Boundary Creek Times.

Vol. 7. GREENWOOD, B. C. FRIDAY, JANUARY 2, 1903. No. 19

BOUNDARY LEADS THEM ALL.

A Remarkable Showing Made During 1902, Notwithstanding Serious Obstacles.—The Ore Shipments Exceeds That of Any Other District in the Province.—A General Review For the Year.

The Boundary mines have passed the the half million mark. Notwithstanding accidents and unforseen delays, slowly but surely the figures crept up until with the year just closed Boundary leads all other districts in British Columbia, with a grand agregate for 1902 of tons. Under ordinary circumstances and taking into consideration the capacity of the shipping mines and the smelters treating their ores the output for 1902 should have reached 650,000 tons but obstacles which are more or less incident to mining in all districts combined to prevent the output from reaching the maximum figure. The Boundary smelters are dependent on the Fernie mines and coke ovens for their fuel supply. Early in the year, a serious accident took place at the principal mine of the Crow's Nest Pass Coal company which seriously crippled its output. The smelters were practically living from hand to mouth in so far as a coke supply was concerned and when the accident was followed by a strike which lasted several weeks the smelters were unable to secure any coke and the smelters had to close down. The mines of course had to follow suit and mining and smelting was at a standstill until the strike was settled. The Granby company was compelled to blow out two of its furnaces early in the year and these remained idle except at short intervals until nearly a week ago. The power to be secured from the North Fork of the Kettle River where the works are established proved insufficient to meet the requirements of the company and they arranged with the Cascade Power & Light company for an auxiliary supply. The power company expected to be in a position to transmit electricity early in the year, but delay in securing the necessary plant and other obstacles retarded the company until it was November before the current was turned on. A series of accidents since then has further delayed operations and it was only for a few days at the end of the year that the Granby company has been able to run all its furnaces and maintain normal shipments from its mines

The other draw back to the bright picture was the unsatisfactory price of copper during the year. The companies operating the big low grade mines to a large extent expect their dividends from the sale of matte. During 1900 and 1901 the price of electrilytic copper in New York was between 16 and 16½ cents per pound. In December 1901 copper came down with a crash, 14 cents was soon reached and many thought that it had reached rock bottom but early in 1902 there wasa still further stump and copper was selling aslow as 10½ cents per pound. From this price it recovered but slowly and today 11½ to 11¾ cents is the price for electrolytic copper copper. A loss of nearly six cents a pound in the price of copper nearly put the low grade mines and smelters out of business. But the men behind them were not easily discouraged. They kept pushing ahead as if nothing had happened. Cheap methods of mining and smelting were introduced and even at the low price of 10½ cents they were able to make a small profit out of the ore without reducing the wages of the men or attempting to do so. On the other hand, much might be done towards encouraging the men who are pluckily developing low grade mines. Cheaper explosives, cheaper fuel and above all cheaper freight rates, meaning cheaper cost of living for the men would materially assist in raising the factor of profit.

These are the discouragements and disappointments of the mining industrids, but the law of compensation got in its work. While the low grade mines were being successfully worked under a low price of copper, the general outlook for the district has been made brighter by the development of high grade properties in the immediate vicinity of Greenwood. At the close of the year several high grade properties are being worked and inquiries are being made for others and the outlook for 1903 in this regard is parularly bright.

Taking everything into consideration there is much encouragement to be formed in the year's work. A strenuous struggle against a downward copper market, it has been a struggle crowned with success and which gives rich promise of a splendid future.

THOSE GLORY HOLES.

How the Cost of Mining was and can be Greatly Cheapened.

Perhaps the most important feature of the year's work in the larger mines was the change which transferred the greater part of the ore-producing operations from the underground workings to the big quarries contributing the bulk of the tonnage of these mines. This transference had been, in the case of the Granby Company's Knob Hill mine, in part effected in the year 1900, but it was during the year now under notice that this means of bringing about an indispensable reduction in labor charges was to a much greater extent availed of. When it is remembered that this change, speaking generally, reduced ore-producing costs by about 50 cents per ton, its vital importance to mines working on a narrow margin and maintaining a large average daily output is at once evident. As yet reductions in cost on mine supplies have not been practicable, but there is little doubt that these will be made to some extent during the ensuing year. The smelters for a short period had the benefit of a slight reduction in the cost of coke, but this was lost after the disasterous explosion at one of the collieries of the Crow's Nest Pass Coal Company last summer. Whether any advantage will be gained in this direction in 1903 will depend very much upon whether railway competition be brought about, or not. Should the railway proposals of the Great Northern or the V. V. & E. company, or of the combination supposed to exist between these two, be shortly carried out to a sufficient extent to give bona fide competition, it is not unlikely that a reduction in freight charges on coke will be secured even though the Crow's Nest Pass Coal Company's present practical monopoly enable it to keep up its comparatively high price for the fuel itself. Still one more consideration additional to a possible increase in the price of copper, induces hope for better results in the near future. This is the recent provision of cheap power by the completion of the Cascade Water Power Company's power-generating works. The possible effect of reported combinations and amalgamations of companies owning or smelting properties need not be here considered, since these are still very much "in the air", yet should any amalgamation, strongly supported financially, be effected it will probably be a step in the right direction by enabling operations to be carried on on a considerably larger scale and by concentrating management and thereby making a saving as compared with the cost of several individual managements.

