

# Daycare centre plan is set for approval

By JOMOSS

UBC is proposing to proceed with a \$2.6-million daycare project on campus, said K.D. Srivastava, Vice-President of Student and Academic Services.

Once approved by the university's Board of Governors, construction could begin as early as next month with completion scheduled for Fall, 1989.

Glenn Drover, president of the Child Care Society--an umbrella organization representing the 12 independent daycare centres on campus--said the society executive has recommended acceptance of

the university's proposal. The society's board will vote on it at a Nov. 22 meeting.

Construction cost for the proposed daycare centre, which will be located on Acadia Road, is \$2.2-million plus services to the site.

In addition to construction of new buildings, UBC will arrange for the Prince Rupert building, which is already being used as a daycare, to be permanently available for that purpose. (The building is currently on temporary loan to the centre.)

See TIME on Page 2

Singer/songwriter Bruce Cockburn spoke at UBC earlier this month on his impressions of life in Mozambique. He recently toured the African country.

# Reports

The University of British Columbia, Vancouver, B.C.

Volume 34, Number 20, Nov. 17, 1988

## Hagen, Strangway agree

# More funds sought for grads

By DEBORA SWEENEY

B.C.'s Minister of Advanced Education will ask for more money to increase the number of graduate students at the province's universities.

Stan Hagen was responding to UBC President David Strangway, who said that a recent report on advanced education in B.C. ignored a growing shortage of spaces for graduate students.

"I agree with the assertion that the case for increased accessibility to post-secondary education is both persuasive and critical and I recognize that graduate studies are an important component of the access issue," said Hagen. "My

Hagen

by a group headed by Les Bullen, recommended the government spend more money to improve space and equipment at colleges and universities and suggests

the ministry will be pursuing increased funding from Treasury Board in order to meet access demands and graduate studies will be part of that submission."

The report, prepared for the provincial government

the creation of "university colleges" -- regional colleges that could grant undergraduate degrees without the facilities of the existing universities.

Strangway welcomed the report's recommendations, but stressed that by creating new places for students throughout the province, the government is still under obligation to ensure that existing institutions are adequately funded.

He added that there is a 2,000-space shortage for graduate students in B.C. "That's as fundamental to the future of this province as providing enough spaces for people in undergraduate programs," he said.

# Check your lifestyle before blaming industry for pollution, expert says

Canadians should stop blaming big industry for every pollution woe and start examining their own lifestyles for patterns that harm the environment, says the organizer of a UBC symposium on sustainable development.

"We cannot merely slough off all the blame for environmental deterioration onto major industrial polluters," said William Rees, a professor of resource planning in the School of Community and Regional Planning.

"As much at fault are the day-to-day actions of people in wealthy societies, inefficiently heating and air-conditioning their homes, purchasing the latest convenience items and generally consuming a disproportionate share of the world's resources," he said.

Rees said Canadians are wrong to think that because of their small population, they don't make a significant contribution to global environmental stress.

"Canadians are the world's most inefficient per capita users of energy and among the highest consumers of other

key resources," he said. "Each Canadian has an impact on the biosphere equal to that of 40-50 people in the Third World."

According to some analysts, that means the Canadian population has an impact on environmental resources -- such as water, soil and air -- that is equivalent to that of

more than a billion people in the Third World, Rees said.

About 150 participants drawn from senior levels of government, private industry, academia and community organizations have been invited to attend the Planning For Sustainable Development symposium at UBC, Nov. 25-27.

Rees said the symposium will address the critical relationship between economic activity in technologically advanced countries such as ours and the global environment.

"But the focus is on what we here in B.C. and Canada can do about it," he added.

Symposium participants will look at the policy, program and planning implications of implementing sustainable forms of economic development in B.C.

Rees said one solution they will explore will be "how governments, the private sector and our universities might cooperate to develop the kinds of technologies that will be required world-wide for a sustainable future."

## Mediator named in faculty talks

By GAVIN WILSON

University and faculty bargainers have agreed to sit down with a mediator in an effort to resolve deadlocked contract negotiations.

Veteran labor mediator Vince Ready will conduct the sessions, which are tentatively scheduled for mid-November. Previously scheduled arbitration panel hearings will go ahead in December if agreement is not reached under mediation.

