SOUTH DEADWOND.

A NEW AND PROMISING CAMP.

Mr. E. A. Bielenberg's Mining Operations Has Brought a New Camp to the Front. The Buckhorn, Arlington Burns and Iron Top Groups. Immense Ore Bodies—Good Values.

Probably no early pioneer of the Boundary creek country deserves as much credit for its rapid development as E. A. Bielenberg. From the time he sold the Anaconda group to the present day he has spent large sums of money in increasing the list of big properties in the district. Mr. Bielenberg individually, has spent over $25,000 in purchasing and developing properties. That he has been successful is due to his pluck and perseverance more than to any favors showered upon him by dame fortune. Up to the time Mr. Bielenberg began operations there, South Deadwood was an unknown and unappreciated mining camp. To-day it is attracting the attention of mining men bacause of the rich ore bodies uncovered by his efforts.

Mr. Bielenberg had a long experience in the business world before coming to this district. For two years he managed a coffee plantation at the headwaters of the Amazon in Peru, South America. Afterwards he was paymaster for five and a half years on the Hutchinson estate Hawaiian Islands owned by Claus Speckles of San Francisco the well known Sugar King. He also carried on mining operations in Montana and after coming to British Columbia was manager of the pioneer store at Ainsworth in the well known Slocan mining district. Mr. Bielenberg still retains large and valuable mining interests in the Slocan. Since coming here he has been ever on the alert to secure valuable mining interests and his many friends are congratulating him upon the great success which has attended his efforts. As has already been stated he is the father of South Deadwood camp. Until the winter of 1897 this camp was unknown. Then Mr. Bielenberg purchased the Buckhorn group and at once began vigorous development work. The Buckhorn group is now classed among the big properties of the Boundary creek district, on account of its large ore bodies and exceptionally high values in gold and copper, one ore body averaging over $60. The Buckhorn was sold to a strong company at the head of which is Rufus Pope, M.P., F. P. Buck and Messrs. Bailey of Sherbrooke, Quebec. Mr. Bielenberg is also largely interested in the company.

Adjoining the Buckhorn group are the Arlington, Burns, Blue Bell, Buckhorn No. 2 and Burns fraction owned by Mr. Bielenberg. He has spent a large sum in their development. On the group are 10 shafts ranging from 17 to 40 feet in depth and 900 feet of open cuts. This work discloses an ore body 200 feet in length and 600 feet wide on the surface. An ore body which runs from the Buckhorn across the Arlington and Burns has been uncovefed for a width of 212 feet by crosscuts and shafts. This ore was sampled by J. C. Haas, M. E., and Mr. Bielenberg and from the shafts dumps, and open cuts they obtained from $15.45 in gold and 20 1-5 per cent in copper down to 1⅓ per cent copper and 65 cents in gold. Twenty-five samples taken by Mr. Haas and Mr. Bielenberg gave the following values:

No.	Gold.	Copper Per Cent.
1	$ 75	$ 1 90
2	65	2 08
3	3 00	1 80
4	.....	2 23
5	1 60	76
6	trace	trace
7	65	1 07
8	trace	5 27
9	3 00	10 81
10	50	2 60
11	trace	trace
12	trace	5 68
13	4 50	trace
14	trace	17 44
15	2 50	3 50
16	2 75	.....
17	60	.....
18	1 50	80
19	trace	trace
20	4 15	2 00
21	5 25	20 00
22	2 00	3 00
23	75	4 24
24	2 50	1 05
25	trace	trace

Ten additional samples ran from $15.45 in gold and 2.05 per cent copper to a trace in gold and copper. These samples were taken from a distance of 212 feet across the ledge. When it is considered that the samples were taken from this distance without any preference being made for picked ore, it shows there is on the Arlington-Burns one of the most remarkable ore bodies in a district of marvelous mining properties.

Lying directly west and north of the Arlington-Burns is the Iron Top group, also owned by Mr. Bielenberg, and comprises the Iron Top, Piccadilly, Scranton, Copper Trust, Iron Top Fraction and Otis Fraction. Upon this group marvelous bodies of copper-gold ores have been discovered and eleven distinct ore chutes have been opened opened up, either by shafts or crosscuts. The development work includes eight shafts varying in depth from 40 feet to 16 feet and crossuts aggregating over 900 feet. Development in the Iron Top group disclosed ore dissimilar to anything heretofore found in the Boundary district, at least in Deadwood camp. The ore is chalcopyrite and bornite and seventeen assays went from 43 per cent copper, $8 in gold and 10 ounces in silver to 1½ per cent copper and $3 in gold. This property will be opened up by two parallel tunnels 300 feet apart, cutting the ore bodies at right angles.

The development of South Deadwood camp has attracted the attention of the Canadian Pacific Railway company, and already a spur from the Deadwood branch line is being surveyed to pass through the Buckhorn, Arlington, Burns and Iron Top groups. This spur will be built early next spring and will afford the properties cheap shipping facilities to the smelter at Greenwood, only one and three-quarter miles distant from the camp.

The development of the properties mentioned indicate that South Deadwood camp will soon become one of the largest in the district.

Special to the Times.

LONDON, Nov. 23.—A dispatch to the British secretary of war from General Methuen, dated Belmont, Nov. 22, says: "Attacked the enemy at Day creek; victory complete. Have forty prisoners. Captured a large number of horses and cattle and a large qantity of ammunition. We are burying a large number of Boers. Our troops behaved splendidly. The enemy fought with courage. Our casualties are: Three officers killed, 19 officers wounded, 55 men killed, 147 wounded, 18 missing. The Boers engaged 2,000 men. Notwithstanding the demoralizing defeat of Boers, the fact that Joubert is succeeding in partially paralyzing advance of relieving columns of British is causing much apprehension as to the fate of Ladysmith, Estcourt and Mooie river station. These positions being isolated, Dutch rising increases.

ACCIDENT AT THE B. C. MINE.

Explosion in the Mine Injures Three Men—Two are Badly Hurt.

