Boundary Creek Times.

Vol. 7. GREENWOOD, B. C. FRIDAY JULY 3, 1903. No. 45

A HALF YEAR RECORD

Boundary Ore Shipments for the Six Months Ending June—Better Than Last Year, but Not Up to the Estimate—Outlook for the Year.

Boundary is rich in expectations. It has already demonstrated that it is easily the largest producer of copper ore of all mining districts in British Columbia, but notwithstanding this good showing it is still richer in expectation than in actual tonnage shipped. The fault lies not in the district itself but in outside influences which combine to restrict the output of the big mines. Last year the natural output of the Boundary mines should have exceeded 650,000 tons, but when the year ended the tonnage had passed the half million mark by only some seven thousand tons. The shortage in the estimated output was due to the serious accident and strike at Fernie, which closed the smelters for several weeks and kept them often running half their furnaces for the balance of the year. Since the dreadful accident at Fernie in May, 1902, the smelters have practically lived from hand to mouth so far as a fuel supply is concerned.

Last year closed with a total tonnage of 507,811 tons, a remarkable showing, and one which easily led any of the other mining districts of the province. Just as the tonnage of last year should have been 650,000 tons, at the beginning of the year the statement that the million dollar mark would be reached would not have looked unreasonable. But man proposes and the Crow's Nest Coal company disposes. At the beginning of the year it looked as if the capacity of the Boundary smelters would reach 3000 tons a day. The Granby smelter had already four furnaces established with a capacity of 1500 tons a day; the B. C. Copper company's smelter had two with a capacity of 700, and the Sunset smelter has one with a 300-ton capacity. The Granby people intended to immediately install two additional furnaces, bringing their capacity up to 2300; the B. C. Copper company had made arrangements to add four more furnaces during the year. One furnace at the Sunset smelter was being put in place at the first of the year and has since been blown in, and a third had been ordered, but the order was not hurried on account of shortage of fuel and this furnace will reach the smelter next week.

Under the circumstances one million tons would have been a conservative estimate. The smelters would have been ready to treat ore the mines were ready to produce; for in addition to the big mines belonging to the companies owning the smelters, there was a large tonnage of ore offering from other mines.

The first of the year looked particularly bright for a million ton camp, but in this world mining camps are interdependent. Boundary had the ore and the smelters the men and the managers, who would all combine to secure the new record, but Boundary had not the coal mines nor the coke ovens, nor the Crow's Nest Pass Coal company, nor its men, all of whom have apparently agreed upon nothing but to disagree.

In February of this year a general strike was ordered among the employes of the coal company and every mine and coke oven was closed down. The smelters had to close for want of coke, mines followed and the million ton estimate of the new year joined the great order of has-beens. The strike was finally settled, but the coke supply did not nearly equal the demands of the smelters. The output was consequently restricted and the estimated output of the mines reduced.

But notwithstanding all this the output of the Boundary mines for the half year ending June 30th makes a formidable showing. The aggregate exceeds 274,000 tons, which is much more than half the tonnage for the year 1902. The Granby mines has the largest comparative tonnage because the Granby company secured coke from outside points when the Crow's Nest Pass Coal company was unable to furnish any and thus helped to swell the shipments from the mines. She total tonnage of these mines in 1902 was 310,000 tons in round numbers, and up to June 30 the tonnage this year is about 164,000. The Mother Lode mine has fallen short on account of the smelter being idle. Last year's tonnage was about 140,000 tons, and for the half year just closed about 50,000. Of course with a reasonable show, the difference can be easily overcome and the tonnage far exceeded before the close of the year. The Sunset mine has more than equalled half of last year's tonnage; the Snowshoe in the half year has exceeded by 6000 tons its entire output for 1902, and the B. C. mine has just about equalled its output for last year. The small tonnage from the Sunset and the shortage in Mother Lode shipments is accounted for by reason of the fact that both the B. C. mine and the Snowshoe have largely increased their tonnage. These ores have been treated at the Sunset and B. C. Copper company's smelters, and in the absence of an adequate supply of coke the shipments from the companies' own mines were necessarily curtailed. The Emma mine has also in the half year exceeded by 2000 tons last year's total shipments. In addition the high grade mines near Greenwood shipped about 800 tons in six months.

