COUNTY COURT

Will Be Held in Atlin Next Tuesday.

A Very L[illegible]ht Docket — Two Welcome Arrivals — A Newspaper Pro[illegible]ion.

Judge [illegible]erson, of the County Court, arrived in Atlin [illegible]ncouver, arrived in Atlin [illegible]ursday morning and will open sittings of the County Court [illegible]esday morning next, at [illegible]

[illegible]t indications there w[illegible]y large docket at the or[illegible]nly cases presently [illegible]are the lien cases of [illegible]Nichol and McLeod vs. [illegible]Brewery. Though not de[illegible]et down, there are a num[illegible]ther cases, not settled last [illegible]hich may be got in shap[illegible]e brought before Judge Henderson.

Differing from the usual annual visitation of a Judge from the outside, Judge Henderson was not accompanied by a formal array of legal satellites, which has previously marked the arrival of a judicial official. As a consequence, the County Court is not likely to be overcrowded with work.

Among the other prominent passengers who arrived on Thursday were Mr. F. T. Blunck and Mrs. Blunck, and Mr. G. A. Brackett, the former of the Pine Creek Power Co., and the latter of the Atlin-Willow Creek Co.

The interests of the companies, represented by these two gentlemen, have for the last two years been so often in conflict, that it is sincerely to be hoped that the hatchet has been buried and that peace and prosperity will be the lot of each during this and succeeding seasons.

"Uncle Airchie" Gets Promoted.

The "Daily Alaskan" is responsible for the following information concerning Mr. Archie Cameron, who, for the last three seasons, was Road Foreman for this district:

"On the Amur yesterday was A. Cameron and a party of seven, who are going south today to Chilkat or Pyramid Harbour. Mr. Cameron is a Canadian Government surveyor, and is in the North on an important mission.

"With his party they will survey a new road from Pyramid Harbour or Chilkat to the Porcupine district. The party expects to have the job completed within a month or six weeks."

QUARTZ NEWS.

Work Commenced on the Lakeview.

Rich Rock From the Mother Lode —Otter Lake Development Looks Well.

On top of the lucky discovery on the Imperial mine, satisfactory reports continue to come in from the Rock of Ages claim of the Mother Lode. Mr. Ruffner has his hoisting and pumping plant working like a charm. Sinking on the vein is now being continued and the extremely high value which the rock showed on its outcrop has by no means diminished. If the continuity of this ledge can be proved and the same pay found to hold out the Mother Lode will make a name for Atlin the world over.

The Lakeview mineral claims, another free-milling group, on the mountain between Birch and Boulder creeks, the owners, on behalf of a Pennsylvania Company, are running in a tunnel, 70 feet below the old workings, and calculate to tap the ledge at 120 feet. They are now in 35 feet.

In close proximity to the Lakeview, Capt. Hawthorn, who owns a group of claims, is preparing to do development work. The prospects in this section of the district are extremely gratifying.

We have just learned of the result of development upon some property in the Otter lake section of the district, which, to say the least, is most encouraging. The owners claim to have a true fissure vein of ore, carrying gold and silver values, with very well defined walls, while the ledge itself is traceable, by outcroppings, for a very considerable distance. Panning tests from crushings show the rock to carry good values in free gold. A casual sample of the rock sent in for assay, yielded the enormous return of $847. One of the owners, on his return to Atlin from the claims, almost feels that there has been "a job put up" on him when he was shown the assayer's return.

The Medical Health Officer.

The arrival of Dr. D. E. Lazier will be noticed amongst the list of passengers who came in by last Saturday's boat. Dr. Lazier has come here to succeed Dr. Lewis as Resident Physician, Dr. Lewis having signified his intention of resigning his appointment at the completion of his term.

Dr. Lazier is a graduate of Queen's College, Kingston, Ont. He has been a resident of the Pro-

SATURDAY, JUNE 14, 1902.

WE are pleased to extend a cordial welcome to His Honor, Alex. Henderson, Judge of the County Court of Vancouver, to this far away section of his very large district. We are glad to learn that his visit is not limited as to time and that his judicial duties will not be so arduous but that he will find time to look into our mining interests generally, with the view of at least familiarizing himself with our needs in as far as his honorable profession is concerned, and the advisability of having a representative of his Court resident in Atlin for the greater part of the year. He will also have the opportunity of acquiring a knowledge of the immense possible resources of the Atlin district.

