Legislature Library 89

COAST - GREENWOOD - KOOTENAY.

Two Hundred Business Men Visit Greenwood as Guests of the Canadian Pacific Railway Company. Prominent Men of the Coast Cities and Kootenay Size up the Situation in the Boundary District. The Reception by the Citizens of Greenwood. An Address of Welcome. List of Visitors. Excursion Notes. The Extension of the Railway to the Coast.

Two hundred representative business men from the coast cities and Kootenay took possession of Greenwood on Thursday evening and retained possession. Like the shrewd men that they were, they knew a good thing and kept it. While here the town was practically theirs. They filled the hotels and the club, invaded the business houses, buttonholed business men, visited the mining camps and went away fully impressed with the idea that the liveliest, most enterprising town in the interior is Greenwood and that the Boundary district offers many opportunities for increased business in the several branches of commercial trade which the visitors represented. The excursion was a most representative one, the coast cities and Kootenay towns having been represented by the leading business men. The chaperon of the party was F. W. Peters, the Assistant General Freight Agent. Supt. H. E. Beasley, Capt. T. W. Troup, A. B. MacKenzie, Rosslund; Supt. F. P. Gutteus, Trail and Allen Cameron, Vancouver, General Freight Agent, assisted in looking after the comforts of the guests. The coast excursionists left Vancouver on Tuesday. The Nelson delegates met them at Robson. The party that reached Greenwood was 200 strong. As far as could be ascertained the list of visitors was as follows.

VICTORIA.

George L. Courtney, F. Pauline, N. Hardy, H. B. Rickaby, W. Keir, C. F. Todd, C. Lewenberg, J. W. Mallor, F. More, W. S. Fraser, Hamilton-Smith, W. A. Ward, A. B. Erskine, Thos. Earl, M. P., J. Thompson, G. Denny, H. Hawson, W. J. Peadar, L. G. McQuade, P. Wollastou.

VANCOUVER.

J. D. Scott, John Hendry, J. C. McLagan, F. C. Cotton, Jr., Fred Buscombe, J. D. Roberts, S. C. Sykes, Geo. Shoulditch, Geo. A. Walkent, W. H. Armstrong, J. F. McIntosh, Robt. Hamilton, J. K. Strachan, D. A. Tweedie, Jas. Ramsay, W. Tufts, Sol. Oppenheimer, J. Fearsou, J. Kirkpatrick, W. H. Malkin, F. M. Black.

NEW WESTMINSTER.

T. J. Trapp, R. F. Anderson, A. Cunningham.

NELSON.

W. A. McDonald, Q. C., T. G. Proctor, Major W. H. Downing, Rev. Mr. Frew, Hamilton Byers, W. Irvine, Jacob Dorer, W. A. Galligher, John Cholditch, Frank Fletcher, H. J. Evans, W. J. Thompson, G. M. Martin, Assistant Gold Commissioner W. J. Gopel, George Johnstone, C. V. Holt, R. Hedley, J. J. Campbell, Major O. M. Rosendale, D. McFarland, E. J. Matthew, A. G. Gauble, Blake Wilson, James Lawrence, J. K. Strong, H. A. Barton, P. C. Chapman, S. S. Fowler, W. W. Beaton (Miner), Fire Chief W. J. Thomas, Captain T. J. Duncan, Alderman Kirkpatrick, City Clerk Strauss.

ROSSLAND.

Mayor Goodeve, Gold Commissioner Kirkup, Hon. T. Mayne Daly, James Martin, M. P., John Jackson, Jr., J. F. McCrae, William McQueen, William Harp, James Hunter, G. W. McBride, J. B. Johnson, Richard Plewman, Richard Marsh, James D. Sword, Dr. Edward Bowes, C. F. Jackson, A. B. MacKenzie, Hector McCrae, J. G. Egan and J. B. Coombs (Miner), W. B. Townsend, Colin Brown, L. A. Campbell, D. R. Young (Standard), L. K. Hodges (Record), Thomas Hilliard and R. C. Waterson.

KASLO.

G. O. Buchanan, president Board of Trade, George Whiteside, A. T. Garland, F. E. King, A. W. Palmer, C. Frost (Kootenian), A. Grierson, J. F. McIntosh and Lieut. W. J. Twiss.

SANDON.

Cotton, Jr., News-Advertiser, Vancouver.

The complimentary banquet tendered by the citizens to the C. P. R. excursionists last night, at Barrett's hall, was one of the most elaborate affairs ever attempted in the southern portion of the province. The committee in charge worked hard to make the same a success, and while some faults may have been found, the ban-

Round each side were flags of all nationalities and the bright coloring shed from innumerable Chinese lanterns, made the hall look quite attractive. The Clarendon hotel had charge of the banquet and the bill of fare and service reflected great credit upon the management. Four long tables, were set parallel,

The mayor next read a "special fake" cable from London, announcing that the home government were considering the offer of one Hector McCrae, mining promoter of Rosslund, to raise a regiment of Rosslund and Boundary Creek prospectors for service in the trenches, in the Transvaal. The reading evoked tremendous uproar. After

self as surprised in being called upon for this particular toast, as for the last 54 years, he said, he had been in the habit of replying to the toast "C. P. R.". He compared the growth of the southern portion of the province within the past three years, not only in the opening up of the mines, but in the construction of railroads. At that time there was only 28 miles of railway, today there are 584, and this too outside of the magnificent lines of steamboats plying on the lakes. He asked his friends from the coast if they realized what a mining camp really was, what wealth was really capable of being produced from the mines in comparison with any other enterprise? He spoke of the opening of the Crows Nest Pass branch a year ago to the day of the excursion over the Columbia and Western railroad. His witty reference to the Rev. Mr. Frew, as the spiritual adviser of the excursionists, brought forth much laughter. He concluded in warm words of praise for the unstinted hospitality shown by the citizens of Greenwood in the entertainment of their guests.

Allen Cameron, general freight agent, Vancouver and J. G. Sullivan, assistant superintendent of the Columbia & Western branch, Trail, responded to the toast "Canadian Pacific Railway." Mr. Cameron said that his company had after great difficulties, accomplished the building of a branch into the Boundary creek district and while they had been urged to continue the line on to the coast, he would remind the company that its construction was no child's play. He admitted that the line would be of material benefit to the country through which it passed, to the citizens and business men of the coast and the Boundary, and to the C. P. R., but unlike in Great Britain, where the aim is to build air-lines, it would be a physical impossibility in this case on account of the ranges of mountains to put an air line in, on the ideas that have been expressed for some years. J. G. Sullivan followed with a few remarks on the work of construction of railroads.

W. A. Ward, president, Victoria Board of Trade; L. G. McQuade, Victoria; Fred Buscombe, Vancouver; John Furguson McCrae, Rosslund, and T. J. Trapp, New Westminster spoke to the toast "Board of Trade". Each contributed words of wit and wisdom to the entertainment. The Rosslund gentleman's remark that it was the Boards of Trade of the Kootenays and the Coast that compelled the building of branches by the C. P. R. into the Boundary Creek district evoked considerable amusement and applause. Lack of space only prevents a full report of the speeches made by these gentlemen, as also those made to the toasts that followed.

