

Lieut.-Gov. Frank M. Ross (centre) declares "This stone well and truly laid" at laying of foundation stone of St. Andrew's Hall, \$240,000 Presbyterian College under construction at UBC. Presbyterian Moderator R.S.M. Kennedy (right) gave prayer of dedication. Mr. Justice A. M. Manson (left) organized fund-raising committee.

Free society requires aid to education: Grauer

Corporations and individuals should recognize that in giving financial assistance to education they are reinforcing the structure of a free society.

This was the message given by Chancellor-elect Dr. A. E. (Dal) Grauer to UBC graduates and special guests from government and business at the annual meeting of the Alumni Association last month.

"It would be unfortunate if the youth of Canada came to regard the government as the sole provider of the way to higher things," he said.

Dr. Grauer outlined plans for the UBC Capital Gifts Campaign which will seek at least \$5 millions to help finance buildings urgently needed to keep up with growths in enrolment and the demands of an expanding economy for university graduates.

"Although businesses are not responsible for education, they have the same interest as governments in seeing that an adequate supply of well educated people of all kinds come out of our universities," he said.

\$25,000,000 NOT ENOUGH

In addition to the \$5 million from the campaign, the university expects to get \$10 million in grants from the provincial government over the next ten years, \$5 million in provincial grants matching private donations and \$5 million in federal government money through the Canada Council.

"Even this (\$25 million in all) will not be enough, but it will at least let us do the main things that need to be done," he said.

Immediate needs for buildings on the UBC campus, totalling \$28,120,000, are listed below.

ALUMNI SET PACE

Dr. Grauer called on the alumni to "set the pace" for the campaign. "We know what you have already done as undergraduates in providing facilities at the University which

most other universities have obtained through other channels.

"If we alumni, knowing the need, will set the example in generous giving, I am confident that our appeal to industry and the public will succeed."

UBC, which first opened its doors in 1915, had hardly recovered from the First World War when it was hit by the depression of the 1930's and by the Second World War, he told the meeting.

SOUND BUSINESS

"As far as plant and facilities are concerned, therefore, UBC never really got established in the same fashion as most other universities. Plans for permanent buildings were abandoned in favor of temporary ones. Temporary buildings became semi-permanent.

"It is sound and accepted business practice to keep plant and facilities right up to date. The University is lagging considerably behind in this respect and has catching up to do as well as expansion to meet.

"There are, for instance, 300 army huts still in full use at the University. Permanent dormitory accommodation is most inadequate, consisting of four units housing 225 young women.

"The Faculty of Medicine, organized at the request of the people of the province through the Provincial Legislature, is still occupying huts on the campus.

"The College and Faculty of Education, which is responsible for all teacher training in the province, occupies temporary frame buildings erected in a hurry."

Congregation ceremonies to be held May 21, 22

(See pictures page 3)

More than 900 students at the University of B.C. will receive their degrees at the 42nd annual spring congregation May 21 and 22.

Degrees will be conferred by Chancellor Sherwood Lett in ceremonies commencing at 2:30 p.m. in the Armouries.

Honorary degrees will be conferred on:

Dr. Clarence M. Hincks, national consultant to the Canadian Mental Health Association, and founder of the Canadian mental health movement in Canada. He will receive an honorary Doctor of Science Degree, (D.Sc.).

RESEARCH COUNCIL SPEAKER

To receive the same degree is Dr. E. W. R. Steacie, president of the National Research Council of Canada, who has had a distinguished career as a chemist. He will be congregation speaker on May 21.

Capt. M. C. Robinson, national director of the Canadian National Institute for the Blind in Western Canada, will receive an honorary Doctor of Laws degree (LL.D.).

Capt. Robinson has participated in the organization of many rehabilitation programs. He is a past president of the Vancouver Rotary, and was president of the American Association of Workers for the Blind, Inc. He is a resident of Vancouver.

SWIFT AUTHORITY

Also to receive honorary Doctor of Laws degrees are Prof. H. J. Davis of Oxford, a leading authority on English author and satirist Jonathan Swift, and Prof. Doris B. Saunders, Associate Professor of English at the University of Manitoba.

Miss Saunders is cited for her guidance and counsel to university women through the years.

Prof. Davis will address the congregation on May 22.

Advance donations launch campaign

Two contributions totalling \$750,000 have been received as advance gifts for UBC's Capital Gifts Campaign.

