Legislature Library 1901

## RICH PROVIDENCE ORE

### Big Returns From The Trail Smelter—Less Than 44 Tons Net Over $6,300—Getting Ready to Make Regular Shipments.

William Fowler and his associates have received from the Trail smelter a cheque for $6,367.51 being the net proceeds from shipments of Providence ore aggregating 87,504 pounds, or 43 3-4 tons. This gives an average value of over $145 to the ton.

The several shipments were made with a view to ascertaining whether there would be any advantage in sorting the ore, but it was discovered that the values given by the smelter from all grades were so satisfactory that subsequent shipments will be made from the ore as it comes from the mine. Mr. Fowler is well satisfied with the returns and the treatment received from the smelter officials. They could not have been more courteous and their treatment of these trial shipments was satisfactory in every way.

The greater values are to be found in the silver. An average assay gives .61 ounces in gold, 525 ounces silver and 11.30 per ct. lead.

It is now about nine months since Mr. Fowler, an old timer, returned to his first love, Providence camp. He secured a lease and working bond on the Providence, a claim which since the time of its location, he always believed would make a valuable mine. He worked along confident that his opinion was not in error. A sufficiently promising showing was made to induce W. M. Law, J. A. Russell, J. J. Caulfield and W. Macey to take an interest in the property and the big cheque from the Trail smelter is the first proof that their investment was an exceptionally good one.

Mr. Fowler has been doing a large amount of work preparatory to steady shipments. On the brow of the hill is a shaft down 85 feet and in ore. One hundred feet lower down is another shaft 60 feet deep and in ore. At a distance of 155 feet from this second shaft a tunnel was begun into the hill. This tunnel will tap No. 2 shaft at 60 foot level and No. 1 at 100 feet. This tunnel is also in ore. The hill has been stripped from the collar of the first shaft to the mouth of the tunnel and the ledge exposed the entire distance.

From this tunnel large quantities of ore can be shipped.

Values as high as $40,000 to the ton can be secured at the Providence. In the No. 2 shaft particularly, ore of exceptionally high value can be found. The satisfactory smelter returns have not only been gratifying to the owners of the Providence but have also encouraged those leasing other high grade properties in the vicinity.

## Local and Personal.

The city schools were reopened on Monday last.

F. N. Hubbitt, a mining engineer of San Francisco, is in the city.

The War Eagle and Centre Star at Rossland have resumed shipments on a large scale.

Mayor Naden and D. C. McRae made a flying trip up the Main Kettle river this week.

Thos. Pickart of the Arlington hotel is enjoying a vacation at St. Leon Hot Springs.

Geo. C. Hodge, superintendent of the V. & N. is here to remove the central office to the Mellor block.

Frank Sears a Grand Forks merchant and D. Whiteside a barrister of the same place were in the city this week.

D. Manchester of the Queen's hotel has located a claim near the Gold Finch and has a fine showing of high grade ore.

The Chicago and British Columbia Mining company, owning the Lake in Skylark camp, has been registered as a British Columbia company.

Mrs. H. L. Johnson and two children have returned from an extendad visit to New Brunswick and Boston. Mr. Johnson went out to Kootenay Landing to meet them.

William Rowe, foreman of the Jewel intends moving his family to Greenwood so that the children may go to school.

W. R. Brock of the Canadian Geological department who is doing field work in this district was in from the hills this week.

H. F. Stowe of the Bank of B. N. A. staff left on Saturday for Vancouver where he will be assigned to a position in some other branch of the bank.

Rev. J. G. Shearer, B. A., general secretary of the Lord's Day Alliance addressed a small meeting in the Presbyterian church last Wednesday evening. After the meeting the Greenwood branch of the alliance was reorganized.

Messrs. Sutherland and McDonald who have a lease on the Gold Finch up the gulch above Greenwood are getting out large quantities of high grade ore. They are working two shifts of four men each. The shipments of Gold Finch ore to the Trail smelter have netted over $100 to the ton.

D. J. Sullivan and M. Kane nave secured a working bond on the Defiance in Providence camp and are at work sinking on the vein. The Defiance is one of the first locations in Providence camp and has the record for shipping the highest grade ore that ever left the Boundary country.

Special meetings will be held at the Salvation Army Barracks, Saturday, Sunday and Monday, August 23, 24 and 25th led by Ensign Andrews of Spokane. Saturday evening will be a majic lantern service, subject: "The Salvation Army in the Klondyke."

