HOUSE FURNISHERS - - Phone 27
Greenwood, B.C.

Always a Pleasure to Show Goods

Crompton Corsets...

Artistic completeness, Art, Genius and Skill, have in combination produced a Corset that is beautiful in every line, graceful in every curve.

It is distinguished for the charm of its style and beauty of construction

They are worth from 75c to $2.25 per pair : : : : : :

GARTER MODELS A SPECIALTY.

RENDELL & CO

Dry Goods. Millinery

Did you Notice the Well Dressed Men on the Street?

Invariably you will find the following cut in their inside coat pocket

Be sure to look for the above cut when buying Semi-Ready Clothing. The price is also stamped on the label. You can purchase a suit from us the same price as they are sold in Montreal.
GET WISE. We have Seventy-five Suits of Navy and Black Serges on the way out. Don't neglect securing one of this lot. They are the Latest.
Prices run, $20, $25, $28 and $30.

P. W. GEORGE & CO.

The only Exclusive Dealer in Men's Wear in Greenwood

TWO ITALIANS ARRESTED

Near Danville, Wash.--Arrest Follows Sensational Hold-Up in Anaconda

Anaconda has been gaining a bit of notoriety in the last week, having become the scene of two violations of the general law-abiding spirit of Greenwood and its environs. Sunday night, about 11:30, waiting the time until they had all the men in the bar of the Vendome Hotel in a bunch, a couple of masked men stepped in from the side door and held up the crowd. John O'Brien, the landlord, was serving some men who had been playing freeze-out for the drinks, and when his hands were in the air and he looking into the bore of a revolver, the robbers took from him $120. Another man, Peardon, was the poorer by $5, and Tom McMullen enriched the Jesse James outfit by 35 cents of good silver money. Three men who had been working on the evening shift at the smelter, and who were in the bar, were unmolested, and after filching what there was in the cash drawer, the robbers slipped out into the night.

The news was brought up town about 12 o'clock, and on Sunday two men were arrested on suspicion, but were let go, and so far no new developments have given the police any clue to the perpetrators of the deed.

Beside this, the house of Robert Dempster at Anaconda, was broken into on Monday morning and some clothing stolen. No idea is held as to whom the thieves are.

Two Italians, John Genonie and Frank Rialli, were arrested yesterday between Grand Forks and Danville by Constable Aston as being suspicious characters. They were brought to Greenwood yesterday afternoon and are being given a preliminary hearing today before Stipendary Magistrate McMynn. The arrest has followed as a result of the robberies that have been perpetrated in the district in the past few days, but little information beyond the above could be given by the police this morning.

A FINE PROSPECT.

Charles Tremain and J. W. Douglas, of New York City, who have been in the vicinity of their claims—the Lakeview and Dividend, situated about six miles north of Oroville for the past two weeks were in Greenwood this morning. Yesterday they visited the mines and smelter of the Granby Company having previously gone over the mines and smelter of the B.C. Copper Co.

When seen this morning, Mr Tremain expressed himself as very well satisfied with the development of their claims so far. Frederic Keffer, M.E, made an examination of the property for them and Mr. Tremain was pleased with the result although, as yet, not sufficient development has been done to warrant any over-confident statement. Superintent Des Camp, formerly of the Le Roi mine has about 12 men working on the property and the mine is fitted up with a laboratory and an efficient assaying department. There is plenty of capital behind the undertaking and the promoters are developing it only as an investment.

The company own all the copper showings in the group and have many good samples of ore. The ore is a heavy sulphide bearing both copper and gold. The property is on the Canadian side and is at an elevation of about 1,600 feet.

BOUNDARY MINING.

There will be a meeting of the Diamond-Texas syndicate tomorrow night.

The few men laid off at the Sunset mine last week were replaced on Monday.

Three shifts of men are now working at the Golden Eagle mine on the North Fork. The company holding the bond on the property are driving a tunnel. It is expected that the ore taken out in process of development will pay for the tunnel.

Work has been commenced on new waste ore bins for use in conuection with the Granby Curlew tunnel. A trestle work will later be built from the mouth of the tunnel which at the bins will be at an elevation of about 90 feet above the C. P. R. track.