EXCURSION NOTES.

W. Roslington, of Vancouver, a director of the B. C. Assay and Chemical Supply Co., Ltd., was a caller at the Times office. He expressed himself well pleased with the trip, and was complimentary about the business outlook for Greenwood, so much so, that he said his firm would in the near future start a branch in this city. His company recently opened up a branch in Nelson, B. C., in charge of T. A. Mills, where they carry a full line of assayers' materials, mining and milling supplies.

Major O. M. Rosendale, manager of Continued on Page 8.

THE ADDRESS FROM THE BOARD OF TRADE.

The members of the Board of Trade of the City of Greenwood desire on this occasion to officially extend to you, our visitors a hearty welcome. They wish to express the gratification which it affords them to know that the importance of the Boundary district has been so far recognized by the officials of the Canadian Pacific Railway Company as to invite the representative business men of the province here under their auspices; and by you as to accept the invitation at the sacrifice of such valuable time. The members of the Board of Trade and citizens of Greenwood regard it as a distinguished compliment to the present position and future prospects of this city.

It is with pleasure that they now undertake to receive, in what they conceive to be a fitting manner, a body of men whose interests in the upbuilding of the trade and industry of British Columbia is common with our own; and whose presence at such a distance from their own homes indicates the breadth of their sympathies, and their commercial enterprise and foresight. It is sincerely to be hoped that the impressions carried away by you will not only be kindly and favorable, but that their effect will be to lessen the space that geography has created, cement the interests of the various people in the district represented with those of Boundary, and greatly extend business relations.

It is not our intention to dwell upon the importance of Greenwood in contradistinction to that of the other towns in the district. We recognize that your visit is to the Boundary as a whole, and it is as one of the important towns of the district that we bid you welcome. Our merits and possible future as a city must be determined by the development of trade and industry, and as business men you are well qualified to judge of the situation for yourselves, and the verdict we leave in your hands. Greenwood is wide open for your inspection.

Regarding our mines and mineral resources, the subject is too large for particularizing here. We believe, however, that they are destined to afford scope for the greatest development yet witnessed on the continent of America, with corresponding possibilities of commercial expansion, and that as representatives of business interests in this province you will not be slow to appreciate your opportunities.

In this connection, of the Canadian Pacific Railway Company who brought you here and to whose enterprise much of our progress and possibilities are due, it is our duty to express our appreciation. While careful at all times to guard rights and interests, as affected by the operations of that corporation, we regard as of eminent benefit to the district the construction of the Columbia and Western railway, which it is quite proper to assume will soon place us on the short and main line to the coast, and the spur lines that have been built into the various mining camps about us. So far, we are pleased to know that the returns in traffic have far exceeded the anticipations of the company, and this is only a foretaste of what will occur when the mines are shipping. None more cordially than the members of the Board of Trade and citizens of Greenwood desire to see the company for all time to come well rewarded for the expenditure of \$5,000,000 thus entailed. No other fact, we may be permitted to observe, is more significant of what is contained in the Boundary district than that such an undertaking should have been assumed, largely on faith, by a corporation, the management of which is noted for great business capacity and wise foresight.

It is understood that the Canadian Pacific Railway Company is making arrangements to extend the line of the Columbia and Western railway westward to the main line. We believe, this to be the most important enterprise, which can now be undertaken in this province, affecting the interests of Southern British Columbia and the coast cities, and we hope that you, who form so powerful a factor of the business community throughout the province, will extend to the project your utmost moral support and political influence.

In conclusion the desire is expressed that the present will be but one of many visits by you individually and collectively to this city and the right hand of welcome tonight is indefinitely extended. We say: "Come again; come often. Come and do business with us if you can, but come."

quet in itself was a decided success. It was generally understood that about 120 visitors would be in attendance, but on the arrival of the special the number was found to be over 200 and the consequence was at the last moment room could not be found for all. Those however who were present have been unstinting in their praise of the efforts made by the citizens to entertain them. Barrett's hall was lavishly decorated with streamers of red, white and blue covering the ceilings and walls.

the length of the hall and these were filled to uncomfortableness. At the head of one of the tables sat Mayor Hardy, who was toast master of the evening. After the menu had been disposed of, Mayor Hardy rose and in a few words proposed the first toast, The Queen, the company singing the national anthem. Lieut. W. J. Twiss, of Kaslo, then sang in good voice "Soldiers of the Queen." It was a happy thought and the chorus was enthusiastically joined in by the whole company.

it had subsided the toastmaster called upon Secretary Gosnell, of the Board of Trade to read an address of welcome to the excursionists.

"The President of the United States" was next toasted and in a few well chosen words Commodore Troup replied. He spoke of the good-fellowship between the people of the two countries and expressed the hope that the same might grow stronger as the years rolled by. F. W. Peters responded to the toast "Our Guests". He expressed him-

RAILWAY ACCIDENTS.
Two Accidents on the C. & W. Railway Last Week—Two Men Killed.
Last week what might have been a fearful accident occurred on the C. & W. as the passenger train bound east was rounding the grade above Arrow lake. A huge landslide came down in front of the engine, derailing it. The engineer at once reversed the engine and the train stopped just as the engine was ready to plunge over the precipice 600 feet in height. The engineer jumped and was the only one injured. He was badly shaken up. Several Greenwoodites were on the train, among them being Clive Pringle, A. Fisher and J. Poupore. Mr. Fisher states that Mr. Pringle was badly scared and at once committed himself to deal mercifully with litigants he would oppose should Providence provide an earthly future, while Mr. Pringle is equally strong in his assertion that the Boundary Creek lumberman was voluntarily broken for the notice and the big lumbermen promised to furnish building material at cost. These good resolutions which meant much for Boundary Creek, were seem-

ingly strengthened by a second accident five miles this side of Rossland. This one succeeded in disabling the train and many of the passengers walked over the divide to Rossland. They reached there at 7 o'clock in the morning, or nineteen hours after leaving Greenwood. The walk killed the resolutions and almost killed the "resolutions."
A second accident occurred on the railway on Saturday. An east bound freight was making the switchbacks over Bulldog tunnel when the brakes refused to work and the train started at a terrific rate down the grade. It soon jumped the track and was a total wreck. A tramp stealing a ride was killed, while a brakeman, whose name has not been ascertained, was so severely injured that he has since died.

TYPOS ORGANIZE.
A Branch of the International Typographical Union is Now Established in the Boundary.
On Saturday evening last about twenty printers of the district met in the parlors of the Yale hotel, Grand Forks, and organized a branch of the International Typographical Union. F. H. McCarter, sr., was elected temporary chairman, when the following officers were elected temporarily to act until the I. T. U. charter arrived: President, J. W. Grier; vice president, J. D. Hendrix; secretary, W. H. Pierre; treasurer, W. J. Harber; executive committee, Fred Grant, G. Earl McCarter, L. Keefe, E. M. Grace and J. W. Ellis.
Previous to the organization, F. H. McCarter, business manager of the Grand Forks Miner, banquetted the printers in the Yale hotel.
Every competent printer working in the district has either joined or signified his intention to join the new union. The next meeting of the union will be held in Greenwood, subject to the call of the secretary.