Again the Boundary is rich in expectations for the next six months. The Crow's Pass company expect to be able to meet the requirements of the smelters as soon as the Morrissey coke ovens are ready. Coke is coming in a little more freely even now. The Granby people have secured a large shipment of coke from Fairfax, Washington; three furnaces are now running; a fourth will be blown in next week, and two additional furnaces will be ready in a few weeks. This will give six furnaces in all with a capacity of 2300 tons daily. The Montreal & Boston company will blow in the second furnace next week, and the third will soon be here, and the B. C. Copper company has its two furnaces running. The capacity of all these furnaces is about 3500 tons daily, which if running full blast for six months would treat over 600,000 in that time. But shortage of coke, further labor troubles, accidents and other causes may intervene to keep the output down. In any case it is safe to state that the total this year will show a healthy increase over last year.

E. W. Bishop has secured the contract for supplying and installing the steam heating plant in the new court house. The plant will be of the most modern type and is to be in place before September 30th. Mr. Bishop's tender was the lowest, although several outside firms tendered for the contract.

NEW MEAT MARKET

P. Burns & Co's New Establishment in the Ostroski Building.

P. Burns & Co's meat market is now established at the corner of Copper and Greenwood streets in the Ostroski block. The new market is easily one of the finest in the interior, and outside of, possibly, the firm's Nelson establishment, there is nothing to equal it for size and convenience. The improvements carried out reflect the greatest credit on the firm and its local manager, Mr. Ehrlich.

Although P. Burns & Co. own the property where the old market stands, and although they had a monopoly of the meat business in the city, still they moved to the present premises in order to further accommodate the public. It is such enterprise and consideration that make P. Burns & Co., a popular firm notwithstanding the fact that they have a practical monoply of the meat business in the interior.

After securing a lease of the Ostroski building a large force of carpenters were put to work fitting up the interior of the premises. New offices, a cold storage department and all conveniences found in an up-to-date establishment were fitted up. After the carpenters came the painters who painted the whole interior in pure white. An elevator was put in place to lift the ice above the cold storage department and other improvements carried out.

Further improvements are contemplated. Manager Ehrlich intends putting a fountain and miniature lake in one of the deep show windows and stocking it with live fish.

Death of Mrs. H. A. King

Died Suddenly of Heart Disease Wednesday Morning.

Mrs. H. A. King, wife of the well known stationer of this city, died suddenly at two o'clock Wednesday morning. The deceased lady worked up to midnight preparatory to attending the celebration at Grand Forks and shortly after retiring she became suddenly ill. She complained of her heart and before medical aid could be summoned death came.

Besides the bereaved husband Mrs. King leaves a family of two daughters and one son by a former marriage. One of the daughters Mrs. J. D. Sword was visiting with them during Mr. Swords absence in Alaska.

The funeral takes place this afternoon.

GREATLY ALARMED

By a Persistent Cough, but Permanently Cured by Chamberlain's Cough Remedy.

Mr. H. P. Burbage, a student at law, in Greenville, S. C., had been troubled for four of five years with a continuous cough whe says. "greatly alarmed me, causing me to fear that I was in the first stage of consumption." Mr. Burbage, having seen Chamberlain's Cough Remedy advertised, concluded to try it. Now read what he says of it: "I soon felt a remarkable change and after using two bottles of the twenty-five cent size, was permanently cured." Sold by J. L. White, Greenwood, and A. F. Thomas, Midway.

GOING TO THE COAST

Mr. E. Jacobs Will Join the B. C. Mining Record

HIS NEWSPAPER WORK

Appreciated by Mining Men—Letter of Appreciation Presented.

E. Jacobs, secretary of the Greenwood Board of Trade and well known newspaper correspondent will leave for Victoria shortly. During his recent visit there he made an arrangement to join the B. C. Mining Record. If after three months this arrangement is satisfactory to both parties Mr. Jacobs will acquire an interest in the business and become permanently associated with that journal.