THE ORE TONNAGE.

The Amount Contributed by the Shipping Mines During Year

Coming now to details of tonnage for the year, the output of the mines of the district was as under:—

	Tons.
Granby mines	310,601
Mother Lode	141,326
Snowshoe	20,800
B. C.	14,727
Emma	7,900
Sunset	7,560
Jewel	2,175
Winnipeg	785
Golden Crown	625
No. 7	532
Providence	172
Sundry small shipments	158
	507,811

It may be noted that the B. C., did not ship any ore during the first half of the year, whilst the output of the Jewel was confined to that period. The Snowshoe and Emma did practically all their shipping late in the year. The output of the Sunset was restricted chiefly to making up sufficient ore for the requirements of the Boundary Falls smelter above the quantity of custom ore received at those works.

THE YEAR'S WORK.

What was Done in the Matter of Development.

A summary of the development work done, as distinct from stoping and quafrying ore, would not make as good a showing in total number of lineal feet of sinking and raising and of drifting and crosscutting, respectively, as that of a couple of years ago. This is in part accounted for by the fact that fewer properties were worked in 1902 and partly that such mines as the Granby Company's Old Ironsides, Victoria and Knob Hill mines and the B. C. Copper Comrany's Mother Lode, which were for about four years prior to 1901 concentrating their work upon the opening up and blocking out under ground of their big ore bodies, and which together contributed nine-tenths of ore production of 1902, now have large reserves of ore underground which they are not drawing on to any great extent for the reason that the bulk of their ore shipped during 1902 was taken from the quarries. Yet was there in both cases a considerable footage of tunnelling done to get under the quarries, and big raises were made to connect tunnels with quarries and thus provide chutes for the expeditious handling of the ore broken in the quarries and thrown down these chutes for tramming through the ore crushers and bins above the railroad tracks. Similar conditions obtained at the Snowshoe and Sunset mines. The No. 7 mine, on the contrary, did little besides development work, sinking to the 300 ft. level and drifting on that and the 120 and 60 ft. levels. The Jewel not add much during 1902 to its total footage, most of the ore shipped having been taken out of stopes. The Winnipeg and Golden Crown during a part of the year did some development work until compelled, for financial reasons, to cease operations for the time being. The Emma opened an ore quarry, its underground work having been unimportant. The Providence did some sinking and drifting, but as yet its footage is comparatively small.

Of the mines that were not worked during 1002, the Dominion Copper Company's Brooklyn and Stemwinder group are the most important. These are at Phoenix and, having a deal of marketable ore blocked out, would, if in full operation, add appreciably to the district's output. The City of Paris and Majestic group, in Central camp, has been idle for two years. The Athelstan, which was among the shippers during 1900 and 1901, has been neglected for more than a year. The Oro Denoro and B. Bell, in Summit camp, were inoperative, as, too, were the Morrison, in Deadwood camp, the King Solomon, in Copper camp, and the Ruby, the Republic group, in Smith's camp. The Gold Drop, at Phoenix, is waiting for conditions to become more favorable for making a profit out of its low-grade ore. The Carmi, up the West Fork of Kettle River, and the Rambler, in the same neighborhood, were compelled, by resaon of long-continued neglect on the part of the provincial government to give them wagon connection, to suspend operations.

In contrast to this record of properties unworked, there is, beside the high grade properties encouraging results obtained from their enlarged operations at the bigger mines, some little progress to chronicle. The Big Copper in Copper in Copper camp, was at work for some time and on it a fine showing of copper ore was uncovered. The Emma had been unworked for about six years, but now it is among the regular shippers. The B. C., after a suspension of work extending over several months, is once again producing ore and, as well, prospecting for other ore shoots believed to occur not far from those previously discovered. The No. 7 during the year under review achieved results in the direction of proving that its vein lives down and its ore shoot has considerable length, these matters having before been uncertain. The Providence, situate just outside the limits of Greenwood city, produced about 170 tons of ore ranging in gold and silver at values from $80.00 to $150.00 per ton after payment of a freight and treatment rate of $15.00 per ton, and, with its vein going down strongly, encouraged the opening up of other narrow-vein properties in the immediate neighbor hood of Greenwood. The Goldfinch, gave two local men, who had it under option for a short time, an average net yield of $108.85 per ton chiefly in gold, on 40 tons of ore shipped to the smelter, and now a 100 ft. shaft is being sunk to further prove this promising claim. In the same vicinity a fine showing of gold-quartz ore was recently met with in a prospect shaft on the Lancashire fraction, under bond to Nelson men, whilst the Abercraig, near by, is being worked by a party of practical miners, who hold it under a working lease. These latter developments are regarded at Greenwood with [illegible] cation, as indicating the p[illegible] one of the many high-g[illegible] claims in the neighbo[illegible] oping into valuable mines, and [illegible] ing the owners of others to get to work.

