And Greenwood, B. C. HARRY HOWSON, Agent.

## THE BIG IRON TOP.

### LARGE ORE BODY IN DEADWOOD

Owned by E. A. Bielenberg—Rich Strike in Similkameen. Camp McKinney News. Guess Bros. New Assay Office.

E. A. Bielenberg is one of the most successful mining men in the Boundary Creek country. It matters not whether the success is due to good luck or judicious perseverance. From the day that he sold the Anaconda group until the present success has attended his mining efforts. Last winter "the count" sold the Buckhorn to a strong eastern company. The proceeds of this sale would have satisfied a modest man, but Mr. Bielenberg kept several properties adjoining the Buckhorn and proceeded at once to develop them. This work has demonstrated that the great zone of rich copper ore in the Buckhorn extends into the adjoining properties owned by Mr. Bielenberg. The Iron Top, an adjoining property, has been developed by a series of open cuts and shafts. From one of these shafts which is down 40 feet, a drift was run at the 20-foot level. This exposed a large body of rich chalcophyllite and bornite. Mr. Bielenberg brought down some samples to the city. They are magnificent specimens and carry more bornite than has yet been seen in any Deadwood camp ore. The open cuts on the Iron Top demonstrate an ore zone 600 feet wide, all heavily mineralized. This has been traced on the Iron Top for fully 1,000 feet. The values received are exceptionally high. Twenty-five per cent copper is quite common. There are also good gold values. Mr. Bielenberg also owns other properties adjoining the Buckhorn. These he is developing with a force of twelve men, and all show similar big bodies of high grade copper ore.

Thos. Bradshaw of Greenwood is congratulating himself upon having grubstaked Billy Purpose, to prospect in the Similkameen country. Last spring Bradshaw sent Purpose out on the usual terms. He succeeded in locating a promising location on 20-mile creek near the famous Nickle Plate. A small amount of development work uncovered a big body of rich copper ore. Marcus Daly's representatives who are operating in the district experted the property and at once opened negotiations for its purchase. They have already offered \$100,000, ten per cent being down. The deal has not yet been closed.

Messrs. Guess Bros. the pioneer assayers of the district, have moved into their brick block, the basement of which is 25 x 50 feet, entirely given up to their business. Their office is one of the best equipped public assay offices in the province. A large rock

crusher of the Shertoeant pattern to be driven by a gasoline engine gives facilities for handling large samples of ore. A double decker brick assay furnace gives capacity for handling a large amount of rock. The partitions throughout are of glass giving the whole of the basement a fine light.

Wm. Hanna foreman at the Monarch was down from camp this week. He brought with him some splendid specimens of high grade copper ore from the property. The ledge is over 400 feet wide. Men are now engaged in erecting buildings and a large force of men will be employed during the winter. The Monarch is owned by R. E. Brown and his associates.

### SECOND DREYFUS TRIAL.

The French of Central Camp Have Troubles in Court.

The denizens of Greenwood are so unaccustomed to anything approaching the theatrical, that the unheralded performance in the court house Thursday afternoon did not attract as great an audience as the merits of the play deserved. It was a repetition of the Dreyfus case on a small scale. There were plenty of excitable Frenchmen, a secret dossier, Col. Jouanest, in the person of Police Magistrate Hallett, and all the other officers and witnesses necessary to complete a typical Dreyfus trial.

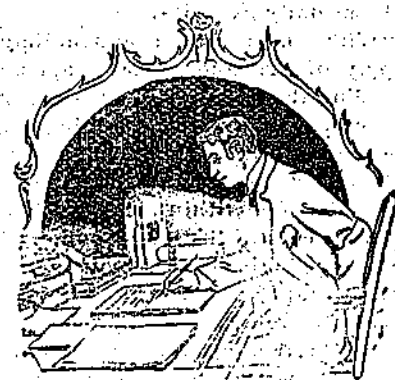

The big powerful Clive Pringle made a splendid Maitre Labori. Andrew Leamy was Maitre Demange and J. P. McLeod was a keen and vigorous prosecutor for the government. The Gires and Vasher completed the company.

The performance was based on an incident which took place some three years ago. Miss Gire, her nephews Messrs. Gire and Clement Vasher, dwelt together in peace and amity in Central camp where they were engaged in the work of developing properties in their own behalf and for friends in France. Then business quarrels arose and Clement Vasher left the home in Central camp. A registered letter addressed to Vasher was delivered at Boundary Falls by John T. Bell to George Sweetland. Sweetland delivered the letter to Miss Gire and Vasher never received it. Miss Gire was charged with stealing the letter; hence the suit.

John T. Bell was the first witness. He told about delivering the letter to Sweetland. Sweetland followed with the story of having delivered the mail to Miss Gire. He also said that the Gires, aunt and nephews, went to an inner room and there called Vasher a "sacre cochon" (which created a great sensation, a la newspaper), and which being translated means "a pig." Then Mr. McLeod called Andrew Gire, but he proved a hostile witness. He believed that the honor of the Gire house must be maintained and acknowledged that if he had made a certain statement he must have told a lie. Then Clement Vasher came. He got along very well until Maitre Labori turned loose. Labori, in a voice that shook the iron bars that sometimes keep prisoners in and sometimes don't, questioned poor Vasher. Vasher vehemently maintained that he had prayed to God for justice, not vengeance, but Labori wanted to know if it was the proper thing to have Mrs. Johnston, a blushing bride of six weeks, arrested (Miss Gire was married to Johnston a few weeks ago). This so excited Vasher that he went into explanations so rapidly that Labori, whose knowledge of French is limited, was forced to retire and leave the witness in charge of Demange, who learnt French on the Ottawa many years ago. After Demange had finished the witness gave an exhibition of the French way of giving evidence. He addressed the court, explaining his position and opinions.

Col. Jouanest couldn't commit for trial. There was not sufficient evidence to convict the accused with the purloining of the letter. He dismissed the charge and the second great Dreyfus trial ended.