James D. Sword left on Wednesday in company with Messrs. Raven and Barton to begin development work on the Bell mine at Beaverdell. Work will be started immediately and it is understood that about a dozen men will be employed.

"The Cost of Diamond Drilling in the Boundary District," is the title of an exhaustive examination of the experience of the results of diamond drilling carried on at the mines of the British Columbia Copper Co. between January, 1906, and August 1907. The article is published in the Mining World, and is written by Frederic Keffer. In 1906 3,002 feet of drilling was done at an average cost per foot of $1.67, and in the seven months of 1907 the number of feet drilled was 3,667, and the average cost $1.72. The average cost for the entire period was $1.70½ per foot, and one caret on the average drilled 111.9 feet.

The article is accompanied by three very complete tables—the progress table giving the monthly results of work, as well as the yearly tables, and furnishing important details of the general character of the rock drilled, which are classed as hard, medium hard and soft. The hard rocks comprise diorites, compact garnetites and certain very hard and silicious eruptives occurring in Summit camp. The medium hard rocks include all ores, and in Deadwood camp, much of the greenstone country. The soft rocks are the limestones, porphyries and serpentines. Of all the rocks drilled the garnetites proved much the most severe in diamond consumption.

A cost table gives the details of costs under the four groups of labor, power, repairs, oils, etc., and diamonds. The employees were normally a runner and a setter. Extra help was required at times for blasting places for good set-ups, for laying pipe lines, moving plant, etc. The totals are complete, covering all these things. The power consumed is taken as being equivalent to that required for a 3¼ in. machine drill; that is to say, about 20 h. p. When drilling at a mine where, for example, 15 machines are used on each shift, the diamond drill is charged with 1.31 of the total power costs, it being in this instance run on one shift only. Steam power was found to be much more expensive than electric power. The average cost of $1.70½ is made as follows: Labor, 74.7; power, 24.6; repairs, oil, etc., 10.5; diamonds, 60.7. A third table, combining the information of the first two, is also given.

After classing all holes over 30 degrees dip as vertical, feet per hour is 15% greater in horizontal holes than in vertical ones. It is also important to note that a greatly increased cost of diamonds in 1907 had much to do with increasing the cost of the work per foot.

An interesting method of feeding furnaces is being worked out at the smelter of the Dominion Copper Co. A short time ago the company announced its intention of installing a trackage system for the feeding of their two smaller furnaces, but on consideration, it has been thought that better results could be obtained with these furnaces by operating the feeding system by an electric aerial tram. By this method, the officials of the company expect to be able to handle and distribute their ore and flux to better advantage. M. M. Johnson, consulting engineer for the company, now has these plans under consideration, as well as those for the gravity aerial tram between the Idaho and the other mines of the Dominion Copper Co. at Phoenix. The use of a similar arrangement for carrying away slag from the furnaces has also been under consideration by the company, though nothing definite has been decided about that.

A new sampling mill equipment is also being added to the company's smelter at Boundary Falls, and will be in the course of installation in a few days.

The recent steady advance in the price of copper will bring to mind the prediction of Mr. Adolph Lewisohn, which General Manager McAllister of the B. C. Copper Co. reported to the Greenwood Board of Trade last spring. Mr. Lewisohn was strongly of the opinion that copper would average better than 15 cents for the latter half of this year.

G. L. Walker, in his issue this week, states that more copper was sold last week than in a month preceding. Mr. Walker continues:

"Domestic consumers are coming into the market. That a few of them have built up considerable confidence in the future is reflected in their complaints because they are unable to buy copper for October delivery at present prices. I understand that none of the large producers are willing to sell for later than September delivery at quotations here given. Some interests express surprise that buyers have been supplied so freely without any material advance in prices. As has been stated in these letters previously, there is probably about two months' production of copper awaiting sale. The greater portion of it is being held for slightly higher prices; and fear that competitive selling might cause a sudden reaction is causing many producing interests to meet the demand at about 13 cents.

"Real improvement is beginning to be noted in the brass trade. A number of foundries have increased their working forces recently, and all of them are buying more copper than for several months past. There is also an improved demand for copper wire, and the rolling mills are quite busy, as might be expected with copper at its present low price.