CAMP MCKINNEY.

The Old Cariboo is Still the Camp's Chief Mine.

Work at Camp McKinney was through the year restricted chiefly to the Cariboo-McKinney Mining & Milling Company's Cariboo mine, the output of which is not included in the foregoing total of ore shipments. Quite lately some activity has been shown in connection with the further development of the Waterloo, but difficulties, first in connection with the organization of a new company to acquire the property from the old Waterloo company, and later from insecurity of title to the mineral claim, prevented much progress being made. Now, however, those obstacles appear to have been overcome, and more energy is being displayed in opening up the shoot of rich ore met with at the 100-ft. level than has heretofore marked the development of this promising mine. A more powerful hoisting engine has been installed at the mine, and a commencement made to sink another 100 feet before the surface water shall become troublesome in the spring. So far as production is concerned the Waterloo has no tonnage of consequence to add to the year's output from this camp. Prospecting has been done on several other prorerties in the camp, but no important developments have yet been reported as a result. Three or four miles southeast of Camp McKinney are the Dayton, Dewey, Jim Crow, Night Hawk and other claims situate on the divide between the main Rock Creek and the south fork of that stream, upon which surface prospecting has disclosed the the presende of big bodies of mineral that give promise of being well worth opening up. Speaking generally, though, the only mining and milling of importance the year aswdone in Camp McKinney was that done on the Cariboo, which fairly well maintained the creditable record of the several prsvious years. The following statistics for the year ended November 30, 1902, are official:

Ore crushed	15,616 tons
Bullion crushed	8,400 ounces
Concentrates produced	550 tons
Values of bullion	$112,300,00
Value of concentrates	$17,381 00
Drifting done	1,005 feet
Raising done	190 feet
Average number of men employed	50
Dividend paid	4 per cent

The tonnage of ore mined and milled the previous year, as shown in the company's last annual report was 16,862 tons, yielding 9439 oz. gold and 424 tons concentrates.

THE SMELTERS

Low Treatment, Good Work, and big Additions Made.

The smelters of the district are a prominent and striking testimony to the confidence felt by some capitalists as to the permanence and eventual profitableness of its resources. At all three of the Boundary smelters the important additions to plant and buildings, and in the case of the Gran-

Local and Personal.

Thomas McDonnell returned on Friday last from Collville and left this week fer Bolster, Wash.

Mrs. S. Barry Yuill arrived from the east on Christmas Day to join her husband in Greenwood.

J. C. Helm, resident manager of the Spokane & Northern Telegraph company, returned on Tuesday after spending the Xmas holidays at outside points.

Two Chinamen who decided to adjust their differences by a rather poor exhibition of the manly art of self defence contributed $5 each to the city exchequer on Tuesday.

The Texas, a fraction adjoining the Providence mine, has been bonded by J. J. Caulfield from the owner, C. N. Collins. A first payment has been made.

Next Wednesday evening the adjourned meeting of the Forest and Stream club will be held in the city hall. The committee to whom the matter was referred will submit a constitution and by-laws for the ratification of the club. Other business will be transacted and a large attendance is requested.

The installing officer at the recent installation of officers of Greenwood Lodge No. 28., A. F. & A. M., was P. M. Brother S. Barry Yuill. There was a numerous attendance of members of the craft, including visitors from King Edward lodge, Phoenix, and several sojourning brethern.

The first fancy dress carnival of the season will be held at the Greenwood skating rink on Monday, January 12th. The band will furnish music, and several handsome prizes will be awarded. No trouble is being spared in preparing for the carnival and all who attend are sure of a splendid evening's entertainment.

The ball given by Greenwood Lodge No. 29 Knights of Pythias, on New Year night, was a success socially, and as the sale of tickets covered all expenses it may be said also financially. About eighty couples were present, and danced till the small hours, and seemed to enjoy themselves thoroughly. The floor was in good condition, and was fully occupied for every number. Excellent music was furnished by the Firemen's ochestra of four pieces. Supper was served by the ladies of the English church, and everyone was equally satisfied with the good things to eat. Visitors were present from Boundary Falls, Phoenix and Mother Lode. The ball was brought to a close about 2 a. m., and all present declared themselves well pleased with the evening's entertainment.

Corporation of the City of Greenwood

PUBLIC NOTICE.