During Mr. Jacobs' six years residence in the Boundary he did good work in bringing the resources of the Boundary to the notice of the readers of various mining journals and newspapers for which he acted as correspondent. He intends to retain this connection and is at present preparing a series of articles on mining and allied subjects for the Engineering Magazine of New York. He will also write some articles for the Engineer and Mining Journal of New York.

That Mr. Jacobs' good work has been appreciated by the mining men of the district is shown by the fact that when he announced his intention of leaving the district, a flattering letter of appreciation was presented to him. It bears date April 30th and follows:

Greenwood, B.C., April 30, 1903.

MR. E. JACOBS,

Greenwood, B. C.,

DEAR SIR: Having been informed that you intend shortly removing to a centre better suited to the extension of your press connection we think the time opportune to bear testimony to the value of the work you have done in contributing for publication statistics, descriptive matter, and other information relative to the mining and smelting industries of the Boundary district of British Columbia.

Some of us have been familiar with the nature of your efforts from the time when, six years ago, you commenced to aid in giving wide publicity to the large extent and considerable value of the mineral resources of the district, and all of us have appreciated the generally reliable character of your numerous contributions published in newspapers, technical mining journals and other publications. We take pleasure in stating that we have found you at all times anxious to obtain accurate facts and figures only, and these obtained you have, in our opinion, been at much pains to place them clearly and intelligently before the public, carefully avoiding exaggeration and misstatement, yet showing the position and progress of the industries with which we are associated in as favourable a light as their condition appeared to warrant.

We are pleased to learn that you are planning to from now on considerably extend the scope of your labors in a similar direction, and altho the Boundary district may not in the future receive so large a share of your attention as in the past we trust it will, in common with other important mining districts of the province, derive benefit from your continued effort to secure the publication of authentic and carefully-prepared descriptive and statistical information, such as may assist in impressing those seeking a field for the investment of capital with the promise and potentialities of mining and smelting enterprises in British Columbia.

Wishing you much success in the larger field you purpose entering, we are, Yours sincerely,

The British Columbia Copper Company, Ltd. FREDERIC KEFFER, Manager.

Montreal & Boston Copper Co., Ltd. H. JOHNS, Superintendent.

E. J. WILSON, Metallurgist.

Granby Consolidated Mining, Smelting & Power Co., Ltd. A. C. FLUMERFELT, Asst. to the President, H. N. GALER, Asst. General Manager, A. B. W. HODGES, Smelter Superintendent, WM. YOLEN WILLIAMS, Mine Superintendent.

Snowshoe Gold & Copper Mines, Ltd. J. W. ASLLEY, Superintendent Snowshoe Mine.

B. C. Chartered Co., Ltd. S. F. PARRISH, Manager.

WM. G. MCMYNN, Gold Commissioner, Greenwood Mining Division.

S. R. ALMOND, Gold Commissioner, Grand Forks Mining Division.

Mr. Jacobs will in the future as in the past take a keen interest in the development of the Boundary. He intends visiting the district at least every three months in the interests of the Record and to keep himself posted on the progress and development of the mining and smelting industry.

While the people of Greenwood and district generally will regret that a faithful chronicler of events, has decided to sever his connection with the district, they are pleased that he is taking a position which will likely be advantageous to himself and in which he can still do good work for the district.

Chambers of Commerce

Official Programme of Visit to the Boundary.

Geo. Hadrill, Montreal, secretary of the Canadian committee of arrangements for the itinerary through Canada of the members of the fifth congress of the Chambers of Commerce of the Empire has sent secretary Jacobs of the Greenwood Board of Trade an official program of the Canadian tour. In his letter Mr. Hadrill states that this programme will be revised on August 15th, but only in minor details, and the tour will be practically as outlined in the official programme. In so far as the trip to the Boundary is concerned the programme follows:

Monday, Sept. 14th, breakfast on boat. Leave Robson by special train at 8:00 a. m. Arrive Grand Forks at 11 a. m. Visit to smelter of the Granby company. Luncheon. Leave Grand Forks at 1:30 p m, arrive at Phoenix at 3:15 p m. Supper at 6:30 p m. Leave Phoenix at 8:00 p m, arrive at Greenwood at 9:00 p. m.