See TALKS on Page 2

# UBC treating MS patients with interferon

By DEBORA SWEENEY

UBC is participating in a multi-million dollar clinical trial to determine whether the drug interferon can block the progression of multiple sclerosis.

The two-year study, funded by Triton Biosciences Inc. of Alameda, Ca., will analyze results taken from 330 patients in 10 centres across North America.

"We think this is a very important study for MS in general and it is the first of its kind using magnetic resonance imaging as an evaluation tool," said Dr. Donald Paty, head of Neurology at UBC.

Dr. Paty's team pioneered the use of magnetic resonance imaging (MRI) to help diagnose difficult cases of MS, monitor the effects of drugs in clinical trials, and study over time the natural course of the disease. Using MRI, doctors can see through bone and analyze the progression of the disease through detailed images of brain tissue.

Through imaging, researchers will study the effects of interferon beta -- a protein normally produced by the body to protect against viral infections -- on patients with relapsing and remitting MS.

During the last several years, Betaseron, a genetically engineered derivative of human interferon beta, has been used in clinical trials for the treatment of cancer and other serious diseases. Recent preliminary trials on MS patients who used Betaseron showed their condition did not get worse and suggested the treatment could reduce the rate of relapse.

The current study will take that work further.

Researchers are looking for 50 people to participate in the clinical trial at University Hospital's Multiple Sclerosis Clinic.

One-third of the patients will receive a placebo treatment. The remaining patients will receive Betaseron in two different dose levels. The patients will administer the treatment to themselves

through injections every other day.

Research will be conducted in several major cities, including London, Ont., Montreal, Chicago, San Francisco, Philadelphia, Baltimore and Birmingham.

MS is a chronic, debilitating disease of the central nervous system. It afflicts an estimated 250,000 people in the United States and 50,000 in Canada.

## Commerce gets Pat Carney

Pat Carney, a former cabinet minister in the Mulroney government, has accepted an executive-in-residence position at UBC's Faculty of Commerce and Business Administration, effective Jan. 1.

As a resource person to the faculty, Carney will give guest lectures on various topics and be available to faculty and students on an informal basis, said Peter Lusztig, faculty dean.

"Executives in residence are like poets in residence, they bring unique abilities and experience to the commerce faculty," Lusztig said.

An economic journalist for 15 years, Carney has a BA in Economics and Political Science and an MA in Community and Regional Planning, both from UBC. She was elected to Parliament in Vancouver Centre in 1980 and held a number of posts including Minister of International Trade, Minister of Energy, Mines and Resources, and most recently President of the Treasury Board.

She retired from politics last month citing ill-health.

## United Way goal in sight

As the 1988 United Way campaign winds down, campus organizers have given employees a last chance to contribute.

By Nov. 9, the campaign had raised \$127,000, or 95 per cent of its financial goal of \$134,000.

Campaign chairman John McNeill, Dean of Pharmaceutical Sciences, said the campus community has until Nov. 28 to participate.

## UBC Reports publishing schedule

The next edition of UBC Reports will be published in three weeks on Thursday, Dec. 8. It will be the last edition for 1988. The first edition in 1989 will be published on Thursday, Jan. 12.

Norm Watt ponders "Artistic Licence," a donation to the World's Worst Oil paintings collection.

**Worst art**

**'We have standards, they're low'**

By PAULA MARTIN

Norm Watt has an eye for the truly awful, as his collection of the world's worst oil paintings shows.

"When I look at a painting, I like to see something I recognize, which is not always the case with these," said Watt, director of Extra Sessional Studies.

Populated by pictures with poor perspective, garish color and inane subject matter, the collection is a connoisseur's delight.

Watt began collecting two decades ago when he became enamored with a painting of a hideous, moonlit landscape in a New York antique store.

Since then, he has scoured yard sales and flea markets in search of the banal. Watt doesn't accept black velvet paintings, paint-by-numbers, or pieces that are just plain boring. And, he won't pay more than \$5 per picture.

"We have standards -- they're low, but we have standards," he says.

The collection has drawn the attention of the North American media, not only for the art, but for the money it raises for charity.

Watt and friend Bill Goodacre, along with a committee that includes Theatre professor Norm Young, organize an annual exhibition and auction of the World's Worst Oil Paintings, with proceeds going to the B.C. Paraplegic Foundation. Last year, the auction netted \$16,000 for the foundation.

