PLANNING PEACE WITH CHINA

Canada Wants Less Drastic Measures Against Coolies

DOMINION WOULD GET PART OF GREAT TRADE

Middle Course in Dealing With Immigration Expected to Be Taken

Ottawa, Ont., Nov. 21.—Canada wants to be a friend of China, too. The swift growth of the Chinese Empire, its commercial future and its political potentialities and are commanding attention in Ottawa, and a revision of the Dominion's immigration policy with regard to Chinese is not improbable. Any step by Canada toward better relations with China, it is pointed out, cannot fail to influence British policy in the Far East.

Not that Chinese coolies will be admitted indiscriminately. In Canada conditions will not permit that, any more than they will in the United States, but Sir Wilfrid Laurier believes the best results will be obtained through diplomatic agreement with China. This has been accomplished successfully with the Japanese, and far-sighted Canadian statesmen believe that it is fully as important to avoid the appearance of discrimination against the Chinese, whose great markets should hereafter prove a profitable field for Canadian enterprise.

On every Chinese immigrant entering Canada a head tax of \$500 is now imposed. Last year 2600 entered and paid the tax. In British Columbia the labor unions now are agitating for complete exclusion or, failing in that, an increase of the head tax to \$1000. The present policy is a direct discrimination against Chinese. Either to adopt the extreme policy of absolute exclusion or to double the head tax would emphasize the discrimination at the very moment that the Laurier government sees the justice of treating China as a modern nation.

It is safe to say that neither course will be followed, but that the Chinese government will be approached with assurances of Canada's friendship. It will be pointed out that it is Canada's desire to strengthen the friendly bonds and expand the commercial relations. This cannot be done by drastic exclusion laws. Nor can good relations long endure if the Chinese coolies are allowed freely to enter. Riots might then be expected. A middle course of mutual agreement is thought best.

The ground work for such an undertaking probably will be laid by the Royal Commission, which will soon be appointed to investigate not only the recent immigration frauds at Vancouver, but the whole question of Chinese immigration and the opium traffic.

The Offertory.

An Eastern contemporary says the following: "We believe in the collection plate, and believe in it most thoroughly. But it's a wonder that God Almighty doesn't stretch forth His finger and suddenly strike dead some of the miserable men for their

miserable offerings. They will blow \$10 on booze and cigars; \$25 for clothes and \$25 more for an overcoat. Then comes Sunday and they will have the gall to sneak in a nicker for the Lord, the Almighty, who holds this earth in His hands. And the Lord lets them live on. They will march up to the front and pull off their gloves and lay their cane under the seat, and pull out a plugged dime and offer it to the Lord; a store would not take it; the bartender could not be fooled with it. This mutt hands it to the collection plate."

There is a good deal of truth in this. A church has to be kept going on a commercial basis just as any business concern.

KETTLE VALLEY COAL

New Corporation Formed on Myers Creek.

The first carload of coal from the Midway coal mine, amounting to thirty tons, was shipped last week to Grand Forks and comments as to its quality are particularly favorable.

That the Kettle Valley west from Midway contains a coal basin of large area is the opinion of not only prospectors intimate with the geological formations of the district, but of a government geologist who recently made a cursory inspection of development work on the deposits, and a recommendation to have an official report made on the district will be sent to the Dominion department.

For years the coal quantities has been secured on the surface from these deposits for blacksmithing and mine purposes. The coal was of good quality, but the owners of the limits never made any attempt to "prove up" on the properties.

Two years ago the Boundary Exploration company secured coal limits three miles west of Midway, which they developed with encouraging results and have now brought up to the shipping stage. Now another syndicate is prosecuting development work on coal limits on Myers Creek, which while divided from the Kettle Valley by a range of mountains, are only six miles distant from the Midway property and are believed to be part of the same coal area.

