CUMBERLAND TO HAVE FINE QUARTERS SOON FOR ATHLETIC CLUB'S HOME

CUMBERLAND.—Due to the generous action of the management of the Canadian Collieries, (Dunsmuir) Limited, in defraying the cost of the erection of a new building and its equipment, Cumberland is soon to have a fine new athletic club quarters which will cost in the neighborhood of $27,000. The new building is to be erected on the vacant lots lying between the company's offices and the city hall and will measure 32 by 60 feet. The building will stand back from the street line 30 feet to allow of beautification of the plot on front with flowers and shrubs.

The exterior will be designed some-

REMODELLING WILL COST ABOUT $55,000

Contract Awarded For Extensive Changes to Royal Bank Premises on Granville Street

In the race to keep ahead of the requirements for banking accommodation in the city the local management of the Royal Bank of Canada is determined to keep well in the forefront as is evidenced by a contract which has just been awarded by Architects Gardiner & Mercer, for the extensive remodelling and interior alterations to the premises occupied by the Royal Bank at the corner of Granville and Robson streets, which will involve an outlay of about $55,000.

The renovation and extension work will consist of completely altering an additional 25 feet of frontage on Granville into banking area and the outright construction of a new 3-story brick addition 45x50 feet in rear of the bank extending the quarters to the lane. The augmented main floor area thus required will be 50x120 feet in size and wil be completed into a splendidly equipped and thoroughly modern bank home.

On the main floor will be installed a new cash vault, a book vault, and a complete interior of new furnishings marble and terrazza flooring, and new banking fixtures. The main entrance will be at the center of the enlarged Granville front and will be a very attractive feature of the finished exterior.

The basement will be occupied by a new safety deposit vault and safety department with an entrance from the main floor banking room. In addition, a large storage vault and lavoratories for men and for women will be included on this level.

The two floors above the banking quarters will be remodelled into office suites to which an entrance will be provided on Robson street.

The contracts for plumbing and heating and electrical work will be later awarded on seperate contracts by the architects.

ASKS BIDS ON RENEWAL OF WHARF AT KINCOLITH

Tenders are being called by the Dominion department of public works for the renewal of the present wharf at Kincolith in the Skeena district. Tenders will be received up to noon of Wednesday, September 22, by Mr. R. C. Desrochers, secretary of the department at Ottawa.

Plans and specifications of what is required in the way of wharf renewal and repairs, together with forms of contract and tender can be obtained at the office of the district engineer at Prince Rupert, and at the post offices at Vancouver and Kincolith, B. C. Blue prints can be obtained from the department at Ottawa upon payment of $10 to ensure their return. The usual ten per cent. check must accompany all bids.

INCREASE AMOUNTS TO OVER A MILLION

Building Inspector's Report for August Shows Nearly Double Value Over 1919.

An increase of nearly one million and a quarter dollars in the value of building construction authorized so far this year as compared with the first eight months of last year is the very satisfactory growth in construction circles as shown by the monthly report of City Building Inspector A. J. Bird, just issued for August.

Not only has the total amount of building since the first of the year almost doubled in volume over the same period last year, but the aggregate value of the permits for the month just closed also shows within a few thousand of having doubled in value over August of 1919, which many thought was a good month too.

The building inspector's report shows that so far this year 1135 permits authorizing construction of an aggregate value of $2,602,794 have been issued by the city building department as compared with only $1,397,671 for the same period of last year.

For the month the total was $308,227, comprised in 141 permits, which also puts far in the shade the aggregate of the 128 permits in August of last year which amounted to $173,345. The classification of the permits issued during the month just past was as follows:

	No. Permits	Value of Bldgs.
Repairs and Alterations	95	$118,206.00
Dwelling Houses	33	101,940.00
Factories and Warehouses	5	55,281.00
Parking Stations	2	7,500.00
Offices and Stores	6	25,300.00
	141	$308,227.00

ASKS TENDERS FOR GRADING

Architect A. Campbell Hope, 1019 Metropolitian building, is inviting tenders for the grading of a lot on Twenty-Seventh avenue, near the corner of Selkirk street. Tenders will be received up to Friday September 3. The lot is 50 by 120 feet in size.