Boundary Creek Licence District.
Notice is hereby given that the undermentioned persons have made application under the provisions of the "Liquor License Act, 1899" for hotel licence at the place set opposite their respective names:

THE LEVEL AND THE SQUARE.

[BY V. A. M., MOTHER LODGE MINE, B.C., DEC. 2, '99.] We meet upon the level and we part upon the square. What words of precious meaning these words Masonic are. Come let us contemplate them, they are worthy of a thought. In the very walls of Masoury the sentiment is wrought. We meet upon the level though from every station come; The rich man from his palace and the poor man from his home; For the rich man must leave his wealth and state outside Masons' door, And the poor man finds his best respect upon the checkered floor. We act upon the plan, 'tis the order of our guide; We walk upright in virtue's way and lean to neither side. The All-seeing eye that reads our hearts doth bear as witness true, That we still try to honor God and give each man his due. We part upon the square for the world must have its due. We mingle with the multitude, a faithful band and true, But the influence of our gatherings in memory is green, And we long upon the level to renew the happy scene. Thus a world where all are equal, we are hurrying to it fast. We shall meet upon the level, there when the gates of death are passed. We shall stand before the Orient and our Master will be there To try the blocks we offer with His own unerring square. We shall meet upon the level there but never thence depart. There's a mansion 'tis all ready; for each trusting, faithful heart; There's a mansion and a welcome and a multitude are there Who have met upon this level and been tried upon the square. Let us meet upon the level while laboring patient here. Let us meet and let us labor though the labor be severe. Already in the western sky, the signs bid us prepare To gather up our working tools and part upon the square. Hands round to faithful brotherhood the bright fraternal chain; We part upon the square below to meet in heaven again. What words of precious meaning these words Masonic are. We part upon the level and we part upon the square.

NEW COMPANY FORMING.

Will Work the Big Mountain View Property in Summit Camp.

A strong company is being formed in this city to operate the Mountain View claim in Summit camp, adjoining the B. C., which was recently bonded by John Dorsey from Louis Shieffe and Pat Lyons.

Messrs. Welch and Stewart, the well-known railway contractors, have become interested in the property and are taking hold of it with a view to its thorough and immediate exploitation.

Six men have been at work running two shifts in a tunnel on the property ever since the bond was given and they have opened up a splendid body of high grade ore. The exact width of the lead has not yet been demonstrated but it is reported that the entire tunnel is in ore with no signs of walls.

The ore now being taken out is some of the finest found in that vicinity and consists of a good friable quartz heavily impregnated with copper and iron and giving most satisfactory gold assays. Another character of ore found in the property is a honey combed quartz, very much rusted from oxidation of the iron in it and carrying a good percentage of copper in a sulphide form.

The mere location of this property is enough to make it fairly valuable, even if no large ore body had been found and this combined with the excellent showing being made, makes the Mountain View a property which attracts most favorable attention from every mining man who visits it and marks it as one of the best in the great Summit camp.

It is understood that sufficient money is being put into the treasury of the new company to insure the taking up of the bond and the full and complete development of the property.—Grand Forks Miner.

Marking a Notable Event.

The excursion to the Boundary country of a goodly company of Vancouver and Victoria merchants, which starts from this city on Tuesday next, will doubtless years hence be regarded as a notable incident in our Province's history, for the visit will mark the opening up by Canada's great railway of what is to become one of the greatest copper and copper-gold mining regions on this continent. It should herald also the early formation of mutually important and profitable trade relations between the merchants of the city and Victoria, and the business men of several districts in the Boundary country in each of which there is likely to grow up a mining town and general supply centre of considerable importance.

There is already little or no doubt that there will in Boundary speedily arise at least two and perhaps more cities, fairly comparable with such important centres in South Kootenay, as Nelson and Rossland, respectively. One of these cities will be Greenwood, but there are several other important points in Boundary which will enter into keen, if friendly rivalry, with that city.

As yet only small first shipments of

trial ore have been made from Boundary, but more development work and smelter building is there already active, and more than one town even now possesses very substantial business blocks, many active and enterprising traders and a considerable nucleus of population. The great banks of Canada have already occupied the field; leading financiers of Canada and the United States are interested in many projects. There too scores of shrewd business men have already settled down and established themselves in the usual trades of a new country; a small host of professional men have followed in their train, and there is also a general population of several thousand people, all more or less directly connected with mining enterprise.

The outcome will even so early as next year be a beginning of very large shipments from Boundary of ore treated and concentrated, and the transaction of a more than corresponding aggregate of general business. In the transaction of much of this we have every hope that as a result of next week's excursion and its facilities for the personal investigation of commercial opportunities, full many of our city merchants will largely and profitably participate.—News Advertiser.

NOTICE.

In the Matter of the Tramway Company Incorporation Act and Amending Acts.

NOTICE is hereby given that we, the undersigned, desire to form a company under the Tramway Incorporation Act, under the name of the "Greenwood and Phoenix Tramway Company, Limited," for the purpose of building, equipping and operating a single or double track tramway running in a northerly and southerly direction through the City of Greenwood in Yale District, in the Province of British Columbia, and thence running from a point in the said city in an easterly direction to the town of Phoenix. Also from the City of Greenwood in a westerly direction to Deadwood camp. Also from the City of Greenwood in a northerly direction to Long Lake camp; and from the said city to any point within a radius of fifteen miles from the said city to which the company may wish to extend their tramway line. Also to construct, equip and operate a telegraph or telephone line or lines in connection with said tramway.

Dated at the City of Greenwood, British Columbia, this Thirtieth day of November, A.D. 1899.

Witness: H. C. SHAW, 124

NOTICE.

NOTICE: The British Columbia Southern Railway Company will apply to the Parliament of Canada at its next session for an Act authorizing the Company to complete at any time before the end of the year 1904, its western section as described in the Act of the said Parliament (60-61 Victoria, Chapter 39) and a branch line from a point on its main line at or near the forks of Michel creek thence by way of Michel creek to Morton creek, and for other purposes.

By Order of the Board, H. CAMPBELL OSWALD, Secretary.

Boundary Creek Times

PUBLISHED WEEKLY BY
The Boundary Creek Printing & Publishing
Company, Limited.
DUNCAN ROSS, Editor
W. J. HARBER, Manager

SATURDAY, DECEMBER, 9, 1899.

REPRESENTATION.

