-10th of this amount. Gold values are to be expected.

The smaller specimen is Franklinite, a mineral containing zinc, manganese and iron. It is used as a zinc ore at Franklin, N.J. Please say if we can note the occurrence of this mineral in the Kaslo District.

S., Sandon.

Pure zinc blende contains 67 per cent zinc. Specimens can be obtained in this district running to 62 p.c. zinc, rarely more. The impurity is iron. Pure galena contains 86.6 p.c. lead. Small specimens are easily obtained running 85 p.c. lead. The chief impurities are small quantities of silica and iron.

Whitewater.

The work of remodelling the Whitewater mill is proceeding rapidly, with contractor Culver handling a crew of five men. The mill will about be in shape to do business in six weeks.

Mr. and Mrs. L. A. McPeee visited Kaslo last Friday.

Jack McIsaac, L. R. McInnis and F. McDonell have arrived from Sandon to work on the raise from the Whitewater Deep to No. 8 of the Whitewater, for which W. Matherson has a contract for 250 feet.

One of the largest shipping mines in the Slocan at the present time is the Whitewater, which is now being worked together with the Whitewater Deep by J. L. Retallack, S. S. Fowler and others. The old Whitewater is looking exceedingly well, and as about twenty tons of ore and concentrates are being shipped daily, the value of its producing powers may easily be guaged. The new tunnel (No. 8) has a rich looking face, and as they are in ore in the new raise, big shipments may be looked for from now on. With both mines and the mill running full blast, Whitewater will be a busy mining camp the forthcoming summer.

A. J. Harris is enquiring about ore sacks. It looks as if his lease on No. 4 Whitewater is going to prove a winner.

WELL KNOWN GROUPS.

Report of W. R. Ingalls Is Of Special Value to Intending Investors.

MOUNTAIN CHIEF.

The Mountain Chief group of mining claims is situated on the south side of Carpenter creek, about 1½ miles from New Denver, over an excellent wagon road to within ¼ mile of the principal tunnels. A good pack trail connects the tunnels with the wagon road. The property has not been worked for several years, and no data could be obtained regarding its output or extent.

The first point visited was an open cut in which the vein had been exposed for a length of 50 feet, bearing north 25 deg. east, and dipping southerly, or into the mountain. The vein was 3 feet wide for this distance, and contained from one to 1½ feet of zinc blende, mixed with quartz on the hanging wall, and mostly quartz material on the foot. The vein exhibited ribbon structure, and the short lens made a very fair showing for a surface outcrop. The enclosing rock however, is an extremely hard, light coloured slate, not, I think, very favourable for the production of ore. About 60 feet below the open cut a cross-cut was driven in to intersect this vein, which is exposed in the cross-cut about 18 inches wide, consisting of a stringer of quartz on the hanging and foot wall's; in the central portion it is hard slate, the whole highly silicified and extremely hard. A raise was put up at the face of the tunnel for about 20 feet, but no pay ore was anywhere visible.

Proceeding eastward from this tunnel and passing into a side gulch, or draw, another tunnel is found, which intersects the vein at 60 feet from its portal. This vein has been stoped west of the tunnel for a distance of about 80 feet, continuing to surface, or rather to a short tunnel (No. 4) about 60 feet above. No ore could be observed in the face of the workings, the productive vein matter having been thoroughly stoped out. The mouth of this tunnel exposes a fault, showing considerable movement. The gulch follows the strike of this fault. East of the lens, which has been stoped out on the 60 foot tunnel (No. 3) above described,, the ore lens pinches up and the vein is probably cut off by the fault, but as the workings at the fault were not accessible to complete examination, this fact could not be determined. About 80 feet below No. 3 tunnel and on the east side of the gulch or draw, a tunnel (No. 5) was started in massive quartzite and extended for 250 feet into the mountain to intersect the vein showing on the north side of the gulch and fault. This tunnel penetrated extremely hard rock, and a few irregular fissures were encountered, but nothing indicative of a mineral vein. As near as I could judge, this tunnel shou'd have intersected the vein previously mentioned. About 150 feet above this tunnel a vein has been developed by No. 6 tunnel and drifts, and quite a little stoping has been done. About 30 tons of ore was sacked on one of the dumps from which a sample (No. 42) was taken by Mr. Garde, which assayed: silver 26.1 ozs., lead 5.1 p.c., zinc 31 p.c. The vein in these workings according to Mr. Garde, appears quite regular but small. Sample No. 41 was taken from in No. 7 tunnel. It assayed silver 58.5 ozs, lead 10.7 p.c., zinc 26.6 p.c. I believe the same condition of affairs exists here, as that described at the first tunnel examined; at any rate, the 250-feet quartzite tunnel (No. 5) below it should have intersected this vein, but it has given negative results. The two samples taken will give some idea of the grade of the ore. If this vein can be traced into the darker and softer slates of the Slocan series, as it probably can along its strike, further up the valley, I would consider it a good prospect, but as the vein extends in depth into the extremely silicious slates and quartzite, previously described, it becomes barren and practically disappears.

It looks to me as if the tunnels 2, 3, and 4 exposed merely the roots of an ore vein, the upper portions of which had been eroded during the formation of the valley of Carpenter creek.

HARTNEY GROUP.

These mines are situated on Silver Mountain, about 4 miles by good wagon road from New Denver, and at an elevation of 2,320 feet above Slocan Lake.

The group consists of 8 mining claims 242 acres, but only one vein, the Hartney, has been developed. It was discovered in 1897, and worked for silver-lead ore about 5 years. During the latter part of 1905 an effort was made to market zinc ores and to ship the crude zinc-lead ores of this property but not with much success, as the price offered was too low.

The Hartney vein has been developed by six tunnels, mostly on the vein, varying from 110 to 570 feet in length and aggregating 1,500 feet, with 510 feet of connecting raises and winzes. The vein averages about 18 inches, the pay streak about 4 inches. The lowest working has reached a depth of 510 feet below the outcrop.

The property has produced 180 tons of high grade silver-lead ore, and there was 160 tons of mixed zinc-lead ore, rich in silver, ready for shipment at the time of the examination (Sept. 27, 1905), and about 300 tons of similar ore stored in the stopes. The average grade of the ore as mined is said to be 40 ozs. silver per ton, 15 p.c. lead, and 30 p.c. zinc. The ore haul from the mine to the wharf at New Denver, costs $2.50 per ton.

The mine is developed by tunnels. No. 2, started as a cross-cut, had not reached the vein. No. 3 tunnel intersects the vein at the end of a cross-cut 105 feet long, from which point the drift extends on the vein 570 feet. The enclosing rock is an extremely hard slate, which becomes for the last 100 feet of the drift quite silicious, and the vein slightly changes its strike in this extremely hard ground, while the dip very nearly approaches the vertical; in other portions of the vein the dip is about 60 degrees. At 106 feet from the face a small stope shows the vein to be 10 inches wide, with very regular walls and a pay streak of but three inches of zinc and galena, from which sample No. 43 was taken. This assayed: silver 77.7 ozs, lead 39.7 p.c., zinc 17.9 p.c. This small lens did not appear on the level below, and it looks as if it might open out still wider as the stope is advanced upward. Between this latter stope and the mouth of the tunnel, another stope has been carried up to the level above.

The face of No. 4 tunnel is similar to No. 3, the vein being reduced to a simple 3 inch gouge of crushed slate between very regular and extremely hard walls, showing evidence of movement. The vein here is also practically vertical for a length of 100 feet, as in the level below. So far as I can see, all the ore that would pay to mine has been stoped out above this level. The property has been worked for some time under lease. During part of the term two men produced 120 tons of lead ore in six months, equal to 10 tons per man per month.

The vein looks best at its outcrop and at its shallower depth in the tunnels. All the levels gradually enter harder rock in which the vein becomes both tighter and poorer. The average thickness of the vein matter would not exceed 2 feet, and the paystreak, neglecting the last 100 feet in the two tunnels previously described would not average over 4 inches. The ore now being mined is almost an intimate mixture of zinc blende and galena, with a little siderite and quartz, though from the shallower workings the ore is said to have been almost exclusively galena.

The best pay ore appears to follow the contour of the mountain, extending in the vein only to a moderate depth from surface, or until the silicious slates are met with. Unless a change to a more favourable rock occurs at greater depths, deep development of the vein does not look encouraging and attention is perhaps best given to tracing up and working the vein along the shallow productive zone.

Nelson's Magic Embrocation is just the liniment for rheumatic joints.

Tom Hawes and L. McPhee are making excellent progress on their lease of No. 5 at the Whitewater. The ore coming in looks very promising.

Notes and Comment.

By JAY-JAY

A brewery man, we believe he was from Hogtown, got off the beaten track last week and butted into the Slocan. We know nothing about the quality of the brew he was drumming, but we do think it the height of hoggishness for a Nelson firm to send an emissary to Sandon where we have a brewery, the proprietors of which are staying with the country and hoping for better times. The quality of Sandon beer is too well known in this country to be ousted by any Nelson dope, and it must be most flattering to Messrs. Towgood and Bruder to learn that the hotel men of the Kaslo-Slocan country are loyal to the home brewers, and that a discerning public will refuse all worthless imitations. We might remark that this 'spiel for a home product is quite voluntary on our part, and that Messrs. Towgood and Bruder by their fine brew and stick-to it-tiveness justly merit the undivided loyalty of the district and any support that this journal can give them. Ask for Sandon beer, made by the New York Brewery, at Sandon, B.C., and brewed from the finest hops and under perfect sanitary conditions.