Tuesday afternoon at the B. C. mine in Summit camp, a most serious accident occurred, caused by a powder explosion and resulting in severely injuring William McBride and A. L. Watson in the face, as also William Essenson, slightly. The two former were on Wednesday afternoon's train taken to Rossland, where both have their h ome. At the same time an eye specialist from Spokane was telegraphed for who met the injured men at Rossland. Essenson, although receiving painful wounds, is at the B. C. mine and able to be around. While nothing definite is known here as to the real extent of the men's injuries it is said that Watson will lose his eyesight. Both he and McBride were terribly burnt in the face.

The accident was caused through the non-explosion of one of the shots at the time of the noon firing. The three men went back into the mine after the noon hour and started to muck out, when a pick struck the unexploded charge causing a frightful explosion and the men's injuries. Dr. Gordon, of Phoenix, was hastily summoned, as also was Dr. Foster, of Greenwood, before the arrival at the mine of the latter physician, Dr. Gordon had attended to the injured men and as far as could possibly be done relieved the men of their intense suffering.

An Important Case.

A case of interest to all claim-owners came up before Judge Spinks in the county court held in Greenwood on Tuesday last. It was an action brought by John Mulligan against Louis Fisher, of the Phoenix sawmill, claiming damages from timber cut and taken from the Wheeling mineral claim. The case was adjourned after the evidence of the plaintiff was taken, and one month was given the lawyers in which to put in a stated case. It is probable that an appeal will be taken from the decision of the county court judge, no matter which side wins, as the action was brought principally to obtain an interpretation of the mineral act in reference to ownership of timber on mineral claims and uses to which the timber can be put. The claim-owners of the district have combined to fight the lumber combine, and so the case will in all likelihood be taken to the supreme court, and the matter settled for all time.

Boers Invading Cape Colony.

LONDON, Nov. 21.—[Special.]—Dispatches reports heavy fighting at Ladysmith, said to have occurred last Thursday. The Boers dead number hundreds. The British loss is slight. The plan of operations on both sides unfold slowly. The Boer invasion of Cape Colony continues steadily and rapidly to prevent junction of British forces at Estcourt and Ladysmith. Delayed Cape Colony reports announces the arrival of more German officers and artillerymen who volunteered service with the Boers. The English plan is three-fold to advance from Durban to Ladysmith, from Orange river to Kimberly, and from East London via Queenstown to Burghersdorp. The British hope to early secure the complete control of Orange river. The debarkation of troops at Capetown is progressing satisfactorily. Eighteen hundred and fifty cars have been collected there for the conveyance of troops northward. Six thousand Boers are foraging for food near Greytown.

Lorah-Parker.

On Friday evening last, Richard Lorah and Leta Parker, of Phoenix, were married by Rev. Ralph Trotter. The ceremony took place in the Hotel Armstrong, Greenwood. Mr. A. Graham and Miss Jensen acted as best man and bridesmaid. Mr. Lorah has been in the employ of the Wynkoop Stephens company for some time. Mr. and Mrs. Lorah have the best wishes of their many friends for a happy and prosperous life.

A Typographical Rally.

A charter has been applied for by members of the International Typographical Union in the Boundary district. It is intended to includa all the printers working in Cascade, Grand Forks, Columbia, Phoenix, Greenwood and Midway in the organization. There are at present sixteen card men working in the district, and after the union is established all printers (about 20) working in Boundary will, it is hoped, come in.

NOTICE.

NOTICE is hereby gived that I intend to apply to the board of license commissioners of the City of Greenwood at their first meeting after the expiration of thirty days, for a license to sell liquor by retail on the premises known as the Imperial Hotel, corner Copper and Deadwood streets, Lots 35 and 36, Block 12.

COPPER ST. GREENWOOD.

A Study in Booms.

A recent number of the National Review contains an article on the Klondike, under the above caption, by Ernest E. Williams. The gentleman may be right, or approximately so, in his figures but his conclusion is wrong. But here is what he says: He makes the startling statement that about $50,000,000 have already been invested in the Klondike, and that only about $20,000,000 have been taken out. He estimates the number of Klondike prospectors at 30,000, and figures that the average amount spent by each is over $1,500. With these figures before him the gentleman says: "The world would have been $30,000,000 better off if it had never heard of the Klondike."

The last remark will not meet general endorsement. If his figures be correct the world will be the gainer by $20,000,000, for that $30,000,000expended are not lost they simply changed hands. That is all. Of course hardships suffering and death have been the handmaids of those who pursued the trails to Klondike, but they always hold office in all ventures, They can't be reckoned a factor against the $20,000,000 gained in the last two year's privations. We are speaking about nioney now. But the world is not done with Klondike yet. There are, doubtless, millions resting under the ice of that region which may be thawed into the pockets of miners. Wheu the final accounting shall be made it may be learned that Klondike has paid for its discovery and left a goodly sum to its credit.—Western Mining World.

Missing Ore Bodies.

How haphazzard mining is after all, and with what extraordinary persistence bodies of ore are sometimes overlooked, remarks a mining exchange. A case in point is the recent discovery on the surface of the Black Bear at Rossland. The Black Bear shows the outcrop of a ledge upon which pits have been sunk from the flat on which the Le Roi compressor stands up to the crest of the hill. A tunnel was also started by the original locator, supposed to drift in off the vein. In all of this work no indications of values were discovered. and the Le Roi company bought the claim, so it is reported, for $500. The company continued the tunnel but desiring to use it as a means of exit to the mine, bore away to the north. This summer, to carry out the proposed development scheme of the Le Roi, this tunnel is being enlarged and improved and extensive grading was undertaken at the mouth, where a shop for framing timbers was contemplated. This involved blasting the top off the ledge capping, which has been lying stripped for years. The result was more than ten feet of beautiful ore, carrying fair values in gold and high percentage in copper. The portal of the tunnel is within six feet of this ore. Four sticks of giant powder and four hours' work would have made a difference to the original locator of between $500 and $50,000, or if he held his property till now, between $500 and $500,000, but the tunnel started above the ore and bearing north, remained above and to one side of it all the way. The obvious moral is never to run a drift tunnel to show up property without crosscutting, and do not be afraid of surface work.

