A MURDEROUS CARNIVAL

Was Enacted in the Streets of Many Polish Cities.

NUMBERS OF WOMEN WERE KILLED.

Peasant Member of Late Douma to be Tried for Treason.

Two Men Met Instantaneous Deaths

--Bombs and Panic in Warsaw

--Government Recognition for Life Saving--Newfoundland's

Chinese Head Tax--Victoria

Woman Suicided--Drowning

Accident--A Fighting Parson

--Embezzler Arrested.

[SPECIAL TO THE CLAIM.]

St. Petersburg, Aug. 16.--Acting with definite plans and signals, the terrorists and revolutionists yesterday inaugurated a carnival of murderous attacks with bombs and revolvers on the government buildings and troops in various towns and cities throughout Poland. Many police, merchants and women were killed.

The czar a few days ago accepted a new ministry composed of October-ists and democrats, and as a result revolutionary talk at the capital is thought to be on the decrease.

L. Monitko, a peasant member of the late douma, was arrested last week charged with having aided the late mutiny at Kronstadt. He will be tried by court martial and, if convicted of his crime, which is treason, will likely receive the death penalty.

Bellingham, Wash., Aug. 16.--Charles Davis, an employee of the Guarantee Mill company of this city, was instantly killed yesterday morning by a piece of steel which, flying from a circular saw running at high speed, pierced his heart.

Vancouver, B. C., Aug. 16.--A laborer named Beaton fell fifty feet on to a pile of bricks at the new Woods hotel in this city yesterday and was instantly killed. The unfortunate man's body was terribly mangled.

New Mexico, Aug. 16.--The strike of the mechanics of the Mexican Central railroad has been ended in a peaceful manner and with satisfaction to all concerned through the friendly advice addressed by General Diaz to the strikers.

Warsaw, Aug. 16.--Bombs were thrown at policemen and soldiers in several different parts of this city during yesterday afternoon and evening and resulted in over one hundred persons being seriously injured. A panic prevails here at present.

New York, Aug. 16.--Captain Praeger, of the steamship Maine of this port, has this week been presented with a handsome and costly

silver cup by the government of the Dominion of Canada in recognition of his heroic services in saving seven men from the wrecked Nova Scotia schooner, Kipling, in mid-ocean last January.

St. John's, Nfld., Aug. 16.--The head tax of three hundred dollars imposed by an Act of the local legislature on Chinamen entering this colony came into force today, and will hereafter be rigidly collected.

Vancouver, B. C., Aug. 16.--Mrs. Cooksley, a resident of James Road, Victoria, committed suicide last night by jumping into the narrows at the entrance to Burrard inlet near here. Despondency from poor health is thought to have resulted in insanity and thus caused her to take her own life. The woman sprang through the glass of a window in the house where she was stopping and, making her way to a cliff in Stanley park which overlooks the narrows, she jumped into the water.

Winnipeg, Aug. 16.--A gasoline pleasure launch with eight young persons aboard ran on to a sunken pile in the Red river here yesterday and upset. Five of those aboard were drowned.

Vancouver, B. C., Aug. 16.--The attempts which have persistently been made since the day of the accident to locate the wrecked tug Chehalis have all proved futile and all hopes of ever recovering the bodies of those drowned has been abandoned.

Sault Ste. Marie, Mich., Aug. 16.--The Rev. Mr. Marshall, a Baptist clergyman of this town, severely punished one of his congregation during the morning service on Sunday and then left the church building accompanied by over a hundred of his followers. A slanderous tongue is said to have been the cause of the reverend gentleman's wrath.

Toronto, Aug. 16.--Mr. Clinton Wray, an American, was arrested in this city today on a charge of having embezzled \$125,000 from the Union Trust Company of Pittsburgh. Wray confessed his guilt to the police and has agreed to waive extradition proceedings and to return to the States and stand trial. Grace Lougheed, Wray's paramour, has also been arrested and will be charged with complicity.

Denver, Col., Aug. 16.--The Democratic ticket was announced here today with Wm. J. Bryan for president and W. A. Clark for vice-president.

Earthquake and Fire at Valparaiso.

New York, Aug. 17.--A cablegram was received here at noon today via Lisbon, Portugal, from Valparaiso, Chili, stating that the latter city was badly wrecked this morning as the result of several severe earthquakes which occurred on the Chilean coast. Many fires were started in different parts of the city immediately after the shocks

and it is feared that the ultimate result will be a repetition of the San Francisco disaster. Owing to the complete shutting off of the coast cable to South America and continued interruptions on the Spanish cable, it is impossible to secure full details of the calamity. As yet no statement has been given out of the probable number of killed and injured, but it is thought that the list will be large. Valparaiso, which is the capital of Chili, is a city of over 135,000 people.