We were very pleased to note that our printed remarks in our issue of the 14th inst. did not fall upon barren ground. We allude more especially to our observations on the lack of enterprise of the business men throughout the district. We pointed out that no more favored section existed in British Columbia, its principal assets being diversified minerals, timber, ranch and fruit lands, and incomparable scenery, and that the world was practically ignorant of the resources of this country. Our object was to rouse the business men of the Slocan towns and cities to concerted action towards combatting existing circumstances with a remedy that was never failing.

When the goods are as advertised, a genuine hammer it-in-boost is bound to be effective. A booster's club will accomplish much. Let the outside world know what we have to offer. Get together and debate the subject. Someone must take the initiative. Why not at once? Thousands are rushing to the west this spring. What percentage are we figuring on? To be honest, 00.00. And all because many of our so-called business men have adopted an incongruous now-I-lay-me-down-to-die attitude. Oh, it's a fact; and it won't hurt you to be told either.

The letter over the signature of C. F. Nelson in last week's Review hit the mark just proper. It is true, as he says, "that if we want outside help we must to some extent help ourselves," and he sees "no reason why the residents of Sandon, Three Forks, New Denver, Silverton, Slocan, Roseberry and Nakusp could not band themselves together to promote the best interests of the whole district." Charlie Nelson stands ready to help all he can. Same here. Let us hear from you.

With the advent of Spring the temperature of the Cobalt mining district is rising. Before long it will be at fever heat. Each issue of the Official Gazette contains the announcement of the incorporation of new companies, each company being capitalized at several millions. It is really surprising to discover that Canada contains so many millionaires. Young fellows who have never been suspected of having money enough to take their girl to the theatre, suddenly blossom forth in the Official Gazette as Cobalt millionaires. Already the millions set forth in these amounts would pay off all the national debts of Europe. But unfortunately it is mostly wind and paper. If the entire Cobalt district were a solid mass of silver it would not pay dividends on all these imaginary millions.

A petition is now being circulated which when full will be forwarded to Wm. Hunter, M.P.P. The petition calls for a special appropriation from the provincial treasury for completing the wagon road through to New Denver siding, and it is being signed by every resident in the district. At the present time it is impossible to get through to New Denver with stock. The only means of transportation is the railway, as no trail or wagon road exists below Three Forks, and the present conditions are such that business men and ranchers are most unfavorably handicapped. To foster our local industries it is absolutely essential that a trunk road be established. Cut off as we have been from doing business with our neighboring towns, we have seen carloads of vegetables arriving from outside points which could well be supplied by the local ranchers. With the road completed from the Lake to Sandon, ranchers could easily make the round trip in any weather in three hours, as against a two days' trip under existing conditions. With such an easy grade for the completion of the five miles of road in which no rock work figures, it appears to us absurd that the claims of the people were not asserted before. We have every confidence in the ability and aggressiveness of our new member to press for this appropriation, which when the road is completed will confer a boon upon the district which will be greatly appreciated by all the towns in the Slocan.

Coming up from Slocan City and Silverton by the morning boat to New Denver, passengers could do business with Three Forks and Sandon and return the same day. Business men of Sandon and Three Forks with banking and other business to attend to at the lake could run down in an hour as against a days' trip now, and families here would be able to enjoy a drive out as often as desired.

We look for seeing the road completed in the coming summer. In the meantime boost for the Slocan and tickle our member up with a few more petitions. It's time the Slocan got a portion of what is coming to it.

Knight errant of a century that knows no romance, the prospector hits the lone trail for the tall uncut. Razorless, he perforce must grow a beard. Persecuted by the ubiquitus mosquito, suffering all the ills of exposure and privation, he eats his dough boys, smokes his twist and is content. Impelled by an urgent faith, he perserveres and fails and is forgotten, or, he finds and is famous.

Unsuccessful, he is spurned and flouted, Successful, he is fawned upon, flattered and not infrequently spoiled.

A badly regulated thirst is not unusual concomitant of the first flush of achievement. For this the one specific is a return to the bush.

But, levity apart, his country owes to the fearless, tireless prospector a surprising debt of gratitude. Were it not for his perferfid enthusiasm, Canada would not now be reaping the rich harvest of Cobalt, nor would she be taking her place among the great mineral producers of the world.

Laws are made with an eye single to the glory of greedy corporations; lobbies are vocal with the clamorings of special interests. The broker, the banker, the miner and the operator howl to the legislative moon when all things do not fit their fancies.

But the prospector, unprotected, uncaring mayhap, is silent. He cannot organize, he does not strike. He dies strange deaths in lone lands. Hymned by no bard, unsung of poets, the prospector is girding up his loins against another season of peril and flap-jacks. We wish him God-speed! Prosperity be with him! Prosit!—Ex.

Late press items indicate that the government is to appeal the zinc ore decision recently rendered by the New York Board of General Appraisers. The Secretary of the treasury has given notice to this effect to the zinc ore buyers of the East. The question of the non dutiability of silicates and carbonates was undoubtedly finally settled by the appraisers, but the decision making sulphide ores duty free may be successfully assailed by the Washington authorities. To say the least, this condition is an unfortunate one for the American ore buyers who may have closed contracts for foreign ores on the understanding that the importations were to be free of duty.

WHO IS A MINING ENGINEER?

Of late the mining press has devoted considerable space to the discussion of this subject. While this discussion was participated in by competent engineers and layman throughout the world, no definite conclusion as to what or what did not constitute the necessary essentials or qualifications of a mining engineer was reached. This result was expected and therefore not disappointing. Not with a view of a revival of this discussion, but rather as an interesting answer bearing on this query, we reprint the statement of Mr. George F. Taylor M.E., made in a reply to the question asked in a Nevada City (California) court, "What constitutes a mining expert?" His reply was: "A thorough knowledge of chemistry, assaying, geology, mathematics, surveying, the connaisance of several languages and of law." The examining counsel appears to have been perfectly satisfied with this answer.—Mining Reporter.

J. M. Harris arrived back from Spokane Tuesday. He was delayed on the G N. train for 12 hours owing to an axle of a coach breaking.

Addie and Mrs. Innes left for Nelson this morning. Mr. Innes, who has been braking out of here for the past two years, is about to wear a con.'s cap.

LIQUOR LICENSE ACT.

Notice is hereby given that at the expiration of thirty days I intend to apply to the Board of License Commissioners of the Slocan License District for a transfer of my Retail Liquor License held by me for the Rosebery Hotel at Rosebery, B.C. to M. McCarthy. MRS. H. LABRASH.

A meeting of the Board of License Commissioners will be held to consider such transfer at the Court House, New Denver, on Saturday, the thirteenth day of April, 1907.

Dated at New Denver this sixth day of March, 1907.

JOHN T. BLACK,
Chief License Inspector.

Beverly of Graustark

By GEORGE BARR M'CUTCHEON, Author of "Graustark"

Copyright, 1904, by Dodd, Mead and Company

(Continued From Last Week.)

Anguish the painter became Anguish the strategist and soldier. He planned with Lorry and the ministry, advancing some of the most harebrained projects that ever encouraged discussion in a solemn conclave. The staid, cautious ministers looked upon him with wonder, but so plausible did he make his proposals appear that they were forced to consider them seriously. The old Count of Marlanx held him in great disdain and did not hesitate to expose his contempt. This did not disturb Anguish in the least, for he was as optimistic as the sunshine. His plan for the recapture of Gabriel was ridiculously improbable, but it was afterward seen that had it been attempted much distress and delay might actually have been avoided.

Yetive and Beverly, with Dagmar and the baby, made merry while the men were in council. Their mornings were spent in the shady park surrounding the castle, their afternoons in driving, riding and walking. Oftentimes the princess was barred from these simple pleasures by the exigencies of her position. She was obliged to grant audiences, observe certain customs of state, attend to the charities that came directly under her supervision and confer with the nobles on affairs of weight and importance. Beverly delighted in the throne room and the underground passages. They signified more to her than all the rest. She was shown the room in which Lorry had foiled the Viennese who once tried to abduct Yetive. The dungeon where Gabriel spent his first days of confinement, the tower in which Lorry had been held a prisoner and the monastery in the clouds were all places of unusual interest to her.

Some of the people of the city began to recognize the fair American girl who was a guest in the castle, and a certain amount of homage was paid to her. When she rode or drove in the streets, with her attendant soldiers, the people bowed as deeply and as respectfully as they did to the princess herself, and Beverly was just as grand and gracious as if she had been born with a scepter in her hand.

The soft moonlight nights charmed her with a sense of rapture never known before. With the castle brilliantly illuminated, the halls and drawing rooms filled with gay courtiers, the harpists at their posts, the military band playing in the parade ground, the balconies and porches offering their most inviting allurements, it is no wonder that Beverly was entranced. War had no terrors for her. If she thought of it at all it was with the fear that it might disturb the dream into which she had fallen. True, there was little or nothing to distress the most timid in these first days. The controversy between the principalities was at a standstill, although there was not an hour in which preparations for the worst were neglected. To Beverly Calhoun it meant little when sentiment was laid aside. To Yetive and her people this probable war with Dawsbergen meant everything.

