The Crusher at the Mother

LCDE MADE A TRIAL RUN ON SUNDAY.

WATCHING A BIG BLAST.

On Sunday the trial run was made, and the big machine proved to run quite smoothly. Rosin was put on the belts to prevent slipping.

The bucket elevator is up and ready for belt connections. It is driven from a pulley above. This elevator consists of steel buckets bolted on two heavy chains so that they overlap and form an endless series.

On going up to the glory hole, we found that they were ready to blast 2 of the deep holes. Mr. Pasco wanted us to see how the rocks cave in, so we took a position behind some trees about 200 feet away, and on a level with the top, and saw a wall of rock shoved bodily into the hole. Both holes went off at the same time and filled the

glory hole with falling rocks for an instant, then all was over. Such an experience is rather exciting, and requires some nerve to keep your eye on the blast.

ABOUT TOWN

Mr. F. Whitwell has made a rich strike on his claim on Providence Creek. His many friends will rejoice in his good luck.

Monday, April 14—The first ore was put through the Mother Lode crusher today.

At the No 7 they are drifting on the 300 level.

The prospects of the V. V. & E. railroad coming through Anaconda on the line already surveyed are good.

It is said that \$500.00 will be spent on improvements of the streets of town. This, together with a little building continually going on, keeps the town active.

CULTUS HEHE.

"I would think you would suffer, standing here in the cold all day." said the Wooden Indian.

"Oh, I'm all right, thank you." replied the clothing dummy. "I'm of a wiry frame, you know."