GENERAL NEWS.

Gen. Parades, the military leader in Venezuela, is in New York organizing a revolution against President Castro, the present controller and practically dictator of Venezuela.

A Tokio despatch says: Government inspection of a meat canning plant at Hiroshima, Japan, reveals the fact that horse meat is being canned there for beef. The government has put a stop to the practice.

George Hall, leader of the mob which lynched three negroes at Charlotetown, N. C., early this month, has been sentenced to 15 years imprisonment. This is the first sentence of the kind in that state.

A Vancouver despatch says the magistrate there finds that the captain of the Princess Victoria was not at fault in the Chehalis collision, but nevertheless has bound him over until the government can fully satisfy itself in the matter.

A judgment for \$1,500 has been secured against "Swiftwater Bill" Gates by Attorney C. H. Peterson, of Seattle, who loaned the former that amount in 1900. "Swiftwater" has also lately been sued for divorce and alimony by his third wife.

The policy holders committee, organized to protect the losers in the recent San Francisco fire, have attached a \$500,000 deposit in New York by the Trans-Atlantic Fire Insurance Company of Hamburg, Germany, which repudiated the San Francisco lawsuits.

A Washington despatch says the isthmian canal commission has decided to try the employment of Chinese laborers on the Panama canal, and in line with the decision it has begun advertising for 2,500 Chinese coolies. It is claimed the Jamaicans have proved a failure. They cannot stand the climate and are not in all respects satisfactory as laboring men.

A late Copenhagen despatch says: Legalized slaughter of women and children has been authorized in Finland, which is still in open revolt against the czar and his government. The slaughter has been authorized in an order given the troops to shoot to kill irrespective of age or sex. A captain of Cossacks was shot in the breast while attempting to arrest a woman agitator.

The Washington state department has sent a complete detailed state-

ment of the killing of the five Japanese poachers at St. Paul sealing island to Ambassador Wright at Tokio. The statement expresses regret because of the incident but no apology as the men were killed for refusing to surrender when violating the American law, which their slayers were enforcing. The Japanese legation at Washington says the matter is not an international incident. A speedy trial has been ordered to be given the 12 Japanese poachers who were captured.

A despatch of the 14th from San Francisco says: Four highwaymen are giving San Francisco a carnival of crime. Many people have been held up during the last few nights. Last night there were several hold-ups and one murder as a result of their depredations near and in Golden Gate park. Fred Mullineaux, who was walking with a lady and refused to surrender when commanded to hold up his hands, was shot and instantly killed.

Mining Notes.

A report was circulated this week that the work in the lower tunnel on the Venus claim, Windy Arm, has resulted in locating and cross-cutting the ledge, which is sixteen feet wide.

Mr. Pardoe Thomas, of Golf Run, has been compelled to close down his mine on account of water. He will operate same again after installing larger pumps. The cause and responsibility for this water will probably not be settled except by the courts.

Mr. J. E. Moran, of the Otter Creek Development Co., came in this week with a partial clean-up of the ground handled by his company so far this season. We understand the poke amounted to about \$2,000, and the indications are that this sum will be greatly increased by the end of the season.

The steam shovel of the Atlin Consolidated Mining Co. was put in motion the early part of the week and is working quite satisfactorily. The company has experienced some difficulty with the incline section of their electric dump car system, but expect shortly to have every part of their big plant operating in smooth order.

W. Sweet was in town this week from Tutshi lake, where he and partners are pushing development work on some quartz claims. Mr. Sweet says they are confident that the work being done will prove their ground to be valuable. Good assays have been obtained from average samples of their ledge. To facilitate the getting in of supplies, the government lately employed those interested with Mr. Sweet and a few other prospectors to slash, clear and grub a wagon road with fairly easy grades between the south end of Windy Arm and Tutshi lake, a distance of three and a half miles.

THE LORD'S DAY IN CANADA

English legislation is far more friendly to sabbatarianism than that of almost any other country. Ontario is likely to prove a worthy rival, however. The government has brought in the so-called Lord's Day Bill, in which it is provided:

First—It is made unlawful to sell anything on Sunday, to transact any business or to employ any other person to do any work, except works of necessity, for money.

Second—Games and performances of all kinds for which an admission fee is charged are made unlawful.

Third—Excursions of every kind by land or water on which passengers are carried for amusement are prohibited.

Fourth—No public park or pleasure ground or amusement place of any kind to which an admission fee is charged can be kept open.

Fifth—No person is allowed to shoot at a target or any other object.