The number of qualified voters in the city of Greenwood, published in last week's issue of the TIMES, was not correct, because the number of householders who registered was not included. The number 381 included only the qualified property owners and the license holders. Outside of these about fifty householders registered, bringing the total up to 430 votes. In addition to these there are many householders who failed to avail themselves of the privileges of the Municipal Elections Act, and are consequently disfranchised so far as municipal affairs are concerned. We refer to this subject because we desire again to call attention to the gross injustice this district is laboring under in the matter of proper representation in the provincial legislature. It must be apparent to everyone that the district of East Yale is under represented from the standpoint of population and area. At the last general election there were 1,229 electors registered in East Yale with only one representative. In the Rossland riding there were 1,399 electors with one member. Let us figure on a constituency out of these two, embracing Camp McKiuney on the west and Christina lake on the east. Greenwood has nearly 500 voters, Grand Forks the same, and the mining and agricultural sections, including Phoenix and Greenwood camps, can easily aggregate another 500 voters. These would make a constituency with about 1,500 qualified voters, and still leave as many today in Rossland and East Yale electoral districts as there were at the time of the last election. How then can a government pledged to wipe out inequalities in representation, pledged to give justice to those sections which suffered because of the insidious distinctions made by the late government, neglect to avail itself of the earliest opportunity to grant the relief asked for? How can a government committed to such a course refuse to take action when Boundary Creek, practically without representation, has today 1,500 voters? Cariboo with 712 voters has two members, North Victoria with 417 voters has one member, while Southeast Kootenay with 436 voters has one member, West Yale with 533 voters has one member, Lillooet with 286 voters has one member, Esquimalt with 522 voters has two members, West Lillooet with 235 voters has one member. This list might be continued. We are quite prepared to admit that there has been an increase in the number of voters in the districts mentioned but not sufficient to destroy the force of our argument. Boundary Creek revolted against the Turner government because of its iniquitous berrymander. Boundary Creek is prepared to speak again unless the Turner government's successors are prepared to carry out their pre-election pledges.

The residents of the district can make a still stronger case by registering. Already several loyal workers are busy enrolling names on the list, but much work remains to be done. We have not heard that Grand Forks, Columbia and other centers have made an organized effort to register their qualified voters. They should lose no time in doing so.

THE MAIL SERVICE.

The Associated Boards of Trade had the temerity to pass a strongly worded resolution condemning the postal service for the province. The resolution was sent to Ottawa after having been decorated with the great seal of the Associated Boards. It brought forth a reply to the effect that the postmaster-general's department would be pleased to receive a bill of particulars of the grievances complained of. We believe the secretary of the Associated Boards accommodated the post-office department in this respect, but if Ottawa is not yet satisfied, attention is hereby directed to the inadequate postal arrangements in this city. The grievances to which the Associated Boards directed the attention of the postoffice department included: "The delay in securing adequate postal facilities for new and rapidly growing mining districts, to the insufficient salaries paid postmasters in towns and cities which have sprung into prominence." In the city of Greenwood the revenue from the office and the salary allowed by the government would

scarcely provide a living for one man; yet since the running of regular trains the mail for Greenwood and that distributed here for outside points would require the time of four or five men to handle promptly. The men at the postoffice do the best they can. The fault lies not with them but with the system. At Phoenix the situation is even worse. The postmaster there handles all the business of an office for 1,000 men for the munificent salary of \$20 a year, or a little over five cents a day. The department cannot or will not realize that conditions are different in this province from old established centers in the east. It would be good policy to give the inspectors who are on the ground and who understand the situation greater latitude.

THE C. P. R. EXCURSION.

At the time of writing the C. P. R. excursionists are appreciating the beauties of McRae pass and are hurrying towards the Boundary district. They are entering a section which few of them have seen and still fewer appreciated its boundless possibilities. They will visit a district which is recognized as one of the most important, not only in the province, but on the continent—a district that will furnish employment to thousands of men who will in turn purchase an almost incalculable amount of supplies. It is a district that will shortly be a wealth producing—a supply consuming district—such a district that is well worthy the careful attention and consideration of the business man. The excursionists will receive a hearty welcome. They deserve it. They are a lot of shrewd, enterprising men who can do much for Boundary Creek. The greatest benefit can be derived from securing closer relations between the commercial and the mining interests of the province.

OUR intentions were good, but we failed owing to circumstances over which we had no control. We promised a daily paper for December 1st, but the plant is not here yet. We could start but we prefer to start right. The additional plant is expected daily and as soon as it can be placed in position the Daily Times will be issued.

THE Boundary Creek Times joins the citizens of Greenwood in extending the excursionists a welcome to the mining, commercial, smelting, and banking center of the Boundary country.

GREENWOOD has made but little noise, but the excursionists will find that it is a sturdy youngster.

COAST-Greenwood-Kootenay. We are in the center.

P. BURNS & COMPANY

A NEW ABATTOIR AT CALGARY.

One Hundred and Fifty Cattle to be Slaughtered Daily. Pens for Eight Hundred Hogs and Two Thousand Sheep—A Huge Enterprise.

The name of P. Burns & Co., is familiar to every one in the Kootenay and Boundary districts. This firm has what is practically a monopoly of the meat industry not because of any of these peculiar actions which are responsible for trusts in other places but because their enterprise has made competition unprofitable. P. Burns & Co., have taken advantage of every opportunity to supply the wants of their customers upon such terms that very little dissatisfaction is heard and less clamoring for rival concerns. Their latest enterprise is the erection of a mammoth abattoir at Calgary, a description of which is published in the Calgary Herald and which will be read with interest. The Herald says:

"The commencement of operations this week at P. Burns & Company's abattoir means the passing of yet another milestone on the road to Calgary's full measure of prosperity. Many as are the successful industries of which the city can boast, there is none which seems more adapted to the surrounding district or more at home in Alberta, so to speak, than the enterprise which Messrs. Burns & company have recently added to their

ALREADY ENORMOUS BUSINESS

The slaughtering of cattle, sheep and hogs before shipment, has been found much more economical and much more convenient than the shipping of live stock in crowded cars for long distances with its unavoidable expense and inconvenience and will in the future be generally adopted. The establishment of an abattoir in Calgary was found by Mr. Burns to be necessary for the success of his business, and like a progressive business man he at once set to work to provide the necessary machinery, with the result that there exists in Calgary today an abattoir of which any city

MIGHT WELL BE PROUD

Some time this summer, the firm purchased the buildings and some 10 acres of land formerly owned by the Canadian Land & Rancho company, and at once set to work to construct and equip a large cold store capable of holding no less than 4,000 carcasses of dressed beef. To the original buildings which were 80x50, have been added a new building 300x70 and a power house 50x60. Large pig pens capable of accommodating 2,000 hogs have also been constructed, as well as commodious sheep pens, stables, and other out offices, the whole covering an area of

NO LESS THAN FIFTEEN ACRES

The whole of the cold storage buildings have been erected under the immediate personal supervision of H. N. Molloy of St. Paul, who is admittedly one of the most capable cold storage experts in Western America and who has already constructed large works in Canada, including the Gordon & Ironside works at Winnipeg and the cold storage warehouses at Port Arthur and Fort William. In his work at Calgary Mr. Molloy has fully justified his reputation and his directions have been carried out to the letter. The walls of the building, which is put up under the Molloy Cold Wave System, are two feet in thickness, and the whole structure is metal covered. Inside there are overhead tracks on which to run the carcasses. It is interesting to know that these tracks, if laid in a straight line, would extend nearly

TWO MILES IN LENGTH

In the abattoir itself, every arrangement is as near perfection as possible. A Herald representative was fortunate enough to be present on Monday afternoon when the first bunch of animals was slaughtered. Geo. Lane striking the first blow with deadly effect. The sight was one, which though somewhat gory at times, could not but make one feel that Alberta had at least secured an industry of practically illimitable scope. In a corral adjoining the abattoir were a bunch of prime steers, which stood around blinking lazily and altogether unconscious of the fact that in a few short moments they would form a half section in