## From Old McGill

### Prof. Stansfield Visited The Boundary District.

Dr. A. Stansfield, professor of Metallurgy at McGill University, Montreal, Quebec, left by yesterday afternoon's train for Nelson, after having visited the larger smelting works of the Boundary district. He was at the Granby smelter early in the week and on Wednesday came to Greenwood. He brought letters of introduction from Dr. J. Bonsall Porter, professor of mining at McGill, who was in charge of the McGill summer mining school when the mining students of the uniqersity visited the Boundary last summer, so received every courtesy in the direction of accomplishing his purpose of familiarisIng himself with the smelting practice so successfully followed in the Boundary.

Dr. Stansfield is a comparatively recent arrival from England, his appointment to McGill having been made but a few months since. For two months he has been travelling through the leading smeltiug districts of the United States, having proceeded from Montreal to Boston, New York, Philadelphia and other large cities, and gone thence to the smelting centres of Utah. Colorado and Montana. He came to British Columbia via Victoria and is now hastening back to Montreal to prepare for the approaching fall and winter term at McGill.

Although too fully occupied with the metallurgical works to admit of his devoting much time to visiting mines Dr. Stansfield accepted the invitation of Mr. Frederic Keffer, M. E., to look over the B. C. Copper comprny's Mother Lode mine, where he was much interested in big ore bodies and in the inexpensive method of mining and crushing the ore that is solving the question of how to profitably work the low grade ores of the Boundary.

## The City Council.

At the regular meeting of the city council on Monday evening arrangements were completed for the exchang of school and court house sites with the provincial government. A resolution was passed authorizing the mayor and city clerk to sign the necessary deeds. Another resolution was passed asking the school trustees to include in the call for tenders for the erection of the school building a condition that no tender will be considered from any contractor not holding a city license. The street committee reported that good progress was being made with the work of grading Louisa street. Arrangements are being made for the continuation of the waterworks to the new school and along Kimberley Avenue. The Canadian Pacific railway company intended tapping this line and using the water for their tank. Heretofore the company pumped water from Boundary creek.

## The Smelters.

The Greenwood smelter will be blown in on Monday next. The smelter has a fairly large reserve of coke and shipments from the Crow's Nest are coming in rapidly. The Granby plant will also resume operations the first of the week. The Sunset smelter will not blow in until the return of Mr. Goodell from Montreal. He expects to reach here about September 1st. The Sunset smelter is getting considerable coke.

It looks as if the Fernie trouble was going to break out again. The men hold that Manager Tonkin has broken faith with them by reducing wages and unless the old scale is restored they will strike again as soon as the two months armstice is ended.

A special meeting of the Greenwood Curling Club will be held at the residence of K. C. B. Frith, Long Lake street, next Monday evening, at 8:30 o'clock, for the purpose of discussing the advisability of organizing a joint stock company to erect a combined curling and skating rink. A full attendance of members is requested as building should be commenced in the immediate future, if the company can be successfully organized.

## HE WAS ENTHUSIASTIC

### Mr. W. W. Slater, Managing-Director of the Scottish Colonial Gold Fields, Eloquently Expresses Confidence in British Columbia Investments.

"There is plenty of capital in the old country seeking investment. My associates and myself have already invested a very large snm of money in mines in British Columbia and the various other colonies. All we ask is a fair show for our money. Political conditions have prejudiced the English investor against British Columbia investments and the Whitaker Wright fiasco has strengthened that prejudice. But your country is all right and you have untold wealth in these hills. I am going back to tell my friends to put more money in British Columbia mines. I have every confidence that everything will come out all right and that you will have here one of the greatest and most prosperous mining countries in the world."

The speaker was Mr. W. W. Slater managing-director of the Scottish Colonial Gold Fields, Limited, owning the Idaho and Salamo mines in the Slocan country. These two mines have already paid over $500,000 in dividends and are considered to be the largest silver-lead properties in the Kootenay. Mr. Slater is also chairman of the board of the Jewel Gold Mines, Limited, and he came out here to examine the property with a view to inquiring into the practibility of installing a cyanide plant so that the property may be worked on a large scale. It was his first visit to the Jewel, and in company with S. F. Parish, E. J. Wilson and other mining men he spent Tuesday underground at the property. He was greatly pleased with the splendid showing there and in all probability he will advise his company that the property fully warrants the erection of a large plant.