W. W. Bailey of Cookshire, Que., who is heavily interested in the Knob Hill, Buckhorn, War Eagle and other properties is in the city. Rufus Pope, M. P. and F. P. Buck are expected here shortly.

## Business and Professional Men

Facilitate your office work and make attractive your office by providing yourself with the many up-to-date things in stationery and writing material which you will find in our up-to-date stock.

Paper Trays, Baskets, Clips, Pins, Letter and Bill Files, High Grade Blank Books and Stationery of all kinds will be found here at low prices.

**SMITH & McRAE,**

Books, Stationery, Office Supplies, Etc.

**Mines Near Okanagan.**The Dominion Consolidated Mines  
company has been incorporated with a  
capital of \$500,000 in 25 cent shares.  
The company own properties near Dog  
Lake, Okanagan Falls. A six-drill  
compressor has been purchased. T. H.  
Tretheway, C. E., who experted the  
properties, says:"The vein on these properties is well  
defined, and where exposed by the  
workings near the line between the  
Western Hill and Virginia, averages  
fully 18 feet in width. The gauge con-  
sists of a somewhat crushed and iron-  
stained quartz, sparingly mineralized  
with galena, copper and iron pyrites,  
with here and there small amount of  
blend and graphite disseminated  
throughout."On the Western Hill, a shaft has  
been sunk to a depth of 27 feet on the  
footwall, and the ledge has been ex-  
posed by a crosscut to its full width; it  
here appears to be divided into hang-  
ing and footwall portions by a seam of  
somewhat decomposed clay material  
which appears to dip towards the hang-  
ing wall, cutting out the leaner and al-  
lowing the richer portions of the vein  
to increase with depth."Samples taken in this shaft, across  
an 8-foot face lying next to the foot-  
wall, gave an average return of \$7 in  
gold and \$1.35 in silver, making a total  
of \$8.35 per ton, while the balance of  
the vein gave a return of \$2 in gold  
and 70 cents in silver, making a total  
of \$2.70 per ton for a width of 10 feet,  
so that \$5.25 may be considered a fair  
average for the full width of the vein."The conclusion I have drawn after  
a thorough examination and study of  
the facts as here presented is, that  
judicious development should locate ex-  
tensive bodies of pay ore, as even if  
only the 8-foot, next to the footwall be  
extracted, the values continuing in  
depth, as there is no reason why they  
should not, while leaner portions may  
be encountered, they could be left in  
the mine to support the walls, and you  
would still have a proposition of un-  
limited tonnage well worthy of  
judicious expenditure in exposing its  
resources."The general conditions, elevation,  
etc., are so favorable that mining  
operations can be carried on for many  
years by simply tunnelling into the  
mountain and following the trend of  
the vein, and hundreds of thousands of  
tons of ore can readily be made avail-  
able without the use of hoisting or  
pumping machinery."Situated as these claims are about  
2,000 feet above the bank of the Okana-  
gan river, with a natural outlet for  
an aerial or other tramway, and only  
about three miles from the Black  
Hawk claim, which is within easy reach  
of the river, the question of transpor-  
tation of ore from the mine to the  
mill could be easily arranged."With an electric power plant estab-  
lished at Dog Falls, which is possibly  
ten miles distant, ample power could  
be generated at a nominal cost for all  
purposes, and by adopting the most  
modern methods of mining, milling  
and concentrating, together with an  
unlimited supply of ore, the cost of pro-  
duction should be reduced to a mini-  
mum."If the present promising assurances  
are borne out, the opening up of the  
three levels should develop at least  
a three years' supply of ore for a plant  
of large capacity, and I would strongly  
recommend the erection and installa-  
tion of a mill not less than from 250 to  
300 tons daily capacity."With cheap power and unlimited  
supply of ore and a plant capable of  
handling the quantity I have suggested  
the cost of mining and milling ought  
not to exceed from \$1.50 to \$2 per ton,  
and under capable management it  
should be kept within the lower limits."Thus even if the lowest values, \$3.05  
be taken as a basis calculation and al-  
lowing that 85 per cent of this can be  
saved, it would yield a profit of \$1.09  
for each ton of ore treated, but I am of  
the opinion that much higher values  
may be confidently expected and if  
there is a profit winner in the camp, all  
conditions considered, this one can be  
conscientiously recommended to the  
investing public."**A New Minister.**An Ottawa special says: James  
Sutherland, Liberal whip, was sworn  
in at Rideau Hall this afternoon as a  
member of the cabinet without por-  
folio. There were present Messrs.  
Laurier, Mullock, Paterson and Sifton.  
[Major James Sutherland, the new  
member of the Laurier cabinet, sits for  
North Oxford in the Dominion house.  
He was first elected to the commons in  
December, 1880, and has continued to  
represent that riding in the house of  
commons ever since. He has been  
chief Liberal whip since 1891. Since  
1892 he has directed the organization  
of the Liberal party in Ontario infederal affairs, and arranged the politi-  
cal tours of the Liberal leader in On-  
tario and the west. He was elected  
chairman of the standing committee of  
railways, canals and telegraph lines  
in the house of commons, August, 1896.  
He is major of the 22nd Oxford Rifles,  
and was one of the 13 who voted in the  
house of commons in favor of Colonel  
O'Brien's resolution, respecting the  
Jesuits Estates' Act, 1889. Major  
Sutherland defeated D. W. Karu, the  
Conservative candidate, in the last  
election (1896) by 1,801 votes.]**Freight Troubles Ended.**Last week the Miner called attention  
to a serious difficulty that had arisen  
in the bringing of shipments here over  
the C. P. R. in bond for Republic. The  
trouble has been arranged and there  
appears to be no further obstacle in  
the way of such shipments. If such  
shipments could not have been made  
the Mountain Lion company at Repub-  
lic would have been very injuriously  
affected. As soon as Jonathon Bourne,  
of Portland, president of the company,  
was made acquainted with the danger  
of having all his mill shipments held  
up he made a very vigorous protest to  
Washington by telegraph, stating that  
the big Mountain Lion mill for which  
250 tons of machinery had been ordered  
could not build at all this fall unless  
the machinery could be shipped over  
the C. P. R. to Grand Forks and that  
great injury would be done Republic  
in general if the regulation already an-  
nounced was adhered to. The result  
was an immediate order from Wash-  
ington to place an American customs  
officer at the Grand Forks station of  
the C. P. R., whose duty it should be  
to break the seals of cars arriving in  
bond. Mr. Plummer, a United States  
customs officer, arrived last Sunday  
and has been at the station to perform  
the duty referred to. Several cars in  
bond for Republic have already arrived  
one being loaded with Mountain Lion  
machinery. All's well that ends well.