AN ARMY OF DRESSED BEEF

At an appointed signal five of the great beasts were driven from the corral through a chute until each one found himself hoisted in a pen just large enough to prevent him getting out. A single blow from a heavy hammer right in the centre of the forehead causes the animal to fall—in most cases—dead. The swing doors at

the side of the pen are unbolting and the body falls through into the large room, where the butchers are ready to receive it. Should life not be extinct the first step is to make it so, after which

THE NIMBLE KNIFE

of the butcher is brought into operation and almost before one can realize it the huge body is skinned, the head, feet and "innards" removed, and the carcass is hoisted on the block where the process of skinning is completed. To every one of the men employed in the abattoir is assigned his own particular duty. Heads, hearts, hides, hoofs, livers and tongues—each has its own proper attendant, and its own particular place in the great warehouse. There is no confusion, yet every step is taken so rapidly that one cannot help but feel surprised. As soon as the dressing is completed the ground is cleared again and five other carcasses fall in, ready for the butcher's knife. On Monday afternoon some 30 head were disposed of in less than two hours. When things have settled down, and the men become more accustomed to their work, Messrs. Burns & company propose to

SLAUGHTER ONE HUNDRED AND FIFTY per day. Every possible precaution is taken to ensure cleanliness and economy. Chutes are provided for the disposal of the offal and a plentiful supply of fresh water—raised on the premises—is always on hand so that as was well said by a visitor, "carnage cuts no figure."

Leaving the carcasses of prime beef to cool off, the Herald visited the hog pens which are constructed in accordance with the most modern ideas regarding comfort and sanitation. The result is to make the porker a far less objectionable animal than he usually appears to be. There are at present in the pens

EIGHT HUNDRED HOGS

on which a sentence of death has already been passed. These hogs have been imported from Ontario, it being as yet impossible to secure anything like the number the firm needs, in Alberta. The Herald has more than once pointed out the fact that the farmers of Northern Alberta can make good money by raising hogs. They have now a market right at home, and the farmer who does not take advantage of it has only himself to blame. The C. P. R. has done its share to foster this industry by the introduction of well bred boars, and it is to be hoped that in a short time, it will not be necessary to import store hogs from the east. The farmers of Alberta can supply them without much trouble and if they consult their own interests they will lose no time in doing so.

The same remarks are equally applicable to the sheep market. The local product is altogether inadequate, and Mr. Burns is

COMPELLED TO IMPORT MUTTON from Australia to supply the needs of his customers. It seems anomalous that this should be so, but it is never the less a fact.

What the ultimate result of this newest industry may be to Calgary, it is difficult to say. Looking at it as it stands today it means a great deal not only for Calgary but for Alberta. The investment in our city of the large capital necessary for such an undertaking; the home market for our beef, hogs and sheep, and the employment of from 40 to 50 men, mean a whole lot. There are today on the track adjoining the abattoir 12 refrigerated meet hook cars awaiting their loads of dressed beef. The firm intend to slaughter 150 head of cattle daily beside all the hogs and sheep they can secure at home. It is not unreasonable to predict that in the near future the addition of a porkpacking factory will be found necessary, as well as a beef cannery, so that it is difficult to say how far reaching this industry may ultimately become. The enterprise of Messrs. Burns & company will be gladly welcomed as a big addition to Calgary's prosperity and its increasing prosperity will be watched with general satisfaction.

Everyone Likes Meat...

to be fresh, Vegetables to be fresh, Bread to be fresh. Then why put up with stale Tobacco?

By their Patent Cold Vacuum Process (patented throughout the world) OGDEN'S TOBACCOS are kept absolutely away from the air from the moment they are packed in the factory, until the tin is opened. Thus the original fragrance and flavor of the Tobacco are preserved, and the smoker gets a fresh Tobacco. If you once try it, you will not go back to the ordinary tobaccos, from which all the beautiful aroma has evaporated into the air.

In 1/2 lb. and 1/4 lb. Vacuum tins, of all first-class tobaccos. R. M. DUCKWORTH & CO., Wholesale Agents, 30 Hospital Street, Montreal. I. ROBERT JACOBS, Agent, Greenwood, B. C.

Ottawa Letter.

Short, sharp and decisive will pretty accurately describe the local campaign now taking place in Manitoba. Both parties are fully prepared for the fight and each is endeavoring to cut out the pace for the other.

THE PULP WOOD INDUSTRY.

Although the wood pulp industry has made considerable progress in the last two or three years, there is evidently immense possibilities ahead of it. The fact is generally recognized that the American pulp wood forests are practically depleted, and that the future supply for the enormous demands of the American paper market must be drawn from Canada.

A GREAT COMBINATION.

The opposition appears to be much hurt at the suggestion that has appeared in government quarters more than once that they are showing much greater energy now in explaining how things should be done, than they ever manifested in doing them, while in office; but as the Toronto Globe observes: "No preferential tariff was enacted until a Liberal government came into power; then the Conservative leaders who had done nothing began to show how much better they would have done. No aid was given to Great Britain in any war until a Liberal government came into power; then the leaders who had done nothing began to show how much better they would have done."

AMENITIES OF PUBLIC LIFE.

Public banquets to public men are often of a more or less perfunctory character and possess very little real significance. Notable exceptions to this, however, occur in those tendered to the two new members of the provincial cabinet, Messrs. Stratton of Peterborough, and Latchford of Ottawa, for in each instance they are spontaneous and genuine tributes to personal worth, tendered by men of all shades of politics and every creed as a recognition of the good citizenship and

all-round merits of the recipients.

In Peterborough a leading part in the festivities was taken by prominent Conservatives of the city, who vied with one another in testifying to the esteem in which they held the man who had represented them with integrity and intelligence for thirteen years. The banquet to Mr. Latchford in this city promises to be of an equally significant and gratifying character. Though hitherto comparatively unknown in politics outside his own immediate vicinity, the new commissioner of public works is not only recognized here as exceptionally able, but he is extremely popular, and while his selection for a seat in the cabinet has given unbounded satisfaction to his friends it has been well received also by his political opponents.

PREFERENTIAL TRADE.

The good work inaugurated by the Laurier government when it put into operation a policy of preferential trade with the mother country is slowly but surely bearing fruit. Recognizing how deep-rooted are the principles of free trade in England, permeating the suggestion of even a semblance of protection, our government realized the utter futility of attempting to secure any reciprocity of preference at first but believed that a practical demonstration of Canada's good will would do more than aught else to reach the desired goal.

CONCERNING THE TEETH.

TARTAR.

Tartar is a deposit of animal and mineral matter, precipitated from the fluids of the mouth on the teeth. Sometimes it accumulates in such large quantities as completely to incrust them. It imparts to the teeth a greenish, yellowish, brownish and sometimes a white color. Its effects on the teeth are always injurious.