Mr. Slater, in addition to being a canny Scotsman, is an ardent Imperialist and is enthusiastic over the mother country and the colonies combining together for the purpose of increasing the prosperity and prestige of the greatest empire in the world. He is too Scottish however to allow sentiment to interfere with business and too imperialistic to allow English or Scottish capital to be invested in foreign countries it there is reasonable assurance that equal returns can be secured in those countries that are proud of the old flag and whose subjects sing "God Save the King" as enthusiastically as do the people at home. So he is ever in search of information regarding the possibilities in the colonies. While here he expressed a desire to meet some of those interested in the mining industry so that he would have an opportunity to learn their views. On Tuesday evening he was the host at a charming dinner given at the Hotel Armstrong. His guests inclnded some of the prominent mining men of the distrct. The dinner itself was one of those tasty affairs which helped to establish the now wide reputation of the Armstrong, The toast list was an informal one, but it produced some capital after dinner speeches. Mr. Slater is an eloquent and forcible speaker. Still a young man he is almost sure to make a name for himself in the old country. He listened attentatively to the views of the different mining men who all assured him that although we are suffering some of those ills that are more or less incident to the development period in every new mining country still no investor would need to fear the result. Mr. Slater's reply breathed encouragement to all who are anxious to see this province developed. After referring in any interesting way to political conditions at home and in this province, he turned his attention to the amount of mutual benefit that would accrue from more intimate business relations between the mother country and her colonies. In an eloquent peroration he pointed out that it was the duty of every good Briton to help in bringing about those close relations and so long as he and his associates were treated fairly they would do everything they could to develop the resources of this great province.

Mr. Slater left on Wednesday for Vancouver accompanied by W. O. Wright. the Jewel company's accountant. He will remain at the terminal city a few days before returning to England. At Nakusp he intended meeting his company's Slocan manager Geo. W. Hughes and discuss matters relating to Idaho and Alamo with him.

## A Big Fire.

About 9:30 Wednesday evening a large fire supposed to be at Ferguson's gardens drew a big crowd from the city anxious to assist King Fungus in saving his house and home. Fortunately the fire was found to be in unused log buildings immediately to the rear of Mr. Ferguson's place. The buildings were formerly used by J. Knowles when he ran a dairy here. Mr. Ferguson wishes to thank all those who went out to his place thinking thai he was the victim.

Paul Johnson and wife have returned from a holiday trip to the coast.

The fall sitting of the court of assize will be held in Greenwood on October 27th.

The handicapped tennis tournament under the auspices of the Greenwood tennis club begins Saturday.

James Kerr and wife and Thos. McDonnell and wife have returned from visiting friends at Colville.

John Houston, M. P. P. will issue the first number of the resurrected Tribune this week. It is reported that F. J. Deane publisher of the Nelson Daily News intends to continue that excellent paper and will make it warm for the commercial agencies which were premature with obituary notices.

D. C. McRae has taken a unique photograph of the Boundary district. From a high elevation in South Deadwood camp he turned his camera northward and succeeded in securing a distinct view of both Greenwood and Phoenix and the intervening territory. It is not often that two cities five miles apart in a mountainous district can be taken by a camera in one view.

Provincial constable George Cunningham has returned from New Westminister whence he took an old man named Charles Duebauer, who had been sent from Camp McKinney to Greenwood for medical treatment. Two doctors having certified to his insanity, he was committed to the provincial asylum for the insane on the order of police magistrate I. H. Hallett The old man appears to be rational enough on many subjects but is possessed of a hallucination which convinces him tnat Chinamen are doping his food.

## Fonnd Drowned.

The body of C. Dordeau was found in Loon Lake between the B. C. mine and Eholt, Thursday afternoon. The body which was fully dressed was found near the centre of the lake. Dordeau was a French-Canadian about 23 years of age. He was a wood cutter and lived at Eholt for several months. Corner Foster is holding an inquest this (Saturday) morning.