GOVERNMENT ERECTS NEW PHONE EXCHANGE

KEREMEOS—Under the direction of the district government engineer, work has been commenced on the erection of a cement block, one-story building which is intended to be used as the local central exchange for the government telephone line. As soon as the building is completed the telephone exchange office is to be taken out of the past office where it is housed for the present, and used as a separate department with Miss Gibson in charge as chief operator. The new telephone exchange building is being erected between the post office and the Keremeos Land Company's build-

TENDERS ARE INVITED ON FOUR-GATE CONCRETE SLUICE FOR MATSQUI

Tenders are being invited by Mr. John A. Wilson, acting inspector of dykes, on behalf of the Matsqui Dyking Commissioners, for the construction of a four-gate concrete sluice for the Matsqui dyking district. The work is part of a special programme that has been found necessary as a result of the recent floods in the Fraser Valley. Tenders will be received by Inspector Wilson up to noon of September 11.

Plans of the sluice gates together with specifications and instructions to bidders, and forms of tender and contract may be seen at the office of the inspector of dykes at Victoria, and also at the provincial court house, Vancouver. Each tender must be accompanied by a deposit amounting to 20 per cent of the amount of the bid.

NEED OF STANDARDIZATION IN BUILDING TO CUT HIGH COSTS.

Conditions during and since the war have brought home to everyone the necessity of maintaining production with less labor. Manufacturers have realized this and have sought all possible means for securing efficiency. The most effective means of increasing production and the real, basic cause of Canada's industrial growth is standardization. Elimination of duplications in products and parts has reduced the number of manufacturing operations and effected savings in time and labor.

Comparisons show how hopelessly inadequate the old methods would be under modern conditions. Compare the book of today, turned out by thousands on a modern printing press, each one exactly alike, with the methods of a few centuries ago when each book had to be laboriously written by hand. Practically every modern manufacturing industry presents illustrations just as striking. In the building field, only initial progress has been made in standardization. In some lines, such as steel sash, a fair degree of standardization has been reached, but building in general remains a strictly made-to-order propositions. Even in bricks, whose history dates back to the Pharaohs, one will hardly find two manufacturers making exactly the same size. The same applies to a number of other standard building materials. Also in tile, if it is desired to have them all of the same size it is necessary to purchase the entire supply used on any building job from the one manufacturer.

The cause of the lack of standardization in the building field is largely a matter of evolution. Building being one of the oldest industries, has developed processes and methods which have become traditional. In former times, it was simple and logical to build as one went along and to meet any individual requirement. Labor and material were plentiful and inexpensive, and needs were not urgent. Modern times, and particularly the present day, will not permit of such methods if volume and economy of construction is to be obtained.

The greatest building need of the present time is standardization. This means the elimination of hundreds of duplicate products which exist only out of traditional habit or personal whims. An instance of the adoption of standardized methods is the action of a number of reinforcing steel companies in eliminating half duplicate bar sizes—an action which vastly increased the production of the rolling mills and makes available larger local stocks. Similar standardization is sure to take place throughout building. Construction operations in the field must adopt more of the factory methods so that the skilled workman can make his time most effective. Many operations in building date back for centuries, so our erection forces should be able to profit materially by the study of Canadian industry.

SHIPBUILDING NOTES

PRINCE RUPERT—Plans for two new shipbuilding berths and a second commissary building have been sent to Winnipeg.

WARD 6 IN BURNABY HAS 37 NEW HOMES THIS YEAR

EDMONDS—No less than 37 new dwellings have been erected in Ward Six, West Burnaby, since the first of the year, while many others have been added to and improved. The value of the new houses is placed at about $75,000. Building in other wards has also shown much progress.

