

THE ATLIN CLAIM.

VOL. 26.

ATLIN, B. C., SATURDAY, OCTOBER 19, 1907.

NO. 432

TELEGRAPHIC.

A Budget of Interesting News From Many Quarters.

(SPECIAL TO THE CLAIM.)

Sault Ste Marie, Oct. 18.—The new steamer Cypress, of The Lackawanna Transportation Company, was wrecked quite recently, and out of a crew of twenty-three there was but one survivor.

Victoria, Oct. 18.—It is reported about here that the provincial government has granted the Grand Trunk a right of way through and privilege of taking timber from all crown lands throughout the province.

New York, Oct. 18.—Harriman has issued instructions to curtail expenses on all the lines under his control, on account of the stringency of the money market. This has caused a big slump in stocks and they have dropped to the level of the prices of last March's panic.

Chicago, Oct. 18.—The railway switchmen have demanded an increase of six cents per hour and double time on Sundays. All the yards in New York and the West are affected. It is believed that the demands will be granted.

Ottawa, Oct. 18.—The bills for the damages done during the recent anti-Japanese riots in Vancouver have been handed in to the government. The cost of one night's demonstration amounts to \$13,000. It will be paid immediately.

New York, Oct. 18.—Gladys Vanderbilt is to wed an Austrian Count named Zechenyi, on the 4th of December next.

Spokane, Oct. 18.—A strenuous legal battle is being fought out in the courts here between Heinze, of Butte, and Bradley, of San Francisco, for the control of one of the richest silver lead mines in the world. It is reported to have produced twenty-two million last year.

Gothenburg, Sweden, Oct. 18.—The Daily Graphic balloon which left the Crystal Palace, London, last Saturday night, broke the over-sea record. It crossed the North Sea to Denmark and travelled over Scandinavia at a great speed and descended at Brockin, Sweden, at 7.30 p. m. Sunday.

San Francisco, Oct. 18.—While in a state of intoxication a logger fell through the window of a Japanese laundry. This started a riot during which the building was completely demolished. Two Japanese are in the hospital and a number of the rioters were badly clubbed by the police.

San Francisco, Oct. 18.—The Norwegian bark Medca nine months out of Gothenburg, Sweden, has just made port. Almost the entire crew were sick with scurvy.

Ottawa, Oct. 18.—Owing to deafness the Hon. A. B. Aylesworth has cancelled all his engagements for public address.

Sir Wilfrid Laurier and the Hon. Wm. Pugsley went to Halifax to attend a banquet given to the Hon. W. S. Fielding last Tuesday.

London, Eng., Oct. 18.—There is a general strike threatened on all the railway lines in England. The companies have refused to accede to the demands of the men.

Fontana, Indiana, Oct. 18.—A most appalling catastrophe occurred here a couple of days ago. An explosion of thirty thousand kegs of powder belonging to the Dupont Powder Company practically wiped this town out of existence, besides killing 35 people and injuring 600 others. Farm houses two miles away were badly damaged. A passenger train four miles away had every pane of glass broken, and all the glass in the city of Terra Haute, twenty miles distant, was broken by the concussion.

Later—Reports indicate that the death list will be increased. Relief trains are being hurried to the scene of the disaster. Two troops of the volunteers are patrolling the town to prevent looting. There are over fifteen hundred people homeless.

Dawson, Oct. 18.—George Kincaid, chief clerk of the public works department, was charged with the theft of \$40,000 from the postoffice. He committed suicide while being brought back from Selkirk. R. L. Hall was arrested on a similar charge and has made a confession implicating several of the business men of the town, whose arrest will follow.

Vancouver, Oct. 18.—Ex-Chief of Police Chisholm is dead.

San Francisco, Oct. 18.—The union sympathisers in the street car strike attacked another carrev. Two passengers were shot in the melee, and a woman fell off the car and fractured her skull.

Shrewsbury, Eng., Oct. 18.—The Scotch mail on the London Northwestern was wrecked recently by jumping the metals. Sixteen people were killed and a great number injured.

Ottawa, Oct. 18.—The increased postage on newspapers and periodicals from the United States has had the desired effect of cutting off tons of yellow trash.

Secretary Taft has arrived at Manilla. He was accorded a great reception and banquets are being held in his honor. He presided at the opening of the first Philippine Assembly, on October 16th. At one of the banquets some temperance reformer cut the wine list from the menu. This action caused a lot of adverse criticism.