## CASCADE'S BIG FIRE.

### BUSINESS HOUSES ARE DESTROYED

One Man Burned to Death—Several Hotels Were Destroyed—The Loss Is \$25,000 and Insurance Small.

Cascade had its baptism of fire last week. The Record gives the following particulars:

"It was 12:30 this morning when the dreaded cry of fire resounded through our streets and the fire alarm triangle began to be rung. Fire was first discovered by Mrs. Mahoney, who had a room in the Britannia hotel. As she looked out of her window the one-story shacks between the Britannia and Club hotel was all ablaze, from what source is not known. Quicker than lightning the flames leaped up and were soon licking up both hotels and spreading westward, fanned by a northwest wind.

"In quick succession, the Grand Central hotel, Railroad Headquarters hotel, Scandia hotel, Francis & Milne and the Hotel Montana were eaten up by the fiery demon and reduced to ashes. Six hotels and one cigar store were destroyed in an hour's time, and nothing remains today but a heap of smoldering embers, marking what was once the busiest part of the Gateway City.

"When the fire first broke out it was evident that the block, if not the entire city, was doomed, but it was hard to realize it. Everyone of the buildings had sleeping occupants, some of whom escaped with but scanty attire. When it was realized that everything in the path of the fire demon must go, a frantic effort was made to save goods, furniture, personal effects, etc., but little, however, was rescued from the flames.

"Then a futile effort was made to save the last building on the block, the Montana, by blowing up the Scandia with dynamite. A box of 50 pounds was touched off with 50-foot fuse. The building rose with a deafening roar and then collapsed, and the flames rushed on as though nothing had happened, engulfing the Montana and the log building in the rear.

"Alex Arvoll, who had been employed by C. J. Eckstrom, was one of the hardest workers, of the several hundred willing ones endeavoring to rescue property. He was imprisoned on the sidewalk in front of the Scandia by falling walls, and before he could possibly be rescued, the sea of flames swept over him, carrying him to eternity in a most horrible manner.

"Several times efforts were made to drag him out, but human endurance could not possibly stand that intense heat. He could be heard piteously calling for help, yet it was not possible to get him out in time.

"When the dynamite was placed in the Scandia, loud warnings were given in every direction to give the building a wide berth. Arvoll saw a drunken man run back into the doomed building and he rushed after him to get him out. The man was saved, but at the cost of his brave rescuer's life. It was a heroic action, and his name will live long in the memory of those who witnessed it.

"The losses by the fire foot up to between \$20,000 and \$25,000. The insurance all told is \$4,450, written by Geo. K. Stocker in the Western, of Toronto, and the Phoenix Assurance, of London. An estimate of the losses and insurance, in detail, is follows:

C. H. May, Hotel Montana, building, \$2,000; stock, \$500; cash, \$300; no insurance.

"Oscar Stenstrom, Scandia house, building, \$1,600; stock, furniture and fixtures, \$1,800; no insurance.

"B. F. VanCleve, Railway Headquarters hotel building, \$1,200; buildings adjoining, \$600; insurance applied for a week ago, \$950.

"C. J. Eckstrom, stock, fixtures and

personal effects, \$2,000; insurance, \$1,000.

"Francis & Milne, building and stock, \$1,000; no insurance.

"Flood & McDonald, Grand Central hotel building, stock and fixtures, \$4,000; insurance, \$1,500.

Nelson, Olson & Bergman, Britannia hotel building, stock and fixtures, \$3,500; insurance, \$1,000.

"Townsite company, vacant building, \$150; no insurance.

"S. F. Quinlivan, Club hotel building, \$1,600; stock, fixtures and furniture, \$2,000; no insurance.

"I. Langley, cash, \$300."

### THE GOLDEN EAGLE.

A North Fork Property of Great Promise—High Copper Values.

Frank D. L. Smith, of the Toronto World, who has been visiting some of the big prospects of this country, has this to say about the Golden Eagle on the North Fork:

"The Golden Eagle proposition has been stocked as the Royal Victoria Mining company, with a capitalization of a million dollars, the chief people behind the concern being P. P. Sharp and L. S. Moulton-Barrett, of Greenwood. The development work is under the direction of Superintendent J. H. Fox. Several outcrops of ore have been opened up by test pits, and a shaft has been sunk upon what appears to be the same ledge as that which is found on the Phil Sheridan. This shaft was started on a contact of porphyry and diorite and 30 feet down it got into ore. At the 70-foot level a 40-foot drift was driven on the contact, which appeared to run nearly east and west. About 20 feet in on this drift a prospecting crosscut was run into what appeared to be a very extensive body of high grade ore. From the end of the drift a 30-foot winze was sunk, and from the bottom of this winze a drift is now being run on the ore body which seems to have swung around and to now run in a northerly and southerly direction. There seems to be a direct twist in the formation at this point. In this lower drift a good ore body is found in place. The ledge is some 14 feet wide and appears to be growing wider as the drift is pushed in. From present indications it would seem that the ore body extends from the upper drift to this drift, and if this proves to be the case the company has unearthed a very large deposit. The ore is largely quartz, carrying copper and iron pyrites and gold. It is disintegrated by oxidation near the surface, and the values are said to run very high. Some samples of ore give from 15 to 20 per cent in copper and the rest of the values are in gold. The unearthing of this big body of high grade ore has created quite a sensation in the district, and the Golden Eagle is looked upon as a prospect that has a bright future."