Sixth—The sale of foreign newspapers is prohibited.

The bill is to go into operation March 1, 1907, although it is not impossible that it may be subject to some amendments.

There is a good deal to be said in favor of this sort of legislation on economic grounds, but it is not likely that it will meet with general approval, even in Canada, and it would be altogether impossible in the United States. Nonetheless, the Sunday question is one which sooner or later must be faced in America. The rise of amusement into a genuine business is destroying the opportunity for weekly rest on the part of many thousands of workmen. In some way the need of rest of one day in seven must be met. The Canadian legislation is an honest if extreme attempt to meet it. It may not be attractive to those who would like to have other people work to help them play, but it is not the outgrowth of religious bigotry.—The World Today.

Preaching recently to a fashionable congregation in a fashionable church, Father Bernard Vaughan, who is one of the most fearless, outspoken and eloquent preachers in the Roman Catholic Church in England, addressed these scathing words to his hearers: "Smart society today is the concentrated essence of selfishness; as unclean and unwholesome as any condemned carcass canned in Chicago. . . Society is just as grossly material today as it was when Dives was in the swim." This reverend gentleman evidently

speaks his convictions, but it is possible that "Smart Society" will snub him because of his outspoken truths.

Mines and millionaires have come to be synonymous words. Rhodes, Clark, Mackay, Fair, Flood, Hearst, Daly, and the late Albert Beit all became millionaires from mines. They were all poor men in the beginning. Their only capital was their ability to see the chance for wealth and seize it. They knew when they had a mine and they compelled that mine to give up its treasures. Those who had faith in their judgment lived to share their wealth.

A letter from "A Churchman" and our comments on same are held over till next issue.

NOTICE is hereby given that I intend, sixty days from date, to apply to the Chief Commissioner of Lands and Works for permission to purchase the following described tract of land: Commencing at a post on western end Tutshi Lake, thence south 80 chains, thence west 20 chains, thence north 80 chains to the shore of Tutshi Lake, thence following the shore 20 chains to the point of commencement. Containing 100 acres more or less.
Dated July 20th, 1906.
018 WALTER G. SWEET.

NOTICE

NOTICE is hereby given that the owners of the "Mon-Union" lease on Boulder Creek will not be responsible for any debts contracted by the lay men, for labor or supplies.
A. S. CROSS,
Atlin, July 24th, 1906. Managing Owner.

NOTICE

Cabin For Sale.
Any person desiring a neat, well appointed and comfortable cabin, situated on the bank of Pine Creek, just above the "Half-Way" House, may procure same and contribute to the support of St. Andrew's Hospital by applying to J. A. FRASER, Govt. Agent.

Certificates of Improvements.

Sunrise and Sunset Mineral Claims.

Situate in the Atlin Mining Division, Cassiar District. Where Located:—On Indian Creek, near Fourth of July Creek.

TAKE Notice that F. Edward S. Wilkinson, as agent for Louise Leonine Graham, Free Miner's Certificate No. 11,643, and Alexander McDonald, Free Miner's Certificate No. 164,009, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 25th day of June, 1906.
EDWARD S. WILKINSON, F.L.S.
s28 Agent.

Etta Extension, At Last, and White Baby Mineral Claims.

Situate in the Atlin Mining Division, Cassiar District. Where Located:—One-quarter of a mile North-West of Atlin.

TAKE Notice that I. W. Gass, Free Miner's Certificate No. 103,978, and as agent for C. O. Beelme, Free Miner's Certificate No. 103,978, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 1st day of August, 1906.

NOTICE.
Cariboo, Omineca and Skeena River Mining Divisions.

NOTICE is hereby given that on and after the first day of June, 1906, the following definitions of the boundaries of the Cariboo Mining Division, the Omineca Mining Division and the Skeena River Mining Division will be substituted for those at present in force:—

CARIBOO MINING DIVISION.
Starting on the eastern boundary of the Province at a point where such boundary cuts the southern boundary of the watershed of the Peace River and its tributaries; thence proceeding westerly and southerly along the height of land separating the drainage area of the Fraser River and its tributaries on the south from the drainage area of the Peace River and its tributaries on the north, continuing to and crossing the Salmon River at a point about five miles from where the said Salmon River empties into the Fraser River; thence westerly along the height of land separating the drainage area of the Fraser River below this point and of the Nechaco River below the junction of the Stuart, on the south, from the drainage area of the Stuart and Salmon Rivers on the north, to the mouth of the Stuart River and crossing of the Nechaco River; thence southerly and westerly along the height of land forming the boundary between the watershed of the Nechaco River above the Stuart on the north and the Chilako (Mud) River and Blackwater on the south and east to a point on such height of land where it intersects the height of land separating the watershed of the Echuifko River on the north and the upper Blackwater on the south; thence easterly along such divide to a crossing of the Blackwater at the junction of the Nazco River; thence easterly along the height of land between West River and Baker's Creek to a crossing of the Fraser at a point half-way between mouths of West and Quesnel Rivers; thence easterly following height of land dividing the drainage area of the Quesnel River and tributaries on the south from the drainage area of the Willow and Cottonwood Rivers on the north, to a point where such height of land intersects the height of land dividing the drainage area of the South Fork of the Upper Fraser from the drainage area of the Canoe River; thence south-east along such divide to the eastern boundary of the Province; thence northerly along such eastern boundary to the point of commencement.