## THE RIGHT SPIRIT.

It is delightfully refreshing to listen to the views of men like Mr. Slater. The average old country investor apparently had a string tied to every dollar he sent out here. He waited for a short time, pulled the string and when he found that there were not two dollars tied to it, he immediately came to the conclusion that the country was no good, that its politics were bad and that it was afflicted with several other ills. Mr. Slater is an ardent imperialists who although not allowing sentiment to affect his business, believes all other things being equal, what is known in the old country as the colonies should receive preference in the investment of capital. He is possessed of a lot of Scotch sense and realizes that every new country must have its period of political unrest and experimental legislation. All he asks is a fair show for his money and if he does not meet with success, he will blame neither the country nor its people.

After all there has been too much made abroad regarding the evils that beset us. The eight hour law doubtless disarranged the mining industry for a time but it never could be so serious a blow to mining as Old Country people were led to believe by their representatives in this country. The two per cent tax is unfair and inequitable. It is an easy way for a weak and impecuanious government to raise a small amount of much needed money. People do not quarrel with its severity so much as with its inequality. One big mining company could pay almost the entire amount raised in this way without seriously crippling it. While the tax should be immediately repealed and a fair method of taxation introduced, it is idle to say that this tax can seriously retard the development of the illimitable mineral resources of this great province.

It is quite true that Whitaker Wright and his gang have dealt a serious blow to mining in British Columbia but there has been wild catting and rascality in other mining countries and they survived.

The minerals are here; the facilities for the cheapest possible treatment of ores are here; the best climate in the world is here; laws that protect life and prosperity are here and those vexatious barriers that meet the investor in every mining district in all parts of the world will soon disappear.

What we want is men like Mr. Slater with plenty of Scottish grit, plenty of money, plenty of common sense, plenty of confidence and who is always willing to take a sporting chance when he invests his capital.

## A TUNNEL LAW.

Capt. Gifford until recently manager of the Hall mines at Nelson, in an interview at the coast made a valuable suggestion in reference to the mining industry. He said that a tunnel law would be of the greatest benefit in many districts. A mining company in its operations is confined within the limits of its own particular claim. It is often difficult and expensive to follow the ore, while a tunnel run from some convenient point might tap several veins of ore in different properties and this ore could be more cheaply handled through the tunnel than any other way. Capt. Gifford suggested that a law which would enable tunnel companies to make contracts and share profits with claim owners would be a great boon to the country and would be the means of discovering large ore bodies which under present methods will never be touched as ore chutes often do not outcrop but would be encountered by crosscutting.

Some years ago an effort was made to organize a tunnel company to run from Greenwood to Phoenix, but the project was abandoned. With such a law as Capt. Gifford suggests, there would be additional encouragement to carry out the scheme as bodies of high grade ore would surely be encountered between here and Phoenix.

The Midway Dispatch is greatly exercised over the fact that the Greenwood Board of Trade is alive and kicking. The Dispatch should remember that in these growing times, it is better to make mistakes than do nothing.

## Have Filed Plans.

### V. V. & E. Filed Plans For Main Line to Similkameen.

The Victoria, Vancouver and Eastern railway have filed plans at Ottawa for the continuation of their road from Midway to the Similkameen. The company intends pushing the construction of this portion of the road as soon as the railway committee of the privy council gives its consent. The cry was raised by the opponents of this road that the company did not intend to build a main line and the piece between Cascade and Carson was simply for the purpose of securing a way of building to Repnblic. When the company made application at Ottawa for permission to build a branch line to the Granby smelter, the minister of railways held that a branch line could not be built from a main line which did not exist and held up the application. Now that the company have shown at least an earnest of their intention by filing plans for the continuation of the road westward, it is possible that the objections to a company building railways without public aid of any kind will be removed.

And further take notice that action under section 37 must be commenced before the issuance of such certificate of improvements.

Dated this 15th day of February, A. D., 1902.

# BRIGHT OUTLOOK

## Mines and Smelters Ready to Increase Output.

## MR. HILL'S INTENTIONS

### Greenwood—Phoenix Tramway Likely to be Built.

The tide has turned. Influences are at work that are bound to make Greenwood a large city—large not in the dim distant future but within a reasonably short space of time.

THE SMELTERS

Both smelters will resume operations immediately. During the week several trains of coke reached here. Tuesday morning one of the longest trains that ever came into Greenwood, pas ed through to the smelters. This train included 30 cars of coke. Previous to this several trainloads arrived and the coal company gives every assurance that a full and steady supply will be forthcoming.