### Mr. Sutherland's Views.

Mr. Hugh Sutherland, managing director of the Dominion Copper Company, whose property is located at Phoenix, is in the City for a few days. In conversation with a Miner representative last night, Mr. Sutherland said:

"The company's new compressor at the mines is now running smoothly. We are running four drills. We do not intend to put in any more machinery, not for some time at least. We will not put up a concentrator or mill. We have been developing the Brooklyn and Stenwinder properties for two years, and will continue development work for at least another year. We could, if necessary, mine 500 tons of ore per day at this present time, but our intention is to let the ore stand and keep tunnelling away at development. The policy of our company toward our employees will always be based upon fairness and equity. We have already given orders for the erection of a number of cottages for the married men in our employ and will build forty more if needed, so

that any self-respecting man of a family, in our employ can have a real comfortable home and a permanent one. The cottages will have five rooms and will be finished in a superior manner. We also take care of other matters beside homes. We will erect school buildings and open schools, so that the children of our employees will be enabled to lay the foundation for an education."

In speaking of the progress of the Boundary country, Mr. Sutherland said it was remarkable. "Why, if I had not known where I was going when I arrived at Phoenix, I would have been lost. It bore no resemblance to the place I left last January. It has built up surprisingly. The townsites company have sold every lot they had. Greenwood has improved wonderfully; so, also, has Grand Forks. The Yale Hotel at Grand Forks is the finest hotel in the Kootenay country. It is a credit to British Columbia."

When asked about the difficulties arising from the eight-hour law, Mr. Sutherland was reticent in a degree, but said he did not think there would be any considerable improvement among the mines until a change in the right direction had been effected. He said:

"We are employing our miners at the rate of \$3.50 per day of eight hours for machine men, and \$3.00 per day of eight hours to hammersmen. This is dry work. In wet work the wages are 50 cents extra. In shaft work our hammersmen are getting \$3.50 per day of eight hours. This has been the prevailing wages in these mines for 18 months before the present company was formed, and the same in the Evening Star, and Slocan City. I have always paid \$3.50 to machine men for 8 hours work in wet ground. For instance, in the Evening Star, at Slocan City, I have paid for the past 18 months \$3.50 to hammersmen and \$4 to machine men for sinking in eight hour shifts. In dry work I have paid in proportion for 10 hour shifts."—Nelson Miner.

## THE WATER QUESTION.

"There is trouble ahead in connection with the granting of records for water to be taken from Boundary creek. Water Commissioner Lambie last week came over from Fairview to hear objections against granting records to certain applicants. The most important case was that of the British Columbia Copper company, limited, which applied for 1,200 inches of water. The Midway company, limited, opposed the granting of this record fearing pollution and a diminished supply, were it granted. The latter company holds one record for 1,000 inches granted in 1885 and another for a like quantity in 1891. These records are for water for irrigation and domestic purposes and the water is being freely used at Midway for these purposes. In good faith the Midway company has during 1897-8 spent between \$9,000 and \$10,000 on an irrigation system and good results. Now interested special pleaders say in effect 'the mining industry is of most importance so notwithstanding that rights of long standing exist, they should give way, so that we and others may profit thereby.' It was admitted by representatives of the company that already records have been granted by the government for five or six times the quantity of water coming down the creek when not in flood—that the minimum flow is less than 500 inches, yet this company makes a modest application for 1,200 inches, further admitting that it is not likely to use anything like that quantity. The position will appear to be should the granting of additional records continue, that the outlay made by earliest holders will be rendered of no avail or it will only be possible to take advantage of it at an unreasonable expense in obtaining legal assistance every time a new application is made for a record. After records for all the available water have been granted no more should be issued for it only means that if records are given in excess of the available water the holders must fight the matter out among themselves, until the longest purse, not justice, shall prevail."

The above is from the Midway correspondent of the Vancouver News-Advertiser. It is entirely opposed to the views of the News-Advertiser on the question of water rights. If memory does not play us false, the News-Advertiser was one of the first papers in the province to take up the cudgels in defence of the interests of the user against those who were endeavoring to control the water of the province for speculative purposes. A government which adopted the suggestion offered by the Midway correspondent would be dismissed at the earliest opportunity. An unprogressive company with a vindictive representative, armed with a record granted when records were granted indiscriminately, could stop important industries. If the correspondent's suggestion were adopted no water could be used from Boundary creek above Boundary Falls, because the Midway company holds two records aggregating 2,000 inches of water. Such records do not give the Midway company a monopoly of Boundary creek. It merely gives a prior right to the use of water if required. It is not at all likely that much water will be required at Midway if the Townsite company endeavor to obstruct important industries by raising absurd objections in reference to the use of water. Every smelter established on Boundary creek, every industry established in the district for the purpose of developing its mineral resources will benefit Midway. The people of Midway have nothing to fear from the erection of smelters on Boundary creek. What they need to fear is a policy that sacrifices the interests of the town that spleen and prejudice may be gratified.

## BOUNDARY CREEK RAILWAYS.

If there be any speculation in connection with the development of the mineral resources of Boundary Creek district, the greatest plunger of them all is the Canadian Pacific Railway company. No other district in Canada has received as much attention from the big railway corporation. In other mining sections the company grudgingly built main lines and then allowed the mine owners to build the spurs or tramways in order that they might be in a position to ship their ore. Here the company has voluntarily built branch lines that tap all the camps and afford direct shipping facilities to nearly all the mines. It would be idle to state that this

treatment has been accorded by the Canadian Pacific Railway company from generous or patriotic motives. It is rather a cold blooded business proposition. For years the railway company had its mining experts in the district. They investigated and upon their reports the company determined to give such facilities as would enable all mine owners to ship their ore, at same time give the C. P. R. a practical monopoly of the carrying trade in the Boundary creek district.