Is hereby given to the electors of the Municipality of the City of Greenwood that I require the presence of the said electors at the City Hall, Greenwood, on the 12th day of January, 1903, at 12 o'clock noon, for the purpose of electing persons to represent them in the Municipal Council as Mayor and Alderman.

Further notice is also given that nomination for one School Trustee will be held at the same time and place and an election, if any, will take place at the same time and be under the same regulations as that for Mayor.

The mode of nomination of candidates shall be as follows :

The candidates shall be nominated in writing; the writing shall be subscribed by two voters of the municipality as proposer and seconder, and shall be delivered to the Returning Officer at any time between the date of the notice and 2 p. m. of the day of the nomination, and in the event of a poll being necessary, such poll will be opened on the 15th day of January, 1903, at the City Hall, Greenwood, of which every person is hereby required to take notice and govern himself accordingly.

Sec. 14.—The Council of every City Municipality incorporated after the 23rd day of April 1902, and of every City Municipality hereafter incorporated, "Shall consist of a Mayor and not more than nine nor less than five Alderman

a. After the first municipal election the persons qualified to be nominated for and elected as the Mayor of such city shall be such persons as are male British subjects of the full age of twenty-one years, and are not disqualified under any law, and have been for the six months next preceding the day of nomination the registered owner, in the Land Registry Office, of land or real property in the city of the assessed value, on the last municipal assessment roll, of one thousand dollars or more over and above any registered incumbrance or charge, and who are otherwise duly qualified as municipal voters :

b. After the first municipal election, the persons qualified to be nominated for and elected as aldermen of such city shall be such persons as are male British subjects of the full age of twenty-one years and are not disqualified under any law, and have been for the six months next preceding the day of nomination the registered owner, in the Land Registery Office, of land or real property in the city of the assessed value, on the last municipal assessment roll, of five hundred dollars or more over and above any registered incumbrance or charge, and who are otherwise qualified as municipal voters.

Last issue March 23

The St. Andrew's Society of Greenwood has arranged for the appearance of Gavin Spence and Flora Macdonald at the Auditorium on Monday, January 12th. The gifted entertainers were here last year and were so thoroughly appreciated by those who heard them that a bumper house is sure to greet them.

"Did you hear about Gilson? He proposed to Miss Wantim while they were bathing in the surf."

"Did she accept him ?"

"No ; as the words fell from his lips he was carried away by the undertow."

"Not drowned ?"

"Oh, no ; nothing serious."

"What a timely rescue !"

"Yes, that's what he said !

NOTICE TO CONTRACTORS.

SCHOOL, EHOLT.

SEALED TENDERS, indorsed "Tender for School House" will be received by the undersigned up to noon of Monday, the 8th December, 1902, for the erection and completion of a one-room frame school house at Eholt.

Plans, specifications, forms of tender and contract may be seen on and after the 24th November, 1902. at the office of the Government Agent, Greenwood, and at the Lands and Works Department, Victoria.

Tenders will not be cousidered unless made upon the printed forms supplied for the purpose and the agreement to execute a bond appended to the forms of tender is duly signed by the contractor himself and two other responsible residences of the Province in the penal sum of $350, for the faithful performance of the work.

The lowest or any tender not necessarily accepted.

W. S. GORE,
Deputy Commissioner of Lands and Works.

MINERAL ACT.
Certificate of Improvements.
NOTICE.

BOSTON Mineral Claim, situate in the Kettle River Mining Division of Yale District. Where located : On Canyon Creek, Main Kettle River.

TAKE NOTICE that we, Felix Darragh and William Dacey, Free Miners Certificate Nos. 61,357 and B30.388 respectively, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

CHAPTER 40.

An Act to amend the Liquor Licence Act 1900, "1900 c 18."

[21st June, 1902.]

His Majesty, by and with the advice and consent of the Legislate Assembly of the province of British Columbia, enacts as follows:

1. This Act may be cited as the Liquor License Act (1900) Amendment Act, 1902.

2. Section 37, of chapter 18 of the statutes of 1900, being the "Liquor License Act 1900" is hereby repealed, and the following substituted therefore,

"37. No license under this Act shall be issued or transferred to any person of the Indian race, or to any person who is not on the list of voters for the Legislature of the province of British Columbia."

Have you made any New Year resolutions ?
Are you going to keep them ?
Perhaps you are not .
Plenty of them have been broken
You can make one that is easily kept.

No man can afford to not dress well
Even in Greenwood,
Why not resolve to get a new suit ?

You can get what you want at home,
Elson the tailor can supply you
And guarantee satisfaction.
Remember the name and place

FRIDAY JANUARY 2, 1903.

1903.

The Boundary Creek Times wishes all its readers a large share of happiness and prosperity during the year which Father Time has just ushered in. It is unwise and unprofitable to make prognostications for the year. The signs of the times are very illusive. Circumstances which are least expected and cannot be foreseen combine to knock awry all our estimates. Although the outlook never looked more promising we have a distinct recollection of making the same statement on previous occasions and a measure of disappointment has been the result. After all, it would not be good for us if there were no "downs" in life. It would be idle to expect nothing but smooth sailing.

