THE ATLIN CLAIM.

VOL. 14. ATLIN, B. C., SATURDAY, JANUARY 20, 1906. NO. 34

TELEGRAPHIC.

GENERAL ELECTIONS IN GREAT BRITAIN

Have Resulted in a Liberal Landslide.

SOME BIG REVERSE MAJORITIES.

Death in New York Tunnel--The Fighters -- Counterfeiters are Captured--Many Immigrants--Capitulated -- The Workmen's Council Arrested--France has Severed Venezuelan Relations.

[SPECIAL TO THE CLAIM.]

London, Jan. 18.—The elections for the British House of Commons, which commenced on Friday of last week, have so far resulted in an overwhelming Liberal landslide. Hon. Joseph Chamberlain was elected in the riding of West Birmingham with over 5,000 of a majority. The standing of the different parties on Wednesday night, the 17th inst., was as follows: Liberals, 133, a gain of 64 seats; Unionists, 50, a gain of one; Free Trade Unionists, 3; Nationalists, 51; Labor, 27, a gain of 23.

New York, Jan. 18.—Four people are already dead and four others who are suffering from suffocation are in a very critical condition as the result of the bursting of an air pipe yesterday afternoon in the Rapid Transit company's tunnel under the East river. The damaged pipe has been repaired and tunnel traffic resumed.

Butte, Mont., Jan. 18.—Marvin Hart, colored pugilist, and who holds the heavyweight championship of the world, knocked out Pat Callahan, miner pugilist of this city, in the second round of what was to have been a four round contest before a big house here on Tuesday night.

Seattle, Wash., Jan. 18.—Three Japanese counterfeiters were arrested in this city late on Tuesday evening. Several hundreds of dollars worth of spurious $5 and $10 gold pieces and the counterfeiters complete manufacturing paraphernalia was also captured.

Ottawa, Jan. 18.—The Dominion immigration department has just made known the fact that nearly 150,000 immigrants arrived and settled in Canada during the last year. Of that number 55,000 came from Great Britain and 45,000 from the United States. The remaining 50,000 were mostly from European countries.

San Domingo, Jan. 18.—The porte of Monte Cristi, which had recently been in the hands of the revolutionists, capitulated to the government forces late yesterday afternoon.

St. Petersburg, Jan. 18.—All the members of the Workmen's Union council for the St. Petersburg district, which included 22 persons, and which had been responsible for many of the recent disorders and strikes in this city and neighborhood, were arrested on Tuesday night while holding a secret meeting. The police at the same time also seized many revolutionary documents and a large quantity of the organizations correspondence.

Vancouver, B. C., Jan. 18.—The Great Northern flyer struck a fallen tree during last night when near Burnaby lake, a few miles south of this city. The engineer, whose name was Jones, was instantly killed. Two of the passengers received severe injuries. The engine was a total wreck.

Cleveland, Ohio, Jan. 18.—Great damage was wrought to many buildings and the telegraph and telephone systems throughout this state by a fierce gale which swept across this section of country on Monday.

Indianapolis, Ind., Jan. 18.—The seventh annual convention of the United Mine Workers of America was opened in this city on Tuesday. There are over twelve hundred delegates in attendance.

Paris, Jan. 18.—As a result of the elections which have this week been held throughout this country M. Fallieres has been elected to the presidency of France.

Vershire, Vermont, Jan. 18.—Mr. George Westinghouse, of Westinghouse air-brake fame, and who during the last few years has spent over a million and a half of dollars searching for copper in the Vershire range of mountains in this state, has this week abandoned the project as futile.

Caracas, Venezuela, Jan. 18.—Mr. Russell, the American ambassador to this country, will today deliver to the government of Venezuela, on behalf of France, a note severing all diplomatic relations between the two countries. The French charge d'affairs was recalled yesterday.

Chicago, Jan. 18.—This city was thrown into mourning yesterday by the death of Mr. Marshall Field, the multi-millionaire merchant. The board of trade, the banks, and a great number of the wholesale and retail establishments remained closed during the day.

Alexandria, Egypt, Jan. 18.—The Suez canal is at present being hurriedly widened at many of the narrowest parts so as to enable the United States floating dry dock, which is being towed to the Phillippines, to pass through without chance of injury or of blocking the canal to traffic.

Paris, Jan. 19.—M. Maubgoret, the Venezuelan minister to France, was yesterday afternoon served with an official notification of his expulsion from France, the same to be acted upon immediately. The government's patience has become exhausted and it has finally decided to adopt energetic measures. It is understood that a naval demonstration against Venezuela is being rapidly prepared.