The C. P. R. Co. were in possession of all the facts when they determined to build the Boundary Creek railway and its branches. The action of the company is an eloquent tribute to the mineral wealth of the district.

## THE FREIGHT BLOCKADE.

The circular letter from F. W. Peters to the Greenwood merchants is a perfect gem. It entitles Mr. Peters to promotion in the service of the company he serves so faithfully. Mr. Peters' life for the past three weeks would not be worth living if he were anything but a C. P. R. official. Greenwood merchants have almost ruined themselves and enriched the Vernon & Nelson Telephone company in wiring that gentleman; they exhausted the supply of William Mulock's new two cent stamps in writing him; they even took a ride on the new railway and personally interviewed him. They coaxed, pleaded, threatened, cajoled. They all wanted goods forwarded from Robson. We foolishly shed tears of sympathy for Mr. Peters. These tears were wasted. He turns up the same, smiling imperturbable Peter and urges the merchants to take their goods away from Grand Forks that he may be able to secure storeroom for the goods at Robson! The 30 odd cars of Greenwood freight at Robson will be moved just as soon as the Greenwood merchants take away the goods which has already reached Grand Forks. So you see the C. P. R. is in no way to blame. The fault lies with the Greenwood merchants.

## THE NEW LOAN.

ALD. CAMERON gives notice that he will introduce by-laws authorizing additional loans amounting to \$15,000. The completion of the municipal buildings will require \$5,000 and \$10,000 is to be expended on streets. Most ratepayers will agree that the money is necessary in order to complete the work contemplated by the council. They will be equally unanimous in the opinion that the council should take them into their confidence and tell them how and where the money is to be spent. The present slipshod method of expending money on streets should be abandoned. Let the council instruct their engineer to prepare a statement giving the streets to be improved, approximate amount required for each street. Let this schedule be adhered to and there is a possibility that the ratepayers would get a reasonable amount of improvements for their money. Up to the present \$55,000 has been borrowed and practically expended. The work accomplished could be done for \$20,000.

THE conservatives of British Columbia this week discussed whether it was Christopher Columbus or Sir Chas. Tupper discovered America.

CASCADE has had its scorching and hotels were the principal losses. A man takes desperate chances when he builds a hotel in the Boundary country.

THE Midway sage denounces champagne and whiskey cocktails but at the same time wants to corral all the water.

## AN OLD OFFENCE.

## C. S. MORRIS IS UNDER ARREST

For an Offence Said to Have Been Committed in New York Fifteen Years Ago. He Will Fight Extradition.

Charles A. Hinckley alias Chas. S. Morris has been arrested, charged with misappropriating \$97,000 of the funds of the West Side Bank, New York, 15 years ago. The arrest was made at Princeton last week by a New York detective.

Chas. S. Morris was vice-president and manager of the Columbia Townsite company for a short time. He was a man of considerable means and took a prominent part in the affairs of Columbia. Morris was taken to Rossland where he intends fighting extradition on the grounds that the alleged crime was committed previous to the enactment of the present extradition law and that at the time the offence was said to have been committed the extradition arrangements between the two countries did not include the offence charged.

The incidents leading up to the arrest are thus detailed in the Rossland Miner:

Hinckley, when the west side bank started in New York city, in the year 1868, was made the paying teller, and he held that position till May 14, 1884. During that period Hinckley was a model bank officer, and was held in high esteem by the president and the directorate, for he was noted for the strictness of his business methods. On May 15, 1884, Hinckley transacted the business of his office with his usual care and promptness, but the next morning he was not at his desk. The cash of the bank was counted, and it was found to be just \$97,000 short. Then it was realized by the management that Hinckley had betrayed the confidence reposed in him, and had stolen the funds of the bank and decamped with them. The bank marked the amount to profit and loss, and has since prospered. This is shown by the fact that it now has \$400,000 in its reserve fund. Every effort was made to locate the missing teller. Detectives were employed, rewards offered, but had the ground opened and swallowed him he could not have more completely disappeared. The officials of the bank learned a short time since that Hinckley was located in Columbia. That he was the vice-president of the townsite company there, and accordingly Messrs. Theodore M. Bertine, cashier of the West Side bank; Frederick A. Camp, attorney for the same bank, and Amazi L. Camp, came to this city from New York, for the purpose of causing the apprehension of Hinckley. They have worked very quietly knowing that their quarry was shy, and might take the alarm and flee if he was about to be apprehended. A few days since Amzi L. Camp, who knows Hinckley well, accompanied the arresting officer to the Boundary Creek country, and there it was learned that the man sought for was in the vicinity of Princeton. The twain hurried to the point. There Hinckley was located, and he was at once recognized by Mr. Camp and placed under arrest. Yesterday Hinckley had been brought as far east as Midway, and he will be in Rossland by Monday evening.

## THE CITY COUNCIL

Intends to Borrow Money for Streets and Buildings.

Mayor Hardy and Ald. Fisher, Sutherland and Cameron were present at the regular meeting of the council. D. W. Morgan, of the Greenwood Clarendon, was granted permission to run a grating on Copper street, the full width of the building, to allow light into the basements; also an entrance from Greenwood street. The entrance to be properly protected and at least four feet from the corner.

M. J. Phelan, representing the Odd Fellows, interviewed the council in reference to securing an Odd Fellows' plot in the cemetery. The council decided to grant one-half acre, provided the Odd Fellows would clear half an acre for the city and fence their own plot within 45 days.

Several small accounts were ordered paid and \$1,000 was ordered to be paid on the Yale Lumber company's account.

J. W. Nelson was paid \$436 on account of the Silver street excavation, and Ald. Fisher and Sutherland were appointed a committee to inspect and take over the cars and rails used by Mr. Nelson.