The latest phase of the strike situation—the importation of Italian laborers—is a menace to the existence of the city of Sandon, and, for that matter, to the industrial welfare of every other community in Kootenay. It is all very well for the Mine Owners' Association to take whatever stand they choose on matters political, but when they undertake to displace British subjects with these ignorant, degenerate aliens they overstep the mark and threaten the business of many who are dependent for their very existence on the high class workmen who have built the Slocan. Such a program will not be quiescently accepted by the citizens of the Slocan, and if the mine owners find the affair assuming a national importance and themselves held up to execration throughout the length and breadth of the land they may sooth their wounded sensibilities with the reflection that whatever they may suffer at the hands of an outraged public and a disparaging press have been brought on by their own actions.—Sandon Paystreak.

The census returns of Dawson City give the population as 4,445. Of these Arabia, China, Greece and Holland have but a single representative each. Great Britain and her colonies, including Canada itself, contribute less than one-fourth of the total, the number being 995. Of these 645 Canadians, 208 English, 69 Scotoh, 49 Irish and 25 Australians. The United States contributes over three-fourths of the total, namely 3,205.

The Prospector.

There are prospectors and—prospectors. There are those who have followed the calling of the prospector for years. They occasionally strike a good thing which they partially develop, and then sell out. They prospect for the love of the business, and seem to be happy only when with burro, or old mare, loaded down with blankets, pick, pan and shovel and "grub," they roam over the mountains in search of *something good—something* that will fetch them a "homestake" or enough to go to their native heath and dream away the rest of their lives. They seldom or never realize the fruition of their hopes. They are prospecting still. No climate is too torrid, none too frigid to deter them from taking their chances in the "stampede." The farther off the country the more alluring the prospect appears, distance seems to lend enchantment to their view.

Then again there are prospectors who engage in the work from the force of circumstances. They camp with the first prospect they come across and make or break by it. They don't last long, If it is a bonanza they have struck they realize what they can out of it and return to pleasanter fields of labor. At all events they quit the business and follow some other callings. Mountain trails know them no more forever. In the early days they were called "summer prospectors," for they hugged warm stoves rather than a cold blanket on frosty ground. They may have been wise in doing so, as far as their personal comfort was concerned. But they never founded new mining camps, never opened new mining sections, nor called new mining territories or states into existence. The summer prospector is a weak brother in "roughing it."

The great northwest is the creation of prospectors. The Forty-niners deepened the tracks made by the first settiers of Oregon, and later by the pioneers of Salt Lake, and made a great state upon the shores of the Pacific. The genos prospector sprang from the golden sands of ths land of sunshine and flowers. He panned from Crescent City at the north to San Diego at the south. He pans no more, but thousands have taken his place. They have hewn the way, blazed the trails and pointed others to the wonderfully rich mineral fields in what was then "howling" wildernesses in the "Great American Desert," but are now the states of Nevada, Colorado, Utah Montana, Idaho, Oregon and Washington. These great, prosperous, wealthy commonwealths are the fruits of the prospectors' toil, of their daring, of their perserving industry and of their bulldog-hang-on-ativeness to the place where "colors" were found.

One may say what he will, but he must admit that the prospector found the camping grounds upon which western towns and cities have since been built; that he opened the way which made it possible for the iron-horse to race around our great mountains into thriving mineral centers, and that through his never tiring industry Alaska and Northern British Columbia may yet enjoy the fruits which an advanced civilization yields to this smiling northwest.—Western Mining World.

Luck in Mining.

Take two men and send them adrift in a gold placer mining or quartz mining country. They are industrious, hard-working frugal men. One lights on a fortune and leaves with his colors flying, and the assurance that the wolf will be forever kept from his door, the other retires as a broken-down, poverty-stricken man. The first struck a bonanza; the other found nothing. The world smiles upon the one, it has none for the other.

Follow these men farther along life's pathway. The man suddenly made rich branches out for higher and larger game; the poor man, who has learned much by an adverse experience, proceeds cautiously and makes a fortune. He has felt the stings of poverty, he is now basking in the world's smiles on the sunny side of Easy street. His former comrade, in search of wealth, made missteps and is now a broken-down, poverty-stricken, discouraged man. Who is the child of fortune, who is the lucky man? We answer, neither. They were both painstaking, honest, industrious and frugal. They are the same now. Luck cut no figure in the case of either. They both did the best they could. One became a wealthy mine owner, whose name is a household word, the other is known by his neighbors as an unfortunate but honest man. Is there any luck in this?—Ex.

SATURDAY, NOVEMBER, 25, 1899.

GREENWOOD'S GROWING TIME.

Two years and a half has worked a wonderful transformation in Greenwood. What a wonderful improvement it is to ride on a comfortable C. P. R. passenger coach instead of taking one's life in one's hand in making a journey by stage from Bossburg to Greenwood. The writer endured all the terrors and hardships of that mountain ride two years and a half ago. He found three buildings on Copper street—a village rich in hopes of a bright future but poor in the concomitants of a prosperous city. It was interesting to watch the old-timers who went to the station on Monday to see the first passenger coach, to wonder at the thoughts that passed through their minds as the iron horse came majestically into the station; as over 100 passengers stepped from the comfortable coaches. It was something new to hear the plaintiff notes of irrepressible hotel runners, to follow travelers to the Hotel Armstrong and see obsequious porters rushing hither and thither looking after the comforts of the guests. There was smething novel in the musical jingle of electric bells, in seeing telephone and telegraph messengers scurrying through the town in their search for new arrivals. Then one could not but be impressed with the coterie of municipal fathers viewing with satisfaction the well graded streets and endeavor to convince themselves that everything was all right, although the proceeds of the latest loan are exhausted.

The evolution of Greenwood from a dirty looking mining camp to a full-fledged city has indeed been rapid. Still many an old-timer hankers after the good old days and is anxious to move elsewhere to enjoy the exhilaration and hardships of pioneer days. They may be just as happy as those who enjoy the bustle of city life. After all it matters little what the environments are life is what one makes it.

BOUNDARY REPRESENTATION.

THE Semlin government cannot fulfil its election pledges without granting representation to the Boundary district at the next session of the house. Every member of the present government and all their supporters were strong in their denunciation of the anomalies and inequalities of the last provincial franchise act. Surely if their criticisims were honestly made and not for the purpose of finding fault with the last government the very earliest opportunity should be taken to redress the wrongs created by that act. There can be absolutely no justification for the practical disfranchisement of the Boundary creek district. The question of political expediency cannot be raised because there can be no act more popular than one which wipes out a glaring injustice. Under responsible government the right which the people prize most highly is the right of proper representation. At the time of the passage of the franchise act Boundary district was entitled to separate representation; owing to the very rapid development of the district and large influx of people the right to representation is now much stronger.