The syndicate which is composed of prominent citizens of Phoenix and Grand Forks, was formed about two months ago and an option acquired on 2340 acres of the Myers Creek limits, nine miles west of Midway on the Great Northern railway. Development work since that time has exposed two large seams of bituminous coal, the government assay on a sample of which shows 69 per cent fixed carbon and only 6 per cent ash.

At a meeting in Phoenix last week the Myers Creek Coal and Coke company was formed with E. Spraggett of Grand Forks as president, and D. J. Darraugh of Phoenix as secretary-treasurer. Others of the company are: G. W. Rumberger, John A. Swanston, R. V. Chisholm, A. S. Hood, J. E. Thompson, N. J. Carson, John Mulligan, Theo. Biner, J. H. Vivian, William Delahay, Carl Helmer of Phoenix, and S. R. Almond, D. A. McKinnon, G. D. Clark and C. E. Johnson of Grand Forks.

Buildings are now being constructed at the property and work will be carried on throughout the winter.

CRIPPEN PAYS PENALTY OF LAW

Hanged at Pentonville on Wednesday Morning at 9:02 O'clock.

RUMORS THAT HE CONFESSED CRIME

Miss Le Neve Booked Passage on Steamship for the United States.

London, Nov. 23.—Dr. Harvey Hawley Crippen was hanged at 9:02 this morning in the yard of Pentonville prison for the murder of his wife, Belle Elmore-Crippen.

The Evening Times makes the bare statement that Crippen confessed his crime, but the statement is doubted.

Ethel Le Neve has booked passage on the steamship Majestic which sails from Southampton for New York on Thursday.

SEED FOR FARMERS.

Distribution of Grain and Potatoes for 1911

By instruction of the Hon. Minister of Agriculture a distribution is being made this season of samples of superior sorts of grain and potatoes to Canadian farmers for the improvement of seed. The stock for distribution has been secured mainly from the experimental farms at Indian Head, Sask., Brandon, Man., and Ottawa, Ont. The samples consist of oats, spring wheat, barley, field peas, Indian corn (for ensilage only), and potatoes. The quantity of oats sent is 4 lbs., and of wheat or barley 5 lbs., sufficient in each case to sow one twentieth of an acre. The samples of Indian corn, peas and potatoes weigh 3 lbs. each. A quantity of each of the following varieties has been secured for distribution:

Oats—Banner, Danish Island, Abundance, Wide-Awake, Thousand Dollar, Improved Ligow—all white varieties.

Wheat—Red varieties: Marquis and Early Red Fife (early beardless sorts of high baking strength), Red Fife, beardless, Preston and Huron, early beardless. White varieties—White Fife beardless, Bobs early beardless.

Barley—Six-rowed: Mensury and Manchurian, a selection from Mensury. Two-rowed: Standwell and Invincible.

Field Peas—Arthur and Golden Vine.

Indian Corn for ensilage, early sorts—Angel of Midnight, Compton's Early and Longfellow. Late varieties—Early Mastodon, Selected Leaming and White Cap Yellow Dent.

Potatoes—Early varieties: Rose Rochester, and Irish Cobbler. Medium to late varieties—Gold Coin, Carman No. 1, and Money Maker. The later varieties are, as a rule, more productive than the earlier varieties.

Only one sample can be sent to each applicant, hence if an individual receives a sample of oats he cannot also receive one of wheat, barley, peas, Indian corn or potatoes. Applications on printed cards or sheets, or lists of names from one individual, or applications for more than one sample for one household, cannot be entertained. The sample will

be sent free of charge through the mail.

Applications should be addressed to the Dominion Cerealists, Experimental Farm, Ottawa, and may be sent in any time from the 1st of December to the 15th of February, after which the lists will be closed, so that the samples asked for may be sent out in good time. Applicants should mention the varieties they prefer, with a second sort as an alternative. Applications will be filled in the order in which they are received, so long as the supply of seed lasts. Farmers are advised to apply early to avoid possible disappointment. Those applying for Indian corn or potatoes should bear in mind that the corn is not usually distributed until April, and that potatoes cannot be mailed until danger from frost in transit is over. No postage is required on mail matter addressed to the Experimental Farm, Ottawa.