Dangloss, going back and forth between Edelweiss and the frontier north of Ganlook, where the best of the police and secret service watched with the sleepless eyes of the lynx, brought unsettling news to the ministry. Axphain troops were engaged in the annual maneuvers just across the border in their own territory. Usually these were held in the plains near the capital, and there was a sinister significance in the fact that this year they were being carried on in the rough southern extremity of the principality, within a day's march of the Graustark line, fully two months earlier than usual. The doughty baron reported that foot, horse and artillery were engaged in the drills, and that fully 8,000 men were massed in the south of Axphain. The fortifications of Ganlook, Labbot and other towns in northern Graustark were strengthened with almost the same care as those in the south, where conflict with Dawsbergen might first be expected. General Marlanx and his staff rested neither day nor night. The army of Graustark was ready. Underneath the castle's gay exterior there smoldered the fire of battle, the tremor of defiance.

Late one afternoon Beverly Calhoun and Mrs. Anguish drove up in state to the Tower, wherein sat Dangloss and his watchdogs. The scowl left his face as far as nature would permit, and he welcomed the ladies warmly.

"I came to ask about my friend, the goat hunter," said Beverly, her cheeks a trifle rosier than usual.

"He is far from an amiable person, your highness," said the officer. When discussing Baldos he never failed to address Beverly as "your highness." "The fever is gone, and he is able to walk without much pain, but he is as restless as a witch. Following instructions, I have not questioned him concerning his plans, but I fancy he is eager to return to the hills."

"What did he say when you gave him my message?" asked Beverly.

"Which one, your highness?" asked he, with tantalizing density.

"Why, the suggestion that he should come to Edelweiss for better treatment," retorted Beverly severely.

"He said he was extremely grateful for your kind offices, but he did not deem it advisable to come to this city. He requested me to thank you in his behalf and to tell you that he will never forget what you have done for him."

"And he refuses to come to Edelweiss?" irritably demanded Beverly.

"Yes, your highness. You see, he still regards himself with disfavor, being a fugitive. It is hardly fair to blame him for respecting the security of the hills."

"I hoped that I might induce him to give up his old life and engage in something perfectly honest, although, mind you, Baron Dangloss, I do not question his integrity in the least. He should have a chance to prove himself worthy, that's all. This morning I petitioned Count Marlanx to give him a place in the castle guard."

"My dear Miss Calhoun, the princess has"— began the captain.

"Her highness has sanctioned the request," interrupted she.

"And the count has promised to discover a vacancy," said Dagmar, with a smile that the baron understood perfectly well.

"This is the first time on record that old Marlanx has ever done anything to oblige a soul save himself. It is wonderful, Miss Calhoun. What spell do you Americans cast over rock and metal that they become as sand in your fingers?" said the baron, admiration and wonder in his eyes.

"You dear old flatterer!" cried Beverly so warmly that he caught his breath.

"I believe that you can conquer even that stubborn fellow in Ganlook," he said, fumbling with his glasses. "He is the most obstinate being I know, and yet in ten minutes you could bring him to terms, I am sure. He could not resist you."

"He still thinks I am the princess?"

"He does and swears by you."

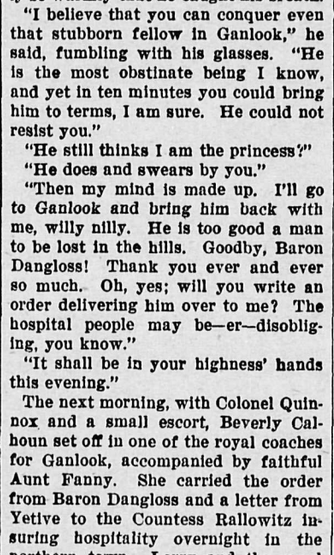
"Then my mind is made up. I'll go to Ganlook and bring him back with me, willy nilly. He is too good a man to be lost in the hills. Goodby, Baron Dangloss! Thank you ever and ever so much. Oh, yes; will you write an order delivering him over to me? The hospital people may be—er—disobliging, you know."

"It shall be in your highness' hands this evening."

The next morning, with Colonel Quinnox and a small escort, Beverly Calhoun set off in one of the royal coaches for Ganlook, accompanied by faithful Aunt Fanny. She carried the order from Baron Dangloss and a letter from Yetive to the Countess Rallowitz insuring hospitality overnight in the northern town. Lorry and the royal household entered merrily into her project, and she went away with the godspeeds of all. The Iron Count himself rode beside her coach to the city gates, an unheard of condescension.

"Now, you'll be sure to find a nice place for him in the castle guard, won't you, Count Marlanx?" she said at the parting, her hopes as fresh as the daisy in the dew, her confidence supreme. The count promised faithfully, even eagerly. Colonel Quinnox, trained as he was in the diplomacy of silence, could scarcely conceal his astonishment at the conquest of the hard old warrior.

Although the afternoon was well spent before Beverly reached Ganlook, she was resolved to visit the obdurate patient at once, relying upon her resourcefulness to secure his promise to start with her for Edelweiss on the following morning. The coach delivered her at the hospital door in grand style. When the visitor was ushered into the snug little anteroom of the governor's office her heart was throbbing and her composure was undergoing a most unusual strain. It annoyed her to discover that the approaching contact with a humble goat hunter was giving her such unmistakable symptoms of perturbation.



He dropped to his knee.

From an upstairs window in the hospital the convalescent but unhappy patient witnessed her approach and arrival. His sore, lonely heart gave a bound of joy, for the days had seemed long since her departure.

He had had time to think during these days too. Turning over in his mind all of the details in connection with their meeting and their subsequent intercourse, it began to dawn upon him that she might not be what she assumed to be. Doubts assailed him, suspicions grew into amazing forms of certainty. There were times when he laughed sardonically at himself for being taken in by this strange but charming young woman, but through it all his heart and mind were being drawn more and more fervently toward her. More than once he called himself a fool and more than once he dreamed foolish dreams of her, princess or not. Of one thing he was sure—he had come to love the adventure for the sake of what it promised, and there was no bitterness beneath his suspicions.

Arrayed in clean linen and presentable clothes, pale from indoor confinement and fever, but once more the straight and strong cavalier of the hills, he hastened into her presence when the summons came for him to descend. He dropped to his knee and kissed her hand, determined to play the game notwithstanding his doubts. As he arose she glanced for a fitting second into his dark eyes, and her own long lashes drooped.

"Your highness!" he said gratefully.

"How well and strong you look!" she said hurriedly. "Some of the tan is gone, but you look as though you had never been ill. Are you quite recovered?"

"They say I am as good as new," he smilingly answered. "A trifle weak and uncertain in my lower extremities, but a few days of exercise in the mountains will overcome all that. Is all well with you and Graustark? They will give me no news here, by whose order I do not know."

"Turn about is fair play, sir. It is a well established fact that you will give them no news. Yes, all is well with me and mine. Were you beginning to think that I had deserted you? It has been two weeks, hasn't it?"

"Ah, your highness, I realize that you have had much more important things to do than to think of poor Baldos. I am exceedingly grateful for this sign of interest in my welfare. Your visit is the brightest experience of my life."

"Be seated!" she cried suddenly. "You are too ill to stand!"

(To Be Continued.)

MIDDIES IN THE MAKING.

Our Naval Cadets Learn to Splice Ropes, Furl Sails, Etc.

It is probably not generally known how the United States government trains the youth upon whose shoulders will rest the responsibility of maintaining the high standard of the navy. His apprenticeship, according to Leslie's Weekly, is not unlike that of any other young man learning a trade, the fundamental principle being the proper kind of tools and when and how to use them.

A midshipman's tools, so to speak, are ships, thus rendering a thorough knowledge of seamanship an essential part of the training. This begins with lessons in splicing hemp and wire rope, after which the young men are given practice in handling sails on the indoor mast in the seamanship building, which is an exact counterpart of the mizzenmast of the training ship Severn and is seventy-two feet in height.

The midshipmen go aloft, furl, reef and set sails, etc.—in fact, go through the entire seamanship drill. A net is spread at the foot of the mast for protection, as a fall on the concrete floor would be far more serious than on the deck of a ship. Accidents, however, are infrequent.

Drills on the Severn begin early in the spring and continue throughout the cruise, which lasts from June until September. The midshipman thus becomes accustomed to ship life. The work is hard and the discipline severe during these drills. There is little tendency to shirk duty, and the future admirals do everything on shipboard, on deck and aloft, even to clearing up the deck and stowing away the ropes.

From a picturesque point of view seamanship practice on the Severn surpasses all other similar exercises. It seems that on shipboard the sense of the reality of the thing is ever present, and one accustomed to witnessing these drills notices that on the deck of the old Severn the middies are more active, more in earnest, and the manner in which they climb and swing around the rigging does credit to an old sailor.

Each man starts in with a practical seaman's duties and as he continues his course is advanced to the duties of the petty officers and later to those of the junior commissioned officers.

Our Bigness.