Mr. Martin the member for the Rossland district should insist upon the introduction of an amendment to the franchise act, granting Boundary district a representative. Before his election he gave his pledge that at the very earliest opportunity he would insist upon this being done. Nearly two years have elapsed since then and the people of Boundary district will soon become impatient at the non-delivery of election goods. It is difficult to ascertain the polling strength of the Boundary district but it is well within the mark to say that there are 1,000 electors between Camp McKinney and Christina Lake. Greenwood itself has 400 voters, a number much larger than that possessed by districts having two representatives.

THE SHIPPING ERA.

BOUNDARY CREEK was not slow in showing the world that if granted transportation facilities it could maintain an output of ore. No sooner was the spur completed to the Oro Denoro mine than business was offered to the C. P. R. in the shape of ore to the Trail smelter. The Boundary Creek Mining and Milling company too have a shipment at the railway track. The B. C. mine is ready to ship as are several mines in Greeenwood and Wellington camps. There is nothing speculative about the business of the Boundary country. The permanency of the mines has been demonstrated to a sufficient extent to warrant the conclusion that no railway company will have anything to complain of in respect to the amount of business there is to do.

THE BUSINESS CENTER.

IT IS an easy matter to arrive at conclusions, but not so easy to produce proof. It is any easy thing to say that the business center of a district is here or there, but the bare statement carries no weight. We now make the statement that the business center of the Boundary district is Greenwood. To prove this we point to the records of the C. P. R. freight department at West Robson. They will show that since the road has been completed to Greenwood, 75 per cent of the freight is billed for Greenwood. No more conclusive proof of the center of trade for the district could be offered.

Winston Churchill a Prisoner at Pretoria.

NEW YORK, Nov. 20.—[Special.]—Winston Churchill and the fifty-six men taken prisoners by the Boers at Estcourt have been sent to Pretoria to be held with the Dublin fusileers.

General Methuen with a large force of men is moving on Kimberly where Cecil Rhodes is beleaguered. The detailed account of the battle at Ladysmith on the 9th says: Boers loss, 800; the British loss was slight. After the battle the results were ascertained.

General White ordered a salute of 21 guns in honor of the birthday of the Prince of Wales amid cheers and a scene of great enthusiasm, soldiers and citizens participating.

The situation at Natal is complicated owing to the loss of bridges, Boers hold railways at Ennersdale-threatening Weenan and Estcourt. The Cape Dutch seeing the futility of their cause are beginning to waver.

MUNICIPAL ELECTIONS FOR 1900.

THE following persons are entitled to vote, viz:

FOR MAYOR:

Any persons qualified to vote for Aldermen is entitled to vote for Mayor.

FOR ALDERMAN:

The following persons are entitled to vote that is to say:

Any male or female, being a British subject, of the full age of twenty-one years, and

(a) Who is the assessed owner of lands or of improvements or the assessed occupier of land situate within the municipality; or

(b) Who is a resident of and carries on business and is the holder of a trade license in the municipality, the annual fee for which is not less than $5.00, and who has paid on or before the 1st day of November, 1899, the full license fee therefore; or

(c) Who is a householder within the municipality. A "householder" is defined as a person who holds and occupies a messuage, dwelling or tenement, or any part of a messuage, dwelling or tenement within a municipality, paying therefore a rental or rent value of not less than sixty dollars per annum.

Householders must have paid all municipal rates, taxes and license fees (exclusive of water rate or water rent) on or before the 1st day of December, 1898, to entitle them to make the declaration as mentioned below, and in order to be included in the voters' list must, on or before the 1st day of December, 1899, enter their names with the Assessor or Clerk of the municipality as voters, and make and personally deliver to the Assessor or Clerk at the same time a statutory declaration as set out in section 2, subsection, 2, of the "Municipal Elections Amendment Act, 1897."

Forms of said declaration may be obtained at at the office of G. B. Taylor, City Clerk.

No Chinese, Japanese or Indians are entitled to vote.

By order,
G. B. TAYLOR
C. M. C.

Greenwood, 25th October, 1899.

NOTICE.

NOTICE is heredy given that I intend to apply to the board of license commissioners of the City of Greenwood at their first meeting after the expiration of thirty days, for a license to sell liquor by retail on the premises known as the Alhambia on Boundary Avenue and Deadwood streets, Lots 13 and 14, Block 97.

ANARCHIST GROUP.

Camp McKinney Property Acquired by a Company.

R. G. Sidley, J. P., of Anarchist mountain was in the city for a few days this week. Mr. Sidley reports a very unsatisfactory season for the farmers in consequence of so much wet weather. Many of the farmers in this locality have been unable to harvest their grain and will suffer great loss.

Mining is in a more hopeful condition and Mr. Sidley has just succeeded in floating a strong company to develop the Anarchist group held by him for a long time. The company is called the Expansion Gold Mining company. Frank Richter, the well known Keremeos cattle man is president, J. C. Calhoun, official administrator, Loomis, is secretary and Frank Jenkins, Major Megraw and Mr. Sidley are included in the board of directors.

Probably no Camp McKinney property has better surface indications or can be more cheaply and economically worked than the Anarchist group. There are three claims in the group, the Anarchist, Success and Dynamite. The ledge has been exposed for 600 feet. It is four and a half feet wide and mineralized throughout. For the 600 feet there are a series of shafts varying in depth from 10 to 81 feet. The same ledge has been exposed at another point by a tunnel. With the property goes what is practically the only available waterpower in the vicinity of Camp McKinney and which will have to be utilized by the town when waterworks are required. The water record gives a 40 horse power at the lowest stage. The ore is free milling quartz and with this water power can be treated very cheaply. It is the intention of the company to develop the properties. A small block of treasury stock has been placed on the market.

THE LUMBER INDUSTRY.

Two Big Companies are Acquiring Control of All the Mills.