The record of the past year however gives a great measure of hope for the future. The mining industry has thrived despite obstacles that combined for failure and disaster. Low prices for copper, shortage of fuel, unstable government and a general feeling of doubt and distrust all militated against the prosperity of the Boundary district. But notwithstanding all these antagonistic forces, the industry developed and expanded into enormous proportions and no one is discouraged. Next year, the output of the mines can be easily doubled and arrangements are being made with that end in view. When it is considered that in three years, the mineral output of the Boundary has been nearly one million tons, and that notwithstanding the setbacks referred to, a substantial increase was made in 1902, there is no excuse for lack of faith in the future.

During 1903 there will be some big movements in railway circles and the Boundary district will not be overlooked. Mr. Hill intends continuing his system into the Boundary mining camps. This will give employment to a large number of men and will give a period of good business during which the mines and smelters will increase their forces and bring a sure and permanent business to the Boundary towns.

Municipally, Greenwood takes a leading place among the cities of the province. Financially, it is safe to say there is no city in a better position. During the last two years, no great enterprises were undertaken by the municipality, but a united effort was made to get the city finances into good shape. The floating indebtedness has been practically wiped out, the bonded indebtedness has been increased by only $5,000, the streets have been improved, the water works extended, side walks laid and the ordinary expenditure incidental to municipal government has been met. Notwithstanding dull times, something has been accomplished without increasing taxation; in fact a slight reduction was made in 1901 and a further reduction in 1902. The municipal house is in good order and ready for a larger business when the proper time comes.

In provincial matters, there is some hope that during 1903 something will be done. North Victoria has spoken; West Yale will speak if given an opportunity. A general election is likely to secure for the province a sound, stable business government.

Taking everything into consideration, the year is full of promise. Much depends upon the character and determination of the people who are building up this district and province. After all

The fault, dear Bruturs, is not in our stars
But in ourselves, that we are underling.

A Taxation Tangle.

At the meeting of the city council on Monday last a resolution was passed asking the attorney-general to defer action in the matter of selling crown granted mineral claims within municipalities for unpaid taxes until an amendment could be introduced in the legislature dealing with this matter. As has already been pointed out original owners of crown granted mineral claims secured the surface rights and subdivided into town lots. A great many of these have been sold. Not deeming the mineral rights of sufficient importance they do not care to pay taxes and are prepared to let their titles lapse. The result might be prejudical to numerous owners of lots and efforts is being made to secure an amendment to the mineral act exempting unworked crown granted mineral claims within municipalities from taxation.

Rev. Father J. Chinanale S. J., professor of Philosophy at Couzaga College Spokane, was the guest of Rev. Father Bedard Wednesday and Thursday this week. He preached an eloquent sermon in the Sacred Heart church at the 10 o'clock mass, New Year's Day and in the afternoon reached Grand Forks on his homeward journey.

Rev. J. A. Bedard shall hold service in Phoenix next Sunday and on the day of the Epiphany of our Lord the 6th inst.

WHEN OUGHT WE TO GO TO A DENTIST?

Many think it unnecessary to devote particular attention to the teeth until the appearance of the mouth is affected by damaged, decayed or broken teeth. Others give the teeth no attention till pain compels them.

The stupidity and shortsightedness of either policy is evident.

Everyone who thinks a moment on the subject knows that food cannot be masticated satisfactorily if one or more teeth are tender, inflamed, decayed, or otherwise out of working order; and if this be the case, the mouth requires immediate attention.

PHOENIX WINNER

Men From Dinner Bucket Town Victorious.

IN THE CURLING BONSPEIL

Well Contested Matches at Local Rink.

"Soop her up", "Don't look at it", "All the way", and then a series of most fiendish yells were the main feature of the curling games New Year's day between Phoenix and Greenwood, when the boys from the hill got away once more with the picked teams of the home club. Four rinks curled and Phoenix won by a total of seventeen points. At times some fair curling was done, but in the evening the ice became somewhat sticky and nice curling was out of the question.

In the afternoon F. F. Ketchum and C. E. Mereitt succeeded in holding down Messrs Crawford and Hardy of Phoenix, but in the evening Phoenix won by a handy margin.

The rinks and results of the games in the afternoon were as follow.

Greenwood	Phoenix
D. A. Macdonald,	J. Morrin,
E. G. Warren,	W. J. Porter,
J. M. Humphrey,	R. Scott,
F. F. Ketchum,—12	T. J. Hardy—11
K. C. B. Frith,	G W Rumberger

A. D. Hallett,	Norman Slack,
Rev. A. O. MacRae,	O. B. Smith,
J. A. Russell,—13	Dr. Boucher—14
Total 41	Total 38

After the afternoon games, the Greenwood boys entertained their Phoenix guests at the Imperial: where Messrs Grahm & Parry did everything possible to make things run smoothly. The Phoenix boys started for home about 11.30, but as we go to press we are unable to learn as to whether they have all arrived or not.