Apropos of a County Court Judge for Atlin, we learn upon reliable authority that the appointment of a resident Judge for the district has for the meantime been withheld. The visit of the Hon. Judge Henderson is ostensibly for the purpose of "relieving the pressure" and at the same time of fully ascertaining as to the need of making such an appointment before establishing a "precedent."

From our own point of view we would far rather see the necessity of a County—or any other—Court removed than the appointment of Judge!

TO THOSE interested in quartz mining in the district, the result attendant upon the further development at the Imperial mine, must be hailed with extreme pleasure, as tending to show that perseverance and thorough practical knowledge invariably win out in spite of contending odds. Mr. Pearse and his associates are to be congratulated on the prosperous outlook to which their faith in the property and their hard work has opened out for them.

In an interview with Mr. Blake, of San Francisco, a mining man of much experience, who visited the mine this week, we learn that from his personal observation, he has every reason for affirming that the Imperial mine has the prospect of becoming a mine of no mean importance. Before reaching this desirable stage a different method of working than the stamp mill will most likely be found necessary if the full gold values are to be saved. The mine, if properly managed, and he considers Mr. Pearse a man who knows his business, is unquestionably one, which, for very little money, could soon be placed on a profit-bearing basis. In his opinion values were lost by the stamp mill employed in the test crushings, and suggested that a shipment be sent outside for advice as to the best method of treatment.

WILL MAKE A MINE.

The Prospects of the Imperial Group.

The New Rich Ore Chute Can be Traced for Over Two Hundred Feet.

From the reports which have recently appeared in our columns on the satisfactory development which has been done by Mr. H. P. Pearse on the Imperial mine, Monro mountain, our representative decided to make a visit and verify these reports by personal observation.

From the interview had with Mr. Pearse, it was learned that the work he had undertaken was no easy task. A record had been made for the mine by the company who first opened it up. This record, as demonstrated from a mill run of 372 tons of the ore, gave an average value of $7.05 per ton. It was demonstrated then that with such values the mine could not be made pay. Very naturally, with unlimited means and with every possible facility, it was generally assumed that if the Nimrod Syndicate could not make the property pay no other company could, consequently it has remained inactive until Mr. Pearse took a bond upon it, and was prepared to, at least, try and prove that the property could be converted into a paying mine.

Mr. Pearse's first work was to thoroughly sample the rock from the vein exposed by the previous workings and put it through the same stamp mill. The result, as stated in a communication from that gentlemen, brings the average value away in excess of that obtained from the previous tests, with a return of $10.65, allowing nothing for values contained in the tailings. From the known inefficiency of the stamp mill the tailings are expected to contain a good percentage of free gold as well as gold in other combinations.

The writer visited the workings and saw what work had been done, took and "mortared" samples from various parts of the mine, and saw results far beyond what he was led to expect. Although it is at present impossible to estimate the extent or possible continuity of the rich strike made a few days ago by Mr. Pearse, there is enough now in sight — traced from the outcrop, through the upper, main west drive, down to the lower tunnel, a depth of over 200 feet—to warrant much development. It is the present intention to sink on the vein from the upper tunnel and systematically test the ore. This, though cut through by the Nimrod Syndicate in the upper drift, was not followed or traced by them and the high gold values were evidently unknown. From several indications on the footwall there is a strong probability of other and possibly richer parallel veins further in, and it is Mr. Pearse's intention, if all goes well, to continue the main tunnel several feet in and ascertain if these indications are worth following up.

Letter to the Editor.

THE IMPERIAL MINE.

SIR:—Allow me to draw your attention to a paragraph in re the Imperial mine, Monro mountain, appearing in the ATLIN CLAIM of today's issue, which, though partially correct, conveys a somewhat misleading impression.

The crushing referred to was a little over twenty-five tons which gave a mill return of 15 oz. gold, or an average yield of 15 dwts to the ton. One cake of this, of the weight you mention [11 oz 48 dwts], was deposited with the Bank of B. N. A. at Atlin. What the assay value of the gold may be I am not at present prepared to say, but I think it will be found to be in advance of $15.00 per oz.