"Foreign buyers probably will not follow the market advance. Nearly all of the British and European consumers bought in excess of their immediate requirements early in the year, going on the principle that the metal should be secured when it is cheap. They can now well afford to retire from the market and await developments.

"It is very good opinion that the price of copper will hold between 13 and 14 cents during the coming three months. The statistical position is not quite strong enough to warrant the expectation of any considerable advance. While the consumptive demand is increasing, it will be some time before it exceeds the current volume of production. The prospect is good, however, that there will be an active market and that the supplies in the hands of producers will diminish rather than increase.

"The cost of producing copper is believed to be one cent per pound lower now than it was a year ago, due to curtailment by some of the high cost producers, reductions in wages, increased efficiency of labor and lower cost of supplies. Most of the mines, also, are working on a slightly higher grade of ore, and some of the low cost producers are forcing production somewhat. I believe that the world's copper is now being made at an average cost of 9½ cents, and that there is an average profit of 3½ cents per pound on all of the copper going to market. This is a very good business profit, and it must be expected, therefore, that production will have a tendency to increase for some time to come."

THE NEW ROAD.

As some discussion has arisen over the proposed route of the new railway from Carmi to Penticton, the following details of its course are given: This part of the road will leave the Midway & Vernon route about three miles below Carmi, crossing the West Fork of the Kettle River and touching Carmi on the west side. Following the west side to Wilkinson Creek, it proceeds along the South Fork of Wilkinson Creek to its source, crossing the divide by Dale's pass at an elevation of 4,590 feet, coming on to the headwaters of Ellis creek. Crossing these streams it turns northward in its descent toward Okanagan Lake, crossing Penticton Creek and back toward the lake for several miles, when it again turns north and returning on an almost parallel line, goes into Penticton. The difficult part of the work is met in the descent on the other side of the divide, where, in making a distance of twelve miles by trail, the railway will accomplish a drop of 3,750 feet.

The Smelter of the Dominion Copper Co. this week treated 3,099 tons, distributed as follows: Brooklyn 736, Rawhide 1,793, Sunset 515, Mountain Rose 55 tons.

The annual tournament of the Tennis Club is in full swing. On Wednesday afternoon in the first game of ladies' singles, McMynn and Mrs. Stowe were winners, and yesterday Rochfort, working against a handicap, defeated Macfarlane, winning the first game in the mens' singles.

TONNAGE RUNS HIGHEST YET

New Strike of Ore Body at Mother Lode--High Grade, Perfect Fluxing Ore

The daily average of the smelter treatment of the B. C. Copper Co. is 2,097 tons, or 59,821 tons for the month of July. The highest tonnage reached in 1907 was made in the same month, but amounted only to 47,798 tons, or 12,023 tons less than this month.

The encouraging features of this tonnage, however, are not limited to this fact. Last year the smelter treatment included considerable custom ore, principally from the Snowshoe mine, and this year all the ore treated has come from the B. C. Copper Company's own mines. The Mother Lode and Oro Denoro have both been making records.

The tonnage reached is not the limit. It is understood that the three big furnaces will yet do greater things, and when they can't do it other furnaces will be constructed to handle the tonnage.

The Mother Lode Mine has been shipping since Monday about 100 tons a day of exceptionally fine ore. The ore is calcopryte with either magnetite or calcite gangue and will run high in copper. The ore body was encountered after breaking through the hanging wall on the 400 level and is entirely outside the main ore body.

So far, the company has contented itself with cutting across the face of the body, and up till last night had cut across 24 feet. The ore body has not been prospected with the diamond drill, and is entirely "found money."

It is impossible as yet to say what the ore will run. If the body is large, as it may well be, it may be the most important strike yet made. The fact of its being outside the ore body is also of very great importance, making the chances of striking other and higher grade quantities of ore more likely.

The smelter of the B. C. Copper Co. this week treated 13,696 tons of ore, distributed as follows: Mother Lode, 9,762 tons; Oro Denoro, 3,621 tons; others, 313 tons.