London, Jan. 19.—The Laborites and Liberals each gained a seat as the result of last Saturday's election at Newcastle-on-Tyne. Both of these seats were formerly held by Unionists, who had won them in the previous elections by majorities of over 5,000. The force of the recent anti-Unionist blizzard in the Newcastle-on-Tyne ridings may be guaged by the results, which gave the Labor and Liberal candidates majorities of over 7,000 each.

Victoria, B. C., Jan. 19.—MacDonald, the leader of the opposition in the British Columbia parliament, has challenged the legality of the order-in-council which transferred the Kaien island lands to the Grand Trunk Pacific railway, to be used as a terminal point.

London, Jan. 19.—The members already elected are distributed among the parties as follows: Liberals, 167; Unionists, 73; Labor, 31; Nationalists, 50. Of the twenty-three London seats which have so far been polled up to today the Liberals were successful in capturing a snug sixteen, and twelve of these were net gains.

GENERAL NEWS.

William Cunard, son of the founder of the Cunard steamship line, is dead at New York, aged 81 years.

The town of Edmonton has decided to support Calgary in the latter's efforts to secure the Dominion fair for 1907.

Lady Barrow, widow of Sir Geo. Barrow, has died in London, aged 97 years. She was the original of Lawrence's portrait, "The Beautiful Miss Crocker," now owned by J. Pierpont Morgan.

Spruce Creek Notes.

[From Our Own Correspondent.]

Spruce creek is practically shut down from sluicing on account of the present cold snap.

Cox & Co. will resume operations in a few days.

Mrs. Rineberg, who has been confined to her bed for a week or so with a severe cold, has recovered and is up and around again.

Mr. McNaughton, who has this week returned to Spruce from a trip to the coast, will take charge of Mr. Bennett's store while the latter, whose health has been rather poorly of late, takes a trip to Vancouver to visit his wife and family.

Messrs. Rannie McLeod, J. McKechnie, William Small and many others went to Atlin from the creek on Sunday last to attend the funeral of the late E. J. Thain.

H. Calvert, who is this winter trapping on the head of Spruce creek, this week brought in one of the finest silver-grey fox skins that was ever captured in the Atlin district. Mr. E. L. Pillman purchased the fur.

THE PAST YEAR'S MINING IN ATLIN DISTRICT.

SPRUCE CREEK CONTINUED.

Although a good pay streak exists above and below their ground, the Columbia Hydraulic Company prospected much of their ground last season and were unsuccessful in trying to locate "pay."

The British Columbia Dredging Co., Ltd., completed the construction of their dredge in Blue Canyon, Spruce creek, in time for a test run of about three weeks before the season closed. The management stated that the results, both from efficiency of operation and gold secured standpoints, were exceedingly satisfactory and the company is quite confident of successful operations during the approaching season.

The introduction on Spruce creek of a steam traction shovel, by the Northern Mines Limited, as a means of successfully working placer ground was an entirely new venture in this district. The shovel was operated seven or eight week, moved a considerable yardage of gravel and made good returns and clearly demonstrated that it will almost assuredly become a mode of successfully operating much of the ground in this district.

On a group of leases on Little Spruce creek prospecting was done by means of a shaft, which was sunk to a depth of 70 odd feet without getting bedrock. The holders have good faith in their ground and will continue sinking next season.

BIRCH CREEK.

The ground on this creek is quite rich but the water supply is quite inadequate and from the results of last season's operations by a dozen individual miners and two companies the only practical conclusion is that reservoirs will have to be constructed in order to obtain a sufficient supply of water to ensure successful operation.

The Atlin Lake Company, Ltd., only sluiced for about two months, being compelled to shut down by shortage of water, but they obtained good results.

Cancellor, Pearse & Co. were put to much expense by damages caused to flumes, pits, etc., by the spring freshet, but operated until the end of August with inspiring returns obtained. They will continue operations at the commencement of the season.

BOULDER CREEK.

About forty individual miners operated on this creek during the past season and obtained good returns, which would have been greatly increased had they not been restrained from ground-sluicing by the unexpired injunction in the hands of the French company holding property on Boulder.

The Societe Miniere de la Colombie Britannique cleaned up considerable bedrock with fair returns and at the end of the season had

DR. YOUNG'S VIEWS.