Earlier this month, almost \$250,000 (gross) was raised for charity in Toronto at that city's first World's Worst Oil Paintings auction.

The highest bid, \$14,000, came for celebrity painter Rick Hansen's work "It's been a Goodyear," produced by driving his wheelchair on a paint-soaked canvas.

Vancouver's 12th annual exhibition will be held Nov. 22 - 24 at the Robson Media Centre, followed by the annual auction on Nov. 24 of 100 of the world's worst paintings.

**Universities need more funds to survive trade pact: CAUT**

By GAVIN WILSON

Canadian universities need better funding if the country is to survive a free trade agreement with the United States, says the president of the Canadian Association of University Teachers.

Peter King, recently in Vancouver to attend a CAUT conference and lobby candidates in the federal ridings of Vancouver Centre and Quadra, said that Canada's prosperity requires a highly educated population and increased spending for research and development.

"If Canada wants to be competitive in the free trade era of the 21st century and the Information Age of the 21st century, we need to build the research base and the educated populace in what remains of the 20th century," he said.

"If we have American universities which are better funded, better endowed,

have more equipment and better research grants than our Canadian universities, then the playing field will not be level and we will not be successful."

CAUT organizers at both the national and local levels are meeting with the candidates of major parties in ridings containing or near universities to lobby for increased education funding, he said.

King, a University of Manitoba computer scientist, said CAUT has also submitted a questionnaire on education to party leaders. The replies will be published in the November issue of the CAUT Bulletin.

"Post secondary education is not -- unfortunately -- a major election issue in itself. We think it should be. A federal election is an important time to get some of these issues on the agenda."

King said that funding for the three

major granting councils in Canada has been "dismal." A recently announced \$200-million increase is spread over the next five years, with most of the increases earmarked for years four and five, he said.

CAUT is also concerned with the levels of student aid and the fact that many students graduate carrying large debt loads.

"Thirty-seven per cent of those people in the student loans program have an accumulated debt load of between \$5,000 to \$10,000, and nine per cent owe more than \$12,000," said King.

CAUT also called for increases in native student aid funding. A program for treaty native Indians who are qualified students had its funding capped a year ago by the federal government. This has since become a permanent policy, King said.

**Senior librarian**

**McInnes to head Woodward**

By GAVIN WILSON

University Librarian Douglas McInnes is stepping down to head the Woodward Biomedical Library after nearly eight years in the senior library position at UBC.

McInnes was appointed University Librarian in 1982 after serving a year as Acting University Librarian. He was previously the Assistant University Librarian for Public Services.

"I've spent 20 years in the front office and I'd like a change from that," he said, explaining his decision to decline another six-year term as head librarian. "I'd like to work a little more closely with library users."

The move also gives McInnes the opportunity to go back to a position he formerly held. He was first placed in charge of Woodward -- the largest branch in the library system -- when it was established in 1964. McInnes will replace Anna

McInnes

Leith, who retired in June after 29 years at UBC.

"Over the last seven years, under difficult circumstances, Mr. McInnes has provided able leadership for the university's library system," said K.D. Srivastava, Vice-President, Student and Academic Services.

"I am personally grateful to him for the support he has provided in the preparation of the President's Report on the Library and the report on library space requirements to the year 2000. Both these reports are proving to be invaluable in our development campaign," he said.

Among the important developments of recent years, McInnes includes the

increasingly strong bonds between the library and the community.

"It's important that we're seen as a resource to support research not only at UBC, but elsewhere in B.C. as well," he said. "UBC has always been one of the most heavily used academic libraries in North America."

**Strangway to speak**

UBC President David Strangway will speak at a forum to explore opportunities for British Columbia in the Canadian space program.

The Nov. 24 forum hopes to provide opportunities for increased participation in space science by post-secondary institutions, technology companies and the resource sector.

The forum will be held in the IMAX theatre, 999 Canada Place. For more information call 682-6005.

**Women urged to join intramurals**

Organizers of UBC's intramural athletics program are trying to encourage more women to become involved this year. Despite a university population of almost half women, men currently outnumber women four to one in all intramural programs.

Nestor Korchinsky, director of Intramurals, says that ratio isn't good enough. "We'd like to take participation by women to a new level and maintain it," he said.