OMINECA MINING DIVISION.
Commencing on the eastern boundary of the Province at a point where such boundary crosses the divide separating the drainage area of the Hay River on the north from the drainage area of the tributaries of the Peace River on the south; thence westerly along height of land forming divide separating the drainage area of the Hay River and tributaries of the Laird River on the north from the drainage area of the Peace River on the south, to a point where such height of land intersects the height of land separating the headwaters of the Skeena River from the headwaters of the Skeena River; thence south-westerly following the height of land separating the drainage area of the Skeena River on the east from the drainage area of the Naus River

and tributaries on the west to the intersection of the height of land forming the north-western boundary of the watershed of the Kitsumgallum River; thence along this latter divide to a crossing of the Skeena River at a point three miles below the mouth of the Copper River; thence south-easterly along the height of land separating the drainage area of the Copper River from that of Thornhill Creek; thence continuing south-easterly along the height of land between the Copper River and its tributaries on the north-east and the Kitimat River on the south-west to a point on the height of land separating the drainage area of Gardner Canal on the west from the tributaries of the Nechaco River on the east; thence southerly and easterly following the height of land forming the west and southern boundaries of the watershed of the Nechaco River above the junction of the Stuart, to the crossing of the Nechaco River at the mouth of the Stuart; thence easterly along height of land between the drainage area of the Nechaco on the south and the Salmon River on the north, crossing the Salmon River at a point five miles from where the said Salmon River empties into the Fraser River and still following the height of land to a point between Summit Lake on the north and the Fraser River on the south; thence northerly and easterly along the height of land dividing the drainage area of the Fraser and its tributaries on the south from the drainage area of the Peace River and its tributaries on the north, continuing to a point where the southern boundary of the watershed of the Peace River is cut by the eastern boundary of the Province; thence north along such eastern boundary to point of commencement.

SKENA RIVER MINING DIVISION.
Starting on the International boundary in Dixon's Entrance opposite Cape Muzon; thence easterly and northerly along said International boundary to the height of land between the Unk River and Iskut River; thence north-easterly, following the height of land dividing the drainage area of the Stikine River on the north from the drainage area of those streams emptying into the Pacific Ocean south of Portland Canal to a point where such height of land intersects the height of land separating the watershed of the Skeena River on the east from the Naus River on the west; thence following the height of land between said rivers to a point where such height of land joins the height of land forming the north-western boundary of the watershed of the Kitsumgallum River; thence along this latter divide to a crossing of the Skeena River three miles below the mouth of the Copper River; thence south-easterly along the height of land separating the drainage area of the Copper River from that of Thornhill Creek; thence continuing south-easterly along the height of land between the Copper River and its tributaries on the north-east and the Kitimat River on the south-west to a point on the height of land dividing the drainage area of Gardner Canal on the west and the tributaries of the Nechaco River on the east to a point on the height of land separating the drainage area of Gardner Canal and its tributaries on the north from that of Dean Canal and its tributaries on the south; thence south-westerly, following the height of land to a point north of Salmon Bay opposite Oscar Pass; thence through Oscar Pass and Millbank Sound, passing south of Price Island; thence westerly, passing to the south and west of Queen Charlotte Islands; thence northerly to the point of commencement in Dixon's Entrance.

RICHARD McBRIDE,
Minister of Mines.

OPPORTUNITY.

Master of human destinies am I!
 Fame, love and fortune at my
 footsteps wait.
 Cities and fields I walk; I pene-
 trate
 Deserts and seas remote; and pass-
 ing by
 Hovel and mart and palace, soon
 or late,
 I knock, once unbidden at every
 gate!
 If sleeping, wake; if feasting, rise,
 before
 I turn away. It is the hour of
 fate.
 And they who follow me reach
 every state
 Mortals desire, and conquer every
 foe
 Save death; but those who doubt
 or hesitate,
 Condemned to failure, penury and
 woe
 Seek me in vain and uselessly im-
 plore;
 I answer not, and I return no more!
 —John J. Ingalls.