Bigness is said to be a quality which appeals especially to Americans. However that may be, a purely scientific interest justifies the spreading of information contained in a recent bulletin of the United States geological survey about the size of the United States. The area of the United States proper, exclusive of Alaska, island dependencies and the Panama strip, is given as 3,026,789 square miles. The absence hitherto of an official standard resulted in a discrepancy between the computations of the census bureau and the general land office. A conference was called between these departments and the geological survey, and the bulletin of the geological survey is the result.—Youth's Companion.

The Table Top Cold.

"You have, madam," said the physician, "what I call a table top cold."

"What is a table top cold?" the lady asked.

"It is a cold brought on by marble tops in the late fall and winter. You ladies always wear short sleeves, and you always lean your bare arms on the icy surface of marble tables. This contact sends a chill all through you—a chill that you disregard. But in the morning you awake with a heavy cold.

"Marble table tops in the winter should be covered with a cloth if they are going to be leaned on. Then the table top cold would disappear."—New Orleans Times-Democrat.

Real Estate In Korea.

One of the most astonishing regulations has been made regarding the transfer of real estate in Korea. No one is to be allowed to sell or buy real estate except by permission of the governor. This is apparently a move on the part of the Japanese to prevent the selling of any land in Korea except to people that they approve, for the governors are, of course, under the Japanese advisers. It makes no difference that foreigners have as good a right to buy land as the Japanese. The matter will have to be tested in the courts before the powers will allow their citizens to be curtailed in their privileges in the peninsula.—Korea News.

A Plague of Malaria.

The excessive prevalence of malaria in Greece is engaging the attention of English physicists. It is said to be checking the development of rural life and is a very serious thing for the nation. Out of a population of 2,500,000 there were 250,000 cases of malaria annually, and the deaths were about 1,760. Last year the number of cases increased to 960,000 and the deaths to 5,916. Professor Savas of the University of Athens and physician to King George is initiating a movement to deal with the plague.

The Mark That Tells

Trade marked thus in a variety of styles, fabrics and prices for women, men and children. Form Fitted. Dealers are authorized to replace instantly and at our cost, any Pen-Angle garment faulty in material or making. 206

Pen-Angle trademark (in red) on every Pen-Angle garment, tells you it will fit and won't shrink,—your own dealer so guarantees it. Underwear thus trademarked is softer, warmer, more flexible, better wearing.

BETTER UNDERWEAR

COVERED WITH BOILS!

HOW BILEANS PURIFY THE BLOOD

Spring pimples, boils, skin rashes and eruptions are just now rampant. The most scientific corrective and blood purifier is Bileans, the herbal remedy. Mr. Thos. Hesselwood, an employee of the Consumers' Gas Co., Toronto, says: "Bileans are the best blood purifier and liver corrective I have ever met with. Pimples and boils broke out all over my neck. My blood seemed absolutely filled with impurities and poisons. My liver was disordered, too, and I was dull, weak and ailing. Bileans purified my blood and cured the boils and pimples; they also toned up my system—gave me vim and energy, and filled me with life and vigor!"

Reader, Bileans can do the same for you! All druggists and stores sell them at 50 cents a box, or from Bilean Co., Toronto, for price. 6 boxes for $2.50. Send one cent stamp for sample box.

Price of Platinum.

Platinum, ounce for ounce, is now worth more than half as much again as gold, while the demand for platinum, like the demand for other metals, has increased. There has been talk of an export duty on the metal produced in Russia, and a rumor that such a duty was about to be imposed was given credit for causing the recent sharp advance in the price of the metal; but the export tax plan, it is reported, has been definitely abandoned, and the Russian government will make special inducements to encourage prospecting. French investors are heavily interested in the industry. The largest producer and also an extensive buyer of crude platinum in the Urals is a French company operating a large refinery in Paris. It should be noted that the imports of platinum into the United States, which is a large consumer, during 1905, were valued at $2,173,263, as against $1,879,155 in 1904, an increase in value of $294,108. Considering the increased demand for platinum, the gain in importation is slight, but if the high price and scarcity of the metal be taken into account the wonder is that there was not a large decrease in the quantity imported.—Industrial World.

WEAK AND WORN OUT.

Dr. Williams' Pink Pills Give New Strength to Overworked Women.

The life of a domestic is a hard one. She toils from early morning till late at night; her work is never done. Often she is too busy to get out of doors for a breath of fresh air. Unless her blood is kept rich and pure this close confinement wears on her health. Her strength will fail; she may lose her appetite, become pale and dyspeptic. In fact she is in danger of a general breakdown. Such was the condition of Miss Marie Anne Fleury, of Ste. Anne de la Perade, Que., before she used Dr. Williams' Pink Pills. She says: "For a number of years I have been a servant. Up to a year ago I always enjoyed the best of health, but suddenly I was seized with pains in my side, my appetite left me, I became dyspeptic and lost all strength. I consulted a doctor who told me I was suffering from general debility. I was forced to stop work and for three months I followed the doctor's treatment, but without benefit. I was advised to try Dr. Williams' Pink Pills, and as I had often read of the cases they cured, I decided to do so. I only took eight boxes before I was cured and today I am stronger than I ever was. My digestion is good and I can now go about my work without fatigue. I owe a debt of gratitude to Dr. Williams' Pink Pills for what they have done for me and I strongly advise other weak sickly girls to give them a trial."

Miss Fleury's case is one of many that Dr. Williams' Pink Pills have cured after doctors' help had failed. The success of these pills lies in the fact that they strike right at the root of the trouble—the blood. Other medicines simply act on the symptoms of the trouble—and may relieve, but they do not cure. Dr. Williams' Pink Pills make new rich blood—that is why they cure dyspepsia, rheumatism, anaemia, heart palpitation, headache, backache and the ills of women; all these are caused by bad blood—Dr. Williams' Pink Pills cure them all because they make new blood. For sale at druggists or by mail at 50 cents a box or six boxes for $2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

A group of workmen were arguing during the dinner hour. A deadlock had been reached, when one of the men on the losing side turned to a mate who had remained silent during the whole of the debate.

"'Ere, Bill," he said, "you're pretty good at a argyment. Wot's your opinion?"

"I ain't a-going to say," said Bill. "I thrashed the matter out afore with Dick Grey."

"Ah!" said the other, artfully, hoping to entice him into the fray, "and what did you arrive at?"

"Well, e-venchually," said Bill, "Dick 'e arrived at the 'orspital an' I arrived at the perlice station!"—Tit-Bits.

"THE DESIGNER."

The early spring number of "The Designer" has a useful and interesting array of household matter and fiction. The first fifty pages are mainly devoted to the display and description of gowns designed for spring and summer wear, and to the illustration of the accessories that go with them. The end of the book is reserved for articles relating to household affairs, among which are the three sections of matter contributed by the readers of "The Designer" containing many practical bits of advice about children, homes and wage-earning. Simple entertainments, suitable for little home evening affairs, are always given in "The Designer," and in the March number some verse suitable for recitation is included. The Puzzle pages, the Fashion Notes for Men, the practical advice about how to make and keep oneself beautiful, the lectures by a florist on how to grow flowers—all regular departments of the magazine—are full of especial interest this month.

The Fiction is made a feature in the March number. A continued story by Miles Bradford, author of "Carlotta and I," is begun, entitled "Economy Farm." Also, Edith Parker Johnson, now a resident of Korea, has contributed an interesting article called "An American Garden in Korea." Besides these, there is a story by Edwin L. Sabin and a particularly graceful little poem of Minna Irving's.

A Sour Stomach and a Sour Temper—travel hand in hand and are the precursors of mental and physical wreck. Nine hundred and ninety-nine times in a thousand food ferment (indigestion) is the cause. Dr. Von Stan's Pineapple Tablets keep the stomach sweet — aid digestion—keep the nerve centres well balanced — they're nature's panacea — pleasant and harmless. 35 cents.—88

She—I'm sorry you lost your temper over the fried steak this morning.

He—But it wasn't fit to eat.

She—I know, dear, but you must consider the consequences. You made cook very angry, and she may decide to put us on bread and water.—Baltimore American.

Minard's Liniment Cures Diphtheria

Don't you believe in evolution?" asked the scientific man.

"Certainly," answered Miss Cayenne. "No change that centuries bring about in natural history can be more remarkable than that which a woman undergoes in a single day as she progresses from curl papers to evening gowns."—Washington Star.

Dear Mother

Your little ones are a constant care in Fall and Winter weather. They will catch cold. Do you know about Shiloh's Consumption Cure, the Lung Tonic, and what it has done for so many? It is said to be the only reliable remedy for all diseases of the air passages in children. It is absolutely harmless and pleasant to take. It is guaranteed to cure or your money is returned. The price is 25c. per bottle, and all dealers in medicine sell 314

SHILOH

This remedy should be in every household.

C. E. BROOKS, 3619 Brooks' Bldg., MARSHALL, MICH

EXCITED NERVES, TWITCHING MUSCLES

System Exhausted by Worry and Loss of Sleep--Perfect Health the Result of Using

Dr. Chase's Nerve Food.

Such cures as this make it impossible to doubt the restorative influence of Dr. Chase's Nerve Food.

Mrs. E. J. Vanderburgh, of Eastern Welland avenue, St. Catharines, Ont., states: "For twenty-one years I was badly afflicted with heart trouble, nervousness and cramps in the limbs, also twitching of the muscles and nervous headaches. I became weak, debilitated and emaciated. My condition was distressing and I was made worse through worry and loss of sleep.