To help tip the balance, organizers have named 1988/89 Year of the Woman Participant and come up with a number of ingenious ways to attract female students.

All advertising now depicts a stylized generic athlete instead of the obviously male figure. As well, two scheduled noon Women's Day Runs attracted more than 100 female joggers. (Men were welcome to run, too.)

Women's field hockey is being offered for the first time and other programs, such as the Cycle Criterium, have been expanded or modified to attract more women participants. Cycle events traditionally attract the lowest number of women, but a woman's heat in the Sept. 17 Criterium brought 10 female competitors in a field of 44.

While Korchinsky acknowledged that gains in participation "may take time to evolve," he said the key to attracting more women students will be through increased personal contact.

All UBC students pay \$4.50 to support intramural programs, but women aren't getting their money's worth, he said.

The most important reason for participating, Korchinsky added, is to take advantage of what a university offers outside of classes and labs.

UBC's intramural program is geared

to the recreational athlete and offers 88 activities including a cycle race series; racquet sports tournaments; league sports in soccer, field hockey, ball hockey, basketball and volleyball; a co-rec drop-in program offering 12 sports from indoor cricket to softball; 25 scheduled runs and 10 highly visible special events such as Storm the Wall.

**Murrin Scholar asks media to educate in Third World**

By DEBORA SWEENEY

Media have a powerful and pervasive influence on all aspects of society -- but they can go much further to educate people around the world, said Pauline Webb, this semester's Murrin Scholar in Residence at UBC.

"The problem is the media are very much in the hands of one part of the world and people in developing countries see everything from the western perspective," said Webb. "With video markets in almost every African village, they're seeing everything that has been produced in the west, with western values, western lifestyle and western culture."

Webb would like to see a flow of ideas between east and west where people in developing countries could present their ideas and culture to the world, and she is

working energetically to achieve that goal. When she leaves UBC in December, Webb plans to travel to Kenya to lecture about the media.

An internationally known writer and broadcaster on religion, the role of women in the church and society, race relations and international affairs, Webb has travelled extensively in Asia, Africa, Latin America and Eastern Europe. She has been vice-moderator of the World Council of Churches and was a director of religious broadcasting for the BBC.

**Talks to start**

Continued from Page 1

Under the framework agreement which governs talks, an arbitration panel must be brought in if other attempts at negotiation do not result in a settlement.

**Time was running out for centre**

The university will continue to provide the daycare site which has a land value of about \$2.5-million and work out a lease arrangement with the Child Care Society, Srivastava said.

UBC will cover about \$1.8-million of the construction costs with the remainder coming from a variety of sources. UBC's Alma Mater Society has committed \$350,000 and the Vancouver Foundation \$75,000. More than \$40,000 was raised from faculty donations and \$5,000 from the teaching assistants' union.

UBC's cash contribution toward construction costs comes from interest earnings on capital funds, Srivastava said.

The university proposes to take out a loan for the remaining \$336,000 on behalf of the Child Care Society which will undertake repayment.

Drover said the Child Centre Society will look at alternate funding to prevent

the full impact of that cost from being passed on to daycare users.

"Parents do pay most of the daycare costs and the large part of daycare users are graduate students," he said.

About 215 children, between 18 months and 12 years, are enrolled in campus daycare. An additional 60 children are in daycare at University Hill Secondary School. The new facilities will accommodate all 275.

Time was running out for UBC's daycare centres. Nine are located in World War II huts which have been condemned by the Fire Marshal and are operating under a provisional permit that expires on Dec. 1. UBC will ask for a permit extension.

As a separate project, the university is also planning to bring the UBC Child Study Centre, currently located in Kitchener Elementary School, back to campus.

People

# Beagrie earns international honor

Beagrie

**Dr. George Beagrie**, former Dean of Dentistry, has received the Federation Dentaire Internationale Merit Award.

Dr. Beagrie was recognized for his service as chairman of the FDI Commission on Dental Education and Practice and the FDI Committee on Commissions.

FDI Commissions provide a global scientific forum where international authorities can work on significant dental issues.

Botany professor **Iain Taylor** was recently named editor of the *Canadian Journal of Botany*, Canada's most prestigious botanical journal. Taylor, who researches plant physiology, tissue culture and the bio-physics of plant cell growth, takes over the position Jan. 1 for a four-year term.