Refinings of "The Mining World."

The face powder known as "pearl powder" is a compound of bismuth. Other metallic substitutes used as cosmetics are lead, mercury, anti-
 mony and arsenic.

Minerals have a number of char-
 acters which show their form and
 structure, the more important being
 crystallization, cleavage, fracture,
 hardness, density, luster and color.

One hundred and thirty-one miles
 is the height of the atmosphere, de-
 termined by noting the difference
 between the time of sunset and the
 complete disappearance of blue from
 the sky.

Water, in freezing, expands one-
 twelfth of its bulk, exerting a pres-
 sure of about 30,000 pounds per
 square inch. Pipes, etc., are dam-
 aged at the moment of freezing and
 not, as is commonly stated, by a too
 rapid thawing.

One of the largest saws, 8 feet 2
 inches in diameter and 3/8 inch
 thick, weighing 1,100 pounds, val-
 ued at \$5,000, having 210 teeth set
 with diamonds costing \$20 each in
 the rough, has just been made by
 an Indianapolis, Ind., company for
 the Romono Oolitic Stone Company
 of Stinesville, Ind.

An opinion of the source of the
 gold nuggets is that gold, being
 heavy, settles at the first opportu-
 nity at the bottom of a stream, unless
 a stratum of stiff clay prevents its
 reaching bedrock. Nuggets and
 coarse gold are found nearest the
 lode, when the topography has been
 of a nature to afford gold a resting
 place. Farther down stream the
 lighter flakes and small grains are
 deposited, as the stream widens and
 the force of the current abates. Fine
 flake and "flour" gold is often car-
 ried many miles down stream by
 the force of the water, which keeps
 it turning over and over and sliding
 along with the muddy matter of
 floods or freshets. Metallic gold,
 wire and thick gold leaves have also
 been found in chunks of lead ore;
 wire in copper and leaves in iron
 ore in lode mines, showing plainly
 that the lead, copper or iron was de-
 posited after the metallic gold had
 formed in the veins. These speci-
 mens are more worthy of the scien-
 tist's speculation and research than
 are the few battered and partly
 "rusty" gold placer nuggets found.
 Gold in placers comes from lodes.

Rich Gold Quartz Strike at Toochi.

Word comes from Log Cabin that
 a rich gold quartz strike has been
 made at the head of Toochi [Tutshi]
 lake, eight miles from Log Cabin.
 The strike was made some time ago,
 but the work of prospecting has
 been kept so quiet that word of it
 has just leaked out.

The lode has been traced over the
 top of Windy mountain and is more
 than eight feet wide. Many smaller
 lodes and stringers of the ore have
 been found.

Fifteen claims have been located
 and bonded already to a New York
 syndicate for \$200,000.

The assays that have been re-
 ceived average \$37 per ton, mostly
 in gold, but carrying values in sil-
 ver and copper.

A trail is now being made to the
 strike from Log Cabin.—Skagway
 Alaskan.

It is easy to mistake the outer re-
 straints of society for the inner
 righteousness of the soul.

It's hard to steer a straight course
 when you keep your conscience in
 your pants pocket.

An exchange says that when
 Harry Thaw killed Sanford White
 in New York he shot the lid off a
 very putrid state of affairs.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within
 the Railway Belt in British Columbia
 may be homesteaded by any person who is
 the sole head of a family, or any male over 18
 years of age, to the extent of one-quarter
 section of 160 acres more or less.

Entry must be made personally at the local
 land office for the district in which the land
 is situated.

The homesteader is required to perform
 the conditions connected therewith under
 one of the following plans:

(1) At least six months' residence upon and
 cultivation of the land in each year for three
 years.

(2) If the father (or mother, if the father is
 deceased) of the homesteader resides upon a
 farm in the vicinity of the land entered for,
 the requirements as to residence may be
 satisfied by such person residing with the
 father or mother.

(3) If the settler has his permanent resi-
 dence upon farming land owned by him in
 the vicinity of his homestead, the require-
 ments as to residence may be satisfied by
 residence upon the said land.

Six months' notice in writing should be
 given to the Commissioner of Dominion Lands
 at Ottawa of intention to apply for patent.

Coal lands may be purchased at \$10 per acre
 for soft coal and \$20 for anthracite. Not more
 than 320 acres can be acquired by one indi-
 vidual or company. Royalty at the rate of
 ten cents per ton of 2,000 pounds shall be col-
 lected on the gross output.

W. W. CORY,
 Deputy of the Minister of the Interior.