When once allowed to become incrustated with tartar, no one can thoroughly clean his own teeth, because he can neither see where the masses are nor can he use the proper instruments for their removal. The work can only be done by the dentist. Everyone, then, should visit his dentist at least twice each year, for cleaning and examination of his teeth.

The question is often asked, if cleaning the teeth with instruments does not injure the enamel, or if they are not so irritated as to cause disease, and perhaps instances are cited in which teeth of a friend have, in their imagination, been led to decay because of the work done on them by some dentist in cleaning.

It is undoubtedly true, that when teeth are cleaned cavities of decay that were masked by tartar are uncovered, but the cause existed before. The decay of which the patient complains was not caused, but revealed by the cleaning.

Neither the medicines nor the instruments employed by a good dentist will in any case injure the teeth?

TOOTHACHE.

The toothache is the result of long, long neglect of carious teeth. The decay may not have been long known to exist, for many never think of having their teeth examined to ascertain their condition. They seem to think this is unnecessary till they feel the actual toothache. It is then generally too late for the dentist to be of more than partial service, for it indicates that the tooth is rotten quite to the pulp cavity, and necessitates uncertain treatment or the destruction of the nerve before the tooth can be filled. Even then it is liable to give after trouble by ulceration. The toothache is not, therefore, a criterion that the teeth need attention, but a proof that they have not been attended to soon enough. The toothache would be a rare occurrence if prompt and proper attention were given to the teeth.

FILLING THE TEETH.

When any part of the tooth becomes affected by decay the only remedy is to remove that portion and supply the place with a material that may be so manipulated that it will become solid, impervious to the action of air or moisture, resist the force of mastication and serve as an artificial enamel.

DIGESTION.

Good health demands thorough digestion; thorough digestion demands thorough mastication, and thorough mastication demands sound and healthy teeth. Ulcerated roots and decayed teeth, an inflamed mouth and

DR. R. MATHISON, DENTIST.
D. D. S.—Pennsylvania College of Dental Surgery, Philadelphia, Licentiate of British Columbia.
Naden-Flood Block : : : : : Greenwood, B. C.

vitiated saliva are poorly fitted to supply the stomach with food that can be properly digested and assimilated.

ARTIFICIAL CROWNS.

Though it is folly to neglect teeth till artificial crowns are called for, yet we should be thankful that when they are necessary, they can be made so as to be useful, beautiful and durable. It is astonishing to see how many roots that are considered useless can be thus made the supports for good comfortable teeth—teeth looking so natural, it is impossible for the casual observer to detect them as artificial, and so useful and easy to the wearer he soon forgets to distinguish them from the others. In fact, two or three sound roots are now often made to hold in place three or four artificial teeth. This is called bridge work.

With two or three good teeth as supports, several artificial teeth may be attached to such a bridge, and thus quite a vacant space may be filled, without the vexations of a plate.

There are many improvements in dentistry of late. It will astonish the uninitiated to see how many ways there are of saving teeth. Do not, therefore, assume to judge whether a certain tooth can be saved. Go to an intelligent dentist, and let him decide; be willing to pay much more for its preservation than for its extraction.

ARTIFICIAL TEETH.

When the natural teeth have been lost, the comfort, the health, the speech and the personal appearance will be preserved and greatly enhanced by the substitution of artificial teeth skillfully made.

CAUSES OF DECAY OF THE TEETH.

Judging from questions constantly asked it is evident few people have a clear conception of the causes which lead to decay of the teeth.

Chief among them is the fermentation of particles of food lodged between the teeth, or in their pits or depressions, during mastication. When, through carelessness or indifference, these deposits are not removed, under the influence of the warmth, moisture and the microbes present, fermentation or chemical change takes place and an acid is generated, and this dissolves the enamel and dentine, leaving a cavity to grow larger and deeper.

Among other causes producing decay may be mentioned any protracted sickness, the lack of out door exercise, excessive study, anxiety or worry, which undermine and weaken the system. When the body is ill, no one organ can be said to be perfectly sound.

EXTRACTION OF TEETH.

Extraction is an ultimate remedy and should be resorted to in extreme cases only. If people would give to their teeth the attention that is their due there would be no occasion for the forceps, except in very rare instances. It is because of ignorance, or inexcusable carelessness, or the unconquerable dread of dental operations, that gives necessity for the forceps. Timely care might preserve even those which are naturally weak and bad.

Continued From Page.

the sampler at Nelson, was one of a party of excursionists who visited the construction work now being carried on at the B. C. Copper Mining company's smelter, and was quite enthusiastic in his praise of the same. The Major has had quite an extended experience in the smelter business, and was at one time on the Halls staff.

Many of the wholesales combined business with pleasure and Friday morning were busy booking orders.

J. C. McLagan, of the Vancouver World, one of the oldest newspaper men in the province, was with the Vancouver contingent.

To many, who were the guests of the Canadian Pacific a year ago yesterday, at the opening of the Crow's Nest Pass branch, the absence of Archie Mackenzie's choir of rag-time singers, was a distinct loss to the amusement of the company. Probably this hint will be sufficient to get Archie to reorganize before the company arrives at Grand Forks, so that the banquet to be tendered to the visitors to-night, will be enlivened by the sweet strains of "There'll Be a Hot Time," specially arranged for the occasion by the choirmaster. Archie is always strictly alright, but the choir's absence from last night's banquet is to be regretted.

It is said by some of his Nelson friends, that J. Roderick Roberston, president of the association that is supposed to attend to the wants of the business men of not only Nelson but the whole portion of southern British Columbia, refused to journey west of Robson on account of the non-completion of the long tunnel. Probably he remembered that entirely too interesting journey by sledge down the long hill that takes one from the city of Fort Steele, across the Kootenay river.

NOTES.

The good conservatives simply howled when the Manitoba elections were announced at the banquet.

The Greenwood brass band met the excursionists at the station and played some excellent music.

The choruses sang by the coast contingent were excellent.

Several excursionists visited Phoenix, others the Mother Lode mine.

The excursionists are to be banqueted at Grand Forks this (Friday) evening.

Thos. Earle, M. P., and Senator Reid were in the party. Mr. Earle was simply delighted with Greenwood.

Geo. Denny and H. Hawson, two of the brightest newspaper men in the province reported the excursion for the Victoria Times and Colonist.

The veteran Col. Eagen was with the party for the Rossland Miner.

Rev. Mr. Few, of Nelson, one of the most eloquent speakers in the province, assisted Mr. Peters in looking after the party. As was stated by Mr. Peteas, the two 'chaperons' worked in opposite directions. Mr. Peters was the more successful.

As a souvenir of the trip, the excursionists were each presented with a handsome colored card folder. The outside had in one corner the Canadian flag crossed with the company's flag and the lower corner was a steamboat scene on the Arrow lakes. The wording was, "Canadian Pacific Railway. Complimentary excursion. Opening of the Boundary country, Kettle river valley. Columbia and Western Railway, Dec. 7, 1899." The inside portion contained the names and official positions of the heads of the departments operating from Winnipeg west to the coast and in the lower section of the province. The souvenir was neat and prettily gotten up.

BOARD OF TRADE.

A Meeting of the Council Held Wednesday Evening.