Tuesday 15th—Morning in Greenwood. The Greenwood Board of Trade will convey delegates to mines, smelters and other points of interest. Luncheon at Greenwood. Leave Greenwood by regular train at 3:20 p m. The second party will come on the day following. The Greenwood Board will send representatives to meet the visitors at Robson and accompany them through the Boundary.

Mr. Ames a member of the committee will be in Greenwood about the end of July and will make further arrangements with the Board of Trade.

If it's a bilious attack, take Chamberlain's Stomach and Liver Tablets and a quick recovery is certain. For sale by J. L. White, Greenwood, and A. F. Thomas, Midway.

UNION LABEL GEOGRAPHICAL GREENWOOD

FRIDAY, JULY 3, 1903.

R. T. Lowry will now publish his Claim at Nelson. His sidekicker, MacAdams, will probably go to Atlin and publish a paper in Chinook, which will, no doubt, be appreciated by the natives. The Ozonogram at Vancouver is dead. They found that the denizens of that city did not take to their alleged wit as a hobo does to a free lunch.

John Houston has an announcement in the Nelson Tribune that he will be a candidate for member of the legislative assembly for the city of Nelson at the next general election, provided he gets the nomination of the Liberal-Conservatives. John will, no doubt, get the nomination; but that's about all he will get.

In the Nelson Tribune John Houston states that in the last legislature there were 22 Conservatives and 16 Liberals. And what did the Conservatives do when they had control of the house? Nothing but draw their breaths and their salaries.

Reader, the Conservatives had six majority in the provincial house for the past three years. Has the policy of that party in British Columbia made you rich?

The wages paid in free trade England are higher than in all the protectionist countries of Europe.

REGISTER YOUR VOTE.

THE LIBERAL PLATFORM

The liberal platform, as adopted at the provincial liberal convention held at Vancouver on February 7th, 1902, is as follows:

1. The immediate redistribution of the constituencies of the province on the basis of population but allowing a smaller unit of population per seat for the outlying districts.

2. Government ownership, Dominion, provincial and municipal, of public services of utilities i ssound and should be carried out in British Columbia.

3. Should it be advisable at any time to grant aid to a railway company such shall be in cash and not in land and no bonus of any kind shall be given without definite and effective means being taken to safeguard the interests of the province in the management of the road, control of the freight and passenger rates, and provision made against such railway having any liability against it except for actual cost.

4. Immediate construction of the Coast-Kootenay railway; the Cariboo railway; a railway from Alberni to a point on the east coast of the island; a road in the northern part of the province from the coast to the eastern boundary with an extension to the northern boundary; the railway from Vernon to Midway by north fork of Kettle river; with necessary branch lines, ferries and connections.

5. The enforcement of the act now in force compelling the scaling of logs by government scalers.

6. That such legislation should be enacted as will result in making the lands included in the various dyking areas available for cultivation as quickly as possible and secure prompt payments of assessments when due.

7. That the government should keep in touch with the conditions in connection with mining, protecting said industry against combines and trusts and if necessary for the purpose build and operate smelters and refineries. No reasonable change should be made in the mining laws without full notice to all parties interested, giving full opportunity for discussion and criticism.

8. As the province can only advance by the settlement within its borders of thrifty and prosperous citizens, and as Orientals never become citizens in any proper sense of the word, we declare it to be the duty of the government to discourage Oriental immigration and employment by every means within its power, and we appeal to our fellow liberals throughout the Dominion to aid us in our efforts to protect ourselves against the ruinous competition of men having a standard of decency and comfort immensely below that of civilized peoples, and who shirk every duty and obligation of citenship which the law will allow them to escape.

9. The government ought to prevent the waste and suffering caused by strikes and lock-outs, and an eanest effort ought to be made to provide some means of preventing such strikes and lockouts, and we approve the adoption of compulsory arbitration.

10. The fiscal system of the province stands in need of revision. Taxation should bear upon privilege rather than upon industry, and no addition should be made to the debt of the province except for public works properly chargeable to capital.