LATEST MINING ITEMS

It is reported that No. 7 mine has run into some extraordinary rich ore.

The Bay and the Tiptop mines are working along with satisfactory results.

The Greenwood-Phoenix tunnel is in full blast with day and night double shifts of men.

The Midway coal mines will ship at once a car to Nelson and two or more under way loading for other points. It meets with a ready sale.

The At There mine has its shaft pumped out and have opened a streak of high grade ore on the 100 and 150 foot levels.

The Boundary Exploration company's coal mine at Midway having disposed of a large block of stock to Spokane capitalists, these gentlemen made it their business to personally inspect the same, of which four of a party was at the mine on Saturday last and their conclusion was very much in its favor and very encouraging to the original promoters. After inspecting the mine they proceeded to Greenwood to take stock of the Fremont property which apparently was approved of by them, and it is decided to start work immediately if possible, if not at first of new year for certain. A large amount of capital is available for both of these mines. The Midway coal and the Fremont mine indications certainly look good for extensive work at both these plants.

Machinery to fully equip the Midway coal mine has been ordered, which, when installed will place it in first class working and shipping condition.

TO RENT—Pianos also sewing machines. Enquire of A. L. White.

HELPLESS IF ATTACKED Doughty Warns Britain to Protect the Dominion

London—Sir George Doughty, who was defeated in the Grimsby constituency at the last election, has been giving his views on imperial federation since his return from Canada. He says:

"I am keenly in favor of federal parliament which may deal with all questions of imperial interest. Imperial defence is a question which is being much discussed in Canada. The more it is discussed by influential Canadians the more do they realize that the time has arrived when there should be an attempt at establishing a union of British states. Canada is already a nation and if, through any misfortune or lack of appreciation on our part of her position, she should become separated from the mother state, there would be grave danger for both of us. National jealousy as well as national ambition would cast lingering eyes on that great province, British Columbia, and it would be impossible for Canada to withstand any action, say Japan, seeking an opportunity of extending her area, or prevent the annexation by such power of that great Dominion. From the standpoint of security of their great national asset it is essential that behind the Canadian government and its provinces there should be the silent, forceful power of the British navy and British prestige."

Rome—The Pope has received an autograph letter from King Alfonso of Spain, announcing that his personal efforts to avert a diplomatic rupture between Spain and the Vatican have crowned with success.

"Premier Canalejas," he wrote has consented not to apply the law to which the Holy See objected until the negotiations for the amendment of the concordat have been concluded and the question relating to the religious congregations have been fully settled."

The King further expressed the hope that the negotiations will be resumed shortly and announces that with this object in view the Spanish ambassador will return to Rome before Christmas.

The Pope is reported to have been highly gratified at the receipt of the letter and to have tendered his thanks and blessings. He also notified the King that he is willing to smooth over the difficulties and make concessions provided he received assurance that Premier Canalejas is willing to co-operate in finding a solution of mutual advantage to the Vatican and to Spain. The prevailing impression at the Vatican is that a settlement of the controversy is not practically certain.

OLD-TIME RELIGION.

The citizens of Vancouver have raised something over \$800,000 for the erection of a new Y. M. C. A. building. While The Times is at all times in favor of propagating any measure that will tend to elevate the young men of the country, it occurs to us that less expensive quarters could be provided and a portion of this money turned over to the poor hospitals who are so dire in need of funds to carry on the work of aiding suffering humanity.

But the tendencies of the world are not along these lines as in the days of yore. Great gaudy temples with expensive tapestry, mammoth pipe organs and high salaried ministers have long since supplanted the humble church edifice where our forefathers bowed in humble submission to a righteous and just God.

Then it was that the old-time religion held sway, for in those days the word hypocrisy was scarcely known, for every man and woman was sincere in their duty to God as well as a help-mate to their fellow-beings, and no thought other than reverence to Him and benevolence to all man-kind entered into their daily walks through life.