The lumber industry in the Boundary Creek country is in a flourishing condition these days. The rapid development of the Boundary cities and consequent erection of many buildings and the large amount of timber used in the mines, have created such a demand for lumber that the mills in many instances have been kept running day and night. This prosperity among the mills has induced financiers to give the lumber industry considerable attention, with the result that all the mills are fast becoming the properties of two powerful companies. It was at first intended to create a lumber trust, but the principals in the deal could not come to terms so two companies were organized. Messrs. Blue & Fisher and Poupore & Genelle amalgamed their interests in Boundary Creek and the Slocan, while Geo. O. Buchanan, the Kaslo lumber man, has turned his attention to the mills on the other side of the mountain, and it is reported that he represents a million dollar company which has secured control of the mills along the North Fork and the main Kettle river. The deal also includes valuable timber limits up the North Fork. The company operating on this side this week purchased W. S. Fletcher's extensive lumbering interests. The deal includes the sawmill near Eholt.

LADYSMITH COVERED.

By the Frantic Boers—Kimberly Safe, but in Need of Men Who Know How to Fight.

Special to the Times.

New York, November 17.—London advices say that the situation in lower Natal is quite obscure notwithstanding that 20,000 British troops have arrived. The display at Estacourt is not easily understood. A dispatch from Pretoria, November 9, says that Ladysmith is completely surrounded by Boers. At midnight the Afrikander cannon opened simultaneously, making a grand pyrotechnic display, and causing many buildings to burn. The casualties are unknown.

Kimberly was safe on November 10 but artillery and cavalry were badly needed. The Boers have taken Aliwal North and hoisted the Free State flag. President Kruger has issued a proclamation that there is to be no looting of captured cities by the Boers. A new armored train has been fitted out and sent to Estacourt. In the absence of definite news it may be taken that the situation is serious. General Buller has the entire matter under his control, and will probably turn up unexpectedly and surprise the Boers and the world.

Misquoting Mr. Hamilton.

L. A. Hamilton, the land commissioner of the C. P. R., is entitled to the sympathy of all western people. He is so affable and good natured that he cannot resist the importunities of a Winnipeg Free Press reporter searching for copy. So he talks about the west. The reporter, in his wisdom, attempts to improve Mr. Hamilton's expressions. Here is the result:

"L. A. Hamilton, land commissioner of the C. P. R., who has just returned from the coast, in reply to the interrogations of a Free Press reporter, supplied some interesting information regarding the mining operations in the Boundary creek and Kettle river districts, through which the C. P. R. are now running extensive railway branches. He was greatly impressed with the general progress made in the country since his visit there only two months ago. On the British Columbia Southern road, an extension of the Crow's Nest line, and on the Columbia Western, there many changes. Marked development in the Fernie coal mines could be noticed. The demand for coal and coke has been so great that that the coal company has established a coal station at Sparwood on Mickle creek and the ground is being cleared for extensive sidings and for coke ovens. The work of pushing tunnels on the coal seams is being carried on as fast as men can be employed. At Fernie there is great business activity and marked changes have taken place at Cranbrook by reason of the construction of the North Star line. Grading on this line is nearly completed to the vicinity of the North Star mine and Sulivan groups. The North Star Mining company have constructed a tramway to connect with the railway and are building from Cranbrook to Kimberley.

Considerable development is going on on the St. Mary's river. Mines are being developed and prospects for large business in that section are good. The branch of the North Star like will give facilities to St. Marysville, at the crossing of St. Mary's river, to further the interests of the mines of Mobelle, Moyeville, and Moyie in connection with the introduction of concentrating and other works at these points. New capital and new management is being brought to bear on the Trujean, Moyie and Lake Shore and other important properties in that section. More activity is now being shown on these old properties than in any of the newly opened mining districts of the west.

On the Columbia & Western railway a large gang of men are now working on the Cascade waterpower, which, when completed will supply power for the development of the properties in the Kettle River district, a strong English company has secured the franchise for the investment of a large amount of capital for the furthering of this concern. They are arranging for the distribution of electrical power to Rossland and Greenwood camps. The water power will generate 10,000 horse power and distribute electric power.

The town of Eholt on the Columbia & Western was something of a revelation to Mr. Hamilton. He was there two months ago and at that time there were no indications of a town. It is now a thriving town, with stores, hotels and houses, which are going up in remarkable manner. Eholt will soon be connected with all the camps in the Greenwood district. The town of Greenwood has also made marvellous strides. The company at the time of Mr. Hamilton's visit, had a large gang of men at work on the new freight sheds and yards, and working on the the spur line, which was from Greenwood into the Deadwood copper camp. The principal copper produced in this mine will be shipped to upper Grand Forks. A large smelter is being built north of the town, and they expect to receive ores for treatment from Nob Hill, Ironsides and other properties in that locality. On the whole, the development throughout this country is most gratifying, states Mr. Hamilton, and will one day repay the company for the immense expenditure put into it for railways."

"Deadwood copper camp's" ores going to upper Grand Forks while a big smelter is being built at home! Mr. Hamilton in the future should write his own reports.

The Canadian Pacific Telegraph company have taken an office in the Rendell block on Greenwood street and are now ready for business. Mr. McGregor who was stationed at Columbia for some time has charge of the office.

Dr. Thos. C. Bramard, president of the Hamilton Powder company, H. J. Scott, general agent at Victoria and Geo. C. Tunstall, agent for Kootenay, for the same company, are in the city. Dr. Brainard and Mr. Scott were in the Boundary country two years ago when Dr. Brainard became interested in the Gold Drop in Greenwood camp. He is president of the Gold Drop company. The party are astonished at the remarkable development since the previous visit and predict a great future for Greenwood.

Winter Clothing and Shoes

WE cannot say too much about our Clothing Stock. It merits the strongest emphasis we can give it. We prefer, however having you come and make personal investigation. That is the most satisfactory plan. Our Clothing Stock—that means Clothing, Furnishings and Headwear for men, boys and children, is in splendid shape, better now than ever before, and we're ready for the biggest kind of trade in Winter Clothing needs. There is enough here to satisfy **every** man and **any** man, no matter what his taste or fancy, his calling or profession may be. Put our claims to the test. That's all we ask. The superior excellence of our stock will take care of itself.

SEE those single breasted sacque suits all fine imported tweeds for $8.00.

Shoes

THIS WEEK we placed in stock a full car load of American shoes for men, women and children, our stock is complete. These goods were shipped direct from Foot Schulze factory to our shoe department and every pair of those goods we save our customers the jobbers profit.