"I tried a hundred remedies in vain and reading about Dr. Chase's Nerve Food I decided to try it. After having used half a dozen boxes of this preparation my old trouble had entirely vanished and I was enjoying better health than I had since girlhood. I am now past middle life and am in perfect health. I would not take worlds today and go back to my former state."

There is more or less mystery and doubt as to the specific action of many drugs, but it is positively and definitely known that iron forms new red corpuscles in the blood, or, in other words, makes the blood rich and nourishing.

But iron alone cannot be taken into a delicate stomach. The great secret of the success of Dr. Chase's Nerve Food is in the way iron is combined with certain other restoratives so as to make a preparation that can be used with the greatest benefit by even the most weak and delicate person.

Dr. Chase's Nerve Food is also slightly laxative as well as tonic in influence, and while building up the system insures the regular and healthful action of the digestive, filtering and excretory systems.

If you would enrich the blood, strengthen the nerves and replace weakness and disease with health and vigor use Dr. Chase's Nerve Food; 50 cents a box, 6 boxes for $2.50, at all dealers, or Edmanson, Bates & Co., Toronto.

Too Early.

Pater (at 2 a. m.)—Oh, drat the child!

Mater—You must expect babies to cry when they are teething.

Pater—This one's been crying ever since he began hairing—Boston Transcript.

A Pill for Generous Eaters.—There are many persons of healthy appetite and poor digestion who, after a hearty meal, are subject to much suffering. The food of which they have partaken lies like lead in their stomachs. Headache, depression, a smothering feeling follow. One so afflicted is unfit for business or work of any kind. In this condition Parmelee's Vegetable Pills will bring relief. They will assist the assimilation of the ailment, and used according to direction will restore healthy digestion.

A Grand Old Walker.

Professor Addison Ballard, who for many years occupied the chair of logic in New York university, is an example of the power of exercise in promoting longevity. He is eighty-five years old and is still to be seen around Pittsfield, Mass., where he now lives, taking long walks, with a free, swinging stride which gives many younger men some trouble in keeping pace with him. When he was at University Heights he gave several courses in downtown schools of New York university, at Washington Square, and it was his daily practice to walk from one class-room to the other, some eight miles distant. No student was ever known to share the walk, though many were invited to do so.—New York Tribune.

Eighty Years Old—Catarrh Fifty Years. Dr. Agnew's Catarrhal Powder cured him. Want any stronger evidence of the power of this wonderful remedy over this universal disease? Want the truth of the case confirmed? Write George Lewis, Shamokin, Pa. He says: "I look upon my cure as a miracle." It relieves in ten minutes.—89.

"Lady," began the wanderer, "kin I chop some wood fur you."

"No, thank you," replied the up-to-date housewife; "we cook and heat entirely by electricity."

"Nothin' I kin do to git a bite to eat?"

"Yes. If you care to peel the shocks from the electric wires I'll allow you to eat the currents."—Harper's Weekly.

"Riches has wings." Don't believe it; if they had they'd fly our way occasionally, if only by accident.

"And why didn't you keep your housemaid, Frau Roth?"

"Well, she arrived with a sewing machine, a camera, a typewriter, a portable darkroom, motor bicycle, gramophone, bath, and health exerciser to say nothing of her trunks. That was too much for our small house."—Meggendorfer Blatter.

Minard's Liniment Cures Colds, Etc.

At the commencement of a geography lesson the master of a small school asked one of his pupils to tell him of what the earth consists and was promptly answered, "Land and water."

He then varied the question slightly, that the fact might be impressed on the boy's mind, and asked:

"What, then, do land and water make?" to which came the immediate response:

"Mud."—Chums.

EASTLAKE STEEL SHINGLES

WRITE FOR PRICES METALLIC ROOFING CO. LIMITED WINNIPEG

Nurses' and Mothers' Treasure

—safest regulator for baby. Prevents colic and vomiting—gives healthful rest—cures diarrhoea without the harmful effects of medicines containing opium or other injurious drugs. 42

Cures Diarrhoea 25c.—at drug-stores. National Drug & Chemical Co., Limited, Montreal.

Medicine Made for Mothers use JOHNSON'S ANODYNE LINIMENT

For Internal and External use. Cures croup, colic, cramps, coughs, sore throat, burns, bruises, bites and any soreness. 25 and 50 cts. At all druggists. I. S. JOHNSON & CO., Boston, Mass.

Get Your Roofs Shingled Right

It's Less Money And Less Work

Tools A-Plenty

You can put on a roof that will last a hundred years and be the right kind of a roof every minute. Or you can put on a ten-year roof that will probably leak after the first rain hits it, and keep leaking till it is rotted away.

Either roof will cost you about the same in money at the start.

But the "Oshawa"-shingled roof will be FIRE-PROOF—literally; and wind-proof—actually; and lightning-proof—positively. That's the hundred-year roof!

And that "Oshawa"-shingled roof will be weather-proof for a century. We'll GUARANTEE in every way for a quarter-century—from now till Nineteen-Thirty-Two.

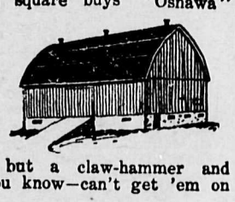
Guaranteed in writing for 25 years—and you needn't ever paint it, even! That's saying something, isn't it?

What would your mill-man say if you asked him to guarantee cedar shingles for even ten years? He certainly would make remarks!

And even the best cedar-shingled roof will be leaking badly inside of ten years. Seven out of ten of them leak the first time it rains. No wood-shingled roof is fire-proof for a minute, and the first high wind that catches a loose shingle—whoosh! goes half your shingled roof over into the next township.

Yet cedar shingles cost you just about the price of these guaranteed "Oshawa" Shingles—28-guage toughened steel, double galvanized—good for a century, guaranteed in writing till 1932,—fire-and-wind-and-weather-proof and lightning-proof.

Four-dollars-and-a-half a square buys "Oshawa" Galvanized Steel Shingles—ten feet by ten feet. Compare that with the present price of cedar shingles—how does it strike you?



And you can put on these "Oshawa" Galvanized Steel Shingles yourself, easily,—with no tools but a claw-hammer and snips. Simplest thing you know—can't get 'em on wrong.

"Oshawa" Shingles lock on all four sides—whole roof is practically one sheet of double-galvanized steel, that never needs painting.

"Oshawa" Galvanized Steel Shingles are GUARANTEED in every way for Twenty-Five Years Ought to Last a Century

And GUARANTEED—don't overlook that. Guaranteed in writing, over the seal of a company with a quarter-million capital,—guaranteed in plain English, without any ifs or buts, for 25 long years.

That's the argument in a nutshell—cost the same as wood-shingles; fire-proof, water-proof, rust-proof, lightning-proof; easier to put on; and GUARANTEED. That's the "Oshawa" proposition! Tell us the measurement of any roof, and we'll tell you exactly what it will cost to roof it with less work and for less money.

Plenty of facts that concern your pocket-book come to you as soon as you ask for our free book, "Roofing Right." A post card will do to ask on.

Why don't you ask now?

TORONTO AND WINNIPEG

THE GOVERNMENT AND ZAM-BUK

SURVEY OUT FROM FORT WILLIAM TAKES A SUPPLY OF THIS USEFUL BALM.

Zam-Buk, the favorite household balm and salve, is now adopted as "The Doctor" by leading parties engaged in surveying various parts of the Dominion lands.

Mr. Henry Hall, writing from Fort William, says: "Having proved how beneficial Zam-Buk is in cases of cuts, skin injuries and diseases, I determined to keep a supply handy. Being engaged to go on a survey, I thought it would be a most useful thing to take along. I obtained a supply in Fort William and very well it was I did so. I may say that pretty nearly every day it was called into requisition by one or other of the party for cuts, bruises, burns, or some injury or other. It is wonderful how quickly Zam-Buk takes the soreness out of cuts, burns, bruises and injuries; and on our survey it earned golden opinions from all who had occasion to try it. I have found it very fine for skin disease, and I can strongly recommend it as a household balm."

Mr. Lascelles Scott, one of the leading Government analysts, says: "I have no hesitation in certifying the entire purity of Zam-Buk, which in my opinion is excellently adapted for skin injuries and diseases." Zam-Buk cures cuts, scalds, burns, bruises, eczema, scalp sores, ringworm, ulcers, abscesses, chapped places. Spring pimples, blood poison, chronic abscesses, etc. As an embrocation it relieves rheumatism, neuralgia and sciatica. All druggists and stores sell at 50c. a box, or from Zam-Buk Co., Toronto, for price. 6 boxes sent for $2.50. Send 1c stamp and we will mail you free sample box.

Popular Air.

Firstborn—"I pulled the governor's leg to the tune of $100 this morning."

Second Son—"Good! By the way, would you mind teaching me the tune?"

"That dog I bought of you yesterday turns out to be a ferocious animal. He's bitten a lump out of my boy's leg."

"Well, sir," replied the dog fancier, "didn't I tell you when you bought 'im that he was very fond of children?"—Tit-Bits.

Getting Ready.

"It's just as well to be prepared for that war with Japan. At least that's what our people think at home."

"But what sort of preparation can they make?"

"I've just had a letter from my wife and she writes that the Winfield Scott Light Guards unanimously disbanded Saturday night."—Cleveland Plain Dealer.