Ald. Cameron gave notice that he would introduce a by-law to borrow

\$10,000 additional for streets, and \$5,000 additional for municipal building. J. F. Junkin, general manager of the Manufacturers' Life association, asked for further time to consider the application to sell additional debentures.

## Seattle Suit Settled.

The decision in the Seattle suit which has been pending for the past two years was given Thursday by Justice Martin. The telegram received by Mr. Clarke from Victoria was as follows:

"Company's suit against you dismissed with costs, on the ground that the first agreement transferred all your rights in your property."  
The Cummings-Manly interests will therefore lose everything and will have to pay the costs of the whole suit, which must run into the thousands.

The Seattle mine is a most valuable property on the North Fork, but has been compelled to lie idle on account of this litigation. It will now be extensively worked and will shortly be shipping.—Columbia Review.

**The Golden Crown.**

The Golden Crown property consists of one whole claim of 52 acres, which the company has crown granted. The property lies only about eight miles from Greenwood on the main stage line, and at the time of my visit to-day the railway constructors were just finishing the grading of the Wellington camp spur of the Columbia and Western line, which runs right up to the Brandon and Golden Crown ore dump, within 150 feet of the collar of the main shaft. The railway people give assurances that their tracks will all be laid in November, and if these promises are carried out the management of the mine may begin shipping ore about sixty days from the present date.

The Brandon and Golden Crown Company's property is equipped with a 100 h.p. boiler, a 30 h.p. steam hoist, a 5-drill air compressor, a large station pump and a No. 7 Knowles sinking pump, to contend with the water, of which the mine makes a good deal. The ore is at present brought from below by means of buckets, but these are now being replaced by a cage. The company has good shaft and engine houses, bunk and dining cabins equal to the accommodations of fifty men, powder house and blacksmith shop, all substantial log and frame buildings.

The chief geological feature of Wellington Camp is found in a series of contacts of diorite and gabbro. The trend of these formations is as a rule northwest and southeast, and the ore bodies generally lie at the contacts referred to. This holds good on the Brandon and Golden Crown property as well as on other locations in the camp. The ore found in these junctures may be properly described as pyrrhotite and copper pyrite in a silicious gangue. Up to date no less than eight parallel leads have been discovered upon the property. These, of course, all run with the formation and they all lie within a distance of 800 feet, varying in width on the surface from 18 inches to 12 feet.

Considerable development work has been done on the Golden Crown, both by Mr. W. J. Porter, the original owner, and since the formation of the company, by its managing director, Mr. H. G. Collins, but a great deal more will have to be done before the management can ascertain the extent of its deposits. Mr. Collins has devoted the most of his attention to the most westerly vein, upon which he has sunk the main shaft. The lead, like most of the company's other deposits, is covered by a heavy "wash" of sand and gravel, but the clearing of this away reveals a vein from 4 to 8 feet wide on the surface. By test pitting and crosscutting this lode was traced for a distance of 700 feet. The main double compartment shaft which the company is sinking to open up this deposit, is down 325 feet with crosscuttings and drifts at several levels. As this working is vertical the dip of the vein carried it out of the shaft at a depth of 30 feet. At the 50-foot level a crosscut was run to catch the vein, and as the dip of the ore body is only about 25 degrees from vertical, the deposit

was encountered within a distance of eight feet. At the 100-foot level a crosscut of 18 feet in length was required to catch the ore. At the 150-foot level 32 feet of work had to be done to intersect it, and if the lode has maintained its dip a crosscut between 60 and 70 feet in length will be required to reach it at the 300-foot level.

To go back a step, a drift along the vein from the crosscut at the 50-foot level opened up a body of ore about five feet in width. A drift from the crosscut of the 100-foot level was run for 66 feet in a body of ore from four to six feet wide, and the drifts from the cross-cuts at the 150-foot level have been run for 66 feet through an ore body from four to six feet in width. From this 150-foot level a good-sized upraise has been made to the 100-foot level. The upraise discloses a fine body of ore from 8 to 12 feet wide, lying between the two levels. From this 150 foot level a winze has also been sunk for 32 feet, all in ore.

It will be seen that the development work thus accomplished proves the contiguity of the ore from the surface down through the 50-foot, 100-foot, and 150-foot levels, and 32 feet below the last named level. Manager Collins expects to catch his ore body again in the cross-cut, which he is now driving at the 300-foot level. At the points where I examined the ledge below ground, it is compassed by remarkably regular walls, the gabbro forming the hanging wall, and the diorite the foot wall. These ear marks indicate continued depth, and, therefore the management is justified in expecting to double the depth of their proven ore body by this last-named cross-cut, if it strikes ore, sinking in the main shaft will be continued with the object of getting ore at still lower levels.

The main shaft will also be used to prospect the seven small parallel ledges which have been unearthed on the property. These leads have been exposed near the surface by a tunnel 322 feet in length, and Mr. Collins will attempt to open them up by driving a tunnel from the 300-foot level of the

main working. This tunnel will be driven 800 feet, in order to cross-cut the seven small ledges spoken of. As the outcrops of these veins occur on an elevation 100 feet or so above the collar of the main shaft, this tunnel will give a vertical depth upon them all of between 400 and 500 feet. The small parallel ledges here referred to, besides being prospected by the 322 foot tunnel spoken of, have been opened up on the surface by means of test pits and cross-cuts. They vary in width from a few inches to six feet and over, and assay tests show them to carry good gold and copper values.

As to the ore values in the deposit opened by the 300-foot shaft, its cross-cuts and drifts, it may be said that they run among the highest in the usually low grade Boundary country. This ore, which resembles War Eagle and Le Roi ore in appearance, gave assay returns of from \$13 to up in the hundreds per ton, and Mr. Collins informs me that all the ore will average \$25 per ton. The values are chiefly gold, but the ore carries from 1 to 2 per cent. in copper.