Just in, new assortment of Glogar and Peterson pipes.—C. R. Bourne.

Local and General News.

Fresh fruit and Vegetables coming in on every boat.—E. L. Pillman.

Toilet Soaps at reduced prices.—C. R. Bourne.

There were about twenty outgoing passengers on last Tuesday's Scotia, and about a dozen Friday.

D. H. McDonald, Atlin Grocer, intends opening up a branch store in Discovery on or about January 1.

For the most comfort and every modern convenience, stop at the Hotel Dewey, when in Skagway. Rates moderate.

There is an increasing demand in the Old Country for Canadian flour, and British Columbia apples are claiming the attention of the London market.

Mr. Clarence Sands, of the Pine Tree Hotel, Discovery, intends reopening his dining room on Sunday, October 20th. This department will be under the supervision of Mr. Peter Crow, a well-known master of the art of providing for the inner man. Mr. Crow has 'cheefed' it for royalty in the days that have been.

What is there in the air at this season of the year that causes so much liquid sunshine to be absorbed into the system? A wave struck the town the beginning of the week and the bubbles are rising yet. It is almost as bad as a birthday epidemic.

Mr. Jack Dunham is carrying on the preliminary work preparatory to opening up the Beavis mine. There will be erected a bank and eating house and a shaft house and work shop. The pumping machinery will be installed as quickly as possible. When the mine is ready to work in two shifts will start and drifting will be carried on with all despatch.

The clearing up of the cemetery reserve and fencing same has been completed. The whole appearance is pleasing to the eye and is a credit to the camp. On three sides is an ordinary wide picket fence and in front is a neat fence of inch and a half square placed about three inches apart. There is an arch built over the gateway on which is painted the words "Rest in Peace." The front fence is painted white.

Have At It.

Here is a "bobbydazzler" for those who are fond of "figgerin'." The difference between the ages of A and X is seven years. X is as old as A, was, when A was twice as old as X then was; and, when X will be as old as A is now, A will be twice as old as X now is. Find their respective ages. This problem has the Mary and Anne question beaten to a standstill.

Dr. J. S. Keller left for his home in Skagway on Friday, after a month's visit to our district, he manages to combine a lot of pleasure with his business trips, and the folks of Atlin and Discovery are always glad to see him.

The striking telegraph operators are determined to bring the companies to their terms. Other unions are showing sympathy in a substantial manner. In New York it has been proposed to levy a ten cent per week tax on all workers. This will provide an enormous fund.

The first snow of the season to stay with us any length of time fell early Tuesday. It gave the country that wintery aspect that makes the thoughts turn to woodpiles and cross-cut saws. The thermometer dropped to zero. The weather-wise prophets say there will be quite a spell of mild weather before Jack Frost pays us his long visit, and already there are symptoms.

Something Original.

This is too good to pass by. There was a certain miner on Spruce creek, who had purchased a claim and who was in a quandary about the deeds, etc. He sought his nearby neighbor for assistance and was told to go to Atlin and see W. G. Paxton, the notary public. The wording of the advice was something like this: "Sure man, go and see Billy Paxton, he'll fix you up; he's a notorious republic, and a damn good one too."

Otter Creek News.

The Otter Hydraulic Gold Mines Company, of which M. R. Jamieson is local manager, ceased work on the creek on the 12th of October. The operations have been under the supervision of Jack Dunham and that gentleman has certainly made a splendid showing of work for the amount of money expended. There has been over 2,000 feet of flume and ditching made, which will obtain a head of 150 feet. The ditch is four feet at the bottom and about ten at the top, with a carrying capacity of over 2,500 inches. The dam, which is six miles from Surprise lake, is 75 feet in length, and 12 feet high, holding the water back to a depth of from 8 to 10 feet, covering an area of over a mile in length and from a half to a quarter of a mile wide. It is the intention, when piping commences, to start on the benches about a quarter of a mile from from the lake, and continue on till the bedrock in the creek is at an elevation possible to operate on. The benches on Otter have been thoroughly tested and the prospects obtained were highly gratifying. Mr. Jamieson intends going out this fall and may visit Europe before returning in the spring.

THE ATLIN CLAIM PUBLISHING CO., LTD.

CHARLES L. GULLIS, EDITOR-MANAGER.

As Others See Us.