The above twenty tons was taken from five different places, extending 100 feet along the vein, and represents the average value of the stone in these workings. A large percentage of the full gold values contained in the ore was lost during crushing operations, partly through defects in the battery and partly in waste concentrates.—Yours, etc.,

H. P. PEARSE.

May 31st, 1902.

THE GOLD COMMISSIONER.

DEAR SIR:—Now that it is demonstrated to us more clearly every day that ours is a hydraulic camp, some of us must feel happy that we took time by the forelock and acquired the property we have in leases, and we must feel happy in the appointment of Gold Commissioner, for there could not be a more apt appointment. We are now sure that our rights and privileges as leaseholders will be respected.—Yours, etc.,

LEASEHOLDER.

Atlin, B. C., June 6th, 1902.

SIR:—The Gold Commissioner has returned from his holiday, and states that he has resigned, and also that Mr. J. A. Fraser was likely to succeed him.

As soon as this report gathered strength, a telegram, in the form of a protest, was sent to the Minister of Mines by the Miners' Association, who, without question, should have a voice in such matters, and today we find that the Secretary of the Association receives an answer from the Minister of Mines to the effect that Mr. J. A. Fraser has been appointed, thus, as it were, "cinching" the matter. What must we assume here from the above facts? That the appointment has been made without the knowledge of the free miners of this district. That the appointment was made with the knowledge, consent and support of Mr. James Stables, who, apparently, has not seen fit to take his constituents into his confidence.

Can it be that it has become necessary to have Mr. Fraser removed, as being a too strong opponent of Mr. Stables?

I think, Sir, the above is a fair summary of what has taken place and I ask you to publish my views so that we here may all understand exactly how far we should, after this exhibition, take Mr. Stables into our confidence.

I think it is high time the free miners of this district should have a representative from their own ranks.—Yours truly,

ONLOOKER.

vince for over a year, during which time he has been Resident Physician at the Halcyon Hot Springs Sanitarium on Arrow Lake, B.C., —noted for its cures of rheumatic complaints. Before receiving his present appointment, the doctor was engaged in quarantine duties on the Coast.

The new incumbent is a young man of ability and has a genial presence and manner, and though this district is noted for health-giving qualities, we feel assured that those who may require a physician's services will find in Dr. Lazier a man in whom implicit confidence can be placed.

A Miners' Union Organized.

A meeting of miners was held at the Nugget Hotel, Discovery, on the evening of Monday, 2nd inst, with a very good attendance. A local Labour Union for the Atlin district was formally organized with the following officers: J. Kirkland, President; J. Thompson, Vice-President; H. Brown, Secretary (pro tem.).

Regular meetings of the Union will be held at the Nugget Hall on the 1st and 3rd Wednesdays of every month at 8.30 p.m., for the transaction of regular business. All those who are in sympathy with the principles of unionism are cordially invited to attend these meetings.

Mr. W. H. Vickers, late Chief Constable of this district, is now Road Superintendent in Porcupine.

Agen's specially selected fresh ranch eggs—McDonald's Grocery.

Back numbers of the ATLIN CLAIM can always be had at the CLAIM office, price 15 cents.

C. Dubois Mason, of Victoria, the well known attorney, who, like the swallows, has come to spend the summer with us, arrived on last Thursday's boat and will occupy his old quarters opposite the Government Building.

For Oranges and the very finest butter go to McDonald's Grocery.

The card of the well known firm of Pellew-Harvey, Bryant & Gilman, Provincial Assayers and Mining Engineers, will be noticed in another column. This firm is one of the most reputable and reliable on the coast and are desirous of entering this field. Their rates are so reasonable that they should appeal to any one desiring to have assays made—Gold, Silver, Lead or Copper, each, $1.50; Gold & Silver, $2.00; Gold, Silver & Copper, $3.00, etc. W. W. Grime, of Atlin, has been appointed local Agent for the company and samples for assay will be forwarded to Vancouver without delay.

The steamer Ruth was launched last Saturday. She will be ready for "sea" in a few days.

Pete McDonald of Pine left for a visit to the Coast on Friday.