AUGUST BUILDING IS GOOD AT POINT GREY

That a good pace in construction operations is being kept up in the Point Grey district is evident in the Monthly report of the building inspector from whose offices seventy-seven permits have been issued during August. The largest structural work was in residences the total being 53 valued at $212,040.00, there being no permits issued for any large public or business buildings during the month. Ten repair jobs and 14 garages constituted the remainder of the permits.

As compared with the same month of last year the result is very favorable despite the fact that the 1919 total for August was $347,570 as two schools totalling $188,000 were included in the month for last year. The remainder of last year's permits being only 47 of a value totalling but $159,570, this year's report is a very favorable one and is so considered the Point Grey inspector.

NEW IRRIGATION DAM AT NARAMATA PROCEEDING

NARAMATA, B. C.—Good progress is being made on construction on the new irrigation dam for Naramata water-users. The retaining wall is now 18 feet in heighth and will be carried up another eight feet still. The dam at the present time will hold from 450 to 500 acre-feet of water and when completed will conserve a total of nearly 900 acre-feet which is expected to be quite an ample supply for the orchards of the district. The dam when entirely completed will be slightly over 600 feet in length and 26 feet at its highest point.

The Naramata Water Users Association which purchased the original system from the former owner, Mr. J. M. Robinson, has applied to the provincial water comptroller to form a water municipality under the provincial Water Act, which will allow of future extensions and additions to the system if desired. Assurances have been received from the department that the application will receive favorable consideration.

Attractive Shaughnessy Park Residence

The above residence was erected by Faulds, McQueen & Pearce, Ltd. 626 Hastings street west, for the owner, Mr. Walter Walsh. It is a seven room California bungalow type home of the style which characterizes a larger number of the homes being constructed by that building firm in Vancouver. It is proving very popular with home-seekers who favor the bungalow type of dwelling.

The special built-in features including bookcases, window seats, buffet, wardrobes, cabinet kitchen, laundry trays, etc., and the panelled walls, beams and ceilings, hardwood floors with mahogany borders, and open fireplaces, are exceptional features not often found in homes of this class.

The Shaughnessy Park district is directly west of Shaughnessy Heights and south of Talton Place. The main thoroughfare to Kerrisdale and Eburne West Boulevard, skirts the district, which is divided into homesites varying upward from 50x122 ft size.

ILLUSTRATED BOOK ON SCHOOL ARCHITECTURE

OAKLAND, Calif.—Mr. J. J. Donovan, former Supervising Architect of the Oakland schools, has completed the text for a practical treatise on school architecture, based upon his experience and study covering a period of fifteen years. The book will have twenty-eight chapters, seven hundred pages, 300 of which will be text matter. There will be approximately 750 illustrations. The first numbers are expected to be off the press in September.

A TRIP FROM INSIDE

In view of the report of the Cleveland Grand Jury, the following opinion boldly stated at the annual convention of the American Federation of Labor by John Donlin of Chicago, recently re-elected president of the Building Trades Department of that body, is worth noting.

"The wage-earner is just as much responsible for the high cost of living as any other agency," said Mr. Donlin in his annual report. "If every worker doing physical labor would insist that production equal pre-war times there would soon be a reduction in the price of commodities. The higher wages go and the more production falls off the more the worker is going to be hurt."

what after Elizabethian lines with a tower effect. The first floor will have an entrance hall 10 by 12, and a library of somewhat circular shape, 17 feet in diameter. The reading room will be 16 by 22 feet and will contain a large fireplace, while adjoining will be a writing room 11 by 18. The remainder of the ground floor will be taken up with a corridor and lecture hall, 26 by 31, which will afford seating accommodation for 117 persons.

From the entrance hall a stairway leads down to the ground floor, the whole of which will be practically taken up with a well equipped gymnasium and billiard and pool room. In the basement below will be full lavatory and locker accommodation as well as the heating apparatus, the building being heated by hot water.

The Canadian Collieries has instructed it's engineers to prepare the detail plans for the structure and work on its erection is to be started at once. The company will defray the entire cost of the building and equipment, amounting to $27,000 and turn it over to the men's committee complete.