A meeting of the council of the Board of Trade was held on Wednesday evening with President Galloway in the chair and the following members present: R. E. Gosnell, secretary, Thos. Hardy, J. J. Caulfield, R. Smailes, A. H. Sperry, D. A. Cameron, W. M. Law and Duncan Ross. The secretary reported that the government owing to representations made by the board had decided to give another \$1,000 for the Central camp road, also that the conference between the board and Hon. Mr. Cotton had resulted in securing everything asked for in connection with the public school. The council discussed the reception to the visiting board of trade and other matters.

MINING PICK-UPS.

(From the Phoenix News.)

On the B. C. in Summit camp, there is greater activity than there has been for the past six months, consequent on preparations being made for the shipment of ore. A part of the electric light plant is now at the mine and will be installed as soon as all of the machinery arrives. New offices and new bunk houses are being built for the accommodation of the large number of men being employed. Sinking is being continued from the 150 to the 250-foot levels. The shaft being put down is 7x14 feet in the clear. A record in sinking was made in this shaft, it having been put down 60 feet in 23 days, and timbered 50 feet. A winze is also being sunk from the 50 to the 150-foot level. It is the intention to widen the shaft from the surface to the 150-foot level, as soon as the present contract has been completed from the 150 to 250-foot level. Shipping will be commenced as soon as the dump and ore cars arrive.

Extensive preparations are being made for the development of the Washington group of claims on the West Fork. Three shifts are now at work on the properties. The buildings for the men, shaft house, blacksmith shop, etc., have all been completed. The big ledge running through the group was last week uncovered at another point and full 12 feet of solid ore exposed. John McCounick returned from the properties last week and reports the waggon road completed about three miles beyond the mouth of West Fork. Notwithstanding the business protests made, the belief is general in that section that the government intend to build the bridge at the point selected by F. C. Gamble. This according to those in a position to know will entail the useless expenditure of a large amount of money.

A. Hamilton and Thos. Corhill are doing assessment work on the Great Laxey. The work now being done is on a new shaft, which is down about 40 feet. Previous to this year an incline shaft was sunk 20 feet, a tunnel run 30 feet and a crosscut of 20 feet from the tunnel. The ore body is quartz carrying values in copper, gold and silver, and is a very large showing on the surface. The Great Laxey group is on the south side of Eholt creek about seven miles from Greenwood. Messrs. Hamilton and Corhill also own the Twin and Black Prince, two claims lying near the Great Laxey. On the Twin there is a 12 foot shaft and a 30 foot open cut and on the Black Prince two tunnels have been run, one 15 and the other 18 feet. These claims were located in 1895.

James Astley, Consulting engineer for the Snowshoe was at the mine this week examining work on the property. The west drift at the 200-foot level is in 80 feet and coming into ledge matter. It is expected that the drift will be in the ore body in another 25 feet. About 250 feet of drifting and crosscutting has been done at the 200-foot level on the Snowshoe. The drift that is now being run in a westerly direction, is intended to strike the surface showing about 100 feet west of the shaft.

Juo. Farrell made a rich strike on the Bay Horse fraction in Wellington camp, the past week. For some time he has been running a surface crosscut on a capping, and last week encountered the ledge, which he has uncovered for a distance of 50 feet. The ore is arsenical iron, similar to that taken out of the Winnibeg about a year ago, and running over \$100 in all values to the ton. The Bay Horse fraction is an adjoining claim to the Butter Cup and Iron Clad.

The tunnel on the Golconda group is in 50 feet. Seven sets of timbers have been put in, and now the work is in a solid formation of sienite, no timbering being required. It is expected ledge matter will be encountered in another 50 feet.

On the Knob Hill drifting is being done at the 100-foot level. Drifts are being run both north and south of the winze. The Knob Hill is a wonderful property. In the 2,000 feet of work done in tunnel, crosscuts, winze and drifts, every foot is in shipping ore. This is perhaps the largest known mineral deposit in the world. The

ledge is over three hundred feet in width, proved by crosscut tunnel. The tunnel was run 406 feet in ore, but not at right angles to the ledge.

Work is to be recommenced on the Rambler group in Summit camp. A. G. Davis has completed arrangements for an eight-months working bond on the properties, and will put a force of men at work developing the claims next week. Mr. Davis will thoroughly prospect the Rambler group by surface crosscutting, and show up the ledge before he makes a turn on the property.

On the Oro Denoro in Summit camp, a tunnel is being put in from the side hill to tap the drift now being run from the 200-foot level. The King company is also building offices, bunk houses, etc., on the property recently bought by Ross Thompson, and adjoining the Oro Denoro. It is said the new town will be named Denoro.

Last week R. H. Donegan, of Greenwood, sold the Mountain Chief on Myers creek to John Empey, representing Barbarian Brown, for \$5,000 cash. The Mountain Chief lies south of the Poland China.

A rich strike was made the past week in the Ah There claim in Deadwood camp. It is also reported that some very rich copper ore is being taken out of the St. Laurence in the same camp.

Work on the Idaho shaft has been shut down owing to difficulty between the miners and Dominion Copper Company in regard to wages of hammersmen.

On the Rathmullen group in Summit camp, the drift from the 200-foot level is in mineralized rock and it is expected the ledge will be encountered in a few days.

Work will be commenced next week on the St. Dunstan and St. Eustace in Deadwood Camp. These Claims adjoin the St. Laurence.

The shaft on the War Eagle is down 30 feet and in ore. Work is being pushed on buildings for boiler and compressor.

Sid M. Johnson, all interest, Ed. H. Mortimer to G. D. Tyson.

The Greenwood Miners' Union desire to express their thanks to the many friends who attended the union ball held in Greenwood last week.

J. A. Coryell, C. E., has completed the survey for the Phoenix water works. Work on the system is being done as rapidly as possible. At present the water is taken from the dam built last summer, but a better system will be needed before spring opens. It is the intention of the company to pump water from the New York lake to a reservoir to be built above the railway grade. This will give sufficient pressure for fire protection.

David Smith, or "Scotty" as he is better known here, narrowly escaped death last week near Republic by the explosion of their stock of powder. He and Bobby Robinson are working on a claim owned by the Friend Gold Mining Company. Scotty went to the blacksmith shop a short distance away to thaw three sticks of powder. The powder exploded, blowing the shop to pieces, tearing the clothes off Scotty and otherwise injuring him. He is now being cared for in the hospital at Republic, and will probably recover.

Services 11 a. m. and 7:30 p. m. Sunday school 2:30 p. m. Social service 8 p. m. Wednesday. EVERYBODY WELCOME. B. H. DALDERSTON, B. A., Pastor.

NOTICE is hereby given that I intend to apply to the board of license commissioners of the City of Greenwood at their first meeting after the expiration of thirty days, for a license to sell liquor by retail on the premises known as the "Aurora" on Boundary Avenue and Greenwood streets, Lots 13 and 14, Block 97. W. S. FLETCHER. Dated Nov. 4th, 1899.

News of the City.

A very successful ball was given under the auspices of the Miners' Union last week.

There was no quorum present at the council room on Monday night and consequently no meeting was held.