11. The retaining of the resources of the province as an asset for the benefit of the people and taking effective measures to prevent the alienation of the public domain except for actual bona fide business or industrial purposes, putting an end to the practice of speculating in connection with the same.

12. The construction and maintenance of roads throughout the province to aid in the development of the mining and agricultural districts.

SOME DENTAL HINTS

Careful cleansing of the teeth is the foundation of all care of the mouth.

Rational care of the teeth and mouth seeks to free the cavity of the mouth of all foreign substance.

Tartar must be removed from time to time. Loose roots and stumps must be extracted. Decayed teeth must be filled, or treated and filled; or extracted.

Artificial substitutes must be inserted in place of natural teeth which have been lost.

The sooner a diseased tooth is treated the more rapidly, painlessly, and cheaper can it be filled For this reason teeth should be thoroughly examined at least twice a year.

It is money well spent to have diseased roots and such as are still firmly implanted filled, and, where necessary, provided with artificial crowns.

TOO GREAT A RISK.

In almost every neighborhood someone has died from an attack of colic or cholera morbus, aften before medicine could be procured or a physician summoned. A reliable remedy for these diseases should be kept at hand. The risk is too great for anyone to take. Chamberlain's Colic, Cholera and Diarrhoea Remedy has undoubtedly saved the liues of more people and relieved more pain and suffering than any other medicine in use. It can always be depended upon. For sale by J. L. White, Greenwood, and A. F. Thomas, Midway.

NOTICE OF FORFEITURE.

To C. D. CAMPBELL, and PETER McBRIDE, late of Greenwood, in Yale District:—

SIRS: You are hereby notified that I have expended One Hundred Dollars ($100.00) in having the "Admiral" Mineral Claim, situate in Providence Camp in the Kettle River Mining Division of Yale District in British Columbia, surveyed, to count as an assessment, and the further sum of $2.50 in recording such survey as an assessment in order to hold said claim under the provisions of Section 24 of the "Mineral Act," as will appear by a Certificate of Work recorded in the office of the Mining Recorder for the Kettle River Mining Division of Yale District, on the 12th day of May, 1902; such expenditure being the amount required to hold the said claim for the year ending on the 14th day of May, 1902;

And if within ninety days after the publication of this notice, you, or either of you fail or refuse to pay or contribute your portion of the expenditure required under said section 24, together with your portion of all costs of advertising, the interest of such of you as fail or refuse to contribute your portion of said expenditure and costs of advertising, shall become vested in the subscriber (your co-owner) under section 4 of the "Mineral Act Amendment Act, 1900."

Dated at Greenwood, B. C., this 13th day of March, 1903. Last issue June 13.

Boarding Schools.

Scheme Endorsed by the General Assembly.

Dr. A. O. MacRae of Greenwood has returned from the meeting of the General Assembly to Calgary, to further promote the establishment of the Western Canada College. The movement met with the endorsation of the assembly. The subject was introduced at the assembly by Dr. Herdman, superintendent of Presbyterian missions. He asked that the General Assembly approve of the project of establishing a boys' and girls' residential school at Calgary and also at Kamloops. The Rev. Dr. pointed out the great and growing need for such institutions in the far west. He said that while he had often noticed the scattered nature of the population and the consequent inability of the government to supply satisfactory schools but it was not till one of the school inspectors urged that the churches duty in the matter that he had been led to seriously consider.

He traced the history of the proposed school scheme up to date, the success that had attended the efforts of the promoters so far, and concluded by urging the Presbyterian church to commend these institutions. Other denominations were being approached in a similar manner and judging from the encouragement that had been given, there was every likelihood of receiving the stamp of approval from all the religious bodies.

Dr. MacRae followed in support of Dr. Herdman. He dwelt upon the serious want of schools where religious and moral instruction was pronounced. The children in many parts were growing up amidst conditions that were anything but conducive to the making of good christian citizenship. There was much freedom in the west, but it was too often of a wild and undisciplined nature.

These proposed institutions were intended to supplement the public schools. In them the moral and religious training of the scholars would be sedulously guarded. The charter would guarantee the christian nature of the schools.