It is stated that the B. C. Copper company's smelter's run for the month previous to closing down was so profitable that directors of the company decided to double the capacity as soon as possible and also install a bessemerizing plant. This would increase the capacity of the smelter to 1600 tons a day and the refinery would also give employment to a large number of men.

The Sunset smelter also had a successful run and the Montreal and Boston Copper company will add a new furnace. This company will make a strong bid for Republic ores as the Sunset can supply any quantity of flux necessary to reduce the refractory ores of Republic. The Sunset ore is peculiarly adapted for mixing with Republic ore as it contains more iron than any of the other Boundary ores.

It is understood, too, that the Snowshoe company are considering a proposition to treat the product of their mine at the Sunset smelter. This would still further increase the merit of the blend as a combination of Sunset, Snowshoe and Republic ores would bring joy to the heart of the successful smelter man. In the event of the Snowshoe company deciding upon this course, the Sunset smelter would have to add at least three new furnaces to treat the ore from the different mines.

In any case it is safe to say that this fall will witness an unusual activity at the local smelters. The past has demonstrated that ore can be treated here cheaper than any other place in the world. Hence there is every inducement to increase the capacity of the smelters.

THE MINES.

The outlook is equally bright at the mines. The big developed properties like the Mother Lode and Sunset are now turning their attention to getting out ore at the lowest possible cost. With quarries, glory holes and the most improved machinery the cost has been reduced to a minimum.

But there are other properties being developed with the most encouraging results. The Big Copper in Copper camp is a revelation to all those who have visited it. John Moran in a short time demonstrated that this looked like one of the biggest and best copper properties in the district. Surface work uncovered an enormous showing of what is apparently high grade copper ore, and the deeper workings that ars now being projected only confirm the surface showings.

W. T. Smith has a force of men at work on the Emma in Summit camp. Several shipments of ore have been made to the Hall Mines smelter at Nelson. In fact the first inducement to begin work on the property came from the management of that smelter. They needed the Emma ore to treat the silver lead ore at their smelter and offered sufficient inducement to Mr. Smith and his associates to begin work on the Emma. A hoisting plant will be installed on the property and work continued on a larger scale.

In South Deadwood Theodore Witty and associates have made a big strike on the Golden Fleece situated near the Golconda. George Andrews is still working on the Golden Gate in Deadwood camp where he uncovered a vein of rich galena ore.

It is probable that work will be resumed on the Bruce near Midway at an early date.

The big returns secured from the Providence ore, reference to which is made elsewhere, will act as a spur to those who are developing high grade properties in the vicinity.

Taking everything into consideration the mining situation never looked brighter. The big low grade properties are of course permanent and the back bone of the district but the activity among the smaller and higher grade, is bound to have its influence upon the prosperity of the district.

RAILWAYS.

All eyes are now turned towards Hill. The Canadian Pacific Railway have announced that they are satisfied. They have a good thing in the Boundary which they intend to nurse and the extension of their system westward is a matter for future consideration. But Mr. Hill is different. "I am getting old" he says. "I haven't done enough yet. There are certain things I want to do and I must hurry because I am getting old." So the young old man who is possibly the most interesting figure on the continent today is actively engaged in making plans for extensions to his great railway system. His eye is on the Boundary and something is going to happen in a short time. His railway will have its branches to every mining camp and he is determined that if cheaper coke and cheap transportation can do it, there will be no ore in the Boundary of too low a grade to be profitably treated. Nay more, he intends bringing the districts to the west into closer touch touch with the Boundary, raising the average value of the ores by bringing in the higher grades that are found in the contiguous district and thus making this the great smelting centre of the entire district.

THE TRAMWAY.

Even railways have lamlations. They can't do everything. A tramway is needed to bring the people into closer touch with each other. It is slow work gathering the necessary data regarding practibility and cost but the scheme is still alive, with very good hope of ultimate success. In fact a well known firm have submitted an offer to build and equip the tramway, turn it over to the city in running order and take city debentures in payment.

PUBLIC BUILDINGS.

Kenneth McKenzie is busy moving the Lawder residence of the site purchased for the school building. The plans of G. D. Curtis have been accepted and the trustees hope to call for tenders in sufficient time to allow the successful contractor to begin work on September 1st.

The department of public works intend calling for tenders for the erection of the court house here at an early date, so that this important work should be under way at the same time as the school building.

The addition to the Sacred Heart hospital is nearly completed. It has added greatly to the appearance of the building and affords additional facilities for the cure of the sick.