NOTES

Phonix has a poor mascot in Judge Williams.

Ask Bouch about that running shot of Smith's.

How about those two goose-egg ends in the Boucher-Russell game?

Don't mention Ketchum's last shot to Skip Hardy or Mascot Williams.

It transpired that Boucher and Merrit took all that was coming to them in the way of flukes.

Hardy: "Ketchum don't have to take ice from anybody."

Talk about a flying wedge, it is not in it with Boucher's final shot in a well gaurded end.

Committed For Trial.

Mike O'Donnell Pays For Xmas Celebration.

Mike O'Donnell who celebrated Christmas morning by breaking into P. Burns & Co's butcher shop and extracting a few choice turkeys therefrom appeared before Magistrates I. H. Hallett and Geo. Arthur Rendell on Monday last. He pleaded guilty to the charge of extracting turkeys from the Burns market but confessed an entire ignorance of further thiefs. He was committed for trial and taken to Grand Forks to elect; chose speedy trial and will appear before Judge Leamy early in the year.

Strong circumstantial evidence connects Mike O'Donnell with crimes more serious than purloining turkeys on Xmas morning.

On Christmas eve., whilst a Christmas tree and dance were in progress at the Mother Lode the company's mine office was entered and about $8 belonging to the mine clerk was stolen from a pocket in his clothes hanging up in his room adjoining the office. Before the dance commenced O'Donnell excused himself from going for the reason that he had no money, but when the boys returned to the bunkhouse they found him with a couple of bottles of whiskey in his possession. He appears to have then made an early trip to Greenwood, for about six o'clock the Burns premises were entered and some dressed turkeys and geese stolen. Some whiskey, a lot of cigars and a little money had already been abstracted from the St. Charles hotel, Greenwood. O'Donnell returned to the mine, and he is stated to have there admitted that he had some whiskey and cigars "eached" and offered one of the men half the proceeds if he would collect from the Hotel Norden the money for the turkey he had sold there. Next morning he did not go to work, and when his roommate returned on coming off shift he found that O'Donnell had drawn his time, cashed his time check and gone to Greenwood. Thinking his sudden departure suspicious the roommate, Chas. Vaughan, looked to see whether his money was safe in his room, but found that it had been taken. As near as he could tell he had about $50, all of which had been stolen. The next known of O'Donnell was his hiring a rig and driving to Eholt, where he evidently got to work at once for some clothing was stolen from John Holmes at Kaiser's hotel, and the same night the cash drawer at the C. P. R. station was broken open and the cash—only a small amount, fortunately—taken. O'Donnell had during the evening left a grip at the railway station and, suspicion having fallen upon him, this was opened and Holmes things found in it. Provincial Constable Darraugh was telephoned for and upon his arrival at Eholt he took O'Donnell into custody and escorted him to Greenwood to the city lock-up.

Telegraph Line Sold

Spokane & Northern Acquired by Great Northern

The Spokane & Northern Telegraph Company has been purchased by the Great Northern and taken over on January 1st. When D. C. Corbin sold the Spokane Falls & Northern railway to the Great Northern, he retained the Telegraph system connected therewith and extended to Republic and Greenwood. The telegraph system was in charge of Austin Corbin II with Mr. Michaels as superintendent. It must have been a paying investment as a large business was transacted at Nelson, Rossland, Grand Forks, Republic, Greenwood and at several point along the line railway. As the Great Northern is extending its railway system to all points included by the telegraph lines, a sufficiently flattering offer was made to Mr. Corbin to induce him to part with the telegraph line. Mr. J C. Helm retains charge of the office here.

The regular monthly meeting of the Greenwood Curling club will be held next Monday evening.

Having purchased a full car of Creamery Butter we are prepared to give lowest quotations in this line.

The Building Trade.

Important Buildings Added to Improvements in Greenwood.

The building trade was fairly active during the past year. The principal buildings were the new public school, which when fully completed will cost $10,000 and the court house, the work which is under way will cost the same amount. Additions and improvements to the Sacred Heart Hospital costing about $4,000 were made. A handsome residence for W. G. McMynn, the government agent was completed at a cost of $3,000; a $7,000 hote was erected at Anaconda for Jno. W. O,Brien. At the Greenwood smelter new ore bunkers and other improvements cost in the neighborhood of $10,000. Several smaller buildings were also erected.

The Riverside Livery stable for A. G. Davis & Co., and the Pacific for Bannerman & Lewis were also erected.

T. B. Winnett also added to the appearance of the city by the erection of a two-story brick dwelling house, costing $3,000.