There is a newspaper man in Ontario who sees past the rim of his spectacles, and his ideas on Western things show that he thinks on what he sees and reads. The editor of the Bruce Herald, of Walkerton, Ontario, is a courageous writer, and it would be well for the country at large if there were more writers of the same kidney. We do not agree with all of the writer's contentions. He scores in two or three places, but one or two of his assertions are too sweeping and too emphatic. We cannot conceive of politicians being so rascally as he makes them, it is too awful to contemplate. That there are some bad ones, we admit, but we believe that the majority of the representatives of the people are honest men, with the welfare of the country at heart. Sometimes they do not think the same as we do, but they are not dishonest because of that. Whenever anything does not suit the taste of some prejudiced and warped individual the cry of graft is sounded, and, as when one dog points his nose and howls at the moon and the others take up the chorus, men do likewise, and for the same reason. However, here is the article, read it for yourselves. It has a good twang and savors of sincerity.

"The most interesting event of the week in current events is the riot at Vancouver, B. C. A swarm of Japanese are coming into Canada at that point, and have become so aggressive that Canada's ownership of the Pacific coast is seriously threatened. Japan is suffering from a swollen head at present, consequent upon its success in the Russian war. Its people really believe that they can beat any of the great western nations. Prof. Goldwin Smith is of opinion that a death struggle for supremacy on the Pacific coast is being rapidly precipitated by the Japanese. Neither the United States or Great Britain is at all anxious to fight the Japs, but if the latter are bent on forcing a struggle, we cannot doubt that their fate will be that of the Mahomedans who undertook the conquest of Europe in the sixteenth

century, and were squelched at the battle of Lepanto.

"A peculiarity of our situation in Canada is that we are bound by the diplomatic treaties of Great Britain. The mother country is bound by treaties with Japan. These entitle the Japanese to come into Canada on equal conditions with British subjects. The people of the Pacific coast don't want them; and because they don't want them, a riot has resulted which happily stopped short of actual murder. The British papers, and many of our own severely condemn the proceedings of the British Columbia 'mob,' as they call the Vancouver people who took action against the Japs. The expression of this sentiment proceeds largely from a sense of obligation to treaty engagements of Great Britain, but the real feelings of the people of Canada supports the people of British Columbia in their determination to hold Canada as a white man's country.

"We don't want to see our country overrun by these pagans. And if we don't stop them they will soon be masters of British Columbia. They swarm over the earth in millions, and they are really both intelligent and courageous. Some of our own political writers encourage their immigration to Canada on the ground that our country needs cheap labor for its development. These people are industrious and frugal. They live cheaply and work for small wages. But, are we willing for those reasons to hand our country over to their ownership? What is meant by developing the country? Who wants these people to develop it? Only the big companies and capitalists. They want their wealth increased by business enterprises and cheap labor. It will enable them and their families to roll in luxury. But it establishes conditions of social and commercial life in Canada on the same level as in European countries. If let go on, in due time Canada will become a country of nabobs and peasants. Now is the time to stop it.

"What is the hurry about developing the resources of Canada? Why should we allow companies of capitalists, mostly foreigners, to possess the mines, forests, fisheries and rich agricultural lands of British Columbia, in order that they may become rich by developing their resources with cheap labor? It is time for the people of Canada to wake up to this problem. Millions of acres of our best lands in the northwest have already gone into the hands of immigrants from the slums of Europe. Our politicians call this national enterprise, and they are all getting rich by supporting it. But those who are

not in the swim get nothing, and in another generation our children will find themselves out in the cold, and their vast national inheritance in the hands of the foreigners.

"Although a suspicion lurks in the minds of a good many people in Canada that all this talk about developing the resources of the country is of no value to themselves and their children, not many have the courage to face the problem of dealing with it. Public sentiment is cowed by the clamour of politicians in the swim, who personally, or through their party leaders are profiting by the game. We are giving away our country to foreigners for the profit of politicians, and won't exert ourselves to stop it, for fear of injuring our party. Every man who reads this paper has a voice in the government of the country. Let him ask himself what interest he has in peopling the rich lands of the northwest with Dutchborders and Galicians, and giving away the rich mines, timber and fisheries of British Columbia to Hindoos and Japanese. He knows in his heart that it is wrong, but will he have the courage to vote against it?"