Similkameen Notes.

The Similkameen country lying west of the Okanagan is now, and in fact has been during the entire season, at attracting a wonderful amount of attention throughout the northwest. The Similkameen river rises in Washington, high up in the Cascades, in the upper Methow region, its course being northerly to Princeton, and thence southeasterly to the boundary line, about 100 miles of its course being through British Columbia. Included in the valley of this stream and along sides are the now well known camps of Keremeos, Olalle creek, Fish lake, Upper Keremeos creek, Riordon mountain, Fifteen-Mile creek, Sixteen-Mile creek, Ashnola, Twenty-Mile creek, Bromley's Jamieson's and Princeton.

Above Princeton and about twelve miles south of that point the famous Coppor mountain is situated. Just across the river from Copper mountain itseif, while farther up stream, are the less known but by no means unimportant camps on Friday creek and Roche river.

At Princeton the main river is joined by the Tulnmeen, locally known as the "North Fork." This stream is probably 80 miles in length and flows through a somewhat rugged and high-lying region, which is known to be rich in mineral. Much prospecting has been done and hundreds of locations made along the Tulameen and its tributaries, many of which are spoken of as of much promise. There is little room for doubt but that the Tulameen region, which is in reality a westerly extension of the Similkameen, will, like the latter, prove to be a country of vast mineral resources.

At Princeton mining operations have been confined chiefly to Copper mountain. It is there the famous Sunset claim is located, and which is now being actively developed by a vigorous company. The work at the claim is under the superintendence of the well-known locator of the property, Mr. R. A. Brown, and it is but fair to say that it would be a difficult matter to find a man better qualified for the position in every respect. Repofts from this property are to the effect that the shaft is now entirely in high grade bornite ore. With machinery installed, and continuous work provided for and kept going, the Sunset and Copper mountain as a whole should prove a point of exceptional activity next season.

At Twenty-Mile creek the usual force of men are at work on the Nickel Plate, and although reports from the property are meagre, owing to the reluctance of the owners to admit strangers to the mine, it is nevertheless well understood that the property has already proved to be of great richness and extent. It is reported that the management at the Nickel Plate has succeeded in arranging with the department of Indian affairs for a mill or smelter site on the Indian reservation near the junction of Twenty-Mile with the Similkameen.

At Keremeos a large amount of work has been done on the various properties throughout that camp. The ore here is for the most part copper pyrites and sulphides, in diorite and quartz. On the Opulence, however, native copper occurs in very considerable qantities, assays from this property running up as high as 62 per cent copper from picked specimens, the average being about 20 per cent copper, with very light gold and silver values. On the Dolphin a very fine ore body has been opened by a tunnel about 80 feet in length, the same body being shown np, both above and below the tunnel by open cuts. On the Roadside a shaft now down 20 feet has disclosed a fine lot of sulphide ore, and the indications are that depth will prove the Roadside a most valuable propeaty.

On the Golconda group a crosscut tunnel is now in about 130 feet and the indications are that the main lead on on this property will soon be cut. Work is about to be resumed on the Copper King, which has a shaft already down some 30 feet. On the Elkhorn group considerable surface work has been done, and a very considerable amount of copper sulphide and pyrhotite disclosed.

On the Bullion Mountain group vast bodies of high grade copper sulphides has been opened, and the management there has commenced an 800-foot crosscut tunnel, which will tap the principal ore deposit at a depth of about 700 feet, besides opening at least two other other leads of less size. This property is regarded as possessing one of the greatest mineral showings so far found in British Columbia.

On the Searchlight a tunnel now in 30 feet is being driven further, the indications being excellent.

At present the Messrs. Black Bros. & Woodcroft are building a new trail into upper Keremeos valley, and as soon as it completed supplies will be taken in and they will commence the permanent development of their Green mountain group of claims.

On the Dividend group a splendid body of iron carrying copper has just been crosscut for a distance of 30 feet without finding the opposite wall from the one where work was started. Sinking will now be commenced on this showing, and it is presumed will be carried on permanently.

Taken altogether the mineral showings throughout Keremeos valley camp, and especially in the vicinity of Olalla creek, where the largest amount of development work of one kind and another has been done, are in all respects exceptional, and by the time the long tunnel on the Bullion mountain group has been completed, there seems no reason to doubt but what Keremeos can boast of mines second to none in the northwest. Arrangements are now being made to bring machinery into the camp, and when installed the work will go forward in a much more rapid manner than is possible by hand work only. Taken altogether the prospects throughout the entire Similkameen are exceedingly bright. — Grand Forks Miner.

ANOTHER RAILWAY.

Smith Curtis is Applying for a Railway Charter.

Smith Curtis, the known mining man, gives the following notice in the current issue of the Gazette:

Notice is hereby given that application will be made to the legislative assembly of the province of British Columbia, at its next session, for an act to incorporate a company with power to construct, maintain, and operate a railway from some point on the Columbia river, south of Lower Arrow lake; thence westerly to the city of Vancouver, via the City of Rossland and Sheep lake, and via or near the various points where the Kettle river intersects the international boundary line, and crossing Okanagan river south of Okanagan lake, and via or near Princeton, on the Similkameen river, and via New Westminister, and with power to operate and construct branch lines up and down the Similkameen river from or near Princeton to the international boundary line, and extending northward to Nicola lake, and thence to Kamloops, and also to Spence's bridge; with power to build, own, equip, and operate boats, docks, wharves, telegraph and telephone lines; to generate electric, steam, water and other powers for traction, heating and lighting purposes; to appropriate lands necessary for said railway, and to acquire, own, work and sell coal lands and leases and other lands generally; to receive bonuses, aids, privileges and exemptions; to levy and collect tolls, and to make traffic arrangements incidental to said lines of railway, telegraph and telephone.

Heavy Firing Near Estcourt.

NEW YORK, Nov. 22.—[Special.]—Owing to the heavy work of debarkation at Capetown and Durban. The British troops are not prepared to advance as rapidly as was at first supposed. The Boers also continue to receive reinforcements and supplies at Ladysmith. The garrison at Ladysmith maintains its position. Heavy firing was was reported in the direction of Estcourt.

Vice President Hobart Dead.

WASHINGTON, Nov. 21.—Vice President Hobart died at 8:30 this morning of heart ailment.