Greenwood has made remarkable strides, it has also had its reverses, but at no time has there been so many ttrong influences combining to make this a large and prosperous city.

**COMPANIES ACT, 1897.**

## THE MORRISON MINES, Ltd.

(Non-personal Liability.

Take notice that the shares in The Morrison Mines, Limited, (Non-Personal Liability) hereinafter described, have been declared in default and will be sold at public auction to the highest bidder for cash, at the office of the said Company, Rendell building, Copper Street, Greenwood, B. C., on Monday, the 8th day of September, A. D., 1902, at the hour of four o'clock in the afternoon, to satisfy assessments which have been made thereon and are in default for a period exceeding sixty days after notice and demand of payment of such assessments.

Look to Your Eyes

Consult an Optician.

When your eyes dim and when you cannot continue for any length of time to regard small objects as in reading.

When you involuntarily frown or parily close the eyes when looking at an object.

When things "swim" or become dim after being looked at for some time.

When the eyes ache, smart or water; when your eyelids get inflamed often, or when you have pain in the eye ball, orbit, temples or forehead.

When you have any nervous derangement that you cannot otherwise account for.

Don't let the matter of expense keep you from visiting us. Sight is as precious to you as life itself, and we test the eyes free of charge.

## Kearns Good Luck.

It is reported that J. P. Flood of this city and Duluth capitalists have bonded the property of Thos. Kearns and his uncle at Deer Trail for $350,000. If the deal is carried through it further demonstrates the chances in the mining industry, Tommy Kearns was one of the pioneer prospectors of the Boundary. He and Geo. H. Ford located a claim in Kimberley camp which had a big showing but exceedingly low values. He afterwards worked in the Knob Hill mine and finally went down to Deer Trail where Jerry Cameron and Seth Emmerson both old time Greenwood men were making money out of a high grade mining property. Kearns worked with them for a while when Cameron told him that some farmers a few miles below held some splendid looking showings but that they did not know the value of them. Kearns investigated. He bonded one of the farmer's properties at an exceedingly low figure and induced an uncle of his who had some money to take an interest. In a short time they got out enough ore to pay for the bond and the property is the one reported to have been bended for $350.000.

Are you using "Blue Ribbon "Cey-Tea.

A sweetly toned bell has been received for the R. C. church in the city. When placed in position in the high belfry it will lead the people of all creeds to their respective places of worship. It is the only church bell in the city.

# READY TO BUILD

**Gread Northern Engineers Will Complete Survey.**

## FROM COAST TO KOOTENAY

**Construction Will Begin From Both Ends of the Line.**

GRAND FORKS, B.C. August 22, 1902. It it understood that the Great Northern railway will s hortly send parties into the field with the object of making a reconnaisance of that portion of the Coast-Kootenay route lying between Vancouver via the proposed New Westminister bridge and the Hope mountains, Simtlkameen district as a preliminary to undertaking the location survey. The recent speech delivered here by president J. J. Hill, would appear to possess even more significance than was ascribed to his utterances at the time when he declared that the surveys would soon be accomplished and that bonus or no bonus he was prepared to build the road from the coast and the interior end simultaneously. Mr. Hill's earnestness is evidenced by the fact that the preliminary survey from the coast terminus willl probably be started within a few weeks. The work it is reported will be under the direction of J. H. Kennedy, chief engineer of the V. V. & E. railway company.

That portion of the purported line from Midway, B. C. west 100 miles to the Similkameen river was surveyed last year by Mr. Kennedy's engineers.

## Have Filed Plans.

**V. V. & E. Filed Plans For Main Line to Similkameen.**

The Victoria, Vancouver and Eastern railway have filed plans at Ottawa for the continuation of their road from Midway to the Similkameen. The company intends pushing the construction of this portion of the road as soon as the railway committee of the privy council gives its consent. The cry was raised by the opponents of this road that the company did not intend to build a main line and the piece between Cascade and Carson was simply for the purpose of securing a way of building to Repnblic. When the company made application at Ottawa for permission to build a branch line to the Granby smelter, the minister of railways held that a branch line could not be built from a main line which did not exist and held up the application. Now that the company have shown at least an earnest of their intention by filing plans for the continuation of the road westward, it is possible that the objections to a company building railways without public aid of any kind will be removed.