Dr. Bryce made a powerful speech in favor of the proposed institutions. We are, he said, first christians, then Presbyterians. The conditions out here are in many respects different from the east. There was not the hard and fixed lines of sect or caste.

If the Presbyterian church was to be worthy of its educational traditions, it must be in the forefront of such movements as the present, that promised so much for the best interests of the churches and christianity at large

The schools were wholly undenominational, and the guarantees of non-secularisation would satisfy the strictist churchman of whatever sect he might be. He closed with a splendid appeal for the good will and patronage of Presbyterian people towards these residential schools.

Mr. Justice Forbes of St. John, New Brunswick seconded the motion, pointing out that it was unnecessary for him to add anything after what Dr. Bryce had said.

The resolution was then put and carried unanimously. This commendation and approval combined with that of the various Presbyteries and the synod of British Columbia should certainly strenthen the hands of the trustees and promoters in furthering the interests of the Western Canada College.

NOTHING LIKE EXPERIENCE.

"Gne truth learned by actual experience does more good than ten experienoes one hears about." Tell a man that Chamberlain's Colic, Cholera and Diarrhoea Remedy will cure cholera morbus, and he will most likely forget it before the end of the day. Let him have a severe attack of that disease, feel that he is about to die, use this remedy, and learn from his own experience how quickly it gives relief, and he will remember it all his life. LOCAL EXTRACT

J. P. Keane, manager of the Cariboo mine, was in the city this week on his way home from Wallace, Idaho.

Captain Long, who has had charge of the local corps of the Salvation Army for some time back, has been promoted to Rossland, and left last week.

Jim Smith, who has been laid up with a fractured for a couple months, left Monday morning with a full pack to do work on his property in Welling ton camp, the Two Jims claims.

Frederic Keffer, manager of the B. C. Copper company, returned on Wednesday from Nelson where he met his father and sister of Cleveland, Ohio, who are out on a visit.

The Waterloo at Camp McKinney, has had a clean-up, but the value of the gold taken from the mill plates has not yet been made public here. The gold has been sent to Spokane.

Provincial Constable R. B. Venner of Camp McKinney, has been in the Greenwood hospital for a few days, where an operation, rendered necessary by his having injured his back whilst riding, was performed.

On Wednesday evening, July 1st, Mr. Martin Anderson and Miss Anna Olson were married at the residence of Mr. Charles Peterson of Anaconda. Rev. J. D. P. Knox, officiated.

The city band gave a couple of open air concerts the past week. The boys are improving. These open air concerts help the band and are appreciated by the citizens. What the boys need the most is more drilling in marching.

Methodist church--Rev. J. D. P. Knox, pastor. Services at 11 a. m. and 7:30 p.m. Morning class at 10 o'clock. Sunday school at 2:30 p. m. The pastor will conduct the morning and evening services.

The last car of ore sent to the Trail smelter by the Providence Mining company from its mine near Greenwood gave returns at the rate of $225 per ton. The net weight of ore was 37,832 lbs, the gross value of which was $4,256.27. The mineral contents per ton were: Gold 1.92 oz., silver 373.6 oz., and lead 6.8 per cent.

There was a fall in vegetables Tuesday morning. Sing Sam's, or Sam Sing's team, hitched to a wagon load of garden truck to be peddled around town, became frightened at some oats on Gold street and started down the thoroughfare at a rapid pace. After crossing the bridge the wagon struck a telephone, breaking it into a dozen pieces and scattering the vegetables over the street.

Chas. J. McGee and wife and A. S. Halls of Chicago and T. H. Rae were in the city this week. Mr. McGee is president of the Hesperus Mining company organized by Mr. Rae in the Windy city to acquire and develop the Betts and Hesperus claims on Hardy mountain. The visitors examined the smelters and mines in the vicinity. Their company has ample funds in the treasury and work on the two properties will be commenced immediately.

The sports held at Camp McKinney on Dominion Day were well attended and successfully carried out. The tug-of-war was the best contested item on the programme, a team from the farming district of Anarchist Mountain, south east of that camp, having most stubbornly contested with local miners for the prize in this event. After "tugging" for an hour and a quarter, until the teams could do little but lie on the rope, the camp men gained and maintained an advantage which secured for them a hard-fought victory.