The Skagway Alaskan interviewed Dr. Young, M.P.P., when he passed through that town recently and reported him as follows:

"One of the things to which Dr. H. E. Young, member for Atlin, will direct much of his attention this winter will be the concessions for hydraulic purposes that have been made in the Atlin district. He will make it a point to see that the concessions are developed as the law contemplates they shall or that they give way, permitting the individual miner to have an opportunity to develop and prospect the ground.

"'I believe,' says Dr. Young, 'that the individual miners who came into the Atlin district, proved its worth, developed it, and who are today its chief producers, should not be restricted in their opportunities by men who are holding concessions for speculative purposes. No one desires to injure those hydraulic men who are spending their money in the development of the country. Every effort should and will be made to protect their interests. What the people of Atlin object to, in which objection I shall uphold them to the extent of my ability, is the continuance in effect of those concessions which retard development.

"'The intention of the British Columbia law is that hydraulic concessions of 80 acres may be made where ground has been proven to be of too low grade to pay to work without extensive machinery and with great outlay of money for the purpose of developing water supply, power, etc. In other words the concession is supposed to follow the abandonment of ground by the individual miner. In the Atlin district in the beginning this was overlooked. There had been no great placer discoveries between the Cariboo and the Klondike. During the long years between the decline of individual placer mining and its revival by reason of the Klondike and Atlin discoveries, the hydraulic men were the principal producers of placer gold and their interests were more in the mind of administrators than were those of the individual miner, whose rights were held in abeyance.

"'Under the circumstances it was very natural that promoters should induce those in authority to permit them to encroach upon the rights of the individual miners before the latter understood them well enough to assert themselves and call a halt. Many concessions were granted in the Atlin district, like which was the case in the Klondike, wherein the intent of the law was not regarded.

"'Our plan is now to return to the law. Those who have concessions will be required to utilize them as the law provides or have them cancelled. The strict letter of the law will be observed in applications for concessions in the future.

"'Headway has been made already in this respect. Within the last year 130 concessions have been cancelled. More will follow.'

"Dr. Young will also seek to have the size of placer claims enlarged from 250 feet square, as at present, to 300 by 1,000 feet in size. He says this is in accordance with ideas of right prevailing in the Atlin district among those who have devoted the last half dozen years to placer mining, and he believes they are the men best qualified to judge on all placer mining matters."

CORRESPONDENCE.

[The Claim is not responsible for views expressed by correspondents.]

Lest I be Misunderstood.

Editor of The Atlin Claim:

Sir,—The following is a transcript of petition received from "The Lord's Day Alliance" asking me to see that as far as possible all qualified voters have an opportunity of signing:

"To the honorable the house of commons of the Dominion of Canada, in parliament assembled:

"The petition of the undersigned electors humbly showeth that

"In view of the decisions of the Supreme Court of Canada and of the Judicial committee of the Privy Council on the question of Sunday legislation, and

"In view of the paramount importance of securing to every one the rights and privileges of the national day of rest,

"We respectfully pray that such legislation be enacted at the ensuing session of parliament as will adequately protect everyone in the enjoyment of the Lord's day, commonly called Sunday, and prevent the doing on that day of labor, business or work, excepting work of necessity or mercy."

Owing to the fact that I will not be able to see personally all the voters, I will see that one list is left at Stables & Lumsden's, Atlin, and one at Geo. A. Kerr & Co's. store, Discovery, so that any wishing to add their signatures will know where to go.

I understand that some are under the false impression that I drafted the preamble with malicious intent at existing conditions. This is not the case. In order to relieve the present situation here in our midst it is not necessary to appeal to the house of commons of the Dominion of Canada. A better and more effective way would be to appeal a little more frequently and a little more persistantly to the law of conscience. According to my interpretation the key note of the petition is protection of the rights and privileges of citizens. If this interpretation be correct surely it should appeal to the sympathy and demand the support of all those in whose bosoms may be found even a spark of those nobler feelings of fraternity and brotherhood.

The petitions must be complete by the 24th of this month.

Rev. A. M. Ross.

Atlin, January 17th.

TAKE Notice that, sixty days after date, I, Thos. E. Fleming, intend applying to the Hon. the Chief Commissioner of Lands and Works for permission to purchase the following described tract of land, situate on the east shore of Windy Arm, Atlin Division: Beginning at Post No. 1, a mile and a half south of the Provincial Boundary, thence north-westerly 40 chains to Post No. 2, thence easterly 40 chains to Post No. 3, thence southerly 40 chains to Post No. 4, thence westerly 40 chains to point of commencement.