The C. P. R. has offered to carry the company's ores to the Trail smelter and treat them at a moderate figure, and the management calculates that it can have its ore mined, shipped and smelted at a total cost of not more than \$9 or \$10. On this basis the Brandon and Golden Crown ore should yield a net profit of \$15 per ton.

As already indicated, the company expects to begin shipping ore within two months from to-day. There is some ore on the dump already, and the management will in a few days begin to raise the bodies which it has blocked out above the 150-level. The ore can be brought up the shaft, run along a short tramway, and loaded right into the C. P. R. cars as they stand on the railway spur, which runs up to the door of the company's shaft house.

General Manager Collins has at present in his employ a force of 18 men, under the direction of A. L. Lynch, acting as foreman. I am told that as soon as the property begins shipping ore the number of men will be increased to 30. Frank D. L. Smith. In the Toronto World.

J. A. MUNSON.

### The Winnipeg.

Generally speaking, the ore deposits on the Winnipeg occur like those of other Wellington camp locations, in contacts of diorite and garbo. The formation, roughly speaking, runs north and south, and dips to the west, and the garbo near the ore is generally altered into a serpentine rock. So far as development has gone on on the Winnipeg, it shows that the ore is found in irregular chutes, varying in width from a few inches to 17 or 18 feet, and sometimes even wider. Near the surface the formation is much broken up, and a tremendous amount of prospecting work is required to ascertain the position and trend of the ore bodies. At the bottom of the present workings, at the 300-foot level, however, the formation is becoming more solid, and the management hopes soon to find its mineralized deposits in more well defined shape. Already however, some extensive ore bodies have been opened up.

The development work so far accomplished by the Winnipeg company consists of two shafts, one down about 50 feet, with crosscuts and drifts, and the other down about 325 feet, with crosscuts and drifts at the 50, 100 and 300-foot levels. In all over 1,600 feet of sinking and horizontal work has been done.

Perhaps the easiest way to give readers an idea of the detail of the underground work will be to review a trip made through the mine in company with Mr. McIntosh.

We first inspected a prospecting shaft, which for convenience sake, may be called No. 1. This was sunk on the outcrop of pyrrhotite, which led Mr. McIntosh to first stake out the claim. The working, which goes down on an incline, remains in solid ore to the 30-foot level. At this level a drift is run for 60 feet in an easterly direction. This drift, for the entire distance, runs through a body of ore, from 8 to 12 feet wide, and here the chute seems to come to an end in that direction. A lot of ore on the dump came from this working, and there is considerable ore in place here yet in a gangue of serpentine.

Returning to the shaft we descended another 20 feet to the 50-foot level. The ore chute continues at this depth, and a drift driven a westerly direction continues more or less in ore for a distance of 70 feet, at which point the working breaks into another large ore body. This deposit has been crosscut and drifted upon for about 40 feet. This crosscut and drift, together with a winze 30 feet deep, proves the existence of a considerable deposit in this part of the mine. This chute will be prospected by an upraise towards the surface and by further sinking in the winze.

Returning to the surface, we descended shaft No. 2. This main working of the property is run down vertically for 100 feet, at which point the management changed its direction to the incline in order to follow soft strata in the formation in which a small stringer of ore appeared.

At this 100-foot level 500 feet of drifting and crosscutting has been done to tap what is apparently the same ore chute as that which appeared in the prospecting shaft before described. The ore body is here irregular and much broken up, being five feet across at the widest part.

From the 100-foot level we descended to the 300-foot level, where Mr. McIntosh has driven a crosscut in an easterly direction through altered garbo. At a distance of 100 feet from the shaft an ore chute varying in width from one foot to seven feet was tapped. This deposit has been drifted upon for 233 feet, and the company has ore throughout practically the whole of this working.

At the 300-foot level Mr. McIntosh has also driven west for 110 feet, and at this point he has crosscut a chute of ore about four feet wide. Upon this body he is now drifting.

While it is the company's intention to continue drifting and crosscutting upon several loads to prove the ore bodies already tapped, the management will also continue sinking for at least another 200 feet.

On the Winnipeg claim the company has unearthed two or three other outcrops. A prospecting shaft sunk on one of these to a depth of 45 feet unearthed considerable ore, but work upon this deposit is not being pushed.

Generally speaking, the ore upon the Winnipeg property may be described as pyrrhotite, carrying gold and copper. It is partly high-grade and partly low-grade, running from \$4 or \$5 up to \$75, and sometimes higher, per ton. Assay tests give even much higher values than the latter figure mentioned. A test shipment of about five tons of ore was some time ago sent

### A Bank Manager Satisfied.

E. S. Clouston, of Montreal, general manager of the Bank of Montreal, left Nelson yesterday. He is reported as saying: "While our policy is conservative, it will be seen that our bank is sufficiently strong in its faith in British Columbia when I say that we have now in course of erection bank buildings at New Westminster, Rossland and Nelson. It is the policy of the Bank of Montreal to erect our own premises when we are thoroughly satisfied the permanency of the location warrants. The satisfaction of our banks with the condition of things in the mining districts of British Columbia will be noted with pleasure by those who have assisted to make mining in Canada a legitimate and profitable industry."—Nelson Tribune.

### Misleading Press Reports.

The Associated Press sends out misleading telegrams from Rossland, a fair sample of which appeared in the Tribune yesterday. A telegram, dated at Rossland, gives accounts of strikes recently made in a number of the mines, leaving the reader to infer that the mines were situate at Rossland, when as a matter of fact the mines are situate near Greenwood, in Boundary district. Rossland has no need of such bolstering; the mines in its immediate neighborhood are amongst the richest in British Columbia, and the town can stand on their merits. Other towns are fairly entitled to any prominence that can be given mines in their immediate neighborhood as much so as in Rossland.—Nelson Tribune.

### C. P. R. Freight.

(Circular letter to merchants.)