The half yearly closing exercises of the Anaconda public school took place last Friday, 26th ulto. A number of parents and friends of the pupils, and other visitors were present, and they listened to an oral examination, conducted by the teacher, Miss F. Gibson, and then inspected the written examination papers, composition work, maps and drawings of the pupils. After the presentation of the honor roll, to Arthur Peterson for proficiency, to Mamie Coutts for attendance, and to Frank McDonald for deportment, refreshments were served by the parents and then the school was dismissed for the summer vacation.

Lieutenant Massey of the local staff of the Salvation Army was this week transferred Missoluia, Mont. Capt. Long who is now in Rossland will likely return to Greenwood in a few days.

Albert I. Goodell, superintendent of the Montreal & Boston Copper company's smelter, left yesterday for Montreal accompanied by Mrs. Goodell and family. Mr. Goodell's visit to Montreal is for the purpose of consulting with the officials of the company. The second furnace will be blown in in a day or so and the third will be installed and put into operation as early as possible. Mr. Goodell expects to be away about two weeks. Mrs. Goodell and family will return by way of Pueblo, Col., where they will visit for some time.

S. H. C. Miner, president of the Granby Smelting company, prior to leaving Grand Forks for Victoria, made an interesting statement:

"I inspected every inch of the new work done at the Granby mines since my last visit, a year ago. I found that the mines as a whole have improved very materially in that period. We have large and extensive plans still in view. Coke continues to be the burning question. We have been handicapped for a year, and averaged a fraction less than two furnaces in operation, while we actually had four available for use."

"This state of affairs, said Mr. Miner with emphasis, "cannot continue We are making arrangements and shall have coke of our own in the near future. The new equipment for the additional furnaces now being installed, making six in all, will be ready for work within a few weeks. Our policy is for constant and moderate expansion all the time, but we must meantime again consider the interests of our shareholders. Notwithstanding the lack of coke thus greatly restricting operations, we have added $300,000 worth of equipment to the mines at Phoenix and the smelter at Grand Forks, all of which has been paid for out of earnings."

The No. 7 Mining Co., Ltd., owing a group of mineral claims near Greenwood, is offering for sale 24,000 shares of its treasury stock, the proceeds to be used in payment for improvements already made, in still further developing the company's No 7 mine, and to install and equip a concentrating plant to enable the company to concentrate its own ores, and to provide working capital. The No. 7 group includes the No. 7 mine, and the Glasgow fractional, Lady of the Lake, Helen, McGregor, and Rob Roy claims, all adjoining. Outside of sinking two prospect shafts and making a number of open cuts along the course of the veins occuring here, practically all the development work has been done on the No. 7, on which a shaft has been sunk to a depth of 320 feet, with long levels run at 50, 120 and 200 feet, respectively, whilst a cross-cut has proved the vein to be in place at the 300 foot level. More than 2,000 lineal feet of work have been done in underground development The ore is quartz mineralized with gold, silver, zinc and lead, and the vein varies in width from 18 inches to 7 feet Several stopes have been opened and about 1200 tons of ore shipped to the smelter. The mine is equipped with power plant consisting of a Class A Ingersoll Sergeant straight line air compressor rated at five drills, six one man machine drills, air receiver, 100-horse power steam boiler, 25 horse power hoisting engine, Cameron sinking pump, etc. The elevation of the property and its distance from the railway—this being about five miles—have made it neeessary from motives of economy for the management to conduct experiments in the direction of concentration tests, and these have been in progress for several months, the object being to materially reduce the cost of transportation from mine to smelter. The mine has been opened up under the direction of Frederic Keffer, M.E., general manager for the B. C. Copper Co., Ltd. As a number of shareholders in the No. 7 Co., also hold shares in the B. C. Copper Company an amalgamation of the two companies is favored by some, provided an equitable basis of absorbtion by the stronger company of the No. 7 can be arranged. The No. 7 Mining company is capitalised at $1,000,000 in 200,000 shares at $5.00 each.