"The old-time religion." Oh! how tuneful that song sounds in the ears of our religious old men and women of today. What a grand and glorious inspiration would thrill their very souls if they could but for one blessed Sabbath day be taken back to the rustic church on the hill with its high benches and home-spun clad neighbors and old-time religion.

But such will never be their pleasure. For instead of the home-made garments, the deep-seated, heartfelt religion, bombast, finery, broadcloth and sermons preached that will not offend are the order of the times. This, of course, does not apply to all church-going people, but it certainly does fit a large number of people and their churches, especially in the large cities.

Does it occur to the reader that a million dollars spent in erecting and equipping a church building is a demonstration of the kind of

religion that Christ taught when all around us the poor are crying for bread and struggling for an existence?

And not only that, but their hearts are yearning for the common unostentatious church for the masses—the church of Christ, one He would heartily welcome, and many approve of. In other words, revert us back to that old time religion in the church on the hill where even the archaels would be glad to be members of the congregation.

Because a newspaper publishes an article from another paper, giving due credit to same, is no indication that the paper voices the position of the paper clipped from. The editorial of a newspaper, emanating from the brain of its editor is the only sentiment from which to define the paper's policy.

Indians in State of Unrest

The apparently inbred desire of the Northern Indians to get their lost heritage of the land back from the white man is very likely to lead to more trouble among the tribes in the northern part of the province, says Mr. R. Campbell Johnstone, a Vancouver mining engineer, who has just returned with Mrs. Johnstone from a two-thousand mile trip in the interior.

Both Mr. Johnstone and his wife spent some time among the Indians in the north and found that they are again in a state of great unrest and anxious to start driving the whites into the sea, as seems to be their one ambition. Much of the trouble is attributed by Mr. Johnstone to the fact that the late Chief Joe Capilano, who was a great favorite among the Indians of British Columbia, spread the idea that it would be possible for the native races to combine and overcome the whites. Notwithstanding that Capilano was over to England to see the King and journeyed on another occasion to Ottawa, thus seeing the power of the whites, Mr. Johnstone thinks that he kept the other Indians in ignorance of the extent of the British possessions.

Then again the returned engineer gives the opinion that the missionaries through not having the right way of handling the Indians give them wrong impressions. In order to keep the Indians from consorting with the rough characters selling liquor the missionaries have indulged in wholesale condemnations of their fellow whites with bad results. Many of the workmen of the railway construction have also been the means of causing

trouble. To offset these influences Mr. Johnstone says that the Indians should be encouraged to take up homesteads, and furthermore the government should appoint more Indian agents in that part of the country to negotiate with the red men.

Mr. and Mrs. Johnstone had some very thrilling experiences on their trip which extended through the country traversed by the old Klondike trail

EPISCOPAL BAZAAR.

It Was Well Patronized and Netted a Neat Sum.

On Wednesday, November 16th, a most successful, financial and otherwise Bazaar was held in the Auditorium by the members of St. Jude's on behalf of the funds of the English church. The hall was very prettily decorated with bunting and had stalls heavily laden with good things all around. The stallholders were kept busy from 2 to 7:30 p. m. and did a brisk trade. The high tea from 6 to 7:30 was well patronized, after which the hall quickly filled for entertainments. During the afternoon the fish pond proved a very popular resort, and the competition stall seems to have been attractive. Here was a lovely cake whose weight people were invited to guess; also a bottle containing 2678 grains of corn for guessing. Candle-lighting with one match drew many skillful hands. The prize-winners were as follows: Cake—Mr. Pals, whose estimate was its exact weight, 11 lbs 4 oz. Corn—Mr. Redpath and Miss Beldon. Tablecloth—Mrs. Fair. Doll—Miss McMyynn. In the evening a short entertainment was given by the children which deserves special mention, as their songs, dance and drill was certainly executed in a befitting manner and highly enjoyed by all those present. An orchestra composed of five pieces furnished excellent music, and a most enjoyable day was brought to a close. The amount realized from all sources was \$300.