HEALTHY BABIES.

Healthy babies are good babies—it is only the sick child that cries all the time. Mothers, if you want to see your little ones smiling and happy give them Baby's Own Tablets—there is a smile in every dose. The Tablets cure all the little ailments of childhood arising out of a disordered condition of the stomach or bowels. They are good for all babies and are sold under the guarantee of a government analyst to contain no opiates or harmful drugs. Mrs. F. D. Kirk, Dumfries, N. S., says: "I always use Baby's Own Tablets for the ailments of my little ones and find them a splendid medicine. A few doses always restores them to perfect health. I would not be without the Tablets in the house." The tablets are sold by druggists or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Slaughtering Robins.

In Central Tennessee are large tracts of cedars, the berries of which serve to attract myriads of robins in the winter. One small hamlet in this region sends to market annually enough robins to return $500 at five cents a dozen, equal to 120,000 birds. They are killed at night by torchlight and with sticks.

The Family Physician

The best medicines in the world cannot take the place of the family physician. Consult him early when taken ill. If the trouble is with your throat, bronchial tubes, or lungs, ask him about taking Ayer's Cherry Pectoral. Then take it or not, as he says.

Ayer's We publish our formulas. We banish alcohol from our medicines. We urge you to consult your doctor

Bilious attacks, sick-headaches, indigestion, constipation, dizzy spells—these are some of the results of an inactive liver. Ask your doctor if he endorses Ayer's Pills in these cases. The dose is small, one pill at bedtime.

Made by the J. C. Ayer Co., Lowell, Mass.

Canadian Honored.

The Canadian Gazette has the following to say of the recent distinction conferred upon Dr. Robert Bell:

There is something peculiarly gratifying to Canadian pride in the distinction conferred upon Dr. Robert Bell, chief geologist of the Canadian survey, by the American Geographical society. Never before has the Cullum medal been conferred upon a geographer who was not a citizen of the United States, and Dr. Bell is thus doubly honored, for only last year he received the Patron's or King's gold medal of the Royal Geographical society. Dr. Bell's name is a household word with Canadians. His surveys and explorations, extending 1,000 miles north of the United States' boundary, have removed from the maps of the Canadian hinterland its former vacant appearance, and form the subject of a great many maps published by the geographical survey of Canada in the last five the brotherhood of science that the extent and value of Dr. Bell's work during the last half century should thus receive spontaneous recognition at the hands of the great geographical societies.

DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

A Single Brain.

A prominent lawyer who formerly practiced at the bar of Kansas City tells of a funny incident in a court there during a trial in which a certain young doctor was called as a witness.

Counsel for the other side, in cross-examining the youthful medico, gave utterance to several sarcastic remarks tending to throw doubt upon the ability of so young a man.

One of the questions was: "You are entirely familiar with the symptoms of concussion of the brain?"

"I am."

"Then," continued the cross-examiner, "suppose my learned friend, Mr. Taylor, and myself were to bang our heads together, should we get concussion of the brain?"

"Your learned friend, Mr. Taylor, might," suggested the young physician.—Rochester Herald.

It Is a Liver Pill.—Many of the ailments that man has to contend with have their origin in a disordered liver, which is a delicate organ, peculiarly susceptible to the disturbances that come from irregular habits or lack of care in eating and drinking. This accounts for the great many liver regulators now pressed on the attention of sufferers. Of these there is none superior to Parmelee's Vegetable Pills. Their operation though gentle is effective, and the most delicate can use them.

"Hang it!" growled young Lovett to the girl of his heart, "it makes me mad every time I think of that $10 I lost today. I certainly feel as if I'd like to have somebody kick me."

"By the way, Jack," said the dear girl, dreamily, "don't you think you'd better speak to father this evening?"—Philadelphia Press.

Have You a Skin Disease? — Tetter, Salt Rheum, Scald Head, Ringworm, Eczema, Itch, Barber's Itch, Ulcers, Blotches, Chronic Erysipelas, Liver Spots, Prurigo, Psoriasis, or other eruptions of the skin—what Dr. Agnew's Ointment has done for others it can do for you—cure you. One application gives relief.—35 cents.—87

Howell—What relations exist between you and Miss Cowell?

Powell—Her father and mother.—Illustrated Bits.

Minard's Liniment Cures Garget in Cows.

"There was a sophomore," said a football coach, "who was hard up in the early fall, and pawned all his good clothes.

"A little before Thanksgiving he got a big check from home and accordingly redeemed his wardrobe.

"When he got home for the holidays his mother said she would unpack his trunk for him. The first thing his mother took out of the trunk was an overcoat, and on it was pinned the pawnbroker's ticket that he had forgotten to remove.

"Hastily grabbing the ticket, he said:

"'Hello! They must have forgotten to take this off at the Smith dance, when I left it in the cloak room.'

"A moment later his mother took out his evening trousers. They also had a ticket on them.

"'Why, Frank,' she said, 'surely you didn't leave those in the cloak room, too, did you?'—Baltimore American.

An Example.

"Dad," enquired Freddy, "what is a 'figure of speech?"

"Where's your mother?" asked "Dad," cautiously.

"She's downstairs," answered the boy.

"Well, then," began "Dad," "a figure of speech, my son, is a woman."—Harper's Weekly.

Story of Bogus Jewels.

A curious incident happened in Rome, Italy, some time ago, when a travelling trunk was lost. The owner, a music hall singer, declared that it contained valuable effects and jewelry, and she was offered $25,000 in final settlement of all claims. But the music hall star refused.

It so happened that, pending negotiations, the trunk was discovered, and the order was at once given by the officials for a list of its contents. An expert jeweller was also requisitioned, and his response was to the effect that the asserted precious diamonds were all false. The fact reached the ears of the owner, who disappeared, and has not been heard of since.

It Lays a Stilling Hand on Pain.—For pains in the joint and limbs and for rheumatic pains, neuralgia and lumbago, Dr. Thomas' Eclectric Oil is without a peer. Well rubbed in, the skin absorbs it and it quickly and permanently relieves the affected part. Its value lies in its magic property of removing pain from the body, and for that good quality it is prized.

"Oh, yes, we are engaged to be married this winter, but I fear that she has not that confidence in me that comes with perfect love."

"Why so?"

"Well, when a fellow looks back—as a fellow in love naturally will, you know—and sees her testing the diamond in her engagement ring on the window pane, don't you think he has good cause to feel a bit dubious?"—Stray Stories.

Itch, Mange, Prairie Scratches and every form of contagious Itch on human or animals cured in 30 minutes by Wolford's Sanitary Lotion.

The French church crisis is a serious thing for the priests. Turned out of their churches and homes, new occupations in which priests are forced to embark to support themselves crop out in the news from day to day. One priest took up woodturning and another decorating. Now a cure at Centeville named Perin announces himself as a breeder of canaries. He offers excellent singers for sale.

Have used MINARD'S LINIMENT for Croup; found nothing equal to it, sure cure.

CHAS. E. SHARP.

Hawkshaw, N. B., Sept. 1st., 1905.

Tom—Bess said "No," to me last night, but I don't think she really could tell why she did it.

Nell—Oh, yes, she could. She told me.

Tom—Did she?

Nell—Yes, she said she didn't think you'd take "No" for an answer.—Philadelphia Press.

Use the safe, pleasant and effectual worm killer, Mother Graves' Worm Exterminator; nothing equals it. Procure a bottle and take it home.

When Thomas A. Edison was living in Menlo Park a visitor from New York said to him one day:

"By the way, your front gate needs repairing. It was all I could do to get it open. You ought to have it trimmed, or greased, or something."

Mr. Edison laughed.

"Oh, no," he said. "Oh, no."

"Why not?" asked the visitor.

"Because," was the reply, "every one who comes through that gate pumps two buckets of water into the tank on the roof." — New Orleans Picayune.

Have you tried Holloway's Corn Cure? It has no equal for removing these troublesome excresences as many have testified who have tried it.

Ambiguous—He—I am going to kiss you when I go.

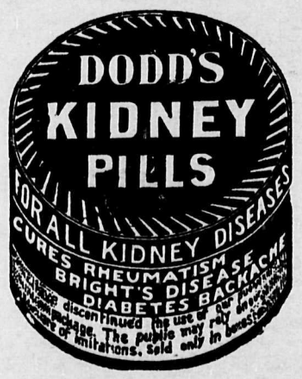
She—Leave the house at once.—Illustrated Bits.

Paul Morton, in a recent address on insurance, said of a certain proposed economy:

"That would not be an economy, but an extravagance, in the long run. It reminds me of the boy and the jam.

"'My son,' said this boy's mother, 'isn't it rather an extravagance to eat butter with that superb jam?'

"'No, ma'am, it's an economy,' the same piece of bread does for both.'"



CLERKS' HOURS IN GERMANY

In Effort to Do Away With the Long Midday Interval.

A discussion is going on in commercial circles in Germany regarding the respective merits of the English and German systems of arranging the hours of work in banks, company offices and big business houses.

It has always been customary in Germany for clerks and accountants and all workers of this class to begin work considerably earlier than is the case in England and to terminate work in the evening much later than is usual in London. Work begins in German offices, as a rule, at 8 o'clock in the morning and is frequently not concluded before 8 o'clock in the evening. Partial compensation for the early beginning and late termination is obtained by taking a two hours' pause at midday, but even with this break the total hours worked in German offices considerably exceed those in English offices, especially as a half holiday Saturday is still an exceptional arrangement in Germany.