Taylor was also elected to the executive of the International Union of Biological Sciences during its annual meeting in Canberra last month. The Paris-based organization recently launched the Decade of the Tropics, to encourage study of the tropical ecosystems and man's effects on them.

UBC's Biotechnology Laboratory has recruited its first faculty members.

**John E. Carlson** joined the laboratory Nov. 1 from Allelix, a biotechnology company in Mississauga, Ont. He will study better methods of breeding trees by identifying seedlings with characteristics that will produce the best trees. He will also use genetic engineering to create new properties in trees, such as better growth characteristics.

Carlson's wife, **Loida Escott-Carlson**, will join the Biotechnology Laboratory Dec. 1 as Director of Biotechnology Teaching Laboratories. She comes to the university from Cangene, a biotechnology company in Mississauga, Ont., and brings considerable expertise in the production of pharmaceutical proteins in bacteria.

**James N. Kronstad** will leave the University of Wisconsin in March, 1989 to join UBC. His area of specialty is studying fungal pathogenesis in agricultural crops and trees.

Nursing professor **Elaine Carty** has been recognized by Yale University for more than 20 years of working to establish midwifery as a profession in Canada.

Carty received the Yale Distinguished Alumni Award—an annual award which recognizes graduates who have made significant contributions to their fields.

Carty was instrumental in the development of a pilot nurse-midwifery service at Grace Hospital in

1982. She was a founding member of the Ontario Midwives Association and has worked with a variety of government organizations and private associations across Canada to promote nursing midwifery.

**Verna Kirkness**, Director of UBC's First Nations House of Learning and an assistant professor in the Faculty of Education, was named an Institute Fellow by the Ontario Institute for Studies in Education in Toronto last month. The honor is given each year to outstanding leaders in Canadian education.

Kirkness has been a prominent native educator for more than 30 years, working in Manitoba and Ottawa as well as B.C. The Kirkness Adult Learning Centre in Winnipeg, named in her honor, opened in June, 1983 with a mandate to fight illiteracy by upgrading the reading and math skills of inner city residents. Three-quarters of the students are native Indians.

**Deborah Apps** has been appointed Executive Director of the UBC Alumni Association.

Formerly the Acting Executive Director, Apps joined the university 18 months ago as Associate Director of the association.

A recent arrival from Alberta, Apps has more than eight years of administrative experience with various non-profit organizations and has served on the Calgary Volunteer Centre and the Calgary Association of Volunteer Directors.

Modi

Engineering professor **Vinod Modi** was recently elected as a fellow of the American Astronautical Society. He is the only academic to be given the title in 1988.

Modi is a world-recognized authority in aerospace engineering and aerodynamics.

The International Society for Comparative Physical Education and Sport elected UBC Physical Education professor **Eric Broom** president at its international conference held in Hong Kong in August.

Broom has been a member of the society's executive board for four years and has served as vice-president since 1986.

As the new president, Broom was also appointed to the executive board of the International Council of Sport Science and Physical Education, an umbrella organization for all international sport science organizations.

**Ecology Seminar**

Myxid Introduction as Food for Salmonids, Successes, Failures and Salvage Strategies. Tom Northcote, UBC. For information call 228-4329. Room 2449, Biological Sciences Bldg. 4:30 p.m.

**Forestry Seminar**

Research Forests: Purpose and Function. Prof. D. Munro, Malcolm Knapp Research Forest, UBC. For information call 228-2507 or 228-4166. Room 166, MacMillan Bldg. 12:30 - 1:30 p.m.

**THURSDAY, DEC. 1**

**Video Night**

International Film Festival: Man Facing Southeast - Argentinean. Joshua Gross, Film Student. For information call 228-3203. Fireside Lounge, Graduate Student Centre. 6:30 p.m.

**Psychology Colloquium**

Plasticity in the Neocortex: Mechanisms Underlying Recovery From Brain Damage. Dr. Bryan Kolb, U. of Lethbridge. For information call 228-2755. Room 2510, Kenny Bldg. 4 p.m.

**Music Recital**

UBC Contemporary Players. Stephen Chatman, Geoffrey Michaels, directors. Free admission. For information call 228-3113. Recital Hall, Music Bldg. 12:30 p.m.