The Official Statement

At the conclusion of a meeting held in Ottawa of the Canadian and United States trade negotiators the following statement was given to the press by Hon. Mr. Fielding: "The conference between the representatives of the United States and Canada on the subject of improved trade relations terminated today. The conference began on Saturday, the 5th instant, and was continued on Monday, Tuesday and Thursday. The whole discussion was of the most frank and friendly nature. While no conclusion was reached, the ground was cleared for a further conference, which will be held in Washington, probably early in January. The members of the conference, Messrs. Hoyt, Pepper and Foster, representing the United States, and Messrs. Fielding Paterson,

To Recuperate

The departure of Mr. Fielding for the West Indies in search of health will bring to an end any prospect of the early resumption of reciprocity negotiations, or of important tariff changes. No doubt the minister of finance needs a rest. He is a hard-worked man and occupies an anxious position. Nearly all the time that other ministers had for vacation Mr. Fielding has given to the West India trade inquiry. He will be greatly missed by his colleagues during the coming session. As first lieutenant to the premier Mr. Fielding has the actual lead of the house as many hours in the session as Sir Wilfrid himself.

MINES AND MINING

Steamboat Mountain gold camp is the drawing card for Vancouver capital.

Whipsaw is active among mining men, and inquiries are coming in freely.

E. P. Galliac recently sold a quarter interest in his coal property on Onemile for \$12,000.

The mining town of Florence, N. S., was recently damaged by fire. The Nova Scotia Steel Co. lost \$100,000.

The Granite-Poorman, one of the oldest mines in the Kootenays is about to resume shipping after a long shut-down.

One of the largest mining deals in the S'milkameen, in which the Guggenbushs are principals, is reported to be about completed.

Hon. Price Ellison and Robert Wood have bonded the Okanagan mine near Princeton and will actively develop the property. The mine was located in 1886 and its ore carries values up to \$35 a ton in gold and silver.

Granby's sharp advance appears to have been due to both inside and general buying, and an extreme scarcity of offerings. It advanced on a very small volume of transactions, thus reflecting the great confidence which the stockholders have in the property and its management.

T. J. Corwin, of Vancouver, is interested in the gold-platinum placers of the Nicola Valley district and made an examination of his properties in that section last week. His company will prospect there during the winter and study the best methods of recovering the precious metals.

Fifteen Canadian companies, 11 operating in Ontario and four in British Columbia, have so far this year paid to shareholders \$6,996,299, and since incorporation \$21,703,689, a 43 per cent return on an issued capitalization of \$49,424,005. Nipissing leads as usual, having made disbursements totalling \$2,100,000 with Crown Reserve second with \$1,061,288. Yukon Girl is third with \$1,050,000.

Since the acquiring of the Nickle Plate mine at Hedley in 1909, the Hedley Gold Mining Co. has paid \$143,520 in dividends, its total earnings to August last being \$284,403. Net profits for the first eight months of this year totalled \$169,841, which is \$25,000 in excess of the 3 per cent dividend requirements for the entire year. The company's reduction plant milled 29,385 tons of ore during the first eight months of this year, of an average value of \$12.18 per ton. The average value recovered was \$11.25, the cost being \$5.47 and the profit \$5.78. The shares of

BLOOD-POISONING FROM CUT FINGER

Serious Condition Relieved by Zam-Buk

Mr. Jas. Davey, of 786 Ellice Avenue Winnipeg, says: "A few months since I was cured of a poisoned finger through the timely use of Zam-Buk. I cut a deep gash across the knuckle on the first finger of the right hand, in opening a lobster can one evening. I suffered at the time with the soreness and pain, but had no idea it would become a serious wound. However in about two days I was greatly alarmed, as my whole hand and arm to the elbow became inflamed, and the figure was much discolored, showing signs of blood-poisoning. The pain was dreadful and I was forced to leave off my work and go home."