Mr. and Mrs. Leon T. Koerner have given the University \$500,000 to finance the whole cost of a Faculty Centre on the campus.

The B.C. Electric Co. Ltd. has donated \$250,000 to the campaign.

"Advance gifts of this size are a happy augury for the success of the campaign," said President N. A. M. MacKenzie.

The Faculty Centre will be built on the site of the present faculty club overlooking Howe Sound and Burrard Inlet. Plans are being drawn by Prof. Fred Lasserre, head of UBC's School of Architecture.

UBC Capital Needs

Arts building (under way)	\$ 2,000,000
Medical Science building	2,500,000
Student residences	2,000,000
Addition to Chemistry building	1,100,000
Biological Sciences building	1,000,000
Commerce building	750,000
Power house and services	650,000
Fine Arts building	2,000,000
Library addition	1,000,000
International House dormitory	750,000
Engineering buildings	2,000,000
Physics addition	500,000
Forestry and Agriculture building	500,000
Home Economics addition	100,000
Additional student residences	2,000,000
Power house and services additions	1,270,000
Cafeteria and student services	500,000
Other campus services	250,000
College of Education	3,000,000
Dental College	1,500,000
Physiotherapy and Rehabilitation	500,000
Administration building	1,000,000
Law building addition	250,000
Athletic buildings	1,000,000
GRAND TOTAL	\$28,120,000

U.B.C. REPORTS

Vol. 3, No. 5

May, 1957

Vancouver 8, B.C.

Editorial

UBC goes to people

"It is yours" is the literal translation of "Tuum Est" the motto of the University of British Columbia. It is a provincial university; it belongs to the people of British Columbia.

The University is not merely a place for the citizens of British Columbia to go to get higher education, it is your university and it will come to you. UBC is firmly committed to the philosophy that education starts at birth and continues all through life. It is committed to the policy of providing educational services that will enable all who wish to do so to develop their abilities to the maximum.

The University Department of Extension under the direction of Dr. John K. Friesen serves as a channel through which the varied resources of the University are made available to everyone in the Province who wish to make use of them.

The Extension Department attempts to help both management and labor keep pace with the technological revolution going on around us. Courses are designed to help a man "do a better job or do a job better" whether it be accounting, cattle ranching, teaching, fishing, directing a pre-school centre or supervising fire prevention in a logging camp.

It is also concerned with helping people broaden their horizons and to use and enjoy the increased leisure time now available through art, music, drama, literature or community service activities.

The current annual report of the extension department points out in a few simple statistics how this job has been done in the past year. One or more short courses were conducted in 32 communities outside the Greater Vancouver area. More than 75,000 people in local groups throughout the province heard university speakers. More than 21,000 books, 14,000 films and 8,000 records were loaned out. More than 3000 people attended non-credit evening classes and more than 1300 studied credit courses by correspondence or evening class lectures.

Through art classes in Kamloops, drama classes in Prince Rupert, fisheries courses in the Queen Charlottes or municipal administration courses in Vancouver, the Extension Department is bringing the University to the people.

Letters to the editor

Name correction

Editor, UBC Reports:

Although I appreciate very much the space you gave to the Art Gallery in your last issue, I think I ought to point out that the Chapter of the IODE which contributes so much to the Gallery is the University Chapter, not the University Hill Chapter.

B. C. Binning,
Curator
Fine Arts Gallery.

Hong Kong likes UBC

Editor, UBC Reports:

I would just like to add how much I appreciate receiving "UBC Reports". It is always interesting to read of the progress of one's home University. In addition there are quite a few Hong Kong students attending UBC, and many others enquiring from me how to be accepted. UBC holds great respect in the eyes of Hong Kong students.

Incidentally, President Mackenzie just arrived a few days ago on his tour of the Far East.

Rev. W. L. Burnham,
Hong Kong.

No such person

Editor, UBC Reports:

We have "UBC Reports" addressed to Henry R. Christie, B.A.Sc., 49, R.R. 1, Fanny Bay, B.C. No such person here.

It may be in error for Robert L. Christie, our son. He is listed among missing grads, so we shall bring his dossier up to date . . .

He is employed by Geological Survey of Canada, for whom he has worked before and since graduation.