Serious delay and inconvenience is occasioned by goods for Greenwood not being taken delivery of promptly after arrival at Grand Forks, and we are compelled to call upon all consignees to arrange to take delivery of their goods more promptly. All material that can be brought forward is being used in laying track so as to reach the terminus of our line as early as possible, consequently we cannot provide siding room sufficient to store the large number of carloads of freight for Greenwood and adjoining camps, and we are compelled to hold cars back until the large number now on hand at Grand Forks are released, this results in delay to some goods which consignees are anxious to get. I therefore ask you to kindly arrange with freighters to remove your goods from Grand Forks as quickly as possible, so that we can hurry forward the freight that is now delayed from the above cause.

F. W. PETERS,

Assistant General Freight Agent.

## THE PHOENIX NEWS.

A Newspaper to be Published at Phoenix—its First Appearance Thursday.

Next Thursday the Phoenix News will make its appearance. J. W. Grier, who has been connected with the Boundary Creek Times for two years, will launch the new journal. Mr. Grier is a hustler and news-gatherer of the first order. He will publish a paper that will do credit to the thriving Greenwood camp town.

## GREENWOOD AND DISTRICT.

Dr. Dutton was in the city this week.

A. M. Whiteside has been ill for a week.

Mrs. J. W. Nelson has returned from a visit to the east.

R. E. Gosnell, of the Greenwood Miner, has gone to the coast.

R. R. Gilpin, collector of customs Grand Forks was in the city this week.

A large number of Greenwood people are away or going to the Spokane fruit fair.

D. W. Morgan of the Greenwood Clarendon has returned from Rossland.

E. Jacobs, of Midway, is at the coast attending the meeting of the Liberal Conservatives.

C. D. L. Smith, of the Toronto World, has returned from a trip to the West Fork country.

W. S. Fletcher has commenced the erection of his three-story block on Copper street.

Wallace and Miller have opened up their store in their own brick block on Copper street.

J. W. Stewart, superintendent for Mann, Foley Bros. & Larsen was in the city this week.

A. B. Campbell has the contract for laying city sidewalks. Work was commenced on Copper street.

O. Marstr and of Doering & Marstrand, Vancouver, paid Greenwood a business visit this week.

Louis Blue made his last appearance as a single man in Boundary creek this week. Mr. Blue will quit the Elks and join the benedictines in a short time.

Phoenix still continues to grow. Harry Bell, of Rossland, is building a large hotel and Martin Bros. a store building along side. Other buildings are under course of erection.

The city exchequer was enriched several hundred dollars this week. Dealers in black jack and other games of chance appeared before Police Magistrate Hallett, pleaded guilty and were each fined \$50.

There will be an association football match on the athletic grounds at 2:30 Saturday afternoon. All those desirous of playing the game should send in their names to E. H. Mortimer, of Bealey & Co.

D. Welsh, provincial grand master and H. H. Clements grand chaplain of the I. O. O. F. paid Boundary Valley Lodge an official visit on Tuesday evening. After lodge the visitors were entertained by the members in the lodge room.

R. Greiger, manager of the B. C. Liquor company, has been a busy man for the past few weeks. He has been on the wing endeavoring to move some of the large quantities of goods for his firm. The company has just received a car load of Pabst's famous Milwaukee beer.

Wm. Martin, of Martin Bros., Rossland, Mr. Stumbles, of the Fisheries department, Ottawa, Ross Thompson and Dr. Reddick, a Rossland physician, came down from the Oro Denoro this week and spent day in the city. Mr. Stumbles is a heavy shareholder in the Oro Denoro. He was astonished at the big showing of rich copper ore and is more than satisfied with his investment. Development work is being carried out on both ledges opened by the railway grade. Mr. Martin also went to Phoenix where he and his brother are erecting a large building. The ground floor will be occupied by themselves.

Fresh pork sausage daily at Burns' meat market.

W. S. Keith is away at the Spokane fruit fair.

Geo. R. Naden and H. T. Ceperley, returned on Wednesday from Kruger mountain.

Morang & company, publishers, Toronto, had a representative in the district this week.

Baltimore oysters always on hand at Burns' meat market.

R. S. Day, the well known architect and insurance man of Victoria, was in Greenwood this week.

Mr. Lukov of Trail is opening in the new Guess block with a stock of gent's furnishings and dress goods.

Get your weinervorst and Frankfurters at Burns' meat market.

Thos. Miller has returned from a trip to the Similkameen district, going west as far as Princeton.

There will be services in the Catholic church on Sunday next, October 8. The mass will be said at 10:30 a. m.

The partnership existing between Portman & Hartman, in the Elkhorn brewery, has been dissolved, Mr. Hartman retiring.

The new town of Keremeos is popular with the real estate investors. Several lots were sold by the Bealey Investment company this week.

The deal for the purchase of Thos. Miller's two corner lots on Copper street to F. W. Hart was finally closed this week. Mr. Hart will build on the property.

F. C. Gamble, provincial government engineer, and C. A. R. Lambly, were in the city on Monday. Mr. Gamble was here in connection with the erection of the new school building.

Peter Scott, an old time prospector, who has been in the Similkameen for Paul Johnson and R. H. Hedley, was in the city this week. He succeeded in locating some promising claims.

Grand Forks celebrated because the Chas. Hinckley who left New York 15 years ago with \$97,000 of other people's money was afterwards connected with the Columbia townsite. It is a sort of offset to the fire.

Duncan Currie, of Greenwood, and Miss Ruth Raspberry, of Lytton, were united in marriage at the Dominion hotel this afternoon, by the Rev. George Murray, of Nicola Lake. The newly married couple leave for their home in Greenwood on Sunday. — Kamloops Sentinel.

## PRESCRIPTIONS

Need special care in compounding as well as pure drugs. "Many a broth is spoiled in the making." Any cook may make rich, light pastry with the same materials that another converts into a soggy mass. A skillful diamond cutter may quadruple the value of a gem by artistic cutting. Care in handling and good material go hand in hand. That is what we assure you of when you bring or send in prescriptions to us.