July 31 '08

BOUNDARY ORE TONNAGE

The following table gives the ore shipments of Boundary mines for 1900, 1901, 1902, 1903, 1904, 1905, 1906 and 1907, as reported to the Greenwood Times—

EDITOR A. D. MACFARLANE

FRIDAY, JULY 31, 1908

WHO IS RESPONSIBLE?

In a recent issue of the News-Advertiser, which is quoted by the Nelson News, there is the complaint that "the history of the last week or ten days of the session at Ottawa furnishes a commentary of the proceedings of the house that cannot be regarded as favorable to the government and its methods. In those few days more actual business was transacted than in three or four months in the earlier periods of the session. Either the measures then introduced and pushed through the house did not receive that careful consideration which they should have had, or else the proceedings in the previous weeks and months of the session were dilatory in the extreme and much time was was wasted at the cost of the country and with unnecessary inconvenience and neglect of their own affairs to the members."

It is hardly necessary in the face of the triumphant leaders of the news columns in the Nelson News, and even in the News-Advertiser, for the last three or four months, to ask anyone to think who was responsible for the unprecedented delay of public business. Each new day brought a new paean of victory to be sung, because the government of the country was unable to transact the country's business without the introduction of some special measure such as the closure. The government hesitated to take radical steps to see that the spirit of the parliamentary rules was obeyed as well as the letter. Now, at the close of the session, someone takes a few minutes to remind the House of what the members have wasted by needless talking and the analysis of Hansard, resulting is something like this. The palm for loquacity goes to Mr. Foster, who talked over 600 columns of Hansard, his printing bill alone for the session being $3,000. Sir Wilfrid Laurier, even though leading the government, was able to get in only one word to Mr. Foster's three. In one speech alone, Dr. Roche, Conservative member for Marquette, filled sixty-three columns, costing the country for printing only, over $150. Of the over 8,700 columns of Hansard occupied altogether, the Opposition members poured forth 4,640, and the government members, though nearly twice as numerous as members of the Opposition, and though it was incumbent on them to furnish information in speeches such as the Budget, filled only a little over 4,000.

The session has taught us many lessons, and not the least of them is the fact that we are a big and growing country, and that trifling with the business of the country in this way is a very expensive affair. The Opposition has seen fit to carry obstructionists tactics to the point where they overreached themselves, and the great wonder is how the News and its confrers have the hardihood now to think that the people have forgotten all that has happened in the past four months, and that they, and not the government, are responsible for the unconscionable delay in the prosecution of public business.

The King's Printer has just issued a book of addresses to His Excellency, Earl Grey, and the replies of the Governor-General in so far as they relate to the resources and progress of the Dominion. The happy circumstance that allows the publication of such a book is stated very well in the preface which reads as follows:

"It has often been pointed out that Canada has been peculiarly fortunate in the selection of the various Governors Generals sent to her by the Imperial Government.

"The present occupant of that most important position is a worthy successor of those who have gone before. At once upon his arrival in Canada he identified himself most closely with the interests and welfare of its people. He has been indefatigable in his efforts to become thoroughly acquainted with the country and its resources, having visited and made himself familiar with each of the nine provinces which now make up the Dominion of Canada. Wherever he has gone, his responses to addresses have been characterized by a knowledge of our country, an appreciation of its resources, an optimistic view as to its its future, a practical common sense and an eloquence that have attracted much attention and been greatly admired.

"It has been thought that what he has stated in these speeches is of such a character that a widespread knowledge of the same could not be but beneficial to the people of Canada and the Empire and, moreover, there has been a general request that they should be published.

"It has accordingly been arranged to put out an edition of these speeches, so as to preserve them in permanent form, and to permit of a wide distribution thereof."

Provincial Items

R. V. Clement, brother of Mr. Justice Clement, has opened a law office in Vernon.

Premier McBride has denied that he will contest Victoria in the Federal elections.

Nelson now eats its dinner an hour earlier and has an hour longer in the cool evening to itself. Nelson is becoming a city.

Referring to the election in Kootenay, the Cranbrook Herald remarks: "Good-bye, Goodeve," which is very pertinent.

The Keremeos Trumpet is publishing a clean and well printed weekly and finds lots of news of interest to Keremeosites.

The Vernon fall fair will be held from September 16-18. The prize list amounts to over $2,600, and the races will take down $1,750.