In 1954 he was geologist on an expedition to north end of Ellesmere Island, under Mr. Kingsley-Smith of England. This summer he will work in the Arctic again, with Mr. Kingsley-Smith, leaving around May 1.

He has won M.A.Sc. at University of Toronto, and is currently working toward Ph.D.

He was married in 1954 to Miss Audrey Koehler of Toronto, a graduate in Architecture at U. of T. They have a son, Michael.

Herbert R. Christie.

Editor's Note: This is the kind of letter we appreciate receiving. News of graduates is always welcome.

Drugs advance

Pharmacy developing new teaching programs

UBC's Faculty of Pharmacy, now in its eleventh year, is the youngest in Canada. It is deeply imbued with the philosophy characteristic of UBC: acceptance of responsibility for teaching, research and direct service to community. Rapid advances in all of the health sciences are creating new drugs (and greater responsibilities for pharmacists) at an ever-increasing rate. The development and expansion of hospital and health insurance schemes is putting new demands on pharmacists, particularly in the area of hospital pharmacy. Practising pharmacists need refresher courses to keep up to date in a rapidly expanding field. These are some of the problems and responsibilities of a vigorous faculty of pharmacy. In this issue of UBC Reports, Dean A. W. (Whit) Matthews tells how UBC is accepting that responsibility:

A. W. Matthews

By A. W. MATTHEWS
Dean of the Faculty of Pharmacy

The Faculty of Pharmacy's main responsibility to its professional community is to provide the minimum basic training for the practice of retail pharmacy. At least 80 per cent of the young people who will graduate in Canadian schools of pharmacy this May will soon be serving the public in neighborhood and downtown drug stores in urban centres and in the towns and villages across Canada.

Not only must the curriculum be broadly based on the sciences but, since the successful retail pharmacist must combine, in a unique manner, the duties of a professional man and the activities of a business man, there must also be emphasis on accounting methods and other aspects of commerce. In this latter respect the young faculty at UBC is in the van in the present-day trend toward greater stress in the area of pharmacy administration.

UBC's pharmacy staff also has taken an active part in developing the growing concept of the pharmacist as a consultant to the physician on drugs. Since the advent of the sulfa

drugs in 1936 our materia medica has grown and continues to grow so rapidly that the busy physician has neither the time nor the opportunity to keep abreast of the new drugs themselves, to say nothing of the various dosage forms in which each is presented, their stability, brand names, and other factors which will influence the choice of drug.

In UBC's model pharmacy, where students work under conditions simulating those of actual practice, they become familiar with a newly developed system of classifying and filing information in order that it may be produced at a moment's notice when it is required.

Hospital pharmacy important

During the relatively few years that graduates in pharmacy have been going out from UBC, the need for an organized pharmacy service in hospitals has been growing in the United States and Canada at a pace beyond the personnel resources of the profession. Nowhere is this more in evidence than in British Columbia under the BCHIS plan. This need is thrusting new responsibilities on and posing new problems for the Faculty of Pharmacy.

A new option in hospital pharmacy administration is being provided at the undergraduate level and a plan for hospital pharmacy internships in leading teaching hospitals will be initiated in June of this year. It is probable that a combination of such internships with additional class work at the graduate level will follow soon. During the period of the internship, a member of the faculty staff will collaborate with the Chief Pharmacist in the hospital in the direction of the student's program, which will include close observation and study of the administrative policies of the hospital, accounting procedures, inventory control and budget. A primary objective of such training is to provide well-trained pharmacists for other hospitals which are not equipped to handle pharmacy internships.

The Faculty of Pharmacy has an active research program in the fields of pharmaceuticals, physical pharmacy, pharmaceutical chemistry, pharmacognosy and pharmacology. Plans are well advanced for starting graduate

instruction in at least two of these fields. Support for present research is being received from the Canadian Foundation for the Advancement of Pharmacy and from the National Research Council.

A refresher course for pharmacists in practice is assisted financially by the Canadian Foundation for the Advancement of Pharmacy and is a combined effort of the Faculty and the Pharmaceutical Association of B.C. During this present academic session an evening symposium was held in Vancouver and as soon as the term ends a series of one-day refresher programs will begin in other districts of the Province. During March and April a series of twelve lectures was arranged through the UBC Department of Extension. These lectures have been very well attended and will become, it is hoped, the first of an annual series.