Duncan Smith of Smith Bros., was in the city this week. His firm has just completed a large public school at Revelstoke. Mr. Smith will move his family to Greenwood in a few days and active work will be resumed on the court house as soon as the weather moderates.

Canadian Customs

Amount Collected at Local Office During Year.

During the year there was collected for Customs at the Greenwood office $12,160.39 and for Inland Revenue $10,227.26. At both Grand Forks and Cascade the amount collected for Customs was unusually large on account of the construction of the Great Northern Railway to Republic and the installation of a large power plant by the Cascade Power & Light Company. At Cascade the customs for the 11 months ending November aggregated $15,000 and at Grand Forks $21,400. For the same term the customs at Midway were $2000, Sidley $816, Fairview $600 and Keremeos $250. The Inland Revenue of Grand Forks amounted to $5,984.

The St. Andrew's Society of Greenwood has arranged for the appearance of Gavin Spence and Flora Macdonald at the Auditorium on Monday, January 12th. The gifted entertainers were here last year and were so thoroughly appreciated by those who heard them that a bumper house is sure to greet them.

Boundary Leads Them All

Continued from First page.

by works these were for a comparatively new district extensive and costly. At the close of 1901 there were but three furnaces in operation, two at the Granby [illegible] at Grand Forks and one at the B. C. Copper Co's [illegible] Greenwood. [illegible] were added at Grand Forks, [illegible] Greenwood, whilst the M[illegible] & Boston Copper company secured possession of the then incomplete smelter situate at Boundary Falls, added to its buildings and equipment and put its single furnace in blast. These additions give a total of seven furnaces available for the reduction of ore and a daily treatment capacity under ordinarily favorable conditions of between 2,200 and 2,300 tons each 24 hours. A second furnace is being installed at Boundary Falls, and it has been announced that the Granby company is arranging for the increase of its number to six. Additions will probably be made as well, to the furnace capacity of the Greenwood smelter, but no definite arrangements to this end have yet been announced.

TheGranby company's additions and enlargements, commenced in 1601 and completed early in 1902, were asfollows: The power-generating plant was first increased to a total of 1,109 horse-power developed, 250 H. P. being for the use of the city of Grand Forks. Two more triplex pumps were added, each capable of supplying 750,000 gallons of water per diem for granulating slag and for water jackets, etc. Another No. 8 Connersville blower was placed in the blower room, making four in all, or one for each furnace. The dust flue was extended 200 feet. The main furnace room was enlarged by the addition of a building 84x82 feet, providing room for the fifth and sixth furnaces it is planned to shortly put in. A second sampling and crushing plant was installed with a No. 5 Gates crusher, automatic sampler, rolls etc., the whole housed in a building 70x70 feet and 65 feet to its highest part. The ore bins were added to and the storage capacity of these increased to about 10,000 tons. A steel fire-proof structure was erected about 100 feet away from the furnace building, dimensions 260x68 feet with the main part 45 feet high. In this were placed two stands of converters, of the horizontal barrel type, each provided with three shells 72 inches in diameter by 100 inches in length, and each stand having a capacity of 50 to seventy tons of matte daily. A 25-ton reverberatory tilting furnace, a 40-ton electric travelling crane with 40-foot span, a quartz crushing plant and grinding pan for mixing converter linings, three mould carriers operated by a hydraulic ram, and other appliances are in this building. The space between the converter building and the furnace room is covered in and a 10-ton electric crane with 24-foot span travels between the two carrying the matte ladles. Behind the converter building is an engine room, containing a blowing engine for blowing the converters, hydraulic pump furnishing the pressure to operate machinery in the converter building, electric motors, and other plant. A briquetting plant, for compressing the flue dust into bricks for re-smelting was also obtained.

At the Greenwood smelter, besides the installation of a second blast furnace, additions were made to ore-bin accommodation increasing the storage capacity to about 12,000 tons, ore bins and tramways were roofed in, a third railway track run through the works, facilities for water supply enlarged, and other additions and improvements made. A slag elevator is now being put in, to facilitate the disposal of the granulated slag. At Boundary Falls the sampling plant has been added to, building and railway track accomodation considerably extended, and now more steam power and another blower are being obtained to meet the requirements of two furnaces instead of one. The matte from both Boundary Falls and Greenwood smelters is converted into blister copper at Grand Forks thus effecting a considerable saving in railway freight as compared with the cost of transporting the whole of the matte instead of only its copper and other valuable content to eastern refineries.

NEW MINE MACHINERY.

Extensive Additions Made to Existing Large Mining Plants.