An agitation is now going on for the abolition of the long midday interval and of the introduction of the hours of work usual in English offices. Many German business men, however, resist the innovation and persist in maintaining the old fashioned system.

Many German stockbrokers, company directors, directors of banks and captains of industry adopt a curious arrangement by which they dine at 3 o'clock in the afternoon and afterward return to their offices from 6 till 8 o'clock in the evening.

Those Germans who have practical experience of office work in England are unanimous in declaring that English clerks do just as much in six or seven hours as German clerks in nine or ten hours and advance this as a strong argument in favor of the general adoption of the English hours of work in offices.

A few of the big banks in Berlin have already got as far as a working day of eight hours, from 9 o'clock in the morning till 5 o'clock in the afternoon, with two hours less Saturday, when they close at 3 o'clock.—Berlin Letter in London Standard.

Electricity In the Home.

In a $3,000 or $4,000 house it is a very common matter to wire for electric lights, but by giving the subject a little further attention with your electrical contractor and the architect it is possible to arrange outlets for lighting socket heating devices at very little extra expense. Such receptacles would be taken off from the lighting wires in a very simple manner. The cost of operating later at lighting rates would not be large, for the reason that the electrical devices which will be used on such a circuit consume only a small amount of electricity and are generally used for only short intervals. They would comprise, for example, the chafing dish, the coffee percolator, heating pad, cigar lighter, shaving mug, curling iron, baby milk warmer, small frying pan and many others.—Cassier's Magazine.

A Bale of Cotton.

In order to see how far a certain bale of cotton was shipped before being manufactured into goods W. H. Parks, Jr., of Ennis, Tex., placed a note in a bale which was shipped in the autumn of 1905 asking the person who finally received and opened it to write to him and tell him where the cotton was used and what price was paid. The bale traveled many thousands of miles, as is shown by this letter, which Mr. Parks received recently from Reval, Russia, which is situated on the Baltic sea:

Reval, Russia, Aug. 23 (Sept. 5).

The bale of cotton in which your letter and blank memorandum were found was received at the Baltic mill, Reval, Russia, via Bremen, bought from Gebruder Fritze of that city at 6.35d. a pound.

A Tree Freak.

A rare proof of the vitality of certain trees is offered by a poplar in the village of Gunten, on the Lake of Thun. When, about twenty years ago, a fountain was placed before the post-office building of that place the builders used for a shank and girder of the water conduit a young poplar trunk which they drove into the ground and in which the pipe was inserted. After a short time the trunk began to throw out shoots, and today it is a tall tree, with heavy foliage. The water pipe is now completely overgrown, and it is a strange sight to see a jet of water stream forth from the interior of the uninjured tree.

The Sayings of Children.

In the new Sunday at Home appears an article on "The Sayings of Children," by Rance Leyton. In many stories about children much is lost because of the impossibilty of "printing the child." The following are but specimens of many sayings that are here collected: One small urchin fancied he had at last got to the other side of omnipotence. With one boot off and the other on he wailed, "Nobody—none-body—can fasten my boot." "God can," said his sister, reprovingly. "He can't," persisted the other, doggedly, "'cause it's got no buttons!"

Here is another illustration of the remorseless logic of childhood: "Why was the world drowned?" Tiny mite, triumphantly: "'Cause, teacher, it couldn't float!" "How do you suppose they filled up their time in the ark?" Little fellow, tentatively: "Fishin'." Other little fellow, scornfully, "Couldn't; there were only two worms."

A new theologian speaks in this judgment: "It isn't the bones that goes to heaven," explained one little sister to another, "it's something in the tummy!" While another solves the question of personal responsibility very easily: A clergyman's daughter, before being put in bed, uttered this somewhat remarkable prayer: "And, dear Lord, this afternoon I saw out on the cold sidewalk a poor little girl, and she had no shoes or stockings on, and—and—" (followed by a silence as though the little mind were wrestling with the problem) she concluded, "but it's none of our business, is it, God?"

To Masticate Missionaries.

A technical magazine has an interesting article by H. D. Jones on America's leadership of the world in the manufacture of false teeth. We send them to India, China, Japan, Patagonia and Polynesia. Indeed, as the writer grimly suggests, "it is not beyond the limit of possibility that cannibal feasts are conducted with the aid of American made artificial teeth."

GREAT BRITAIN'S SONS.

Illustrious Fame Roll of the Mother Country As Exemplified In Many Men of Note.

Sir Robert Peel—"Bob, you dog, if you're not Prime Minister I'll disinherit you." These words were once jocularly uttered by the father of this eminent English statesman, who was anxious from the first that his heir should make a figure in politics. How Sir Robert, step by step, won his way to the Premiership twenty-three years later cannot be told here. Suffice it to say that England has never possessed a statesman with greater talents for legislative business and finance. Personally Sir Robert was not a popular or sociable man, but he loved his work and the House of Commons, and the country is indebted to him for many reforms and much prosperity.

Sir Titus Salt.

The world admires a successful man, and more so when that man uses his gifts and prosperity to confer benefits upon his fellow-creatures. Sir Titus Salt built up the greatest manufactory of alpaca fabrics in Europe, and he also built around that manufactory a village of 900 employes. A man of thoroughly altruistic principles, Sir Titus treated his hands with great liberality, while he gave princely gifts to Bradford, which town he represented in Parliament and served as mayor.

William Cobbett.

The sturdiness and indomitable energy of Cobbett must arouse the admiration of every Englishman. From the son of a peasant he rose to be one of the most daring and powerful political writers of the early half of the nineteenth century. It is true that Cobbett had a capacity for getting himself into "hot water," but this did not deter him from fighting for any cause he considered to be right. Cobbett loved the poor as much as he loved the country and the fields, and he undoubtedly did much by his trenchant writings—which called the attention of reformers to work which required to be done—towards ameliorating the conditions of those who lived in the poverty corners of England.

Dr. Tait, Archbishop of Canterbury.

Undoubtedly the greatest achievement of this prelate was performed when he succeeded Dr. Bloomfield as Bishop of London. So vigorously did Dr. Tait labor in the metropolis that in a few years he raised no less than £350,000 for the building of churches, schools, and parsonages in the poorer districts of London. His sermons and writings in their day were read with avidity, for people recognized that they emanated from a mastermind. Dr. Tait had many difficulties to overcome, but he grappled with them in a manner which proved him to be thoroughly equal to the duties of the high offices conferred upon him.

Lord Melbourne.

Although this noted statesman never earned fame as a great orator and brilliant politician, he accomplished some solid and valuable work for the country, more especially when he became Prime Minister. He signalized his accession to his office, in 1835, by carrying a great measure of municipal reform, and the following year came the lowering of the stamp duty on newspapers and the Tithe Commutation Act, benefiting landowners and clergy alike. One of the most notable and estimable features of Lord Melbourne's career, by the by, was the delicate tact and friendly and conscientious care with which he initiated Queen Victoria into the duties of Sovereign on her accession to the throne.

Lord Dufferin.

This great Ambassador had one of the most distinguished careers among the most distinguished men of his time. Among the letters which he was entitled to write after his name were P.C., K.P., G.C.B., G.C.S.I., G.C.M.G., G.C.I.E., D.C.L., LL.D., F.R.S. The LL.D., was conferred on him by Oxford, Edinburgh and Harvard, while he was also Doctor of Oriental Learning of the Punjab University. His Lordship acted as Governor-General of Canada as well as of India and was Ambassador to Russia, Italy and France, while early in his career he filled various Under Secretaryships of State. Once, in a moment of facetiousness, he described himself as "Maid-of-all-work to British Governments."

William Charles Macready.

The efforts of this great actor were always directed towards elevating and purifying the drama. He undoubtedly did much good service for the English stage, and brought about many reforms. But Macready did more than this. He proved himself a magnificent and powerful actor and splendid manager. He produced Shakespearean plays in a most worthy fashion, and from Macready's triumphs and achievements the present school of actors have been able to learn much of histrionic value.

Sir George White.

It is fifty-three years since Sir George White entered the army, and he served soon after in the Indian Mutiny with the 27th Royal Inniskilling Fusiliers, winning a medal and clasp, while during the engagement at Charasiah he won the Victoria Cross. He took part in the great march from Kabul to Kandahar, and was at one time military secretary to the Viceroy of India. For his distinguished services in the field he was promoted to be major-general, and that by the Government of India, in which country he served as Commander-in-Chief of the Forces from 1893 to 1898.

Charles Lever.

Apart from his powers as a writer, Lever was one of the most brilliant conversationalists who ever lived, and the life and soul of any company. He was at home everywhere, knowing everybody, and a welcome guest in all societies and in all countries. And no less welcome were his books. Who has not laughed over his amusing stories of Irish life, and the adventures of "Charles O'Malley," "Arthur O'Leary," "Tom Burke of Ours," and "Jack Hinton"? Lever has been accused of giving a false idea of Irish character and life. Be that as it may, the world of literature would have been much poorer without his rollicking and always entertaining stories.

"I got a shock from a 'lectric battery terday," said the first hobo. "Gee! It's a funny kind of a feelin'; feels just like takin' a bath."