God bless the woman who works. She is not too proud to earn her own living, nor ashamed to be caught at her daily task. There is a sweet memory of her in everything she touches. She is like the brave mountaineer or prospector already far up the precipice—climbing, struggling, rejoicing. The very sight is an inspiration. It is an honor to know such a woman and to be worthy of her esteem. Lift your hat to her young man, as she passes by. She is a queen in the realm of womanhood. She is a princess among the toilers. Her hands may be stained by dish-washing, factory grease or printer's ink, but it is an honest hand. It stays misfortune from the home; it supports an invalid loved one, it may be; it is a moving, potent shield that protects many a family from destitution. All honor to the brave toiler; God bless and protect the woman who works.—Ex.

A fool and his money are soon parted—and the fool doesn't even get sympathy.

An authority says that, in a man and woman of equal weight, the women's tongue is the lighter. We have another notion.

It's difficult to understand why some men eat brain food.

Rockefeller doesn't know just how much he's worth. Neither do we.

Be Good and Be Happy.

We have to take a good many things for granted in this world. For instance, when one sees and hears another chap addressing a totem pole in a most dignified manner, the only thing to do is to take no notice, just imagine he is rehearsing his after-dinner speech.

It is impossible to live right unless we think right. We must be correct in our mental attitude towards the world or we will grow sick in body and spirit. The proper mental poise makes this life almost perpetual joy. We must have good thoughts about people, and all things, all the time if we would drink of constant happiness. Anger, fear, jealousy, scolding, fault-finding, envy, greed, lust, and kindred thoughts dry up the soul and fill the individual with withered flowers. Worry is worse on the stomach than whisky, and is a weed that grows and fattens upon wrong thinking. There is nothing to fear on this earth, and the soul that can grasp the light is always in heaven. Try a little right thinking, gentle readers, and you will be surprised at the wonderful improvement it will make upon you, under any and all circumstances. Be good.—R. T. Lowery.

Historical.

Prior to the possession of Alaska by the United States, in 1867, there had been no gold mining in the territory. Some old Russian records show that small amounts of that metal had been observed in various localities, though it was not believed to be of commercial importance. In these early days the greater part of the abrupt mountainous belt of southeastern Alaska was known only to the native Indians and a few fur traders. The auriferous gravels at the head of the Stikine river were probably the first gold discoveries in this general region. They were found in the early part of the '60's. During that decade many miners went to the newly-discovered Cassiar gold district, on the Canadian side of the international boundary. In 1869 Mix Sylva and other disappointed Cassiar miners traveled northward from Fort Wrangell and made placer discoveries at Windam Bay, and on Powers Creek on Sumdum Bay. It is reported that \$40,000 was extracted from these placers in 1870 and 71. This represented the first gold production from Alaska.—The Chicago Mining World.

A Happy Event.

On Wednesday evening last at Discovery, the Rev. A. M. Ross joined the hands of Alice Sherwood Ruffner and Harry Edward Brown and pronounced them man and wife.

The wedding was a quiet affair; only the relatives and a few friends of the contracting parties being present. The bride was prettily attired in a dainty frock of white lace, and the room where the ceremony was performed was artistically arranged with flowers. Immediately after the knot was tied the guests adjourned to the dining room where a sumptuous wedding supper was served, and, after congratulations, merry jests and good wishes and toasts were given, the bridal party left for Atlin followed by showers of rice. Dr. L. S. Keller handled the ribbons and Harry recommends him as a careful and considerate driver.

The bride is the daughter of Mr. Henry J. Ruffner, and is but a new arrival in our camp, having come in early this spring. It speaks much for her charms that she should have, in so short a time subdued and made captive one of the eligible and representative men of the camp.

The groom, who is well and favorably known, is a sourdough of the camp. For some years he has been engaged in business in Atlin and Discovery. He is also an active member and an energetic worker in the Arctic Brotherhood and the A. O. U. W. societies.

The presents which were numerous and costly, testified to the high esteem in which the young folks are held in the community. Mr. and Mrs. Brown have taken up their residence in Atlin.

Announcement.

The marriage of Elizabeth Vera Welters to John Allen Murphy is to take place next Thursday, October 24th, at 5.30 p. m., at the residence of Rev. A. M. Ross, Atlin. The wedding is to be a private one, but a reception will be held immediately after and the friends of the contracting parties are asked to consider this notice as an invitation to be present.

Benefit Concert

To be held in Discovery, on Monday evening, October 28th. The proceeds to go towards fitting up the skating and curling rinks.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 660 acres more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

- (1) At least six months' residence upon and cultivation of the land in each year for three years.
- (2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.
- (3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,600 pounds shall be collected on the gross output.
