ST. LAWRENCE

East of Anaconda Being De- veloped—Shaft down Over 70 feet.

Mr. Chas. Peterson is pushing development work on the St. Lawrence, situated above Anaconda on the south-east.

The shaft is now down nearly 70 feet. Two drifts have been run to the east (into the hill). The upper one is driven about 15 feet in on the lead from a point 30 feet down the shaft. No work is being done on this at present.

The work of running the lower drift is now going on and it is in over 25 feet from the shaft. The ore has just been struck and looks very promising. It appears that the two distinct leads so far discovered are coming together here and it is expected that if they join the value of the ore will be much

increased. A small winze is at present being sunk at the end of this drift on the ore. No assay of the ore here has yet been taken.

The Mountain Rose.

On the Mountain Rose, in Summit Camp, preparations are being made to enlarge the glory hole. A tunnel has been run from a point some distance down the hill from the quarry so as to go under it and form a funnel into which the ore will be dumped and drawn off from the bottom. This will cheapen mining operations.

The Mountain Rose ore contains large quantities of sulphur and is very valuable as a flux.

The minimum temperature for Monday night was -5, for Tuesday night -12. Maximum, Mon. 25, Tues. 15.

ABOUT TOWN

The strike is still on at Coleman.

The coming Friday is the big day in Chinatown.

The Phoenix Pioneer's beautiful special number appears today.

The present cold snap has made good ice at the skating and curling rinks here.

Subscribe for the Anaconda News.

The News job department has not gone out of business even if it has no ad this week.

With the good ice now forming the curlers bonspiel at Nelson will probably be held toward the end of the week.

Miss Minkler of Greenwood leaves today for Spokane where she will enter St Lukes hospital as a nurse. Miss Minkler will be very much missed here by her many friends.

MINING NOTES.

The new ore body at the Mother Lode mine is now 320 feet long and 140 feet wide as so far discovered. The exploratory drifts are still in very fine ore.

On the Junebug development is progressing. The tunnel there is in 65 feet and has struck a lead of very fine ore.

At the Emma Mine.

At the Emma mine in Summit Camp the new two compartment shaft is down about 30 feet. The ore chute in the face of the present workings is between fifteen and twenty feet from wall to wall and does not show a streak of waste.

Social Evening.

On Monday evening Rev. & Mrs. McKee gave an At Home that was one of the social successes of the season.

About fifty guests assembled to enjoy an evening of pi. The distribution of the pi to its proper nooks in the flo-

ral kingdom caused much hilarity.

The prizes to the most successful distributors were pies. The evening was concluded with solos by Miss White-side, Mrs. Geo. Williams, and Mrs. Oliver.