**Music Recital**

Faculty Concert Series. Bruno Laplante, baritone; Rena Sharon, piano. Tickets \$8 - Adults, \$4 - Students/Seniors. For information call 228-3113. Recital Hall, Music Bldg. 8 p.m.

**Guest Lecture**

Planning B.C.'s Forested Valleys: Native and Residents' Perspectives. Trevor Chandler, Private Consultant; Resource Use Planner in Africa for 9 years. Admission \$5, \$3 for students, seniors and unemployed. For information call 228-5326. Room 105, Lasserre Bldg. 12:30 p.m.

**Physics Colloquium**

Statistical Mechanics. R. Savit, U. of Michigan. For information call 228-3853. Room 201, Hennings Bldg. 4 p.m.

**Neuroscience Discussion Group**

Synchronizing Mechanisms in the Hippocampus: Gial and Neuronal Influences. Dr. Brian MacVicar, Medical Physiology, U. of Calgary. For information call Dr. P. Reiner at 228-7369. Lecture Hall #1, Woodward Bldg. 4 p.m.

**Geological Sciences Seminar**

The Thermal and Tectonic Structure of the Cascadia Accretionary Prism. Earl Davis, Pacific Geoscience Centre, Victoria. Refreshments served. For information call 228-4525. Room 330A, GLSC Bldg. 12:30 p.m. - 1:30 p.m.

**FRIDAY, DEC. 2**

**Chemistry Seminar**

The L3 Phase. From Differential Geometry to the Endoplasmic Reticulum. Dr. H. Wennerstrom, Chemistry, Lund U., Sweden. For information call 228-2603. Room 301, Hennings Bldg. 11:30 a.m.

**Medical Genetics Seminar**

Clinical case presentations. Fellows, Clinical Genetics Unit, Grace Hospital. For information call 228-5311. Parentcraft Room, Main Floor, Grace Hospital, 4490 Oak St. 1 p.m.

**Pharmaceutical Seminar**

How to be an Expert Witness - Part I. Wayne Jeffery and D'Arcy Smith, RCMP Forensic Laboratory. For information call 228-3183. Room #3, IRC Bldg. 12:30 p.m.

**Ecology Seminar**

Interpreting Movement Patterns of Fishes from Tag and Recapture Data. Ray Hilborn, U. of Washington, Seattle. For information call 228-3025. Room 2361, Biological Sciences Bldg. 3:30 p.m.

**Oceanography Seminar**

The Use of Th-230 As a Tracer of Oceanographic Processes at Continental Margins, Hydrothermal Centres and Upwelling Zones. Dr. Graham Shimmield, Grant Institute of Geology, U. of Edinburgh. For information call S. Calvert at 228-3278. Room 1465, Biological Sciences Bldg. 11:30 a.m.

**Health Care Rounds**

Toxicology of N-Nitroso Compounds. Dr. E. Faustman, U. of Washington, Seattle. For information call 228-2772. Room 253, James Mather Bldg. 9 a.m. - 10 a.m.

**SUNDAY, DEC. 4**

**Music Recital**

UBC Wind Symphony. Martin Beninbaum, director. Free admission. For information call 228-3113. Old Auditorium. 2:30 p.m.

**MONDAY, Dec. 5**

**Biochemical Seminar**

HLA-DQ Polymorphism in Islet Cell Disorders. Dr. John Bell, Oxford U. For information call Dr. R.T.A. MacGillivray at 228-3027. Lecture Hall #4, IRC Bldg. 3:45 p.m.

**Medicine Seminar**

Promoting Health - The B.C. Medical Association. Dr. Hedy Fry, Chairman, B.C. Medical Assoc. Council on Health Promotion. For information call 228-2258. Room 253, Mather Bldg. 4 p.m. - 5:30 p.m.

**Cancer Seminar**

Significance of Stem Cells in the Evolution of Androgen-Independent Malignancy. Dr. Nick Bruchovsky, BCCRC. For information call 877-6010. Lecture Theatre. B.C. Cancer Foundation, 601 W. 10th Ave. noon - 1 p.m.

**Paediatrics Seminar**

Variation in Resistance Towards Herpes Simplex Virus Type 1 of Oligodendrocytes Derived from Inbred Strains of Mice. Dr. Eva Thomas, UBC. Refreshments served. For information call 875-2492. Room 3D16ABC, Children's Hospital, 4480 Oak St. noon.