Festival Society gives scholarships

Applications for scholarships to UBC Summer School and Festival of the Arts are now being received by the Extension Department.

The Vancouver Festival Society has donated \$2500 for scholarships this year. Other scholarships and bursaries are also available.

Last year 60 students received various scholarships and bursaries to attend fine arts courses, during the summer.

Virus researcher studies new tolerance theory

"If you can't beat them, join them," is the principle indicated in the findings of a UBC medical research team which has confirmed a promising theory of tolerance to virus disease.

A research group headed by Dr. J. E. Hotchin of the bacteriology and immunology department found that the mice in their experiments became ill and sometimes died from the violence of the attempts of their bodies to overthrow a virus which was in itself harmless.

MENINGITIS VIRUS

The virus used in Dr. Hotchin's experiments at UBC was a meningitis virus known as LCM, short for lymphocytic choriomeningitis.

He found he could prevent the disease by first destroying the animals' defence mechanisms, either by large doses of X-rays or of cortisone.

A third way of preventing the disease was to inject the virus into the mice at birth. The mice accepted the virus as part of themselves and allowed it to remain, multiplying at the same rate as their own tissues instead of making antibodies against it.

They developed a lifelong tolerance to the virus. Further injections did no damage.

Not all viruses, however, are of the kind that are in themselves harmless.

But mice infected from birth with LCM had lifelong protection, not only against later infection from LCM, but against at least one other virus which is known to be harmful in itself.

This appears to be due to an effect called the interference phenomenon whereby one virus, as it were, keeps another one out.

PROTECTIVE VACCINATION

"This protective effect invites speculation on the possibility of using early infection by a virus, basically harmless, as a form of protective vaccination against the same and other viruses later in life," says Dr. Hotchin.

"It is, of course, much too early to assess what, if any, would be the potentialities of these results for the prevention of human virus infection.

"However, it can be safely said that these results open up some extremely interesting avenues for future exploration in human virus research."

Dr. Hotchin leaves UBC this month to join the staff of the New York State Department of Health at Albany, N.Y., as head of the Virus Department and assistant director of the Division of Laboratories and Research.

He has been at UBC for the past two years.

Brock Hall wing to be ready May 15

The extension to the Brock Hall should be ready for occupancy "approximately May 15" says Mr. T. S. Hughes, superintendent of buildings and grounds.

The \$325,000 addition will provide space for new alumni offices, student club rooms (the dance club will have a studio), barber shop, and college shop.

But the Brock extension still hasn't solved the space problem.

"Before it's finished, they realize it will be too small for their future needs," Mr. Hughes says. "The students are not giving up any hut space and have even requested more."

Faculty activities

Assistant Dean of Medicine appointed

Dr. Charles G. Campbell leaves his private practice of internal medicine to join the Faculty of Medicine as assistant to the Dean.

He is vice-president of the B.C. Society for Internal Medicine and president of the North-West Society for Clinical Research.

In recent years he has been active in investigating the role of inorganic salts in health and disease.

UBC lecturer in classics, **Kathleen A. Sutherland**, has been awarded a scholarship to spend the summer at the American School of Classical Studies at Athens.

She will spend two months in Athens before going on to the University of Cincinnati where she has been awarded a \$1400 Taft fellowship for graduate study.

Canada's highest award in ceramics was won by extension department pottery instructor **Tommy Kakinuma**, who received First Award for Stoneware at the Canadian Ceramic Show held in Toronto in April.

Three former faculty members were given professor emeritus status by the University senate for their services to the University in its early years:

Dr. Theodore H. Boggs, first head of the department of economics, sociology and political science—professor emeritus of economics.

CONFERENCE TO STUDY AGING PROBLEMS FROM ALL ASPECTS

Canada's first major conference on the needs and problems of the aging will be held at UBC May 14 to 17.

Louis Kuplan, executive secretary, citizens' advisory committee on aging, State of California, and Mrs. Barbara Schenfield, former chairman, advisory and welfare services of the Birmingham council for old people, will be featured speakers at the conference.

HEALTH, HOUSING

The conference, sponsored by the University and the Community Chest and Council of Greater Vancouver, will deal with problems of health, employment, housing, and use of leisure time as they affect the aging.

Dr. Sydney M. Friedman, head of UBC's Anatomy Department, and noted researcher on diseases of the aging, and Dr. Leonard C. Marsh, professor of Social Work, will give special lectures.