THOS. E. FLEMING.

Dated this 18th day of November, 1905. ja18

NOTICE.

NOTICE IS HEREBY Given that application will be made to the Legislative Assembly of the Province of British Columbia at its next session for an Act to revive, ratify and confirm to the British Columbia Northern and Mackenzie Valley Railway Company all the rights, powers, privileges and franchises conferred by the British Columbia and Yukon Railway Act, 1903, upon said Company, and to declare that notwithstanding that surveys have not been made in accordance with Section 21 of said Act the said Company is and has been since the passage of the said Act a body corporate and politic under the name of the "British Columbia Northern and Mackenzie Valley Railway Company," with the rights, powers, privileges and franchises thereby conferred in all respects as if the surveys had been made in accordance with said Section 21, and to extend the time for making the said surveys required by said Section 21, and to give to the said Company the following additional powers, viz:—

To acquire and work coal mines; to build branches not exceeding 20 miles from the main line; to build and operate telegraph and telephone lines, and to charge tolls; to build and operate steam and other vessels on the inland waters of British Columbia; to acquire and operate wharves; to enable the line of railway to be constructed in sections; And to amend by omitting the alternative line of railway via the Skeena river.

Dated at Victoria, British Columbia, this 20th day of November, A. D. 1905.

Continued from page 1.

got into rich ground, which gives promise of successful operations during next season.

J. H. Black employed 12 to 14 men all season and successfully operated a lay on a portion of the above company's ground, and on which he is continuing operations during the present winter.

A force of six men were employed during the season on a lay on the Mon-Union lease and much gravel was sluiced, netting good profits.

Drifting operations are being carried on at present on Boulder by some twenty men.

RUBY CREEK.

Some ten miners carried on development work on Ruby creek during last season.

The Ruby Creek Mining Partnership employed some half dozen men in exploratory work on their ground and, besides proving beyond a doubt that their holdings are exceedingly valuable, had the satisfaction, by the comparatively small yardage of gravel washed, in netting a small profit over expense while carrying on purely prospecting work. They have demonstrated a pay streak of over 170 feet wide with the eastern rim as yet unfound. The property of the partnership is about the most promising hydraulic proposition in the Atlin camp.

A lone miner is keeping things on Ruby warm over winter, and in the spring she will talk for herself.

WRIGHT CREEK.

Over a dozen men prospected on Wright creek during the season and quite a few of them were rewarded with good returns.

The Lincolnshire and Surrey hydraulic syndicate expended some $2,200 in preparatory work on their ground and it is expected that next summer they will open up the pay streak in their ground.

OTTER CREEK.

Five or six men prospected different leases near the mouth of Otter creek last season with fair results.

A. Carmichael is at present on the creek developing on a group of leases for next season's operations.

O'DONNELL RIVER.

Although O. B. Perry did not take up the bond which he had on a number of leases on this river last season it is confidentally believed that there is a large quantity of placer ground there which will eventually be opened up and made to pay big profits.

A number of men are at present doing prospecting work on three O'Donnell river leases and a like number of leases on Bull creek and good prospects have been found.

VOLCANIC CREEK.

Last season a number of individual miners with holdings on this creek combined their efforts in an endeavor to sink to bedrock and had reached a depth of 45 feet when stopped by water. They had however got into dirt which gave big returns to the pan and as a result arrangements have already been made for installing a powerful pumping plant in the spring, when the men will continue their quest with increased energy. So great is the faith of the men in the possibilities of this creek that about a 16 mile wagon road has been constructed to their workings to facilitate the getting in of supplies and heavy machinery.

Taking into account the shortage of water experienced and the somewhat smaller number of men employed, the placer mining operations of the past season in the Atlin district were on the whole very successful and we are confident by what we know that we do not greatly overshoot the mark when we state that gold to value of $500,000 was produced in this camp in 1905.

We understand that steps are being taken to conserve water at several different important points in the district by the construction of huge reservoirs so as to ensure a sufficient supply for all operators throughout coming years. At the present time mining in general throughout the district is in an exceptionally healthy condition and the indications are that the season of 1906 will greatly surpass last season both from the standpoint of value of gold produced and numbers of men employed.

MINERAL CLAIMS.

Assessment work was done during the past year on a large number of mineral claims (over 150) in different parts of the district, besides which crown grants were obtained on many claims. Upwards of fifty new locations were recorded during the season and to a casual observer it is evident that from a quartz mining standpoint the Atlin district is as yet in the infancy of a great future.