"Say," exclaimed the other one, "you must have a great memory."—Philadelphia Press.

If you want to rise in your business you must be willing to do your share, and sometimes a little more than your share, of work, and do it well.

Prudent.

"Don't you think you ought to tell father of our engagement, Bob?"

"Was that your father who has just come home?"

"Yes."

"Well, I think I will wait till he has had time to put his slippers on!"

Minard's Liniment Cures Distemper.

Lawyer (cross-examining witness)—Are you sure you didn't dream that, Mr. Ruggles? By the way, do you believe in dreams?

Witness—Not as a general thing, but I know they come true sometimes.

Lawyer—Oh, they do, do they? Can you mention a specific instance?

Witness—Yes, sir. You remember, Mr. Ketcham, you paid me $5 the other day that you had been owing me a year. Well, I had dreamed the night before that you met me on the street and paid it. I was so strongly impressed with that dream that I hunted you up the next day, you recollect, and dunned you for it.—Chicago Tribune.

Dropsy Is One Positive Sign of Kidney Disease.—Have you any of these unmistakable signs? Puffiness under the eyes? Swollen limbs? Smothering feeling? Change of the character of the urine? Exhaustion after least exertion? If you have there's dropsical tendency and you shouldn't delay an hour in putting yourself under the great South American Kidney Cure.—86

No Infraction of Rules.

As an express train was going through a station one of the passengers leaned too far out of the window, overbalanced, and fell out. He fortunately landed on a sand heap, so that he did himself no great injury, but, with torn clothes and not a few bruises, said to a porter who was standing by:

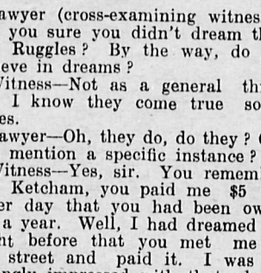
"What shall I do?"

"You're all right, mister," said the porter. "You're ticket allows you to break your journey."—Tit-Bits.

Never judge yourself by the faults of your neighbors.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam



Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

You cannot possibly have a better Cocoa than

EPPS'S

A delicious drink and a sustaining food. Fragrant, nutritious and economical. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

COCOA

Sold by Grocers and Storekeepers in ¼-lb. and ½-lb Tins.

Use for the "x"-ray.

Even such tricks as hiding jewels in hollow shoe-heels or swallowing diamonds cannot longer be depended upon to cheat the customs officials. In the French government tests of the "x"-ray detective of Alphonse le Roux, persons representing smuggling passengers have been examined without removal of clothing or any indignity except being detained a few moments before the apparatus, and so rapid is the process that 167 persons received attention in forty-five minutes. On these individuals were articles of many kinds, variously concealed. Watches were revealed in the hem of a woman's skirt, a tiny locket under a young man's tongue, watch chains and a bracelet in the coils of a woman's hair, card-cases in a man's shoes, and even buttons—proving the presence of gloves—under the clothing over a man's chest. Tried on postal packages, without breaking seals or untying strings, all kinds of articles were shown in the most innocent and unlikely places.—Philadelphia Ledger.

Bickle's Anti-Consumptive Syrup is an unparalleled remedy for colds, coughs, influenza and diseases of the throat and lungs The fame of the medicine rests upon years of successful use in eradicating these affections, and in protecting mankind from the fatal ravages of consumption, and as a neglected cold leads to consumption, one cannot be too careful to fight it in its early stages. Bickle's Syrup is the weapon, use it.

Physician's Wife—I shall soon be wanting a new evening dress, dear.

Physician—All right, my dear; I'll look over my list and find some fellow who can afford an operation for appendicitis.—Pick-Me-Up.

The German emperor's little daughter is credited with this incident. She was tired of all the old games, so said to her playmates:

"I know what we'll do. Let's play at being quite poor people—frightfully poor people, who have only one or two footmen!"

Dr. Slocum's Great Tonic and Disease Destroyer

PSYCHINE

(PRONOUNCED SI-KEEN)

Used in Thousands of Homes in Canada

THOSE WHO don't know what Psychine is and what it does are asking about it.

THOSE WHO do know what Psychine is and what it does are using it. They regard it as their best physician and friend.

THOSE WHO use it are being quickly and permanently cured of all forms of throat, chest, lung and stomach troubles. It is a scientific preparation, destroying all disease germs in the blood and system. It is a wonderful tonic and system building remedy, and is a certain cure for

COUGHS,	Bronchial Coughs,
LA GRIPPE,	Chills and Fever,
Colds,	Difficult Breathing,
Pneumonia,	General Weakness,
Bronchitis,	Female Troubles,
Catarrh,	Fickle Appetite,
Weak Voice,	Hemorrhages,
Sleeplessness,	Night Sweats,
Nervousness,	Consumption,
Malaria,	Catarrh of the Stomach.
Anaemia,	

All these diseases are serious in themselves, and if not promptly cured in the early stages are the certain forerunners of Consumption in its most terrible forms. Psychine conquers and cures Consumption, but it is much easier and safer to prevent its development by using Psychine. Here is a sample of thousands of voluntary and unsolicited statements from all over Canada:

Dr. T. A. Slocum, Limited:

Gentlemen,—I feel it my duty to advise you of the remarkable cure affected by your Psychine and Oxomulsion, which have come under my personal observation. Three men, well known to me, Albert Townsend, Hazel Hipson and John McKay, all of Shelburne County, were pronounced by the best medical men to have consumption, and to be incurable and beyond the reach of medical aid. They used Psychine and Oxomulsion and they are now in good health.

I feel it a duty I owe to suffering humanity to state these facts for the benefit of other sufferers from this terrible disease.

Yours very truly,

LEANDER McKENZIE, J.P.,
Green Harbor, N.S.

Psychine, pronounced Si-keen, is for sale at all up-to-date dealers. If your druggist or general store cannot supply you, write Dr. T. A. Slocum, Limited, 179 King Street West, Toronto.

A Natural Laxative

Inward cleansing is as necessary as outward bathing. To keep the bowels free and regular is of even greater importance than to keep the skin-pores from becoming clogged. The neglect of either invites disease. Everyone needs a natural laxative occasionally, to free the bowels of accumulated impurities For this purpose take

BEECHAM'S PILLS

the greatest boon ever offered to those who suffer from the ills that follow constipation. For over fifty years Beecham's Pills have been famous as a Stomach corrective, a Liver regulator and Bowel laxative. They never gripe nor cause pain. Powerful purgatives are dangerous. Avoid them. Use Beecham's Pills. They give relief without doing violence to any organ. Their action is in harmony with physical laws. Take them regularly and the necessity for their use becomes less frequent. They are a natural laxative and a positive cure for Constipation, Biliousness, Indigestion, Sick Headache and Dyspepsia.

LAND REGISTRY ACT.

TAKE NOTICE that an application has been made to register George Williamson as the owner in Fee Simple under a Tax Sale Deed from Alexander Lucas, Assessor of the District of Slocan, to George Williamson, bearing date the 15th day of December, A.D. 1904 of all and singular those certain parcel or tract of land and premises situate, lying and being in New Denver, in the Province of British Columbia, more particularly known and described as Lots 4, 24, 25, 26, 27 and 28, Block 43, and all of Block 84 in the town of New Denver, McGillivray's Addition (Map 557).

You and each of you are required to contest the claim of the tax purchaser within fourteen days from the date of the service of this notice upon you, and in default of a caveat or a certificate of lis pendens being filed within such period, you will be forever estopped and debarred from setting up any claim to or in respect of the said land, and I shall register George Williamson as owner thereof.

Dated at Land Registry Office, Nelson, Province of British Columbia, this 1st day of May, A.D., 1905.

NOTICE.

To Michael Penrose, or to whomsoever he may have transferred his interest in the "Young Rambler" mineral claim, situated near McGuigan, located the 3rd day of October, 1900, recorded the 17th day of October, 1900, in the Slocan Mining Division of West Kootenay District.

You are hereby notified that I have expended $102.50 in labor and improvements on the above-mentioned mineral claim, under the provisions of the Mineral Act, and if within 90 days from the date of this notice you fail or refuse to contribute your proportion of the above-mentioned sum, together with all costs of advertising, your interest in the said claim will become the property of the undersigned, under section 4 of the Mineral Act Amendment Act, 1900.

Dated at Sandon, this 27th day of November, 1906.

FRED ERICKSON.

TIMBER NOTICE.

Notice is hereby given that 30 days after date I intend to apply to the Hon. Chief Commissioner of Lands and Works for a special license to cut and carry away timber from the following described land situated on Miller creek about 4 miles from Slocan Lake, beginning at a post marked "L. S. corner," thence north 40 chains, thence east 160 chains, thence south 40 chains, thence west 160 chains to point of commencement.

Dated 20th day of March 1907.

TO WORKING MEN.

NOTICE.

Whereas at the Last Chance and Surprise mines, Chinese kitchen help is at present employed, to the exclusion of White labor.

Therefore, be it resolved that this organization, Sandon Miners' union No. 81 of the W.F. of M. reaffirming its opposition to the employment of Orientals within its jurisdiction, strongly condemns the position taken by the management of the properties in question, and counsels working men everywhere and those favorably disposed towards organized labor to be governed by this action.