The conference is designed for volunteer and professional people who work with the aging.

Students from 66 nations at UBC

Approximately 12% of the student body at UBC comes from outside Canada.

A total of 933 students represent 66 different countries.

Although officials cannot predict accurately which students will remain as immigrants and which will return to their country of origin, generally speaking those from Europe will remain as immigrants.

Those from Central and South America, the Caribbean, Africa and Asia will return to their homelands.

Among students from other countries enrolled this year were four Columbo Plan students from Indonesia, seven stateless Russians from China, and four students from the new state of Ghana.

C. G. CAMPBELL
... assistant to dean

man team who visited Washington, Oregon and California on behalf of CBC and the Canadian Association for Adult Education to investigate techniques in education about public affairs via mass media.

Dr. A. J. Nelson, department of public health, has received a further grant from the B.C. Tuberculosis Society to continue research in epidemiology of tuberculosis.

Dr. Nelson with **Dr. Alec Agnew** of the department of obstetrics are doing research into "Maternal Health in B.C."

Approximately 57 members of the staff of the B.C. Department of Agriculture attended a one week extension short course in April—the first of its kind to be given at the University.

Speakers from the United States and UBC discussed extension services in relation to agriculture, farm appraisal, and application of visual aids.

Dr. Earle Birney, English department, will give a paper on "Contemporary Drama" at a symposium on the theatre at the Royal Society of Canada Conference in June.

J. Calder Peeps, School of Architecture, is engaged in research in the physical nature of Fort Langley, B.C., as it was in 1858. Partial restoration of the fort is now in progress and is due to be completed in 1958.

Alumni gifts to support building fund

The 1957 Alumni Annual Giving Program got off to a good start last month when UBC graduate and B.C. Minister of Education Leslie Peterson presented his personal cheque for \$200 to Chancellor-elect Dr. A. E. Grauer at the Alumni annual meeting.

The Alumni Board of Management will be asked to turn over alumni donations received during 1957 to the University's Capital Gifts Campaign.

Chairman of the Alumni Annual Giving Program is Frank F. Walden. He says, "We are confident that alumni everywhere will support generously our 1957 objective—University buildings."

First step in the alumni drive is a questionnaire which was mailed to all members of the Association at the end of April. This will be followed by a general notice at the end of May.

The summer issue of the quarterly Alumni Chronicle, appearing in June, will be sent to all UBC graduates for whom the University has current addresses.

The Chronicle is normally distributed only to those who contribute to the Annual Giving Program.

Objective of the 1957 Alumni Annual Giving Program will be decided after replies to the questionnaire have been studied.

Empire Pool open for public swims

University of B.C.'s Empire Pool has opened for public swimming.

Private lessons and classes in life saving and instructing, speed swimming and synchronized swimming will be available in addition to the regular class lessons in swimming.

Until June 30 the pool will be open Monday to Friday from noon to 5 p.m., and 6:30 p.m. to sundown. On Saturdays and Sundays it will be open from 1 p.m. to 5:30 p.m. and from 6:30 p.m. to sundown.

Prices will be: adults 50 cents, children 25 cents, students 10 tickets for \$2.50. Monthly passes for May, June and September are \$4, and for July and August, \$5. Tickets and passes may be obtained at the Memorial Gymnasium. Reduced family rates are also available.

Only prerequisite for admission to Empire Pool is that you be over 40 inches tall.

H. L. PURDY
... alumni president

Alumni install new officers

Newly elected president of the UBC Alumni Association is Dr. Harry L. Purdy, Executive Vice-President of the B.C. Electric Co. Ltd.

Dr. Purdy graduated from UBC in 1926 and is a former professor of economics at Dartmouth College.

Others elected to the executive committee of the Alumni Association at the annual meeting are:

Past president, Nathan T. Nemetz, Q.C.; first vice-president, J. N. Hyland; second vice-president, Miss Rika Wright; third vice-president, W. C. Gibson; treasurer, A. P. Gardner; executive secretary, A. H. Sager; assistant secretary, H. P. Krosby; editor, H. T. Logan.

Members at large: F. W. Scott, D. F. Miller, Mrs. G. Henderson, J. M. Lecky, Miss Mildred Wright, W. A. Craig.