"The wound on the knuckle had been poisoned through the dust and dirt about the furnaces and boilers. I then decided to start the Zam-Buk treatment, and having first bathed the cut, I applied the healing balm. It soothed the pain almost instantly, and by the next day there was a great improvement. In a week's time, through preservation of Zam-Buk, a complete cure was brought about."

Scores of similar cases could be quoted, and the wisest precaution is to keep a box of Zam-Buk handy and apply it immediately a cut, or burn, or bruise is sustained.

Zam-Buk will also be found a sure cure for cold sores, chapped hands, frost bite, ulcers, eczema, blood-poison varicose sores, piles, scalp sores, ringworm, inflamed patches, babies' eruptions and chapped places, cuts, burns, bruises and skin injuries generally. All druggists and stores sell at 50c. a box, or post free from Zam-Buk Co., Toronto, upon receipt of price. Refuse imitations and substitutes.

the company are quoted on the Boston exchange at \$20 asked, and \$15 bid (par value \$10), though few transactions are recorded. The stock is owned principally by United States Steel and Cole-Ryan people. Considerable money is being expended at present in improvements to the reduction plant.

The copper metal market last week was much stronger. There was a good demand for deliveries during January and February which would indicate that consumers are expecting a further advance before then. The reduction of 12,400,000 lbs. in the foreign stocks and the expectation that the surplus in this country was reduced during the past month have imparted a confident tone to the market. There was a good demand from manufacturing interests, although the output of copper wire is not as large as could be wished for. However, there is improvement in that direction, and when it gains further headway the whole copper trade will present a strong front.

Roosevelt's Mistakes

We have no wish to rub salt into any man's wounds, but it is plain in the cold light of the "morning after," that Mr. Roosevelt's course since his return in June has been one long series of political blunders. On the supposition, which his closer friends have sedulously fostered, that his heart was fixed on a nomination for the presidency in 1912, it can only be said that he misread the situation utterly, and acted like a man whose famed political skill had entirely deserted him. Had he gone quietly to Oyster Bay and maintained a dignified silence throughout the campaign, defeat would have come to his party, but a great cry for him as the only compeller of victory would have been heard. Today he stands as the chief architect of disaster. He has demonstrated the fact that there are thousands of Republicans who will not vote for him or his nominees or his novel doctrines. There has appeared to be a fatal quality in his endorsement, so that nearly every man whom he lauded in different parts of the country has been defeated, while the men that he singled out for vituperation—Dix, Foss, Baldwin, Harmon—have been triumphantly elected. The whole is a terrible shattering of Mr. Roosevelt's prestige.

FAMOUS PEOPLE

BY FANNIE M. LOTHROP

MRS. LILLIAN MASSEY TREBLE
A Life of Consecration to Humanity.

In Leigh Hunt's beautiful poem "Abou Ben Adhem," where the angel wrote in the tablet the names of the world's great ones, because Abou Ben Adhem loved his fellow-men, his name led all the rest. On the tablet of the world's remembrance surely high place belongs to those who have consecrated their lives to the betterment of humanity; who were great not for what they possessed but for what they gave, not for what they absorbed but for what they radiated, not for what they became but for what they helped others to become.

Among the Canadian women who have made philanthropy a living, vital atmosphere of helpfulness rather than a mere theory of living, the name of Lillian Massey Treble deserves high praise. Born in 1854, in Newcastle, Ont., the only daughter of the late Hart A. Massey of Toronto, who was the inspiration and impetus to some of the Dominion's most important industries and institutions, from her earliest moments she has lived in the atmosphere of wealth. Her fine mind was given additional strengthening and refining under the best instructors, and later in that best of schools—foreign travel—where observation is the teacher, and the many new cities and countries but new school-rooms. The heiress of great estates, she consecrated herself and her wealth to the good of the world.