A petition has been circulated in the city and signed by a large number of people asking the city to establish a free reading room in Greenwood.

The firm of Spratt & Macpherson has succeeded Spratt the jeweller. They are getting in a \$10,000 stock and will carry a full and handsome line of Xmas goods.

C. L. Thomet has placed the Elk-horn addition to the city of Greenwood on the market. The addition contains many splendid residential lots. McEntire, McDonnell & Co. are the selling agents.

Hon. T. Mayne Daly ex-Minister of Finance, and W. A. McDonald Q. C., two ex Manitoba politicians but now prominent Kootenay men, were among those who were enthused over the downfall of Greenway.

Duncan McIntosh, manager of the Winnipeg Gold Mining company, returned on Thursday from the east. He visited Montreal and other eastern centers. He reports the money market very tight in consequence of the war, but there is a general impression that when a decisive victory is gained by the British, a better condition will prevail. Everything in connection with the installation of the electric plant by the company in which Mr. McIntosh is a leading spirit has been arranged and the plant will be installed within the time specified in the by-laws.

Excursion Notes

On Saturday, at 9 a.m. the excursionists will leave Grand Forks on their homeward journey. The balance of the itinerary is as follows: Dec. 9th, 9 a.m. start on return trip arriving at Robson 14 k. Leave for Nelson at 14.30, stopping at Bonnington Falls to inspect the largest Electric Power Plant in Western Canada; arriving in Nelson 17 k. Dec. 10th. Leave Nelson for Rossland 8 a.m. arriving at Trail 10.30, inspect the Canadian Smelter Works, the largest smelting works in Canada. Arrive Rossland 12 noon. Lunch, Sunday School and Coffee. Leave Rossland 19 k. arriving at Robson 21 k. To bed—"Home Sweet Home."

St. Jude's Mission-Church of England.

A temporary mission room has been found in Mrs. Foreman's hall, Government street, and on Sunday last two services were conducted at 11 a. m. and 7:30 p. m., by the Rev. W. A. Robins, M. A., Oxon, the newly appointed missionary in charge of this district. There were large congregations at each service, the room being quite filled at the evening service, after which Mr. Robins addressed the church workers and earnestly asked for their co-operation. R. Smailes was unanimously elected a member of the church committee, R. T. Evans and G. B. Taylor were also chosen. These gentlemen with the priest in charge and church wardens will form the church committee until Easter. Several ladies and gentlemen have promised to help in forming a choir and with Mr. Smith's able assistance at the harmonium it is hoped that the services will be brightened by good music and devotional singing.

Manitoba Election.

The provincial elections in Manitoba Thursday, went against the Greenway government. Returns received give Government 15 members, Opposition 20; Independent, 1. Following is the result:

OPPOSITION.

Woodlands, Robin, 50; Cypress, Steele, 90; Virden, Simpson, 50; Souris, Thompson, 51; Portage La Prairie, 150; Brandon, McInnes, 21; Avondale, Argue, 21; St. Andrews and Kildonan, 134; Manitou, Rogers, 73; Killarny, 00; Morden, Ruddell, 24; Reineland, 9; Little Mountain, Johnson, 153; Emerson, McFadden, 62; Norfolk, Lyons, 20; Rockwood, Riley, 30; Winnipeg north, Nelson, 229; Winnipeg south, McDonald, 50; Morris, Rosenfeldt, —. Caullinaise given opposition, 20.

GOVERNMENT.

Mountain, Greenway, 100; North Brandon, Fraser, 11; Beautiful Plains, Ennis, 70; Lakeside, McKenzie, 15; Russell, Crevar, 40; St. Boniface, Bertrand, 35; Winnipeg, Attie McMillan, 115; Minnedosa, Myers, 214; Landsdown, Morris, 26; Birtle, Mickie, 110; Westbourne, Morton, 104; Deloraine, Young, 106; Lorne, Riddell,

24; South Brandon, Fowler, 50; Laverandridge, 00; Saskatchewan, a tie. Total 16.

Mining Notes

Mr. Anthony J. McMillan, who is interested in the Snowshoe mine, left for Great Britain, where he will remain for the next three months. Mr. McMillan will spend most of his time while away in London, where he will confer with the officers of the several mining companies in which he is interested. On his last visit he lectured before several societies on the mining resources of British Columbia, and will probably deliver similar talks during his visit before the Imperial Institute and the Geographical society. He has armed himself with data, and says he is prepared to tell his hearers something of the magnitude and richness of the resources of this section.

Most gratifying returns here, the result of the first shipment of Gold Bug ore. The returns are for 20 tons sent to the Trail smelter, and give a net value of \$110.60 per ton. The values are divided as follows, 131 ounces of silver, two and one-fifth ounces of gold, one and a half ounces copper and 12 per cent. lead. Hector McRae, the representative of the London & Canada Syndicate controlling the stock in the Boundary Creek M. & M. Co. said yesterday to a representative of the Times that at the mine they were preparing another shipment of 20 tons, of which 15 tons were already sacked.

E. G. Warren, mining engineer, arrived in town yesterday from Rossland, on his way to Camp McKinney. "It is only a flying trip" he said last night "and I expect to be back here on Monday, then I may have some news for you that will be of interest. Another visitor to the same camp, who is to leave to-day, is J. Hugo Ross of the firm of Fox & Ross, Toronto. Mr. Ross is going to see for himself the new strike reported to have been made on the Sallor group.

It is definitely announced that the bond, thought to have been secured by Montreal parties on the Calumet-Hecia group in Wellington camp, was never perfected and the deal is off.

A Progressive Firm.

The store of the Wynkoop Stephens company was completed the past week, and the stock is now being arranged in the several departments. This company carries one of the most complete stocks in the Boundary country, consisting of dry goods, clothing, boots and shoes, furnishings, groceries and hardware. They also have a tin and plumbing department in connection with their business. Eighteen months ago George Wynkoop and Jim Stephens, who were then working for the Old Ironsides company, put their heads together and decided that there was more money in working for themselves than for the company, so rented the boarding house and opened a store. The store was located in what is now known as the Rumberger addition. Six months afterwards they opened a second store in the premises now occupied by them. Now they carry as large a stock as any store in the district, and do perhaps a larger business than any other firm in the Boundary country. They still have a branch store in the lower town. The business was stocked this fall, by which Mayor Hardy, of Greenwood, became largely interested in the concern. The Old Ironsides hotel is conducted separately from the other business, by Messrs. Wynkoop and Stephens. Mr. Wynkoop is manager of the Wynkoop Stephens company's business, and Mr. Stephens of the Old Ironsides hotel.—Phoenix News.

PUMPS FOR MINE WORK... We have paid special attention to the construction of Pumping Machinery for duty in mines, our unsurpassed facilities and methods have given our Pumps a Dominion wide reputation. They are fully guaranteed. Our designs include all types of the ordinary Piston Pattern Mining Pump, Solid Cylinder single and Duplex Patterns, outside packed Duplex Plunger Patterns with Pot valves, also Vertical Sinking Pumps, both piston and outside packed double Plunger patterns. Mine superintendents and those interested in Machinery would consult their interests by sending for catalogue and quotations before installing their plants.