One hundred laborers went on strike at Hosmer last week, asking an increase of 50 cents per day. They had been working for $2.

Differences are reported between the McBride government and the G. T. P. which will hinder the placing of the townsite on the market this fall. Soon people will start to wonder whom the delectable Dick can get along with.

Five black hand suspects broke jail at Fernie on Wednesday of last week. Their escape has greatly excited a colony of Italians living in the town who wanted their death.

Carley & Carley, of the late Nelson Canadian, are issuing the Ladysmith Chronicle. The Hosmer Times appeared last week, with Bert Whimster as manager. J. Peck McSwain was the first caller on the new editor.

Geo. Horstead, noticing a perceptible heating of the atmosphere about the Convention Hall in Nelson where the Conservatives were in convention, last week seized the hose and played a steady stream of water on the place for a full half hour.

The fire limit by-law in Grand Forks provides the following boundaries: North Fork of the Kettle River on the east side, centre of Fourth street on the west side, Main street on the south and a line 108 feet south of Victoria avenue on the north.

Jack Derry, an iron worker on the new steel tipple at the Hosmer mines, fell 75 feet and was killed on Wednesday week. Derry's home is in the Canadian Sault. He was 27 years old. The tipple on which the accident occurred is 90 feet high and 285 feet long, and when completed will be able to handle 4,000 tons of coal per day. It will cost about $100,000, is the largest in Western Canada, and will be finished by September 1st.

The last issue of the British Columbia Gazette contains a notice of the incorporation of the Grand Forks Fruit and Nursery Company, Ltd. The company is given power to carry on a general nursery business, and in addition that of canners and packers and dealers in nursery supplies. The capital is $25,000. The incorporators are Tweedle and Son and Mr. Hill, of Fruitland, Niagara Peninsula, Ont., and J. D. Honsberger, the well known fruit grower of this city. The property of the company adjoins the western boundaries of the city limits, and comprises some of the finest orchard lands in the valley, being a portion of the old Newby ranch. Messrs. Tweddle and Son and Hill are experienced Ontario nurserymen, and their removal to this district augurs well for the fruit industry of the valley. Improvements on an extensive scale will be carried out on the company's property next season.—Grand Forks Sun.

The Ashcroft Journal, despite the lapsing of the timber licenses, has turned into quite a newsy sheet. Of the Nechaco Valley it has the following to say:

"An interesting party of settlers passed through Ashcroft last Sunday en route for the Nechaco Valley. The party comprised some twenty-three persons and nine 'Prairie Schooners' are being used for the 'trek.' These settlers are from Rathdrum, northern Idaho, and from this town to their destination at Noolki Lake; Nechaco Valley, they will have covered over five hundred miles and have been on the road thirty-three days.

"The colonization of the Nechaco Valley is proceeding along at a rapid gait, and when it is figured out that over 200,000 acres of productive arable land are available far settlement, an idea is gained of its size.

"The valley has good drainage to the creeks and lakes and contains little rough land. The land has a dense growth of smal poplars, with bunches of small spruce. There are extensive open meadows and clearing the land is not difficult or expensive. The climate is described as being as mild as anywhere in the interior of B. C.

"Small grain is sown in April and ripens in August. Fine results are reported. Timothy and clover have been tried with great success, while wild grasses grow with great luxuriance.

"Wild fruit grows, and where wild fruit is found the soil and climate may be considered suitable for growing fruit in orchards. Wild strawberries, saskatoons, high-bush cranberries, huckleberries and cherries are found in every section of the valley."

Copper HANDBOOK.

(New Edition issued March, 1908.)
Size: Octavo. Pages: 1228.
Chapters: 25.
Scope: The Copper Industry of the World.

Covering; Copper History, Geology, Geography, Chemistry, Mineralolgy, Mining, Milling, Leaching, Smelting, Refining, Brands, Grades, Impurities, Alloys, Uses, Substitutes, Terminology Deposits by Districts, States, Countries and Continents, Mines in Detail, Statistics of Production, Consumption, imports, Exports, Finances, Dividends, etc.