Her earliest work in the Fred Victor Mission in one of Toronto's neglected quarters, soon convinced her that the primary source of good or evil in most instances is the home; that the greatest good to humanity must come from preventing evils, not from curing them, and from building up higher ideals of life and living. The first step in this work of regeneration was in the organization of domestic science classes in connection with the missions. Then came the demand for a higher grade of teachers, alive to their duties and their privileges; this led to the founding of the Lillian Massey School of Household Science and Art. In this institution the practical work of training women for the home, so that they may make home life a place of grace and beauty, is the supreme aim of all the teaching. The education of women, in its moral, practical, and intellectual aspects, is the chief aim of the Lillian Massey School.

In 1907 Mrs. Massey was married to John A. Treble of Toronto, but she continued her work of purpose and helpfulness, not for the sake of the name, but for the sake of the work. She has been a constant presence in the life of the city, and her name is a household word. She has been a member of the Women's Council of the City of Toronto, and her name is a household word. She has been a member of the Women's Council of the City of Toronto, and her name is a household word.

MAGNET Wood Furnace

The McClary Magnet Wood Furnace has a fire-box opening that admits the largest chunks of wood with ease—wide, deep, generous in size as the Magnet is in quality of material and workmanship. The wide opening saves you work, because you can use wood that you would have to saw and split to get through the narrow, shallow fire-box openings of ordinary wood furnaces.

Instead of making the fuel fit the door, the Magnet door is made to fit the fuel.

It is just as easy to get the ashes out of a Magnet as it is to put fuel in; because the opening of the ashpit is just as generous as the fire-box opening. You can get at the farthest corner and remove the ashes with ease and speed—no turning and twisting; no trouble nor inconvenience. These two advantages are good reasons why you ought to use a Magnet. The McClary agent in the nearest town will welcome the chance to give you many more. Write to the nearest McClary branch for booklet.

Treaty would be Dangerous

London—The Standard says "Let us be perfectly frank. Commercial arrangements between Canada and the United States must and can only be the thin end of the wedge of political union. Negotiations at Ottawa represent a most momentous crisis which the empire has experienced since the Boer war. Surely Canadian statesman and Canadian people can think out some other means of meeting the situation, than commercial negotiation with Washington, which will not only endanger her political economy but are a grave menace to the existence of the empire."

Quebec Bridge Contract

Quebec.—It is reported here that the Quebec bridge commission has reached a definite decision regarding the awarding of the contract for the new bridge, and that the placing of the contract is now only a matter of a few days, the contest narrowing down to competition between the American steel companies, supported by the United States Steel corporation, and the Canadian company, which has recently been incorporated by the British builders. If the contract is awarded to the latter company, it is expected to bring a large amount of new British capital to Quebec.

Fifteen Million Dollars or More

The real opportunity for wealth comes to every person once, if they are prepared to take the chance.

There are fifteen million dollars buried on an island on the Pacific, and the man who knows where it is, and has the original charts, and has been on the ground is now in Vancouver and ready to go.

Remember he is the only man now living who can get it. He, Captain Hackett, can get the treasure. He made the trip with the widow of the man who brought away \$100,000 of it.

Now the proposition is this: Some of the best business men of Vancouver have examined the records and have satisfied themselves that the money was put there, and that Capt. Hackett has all the papers and information necessary to get it.

A company has been organized—the Cocos Island Hydraulic and Treasure Co., Ltd.—with a capital stock of \$300,000 divided into \$1.00 shares fully paid and non-assessable. Captain gets for his information the same amount of stock as issued to the public.

It is estimated that \$35,000 will be required to outfit the expedition. It was at first planned to purchase a ship, but it has since been considered wiser to charter the ship and thus save a great deal of money to shareholders. The ship is at present being outfitted for the voyage at Vancouver.

There are no salaried officials. The directors are local men of good business standing.

Stock is now selling at 75 cents per share par value \$1.00 fully paid and non-assessable.

If you are ready to take a chance of losing a few dollars to make a fortune this is your opportunity. For instance a man risking \$10.00 stands to win \$2,500, or for \$100 you may win \$5,000. For literature and full information address