The development work on the quartz mines on the Yukon side of the line at Windy Arm last year caused much renewed interest and many parties took the field in that part of our district bordering on Windy Arm in the latter part of the season and several promising claims were located. It is also said that work of a permanent nature with a view of making shipping mines will be inaugurated on quite a few well developed claims during the coming season.

NOTICE IS HEREBY Given that an application will be made to the Legislative Assembly of the Province of British Columbia at its next session for an Act to incorporate a Company to build a line of Railway from the City of Vancouver, or a point on Burrard Inlet, to the Northern Boundary of the said Province by way of Lillooet, the Fraser Valley, Tacla Lake, Stickine River and Teslin Lake, or in the alternative by the most feasible route through the Chilcoten Valley and Stickine River, with power to equip, construct and maintain branch lines and all necessary bridges, roads, ways and ferries; and to build, own and maintain wharves and docks in connection therewith; and to build, own, equip and maintain steam and other vessels and boats, and operate the same on any navigable waters within the Province; and to build, equip, operate and maintain telegraph and telephone lines in connection with the said railway and branches, and to generate electricity for the supply of light, heat and power; and to acquire lands, bounses, privileges or other aids from any Government, Municipal Corporations or other persons or bodies, and to levy and collect tolls from all parties using telegraph or telephone lines, and on all freight passing over any of such roads, railways, tramways, ferries, wharves and vessels built or owned by the Company; and with power to make traffic and other arrangements with railway, steamboat or other companies, and for all other necessary or incidental rights, powers and privileges in that behalf.

Call early and take your choice.

The Whist club will meet on Monday evening next for a regular rubber in the parlors of the Atlin club building. Members should be present to change their minus' to plus', especially the gentleman who played to a 19 minus at the last meeting.

Stables & Lumsden carry a stock of good groceries.

Word was received in camp lately from Ontario that Mr. J. H. Black, who is one of Atlin's pioneer miners, was on December 26th joined in wedlock with Miss Katherine MacKenzie, who is a sister of Alex., Daniel and Malcolm MacKenzie, residents of the camp.

THE CLAIM chimney and also that of the Royal hotel burned out shortly after 7 o'clock on Thursday evening. The fire boys were on hand in quick order and both of the smudges were given all necessary attention. The result is that there are certainly two chimney flues which are fairly clear of dirt.

The mail which should have arrived in camp on Saturday last was unavoidably detained at Taku for about three days while the lake was putting on ice. It however got in safely on Tuesday afternoon although Mr. Brown, who accompanied Mr. Kirkland across, got wet to the hips when nearing the east shore. McKee arrived on time with Wednesday's mail and "Big" Jack is almost sure to get in on time today.

Dr. Neil M. McNeill, of Victoria, arrived in Atlin with the mail men on Wednesday and will attend to the medical practice of Dr. H. E. Young during the latter's absence while attending the session of the B. C. parliament. This is Dr. McNeill's first experience of mushing and he says it was lovely until he heard the ice crack some when within about four hundred yards of the east shore of Atlin lake. The doctor, who is a native son of British Columbia, is a graduate of the Rush Medical College, of Chicago, and has had considerable practice in this province.

Burial of E. J. Thain, S.M.

Many Attended -- English Church and Masonic Services Held.

The funeral of the late E. J. Thain, S.M., took place on Sunday afternoon last under the auspices of Atlinto Lodge, A.F. & A.M. and, although the weather was bitterly cold, there was a large turnout of the friends and acquaintances, including many from Discovery and the creeks, to pay their last sad respects to our departed and much-missed citizen. The Masonic services were conducted at the house by Mr. J. A. Fraser, W. M., after which the remains were conveyed to the English church, where the Rev. F. L. Stephenson conducted the services of that church to the dead. The cortege was then formed by the members of Atlinto lodge in a body, followed by the citizens, and proceeded to the cemetery, where the final services of the Church of England and the Masonic order were performed.

The pall bearers were: R. B. Anderson, W. H. Vickers, John M. Shirley, Capt. Hathorn, R. A. Jackson and A. B. P. Thomas.

At the Rink.

The Wilkinson Cup Draws--Other Matches Played This Week.

Following is the result so far in the first draw for the J. T. Wilkinson cup:

Fetherston.	0			
D. Ross....	11	...		
Bourne....	14	...	...	
Eggert.....	00			...
Rev. Ross.	10		...	
Rosselli....	3	...