**WEDNESDAY, DEC. 7**

**Jazz and Blues Evening**

D.J. John Fossum. People are encouraged to bring their own CDs or tapes. For information call 228-3203. Fireside Lounge, Graduate Student Centre. 7 p.m. - 11 p.m.

**Geography Colloquium**

Fieldwork as Performance - Cultural Geography in the Venice Region. Denis Cosgrove, Senior Lecturer, Depts. of Geography, U. of Loughborough and U. of Texas. For information call 228-2663. Room 201, Geography Bldg. 3:30 p.m.

**THURSDAY, DEC. 8**

**Video Night**

International Film Festival: Wish You Were Here - British. Joshua Gross, Film Student. For information call 228-3203. Fireside Lounge, Graduate Student Centre. 6:30 p.m.

**Psychology Colloquium**

The Temporal Channels in Human Vision. Dr. Robert Hess, Cambridge. For information call 228-2755. Room 2510, Kenny Bldg. 12:30 p.m.

**Medical Grand Rounds**

New Concepts in Staphylococcal Bacteremia and Endocarditis. Dr. Arnold S. Bayer, Prof. of Medicine, Harbour UCLA Medical Centre. For information call Kathy Blackwood at 228-7737. Room G-279, HSCH - ACU. noon

**Physics Colloquium**

Two Dimensional Quantum Spins. P. Young, UCLA. For information call 228-3853. Room 201, Hennings Bldg. 4 p.m.

**THE VANCOUVER INSTITUTE**

**Saturday, Nov. 26**  
The Media and Morality. Pauline Mary Webb, Writer and Broadcaster, London, England.

All lectures are in Lecture Hall 2, Woodward Instructional Resources Centre at 8:15 p.m.

**NOTICES**

**Christmas Sale**

Botanical Gardens - 6250 Stadium Rd. Dec. 8 - 11 from 11 a.m. to 7 p.m. Books, crafts, flower arrangements etc.

**UBC Bookstore**

Festival of Creative Artists Nov. 21 - 25. Professional artists will demonstrate techniques each day. Special guest artist, Paul Ygartua, will exhibit his works daily. For information call 228-4741. 10:30 a.m. - 2:30 p.m.

**Institute of Asian Research**

Exhibition of Chinese paintings by Mr. William Lau. The Secret of the Forest. Free admission. For information call 228-2746. Auditorium, Asian Centre. Nov. 19-Dec. 1.

**Group Exhibition**

Nov. 14 - 26. Art. This is a 7 person group exhibition of the Studio Faculty of the Fine Arts Dept, UBC. For information call 228-5991. Old Fire Hall.

**M.Y. Williams Geological Museum**

Open Monday-Friday 8:30 a.m.-4:30 p.m. The Collectors Shop is open Wednesdays 1:30-4:30 p.m. or by appointment. For information call 228-5586.

**November Book Sale**

Nov. 12 - Nov. 26. Regular Bookstore hours - Mon., Tues., Thurs., & Fri. 8:30 a.m. - 5 p.m.; Wed. 8:30 a.m. - 6:30 p.m.; Sat. 9:30 a.m. - 5 p.m.. For information call 228-4741. UBC Bookstore.

**Parents Wanted**

Couples with children between the ages of 5 and 12 are wanted for a project studying parenting. Participation involves the mother and father discussing common child-rearing problems and completing questionnaires concerning several aspects of family life. Participation will take about one hour. Evening appointments can be arranged. Interpretation of questionnaire is available. For further information, contact Dr. C. Johnston, Clinical Psychology, UBC at 228-6771.

**Play**

Nov. 16-26. Jacques and His Master by Milan Kundera. Tickets \$10 Adults, \$7 Students/Seniors. For information and reservations call 228-2678. Frederic Wood Theatre 8 p.m. (Oct. 24 Matinee 2 p.m.)

**Language Programs & Services**

Non-credit daytime, evening and weekend programs in Conversational French begin the week of Nov. 7. Also offered is course on Language Teaching Techniques. For more information call Language Programs and Services, Centre for Continuing Education, at 222-5227.

**Walter Gage Toastmasters**

Wednesdays. Public Speaking Club Meeting. Speeches and tabletopics. Guests are welcome. For information call Sulan at 224-9976. Room 215, SUB. 7:30 p.m.

**Language Exchange Program**