Aguinaldo a Solitary Fugative.

NEW YORK, Nov. 22.—[Special.]—A dispatch from Manila states that Aguinaldo escaped between the forces of Generals Young and Wheaton, and is now a solitary fugative.

Emperor William a Guest of Her Majesty.

NEW YORK, Nov. 22.—[Special.]—Advices from London states that Emperor William, of Germany, is the guest of the Queen. There was a great banquet at St. George's hall last night.

J. M. Taylor is working aforce of five men on the Vancouver, in Wellington camp. Previous work consisted of two shafts, one 32 and the other 15 feet. The ledge is about two feet in width, giving from $40 to $50 in all values to the ton. Adjoining the Vancouver is the Columbia which has been developed by open cuts and a tunnel. The assay values run about $30 to the ton. In this group of claims are the Wellington, Keystone and Oro. On the Wellington there is a 30-faot shaft and several open cuts. The ore body is arsenical iron, averaging $20 to the ton. The Keystone has the same lead as the Wellington, the average assays running somewhat higher. A 20-foot shaft has been sunk on the property. On the Oro a 50-foot tunnel has been run on a quartz lead, carrying $40 in gold and a small percentage in copper. J. M. Taylor, G. W. Rumberg r and M. Oppenheimer, of Marcus, are interested in all the claims in this group.

Notice to Creditors.

In the matter of the estate of William Berry Paton, late of Greenwood, in the District of Yale, Broker, deceased.

NOTICE is hereby given that all creditors and others having claims against the estate of the said William Berry Paton, who died on or about the 16th day of July, 1899, are required on or before the 10th day of December, 1899, to forward to or deliver to Messrs. Leamy & Gray of George Block, Copper Street, Greenwood, B. C., Solicitors for Annie Carter Paton and James Napier Paton the administrators of the estate of the said deceased, their christian and surnames, addresses and descriptions, the full particulars of their claims, and the statement of their accounts and the nature of the securities, if any, held by them.

And further take notice that after such last mentioned date the said administrators will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which they shall then have notice, and that the said administrators will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall not have been received by them at the time of such distribution.

LEAMY & GRAY,
Solicitors for Annie Carter Paton and James Napier Paton, Administrators of the estate of William Berry Paton, deceased.

Dated the 10th day of November, 1899.

NOTICE.

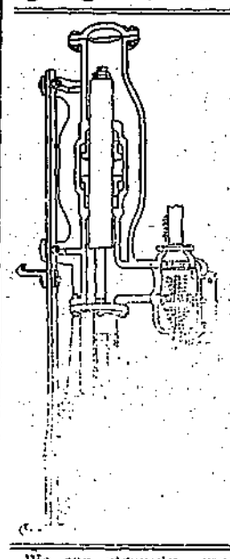
NOTICE is hereby given that an application will be made to the Legislative Assembly of the Province of British Columbia at its next session for an Act to enable the Corporation of the City of Greenwood to construct, equip, maintain, and operate by any kind or kinds of motive power a single or double track tramway, for the purpose of conveying passengers, freight, merchandise and goods; commencing at the said City of Greenwood to the following places: Phoenix Camp; Deadwood Camp; Long Lake Camp; Central Camp and any other point within fifteen miles of the said City of Greenwood, with power to construct, equip, maintain, and operate the same; and with power to expropriate lands for the said purposes, and to make traffic arrangements with other railways, companies or other persons, and with power to build wagon roads and trails to be used in the construction of said works, with all other privileges as may be necessary or incidentel or conducive to the attainment of the above objects.

LEAMY & GRAY,
Solicitors for the applicants.

Dated the 23rd day of November, A. D. 1899.

11-16

VERTICAL SINKING PUMPS



For Mine Duties

We can strongly recommend this Pump to those requiring its special type. The extreme convenience of the outside packed form enables it to be readily packed and taken up. The absence of the projecting valve gear etc. is a feature in avoiding breakages during hoisting and lowering in the confined space where these pumps are used. It is fitted with convenient suspending hooks and the piping arrangement takes up the least possible space. Mining superintendents and those interested in Mining Machinery would consult their interests by sending for catalogue and quotations before installing their plants. We manufacture Pumping Machinery for every conceivable duty.

BOTH BY-LAWS PASSED.

Electors Endorse Electric Light and Tramway By-Laws.

The electors of Greenwood are determined to have electric light and a tramway. Both by-laws were almost unanimously endorsed on Thursday last, the votes standing 52 for and three against. The electric light plant has to be installed within 90 days or the company will forfeit $100 a day. Messrs. Collins and McIntosh are already negotiating for the purchase of the necessary plant. The city is making application for a special act to allow the building of tramways to the different camps.

THE CITY COUNCIL.

Business Transacted at Regular Meeting on Monday Evening.

Owing to illness Mayor Hardy was unable to be present at the regular meeting of the city council on Monday evening. Ald. Cameron was voted to the chair with Alderman Galloway, Wood, Beath and Fisher in their seats.

W. G. Gaunce who was injured on Copper street at the time the street was being graded, asked for compensation and Ald Beath and Galloway were appointed a committee to investigate the matter.

A. B. Campbell submitted an estimate of $2,000 as being necessary to complete the sidewalks in the city. In connection it may be stated that all the money borrowed this year has been spent and there is an overdraft to to be met.

A petition from the ratepayers was read asking that a by-law granting a bouus to the smelter be submitted. Ald. Galloway gave notice to introduce the by-law.

Fire Chief Henton was appointed health inspector without additional salary.

The by-law legalizing the expropriation of land for an alleyway between Copper and Silver streets was read a first and second time.

Lots 2. 3, 4 and 5 in the cemetery were reserved and a price of $10 per lot fixed.

MACHINE SHOPS IN GREENWOOD.

The Jenckes Machine Company Negotiating to Establish a Branch.

J. M. Jenckes, managing director of the Jenckes Machine company of Sherrooke, Quebec, and F. R. Meudenhall, their agent for the province, were in the city for several days this week. The Jenckes Machine company are among the largest manufacturers of mining and other machinery in the Dominion. Appreciating the importance of the mining industry in British Columbia, Mr. Jenckes has decided to establish branch shops in the province so that his company may be in closer touch with mine-owners. After visiting Rossland and other mining districts he decided that &reenwood offers the greatest advantages for such an industry. Mr. Jenckes interviewed the Townsite company and also the council of the Board of Trade. The Townsite company have offered a site near the railway station. It is understood that Mr. Jenckes will ask for a bonus, but no definite proposition has yet been submitted.