Degree representatives: agriculture, N. S. Wright; applied science, M. A. Thomas; architecture, J. B. Chaster; arts and science, Mrs. K. M. Walley; commerce, T. R. Watt; education, R. N. Smith; forestry, J. H. G. Smith; home economics, Mrs. A. R. Gillon. Law, N. D. Mullins; medicine, Thomas W. Davis; nursing, Mrs. Eric L. Smith; pharmacy, Mrs. A. E. Jarvis; physical education, R. J. Hindmarch; social work, Gerald K. Webb.

Class of '57 donate \$1000 to capital fund

The class gift of the graduating class of 1957 is a \$1000 donation to UBC's Capital Gifts Campaign.

Class president John Gayton presented the cheque to the Hon. E. W. Hamber, Chancellor Emeritus and Honorary co-chairman of the Capital Gifts Campaign, at the annual meeting of the Alumni Association.

lost souls

Missing grads list shrinks

The Alumni Association proudly reports that 28 applied science graduates were "found" last month through the cooperation of UBC Reports readers.

Flushed with this success, the Association offers another list of applied science (B.A.Sc.) grads they can't find. If you know any of them, please fill in the form provided at the bottom of the page and return to the Information Office.

Frank Read honored at alumni meeting

The man who coached UBC rowing crews to one gold medal and one silver medal in the 1956 Olympic Games, Vancouver hotelman Frank Read, has been made an Honorary Life Member of the UBC Alumni Association.

The citation for Mr. Reid, who was presented with his life membership certificate at the Alumni Association annual meeting April 17, read in part:

"For nearly a decade Frank Read has given to the University of British Columbia the unstinted, unselfish, voluntary service of a truly great and inspired coach.

"His rowing know-how and devoted teaching have carried our undergraduate crews to the pinnacle of rowing achievements in three continents."

New program for adult educators

A new post-graduate program in training professional adult educators will begin during Summer Session.

The program is intended to provide the maximum opportunity for people already working in the field of adult education to complete a Master's Degree, as well as to attract newcomers to careers as teacher of adults.

Two credit courses, "Introduction to Adult Education" and "Communications in Adult Education" will be given during Summer Session this year.

The University is planning to undertake a program of research in adult education in conjunction with the new training program.

Year of graduation follows name: Donald Calvin Allen, 50; Harold William Anderson, 43; Andrew John Arland, 29; George Allan Armstrong, 50; Theodore Ernest Arnold, 27; Tom Christopher Assaly, 44; Donald Lawrence Atherton, 48; Raymond Charwill Bailey, 50.

John Alexander Baillies, 51; Nick Baker, 51; James Ball, 49; Francis Maurice Barchard, 41; John Howarth Bardsley, 33; William George Alexander Barr, 37; Eugene Bartlett, 32; Edward Marshall Bauder, 48.

Evan Stevenson Beal, 47; Stanley James Beaton, 44; Major John Stanley Beeman, 35; James Douglas Bell, 40; Orval Walter Bennett, 44; Bruce Everett Bewell, 46; Charles Branson Bishop, 27; William Barnes Blair, 43; George Henry Blumenauer, 45; Ashley James Bodaly, 50; Michael Boren, 48.

Bruce Morris Borthwick, 51; Edward Austin Bourne, 43; Archie Chester Boyd, 50; Philip George Brewer, 50; Gordon Edgar Brockhouse, 50; James Donald Broster, 50.

Gordon Francis Gartshore Brown, 50; Richard Burton Marling Brown, 52; Robert Brown, 50; Bruce James Burns, 50; William Alexander Burton, 48; James Donaldson Burwell, 49; Marvin Lee Calhoun, 37; Evan Graeme Cameron, 50.

Douglas Arthur Carey, 50; John David Carmichael, 51; Allan Terence Casey, 53; Leslie Ambrose Challis, 50; Frank Charnley, 24, 37; Thomas Gordon Church, 38; Alan Vincett Clack, 50; William David Clarke, 45; William Arthur Cloke, 38; John Cochran, 43.

Henry James Richard Court, 51; Sydney Godwin Cowan, 33; Robert Gordon Crosby, 39; Earl Elmer Crouser, 50; Henry Michael Curran, 42.

James Davidson, 49; Robert Archibald Davidson, 44; Louis William deCocq, 52; John Keith Diebel, 48; William Scott Douglas, 48; Charles Willoughby Dowding, 46.