Power equipment at the mines either has had or is having noticeable additions made to it in several instances. As in the case of the smelters, the Granby Company leads in this connection, so far as the year under review is concerned. For its mines at Phoenix an order was placed last spring for two duplex tandem compound Rand air compressors, cylinders 16 in. by 36 in. and 28 in. by 36 in., to have a capacity of 8,200 cubic feet of free air at 80 revolutions per minute; high and low pressure cylinders connected by a Rand water tube intercooler. Weight of compressor, 300,000 lbs, and capacity 5[illegible] 3¼ in. Rand drills at an altitude of 5,000 feet. Approximate horse power [illegible] and motive power electricity. Included in the order was an after-cooler, rope drive with 10,500 feet of rope, 20 3¼ New Giant drills, a 72 in. by 20 ft. air receiver and six small receivers, and a 10 ton travelling crane. The Westinghhouse Electric and Manufacturing Company received an order for two 700 horse power induction motors for driving the compressor. A 12 by 18 Jenckes two-cylinder hoist, with drum 60 in. by 48 in., long, fitted with Lane's patent clutch, raw hide pinion and cut gear, was obtained for use at No. 2 shrft. The Ienckes Company alsp supplied a 14-3 Farrel-Bacon improved ore crusher, 36 in. by 42 in. fitted with chilled iron jaw plates, swing jaw and yitman, having a course crushing capacity of 150 tons (approximate) per hovr. To drive this crusher a 100 horse power electric motor has been obtained from the Canadian General Electric Company, which also supplied the transfo3mers to convert the voltage of the Cascade Power Company to that of the mining company. Mine buildings, railway trackage and the general equipment of the mines have been increased correspondingly.

The Snowshoe mine purchased an electric hoist and the first half of a Rand-Corliss 30-drill air compressor. The latter machine has a working pressure of 125 lbs. and is a combined engine to be driven by either steam or electricity. With it are two 80-horse power horizontal return tubular boilers, having a working pressure of 150 lbs. these being the first of this class brought into the district. Railway facilities, building accommodation and general plant were also added to at the Snowshoe. The Mother Lode was already equipped with a cross-compound condensing Coliss-valve Ingersoll-Sargent air compressor having a capacity of 30 to 40 drills. with two 80-horse boilers to supply power, and a Jenckes' double cylinder, Corliss valve, first motion hoisting engine, cylinders 22 by 42 ft. and drums six feet diameter, with two 80-horse power boilers to furnish steam, so the most important addition made was to its machinery was a 24 by 36 in. 14B Farrel improved crusher, fitted with manganese steel jaw plates, steel swing jaw and pitman, capacity 65 to 80 tons per hour crushed to a size not exceeding five inches and a 16 by 20 in. plain slide-valve engine to drive same. A Jeffry elevator, with a chain of 20x9x12 buckets, to lift the ore from the crusher pit to the ore bins above the railroad track, and a 250-Light Westinghouse dynamo, with a 25-horse power engine and a full complement of arc and incandescent lights, were other additions to the Mother Lode equipment. A small power plant was put in at the Emma mine, and additions to plant and machinery were also made at other mines

Corporation of the City of Greenwood

PUBLIC NOTICE.

Is hereby given to the electors of the Municipality of the City of Greenwood that I require the presence of the said electors at the City Hall, Greenwood, on the 12th day of January, 1903, at 12 o'clock noon, for the purpose of electing persons to represent them in the Municipal Council as Mayor and Alderman.

Further notice is also given that nomination for one School Trustee will be held at the same time and place and an election, if any, will take place at the same time and be under the same regulations as that for Mayor.

The mode of nomination of candidates shall be as follows:

The candidates shall be nominated in writing; the writing shall be subscribed by two voters of the municipality as proposer and seconder, and shall be delivered to the Returning Officer at any time between the date of the notice and 2 p. m. of the day of the nomination, and in the event of a poll being necessary, such poll will be opened on the 15th day of January, 1903, at the City Hall, Greenwood, of which every person is hereby required to take notice and govern himself accordingly.

Sec. 14.—The Council of every City Municipality incorporated after the 23rd day of April 1902, and of every City Municipality hereafter incorporated, "Shall consist of a Mayor and not more than nine nor less than five Alderman

a. After the first municipal election the persons qualified to be nominated for and elected as the Mayor of such city shall be such persons as are male British subjects of the full age of twenty-one years, and are not disqualified under any law, and have been for the six months next preceding the day of nomination the registered owner, in the Land Registry Office, of land or real property in the city of the assessed value, on the last municipal assessment roll, of one thousand dollars or more over and above any registered incumbrance or charge, and who are otherwise duly qualified as municipal voters:

b. After the first municipal election, the persons qualified to be nominated for and elected as aldermen of such city shall be such persons as are male British subjects of the full age of twenty-one years and are not disqualified under any law, and have been for the six months next preceding the day of nomination the registered owner, in the Land Registery Office, of land or real property in the city of the assessed value, on the last municipal assessment roll, of five hundred dollars or more over and above any registered incumbrance or charge, and who are otherwise qualified as municipal voters.

G. B. TAYLOR, Returning Officer.