The advantage of having machine shops in the city are apparent to every one. A large establishment of this nature means a valuable addition to the pay-roll of the city.

Notice.

There will be a meeting of the Greenwood Liberal Association at Rendell's hall, Greenwood, on Saturday evening, the 25th, inst., at 8 p. m. Important business is to come before the meeting and all Liberals are requested to be present.

J. R. BROWN, Secretary. THOS. HARDY President.

MINING NOTES.

Samples from the Golden Eagle mine on the North Fork, were brought to the city this week. They were taken from a drift at the 130-foot level. An assay from one of the samples yielded 22 per cent copper and $7 in gold. The ledge had just been encountered and its width was not determined. It appeared solid, however, with 18 inches exposed at the time the samples were taken.

The Athelstan mine in Wellington camp has been bonded by Massam & Lardlaw, of Spokane, on behalf of a Toronto syndicate. Andrew Lardlaw is in Greenwood and will remain here for some weeks looking over the camp and may possibly take in the Myers creek camp. He informed a Times man that the bond on the Athelstan called for $30,000, of which $10,000 in cash is to be paid within a fortnight. The syndicate has also agreed to put up an additional $10,000 for development and in placing machinery on the property. Mr. Lardlaw's firm has also purchased the Bengal, Badger and Bristol claims in Deadwood camp. Quebec money will develop these claims, for which a company is being formed. A small force is at present erecting substantial quarters for the men on the Bengal claim. The vein is a big quartz one from 45 to 75 feet in width and will be exploited by the sinking of a shaft. Within a few days two shifts will be at work developing.

GREENWOOD AND DISTRICT.

M. E. Miller of Miller Bros., has returned from a visit to the east.

F. H. McCarter, of the Grand Forks Miner, was in the city this week.

A. J. McMillan, of Rossland, visited Greenwood and the Snowshoe mine this week.

R. F. Tolmie, secretary of the Sandon Mine Owners' association, was in the district this week.

R. J. McGregor has arrived from Columbia to take charge of the C. P. R. telegraph office here.

A. McDonald, head of the firm of A. McDonald & Co., Winnipeg and Nelson, was in the city this week.

C. A. Powell, manager for Hunter-Kendrick company at Grand Forks, paid Greenwood a visit this week.

Jas. McGregor, inspector of mines was in the city this week. He visited the B. C. mine in connection with the accident there.

A. File who was appointed principal of the Greenwood school arrived from Vernon on Tuesday and will open the first division on Monday.

A large party of friends surprised Mr. and Mrs. Thos. McDonnell at their residence Tuesday evening. The evening was a most enjoyable one.

E. Cronyn who was in Greenwood this week, met with a serious accident at Robson. He fell from a platform in the darkness and was badly shaken up.

A meeting of the Liberal association will be held in Rendell hall this (Saturday) evening. Important business will come up for disscussion and a full attendance is requested.

J. C. Clute, inspector of customs is in the city. He was astonished at the returns of the local office and intimated that Greenwood would be made an outport in a short time.

Wednesday was a field day in the city police court. The dealers of black jack were summoned to appear. Thirteen paid their fines of $50 while the balance sought pastures new.

H. B. Smith, C. E., C. P. R. engineer at Rossland, and J. G. Sullivan, assistant superintendent of the Columbia and Western railway, came over the road this week.

W. R. William,s of the Dominion Copper company, has been gazetted and sworn in as a justice of the peace for the province. Mr. Williams will stand high among the magistrates of the province.

H. A. King has eesigned his position as postmaster. Mr. King found that his rapidly increasing business demanded his entire time. H. Frith, the assistant postmaster, will probably be his successor.

Dr. R. B. Boucher, until recently surgeon on one of the C. P. R. Pacific liners and also resident surgeon in the Montreal general hospital, has entered into partnership with Dr. G. M. Foster of this city. Dr. Boucher will reside at Phoenix.

Percy F. Godenrath, the traveling correspondent of the Spokesman-Review, returned here the first of the week after a three weeks' visit to the mines in Okanagan country. He reports considerable activity at Loomis and steady progress at Chesaw which is building up nicely.

F. H. Oliver, F. C. Loring, and their mining expert, W. H. Taylor, were in the city this week. In addition to having control of the Morrison company, the gentlemen mentioned own the Greyhound mine in Deadwood camp, and are incorporating the Western Gold Minining company to develop this mining property.

County court was held at Midway on Wednesday. Christopher Columbus Warmouth who had been charged with horse stealing by Jno. A. Coulson elected speedy trial. He was acquitted by Judge Spinks without calling witnesses for defence. An order was made for letters of administration to Donald McLennen re the estate of the late Malcom McQuaig of Rock Creek. Injunctions galore were secured to restrain saw mill men from cutting timber on mineral claims.

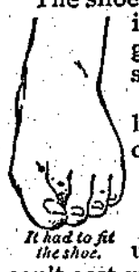
LONDON, Nov. 23.—A dispatch from Cairo states that General Wingate fought Dervishes at Drefissa, killing 400 and capturing prisoners, arms and supplies. Our casualties are: Three wounded.

THE SLATER SHOE

Business Moods.

When a good man swears on a wet day it's more than likely the profanity comes from *his feet.*

The shoe that pinches spoils the temper, irritates the nerves, impairs digestion, and obscures the merry sunshine of life.



It had to fit the shoe.

Success or failure in life oft hinges upon a man's mood at critical moments, and the way his *feet* feel sometimes sways destiny.

A pair of "Slater Shoes" may unconsciously save a fortune, but can't cost more than $5.50.

It's cheaper to *throw away* a shoe that hurts than to *keep* it, and mark this—*new* "Slater Shoes" need no *breaking in.*

A tag on each pair tells just what leather it is made of—how it will affect the feet—and the wear it *will*, or will *not* give, according to use.

The makers name and price stamped on the sole protects against imitations of Goodyear Welt, and ensures value *every* time to the wearer. $3.50, $4.50, $5.50