The Copper Handbook is concededly the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Miner needs the book for the facts it gives him regarding Geology, Mining, Copper Deposits, Copper Mines.

The Metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting, and refining.

The Copper Consumer needs the book for every chapter it contains. It tells what and explains how and why.

The Investor in Copper Shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

Price: $5.00 in Buckram with gilt top, or $7.50 in full library morocco.

Terms: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

What Ails You?

Do you feel weak, tired, despondent, have frequent headaches, coated tongue, bitter or bad taste in morning, "heartburn," belching of gas, acid risings in throat after eating, stomach gnaw or burn, foul breath, dizzy spells, poor or variable appetite, nausea at times and kindred symptoms?

If you have any considerable number of the above symptoms you are suffering from biliousness, torpid liver with indigestion, or dyspepsia. Dr. Pierce's Golden Medical Discovery is made up of the most valuable medicinal principles known to medical science for the permanent cure of such abnormal conditions. It is a most efficient liver invigorator, stomach tonic, bowel regulator and nerve strengthener.

The "Golden Medical Discovery" is not a patent medicine or secret nostrum, a full list of its ingredients being printed on its bottle-wrapper and attested under oath. A glance at its formula will show that it contains no alcohol, or harmful habit-forming drugs. It is a fluid extract made with pure, triple-refined glycerine, of proper strength, from the roots of the following native American forest plants, viz., Golden Seal root, Stone root, Black Cherry bark, Queen's root, Bloodroot, and Mandrake root.

The following leading medical authorities, among a host of others, extol the foregoing roots for the cure of just such ailments as the above symptoms indicate: Prof. R. Bartholow, M. D., of Jefferson Med. College, Phila.; Prof. H. C. Wood, M. D., of Univ. of Pa.; Prof. Edwin M. Hale, M. D., of Hahnemann Med. College, Chicago; Prof. John King, M. D., Author of American Dispensatory; Prof. Jno. M. Scudder, M. D., Author of Specific Medicines; Prof. Laurence Johnson, M. D., Med. Dept. Univ. of N. Y.; Prof. Finley Ellingwood, M. D., Author of Materia Medica and Prof. in Bennett Medical College, Chicago. Send name and address on Postal Card to Dr. R. V. Pierce, Buffalo, N. Y., and receive *free* booklet giving extracts from writings of all the above medical authors and many others endorsing, in the strongest possible terms, each and every ingredient of which "Golden Medical Discovery" is composed.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. They may be used in conjunction with "Golden Medical Discovery" if bowels are much constipated. They're tiny and sugar-coated.

Fruit Industry

Present indications are that the Irrigation Convention to be held in Vernon, B. C., during the week beginning August 10th, will be one of the most important gatherings of the kind that has ever been held in Western Canada. Among the notables, whose attendance will contribute to the prestige of the gathering are Lieutenant-Governor Bulyea, of Alberta, and Lieutenant-Governow Forget, of Saskatchewan, Hon. F. J. Fuller, Chief Commissioner of Lands and Works. It is expected, also, that there will be a particularly strong representation of irrigation and forestry experts, official members of land and colonization organizations, and others particularly interested in the important subjects of irrigation and water legislation.

It is to be hoped that local irrigation and irrigation colonization companies, agricultural, horticultural, forestry and live stock associations, municipal corporations, boards of trade and similar organizations, will lose no time in appointing the number of delegates to which each is entitled. There is scarcely a section of Canada which is not directly interested in problems connected with the distribution and concentration of water, forestry, etc., and all should make a point of taking advantage of their right of representation at this important convention. A single fare rate has been arranged for delegates and their wives.

Strawberries are still being brought in from Anarchist Mountain this week. On Saturday last some fine lucious strawberries from there were sold in Greenwood.

National Apple Show

The national apple show to be held in Spokane, Wash., December 7th to 12th, will be an event in which British Columbia should play an important part. The purpose of this show is to create and supply an increased demand for the apple.

By the offering of large and unusual premiums to bring about a healthy rivalry, by comparison of exhibits between the orchardists in all localities, thereby stimulating the grower to increasing activity and efforts to produce each year a higher standard of fruit, packing, marketing and price.

By keeping at one time before the apple growers of the world a representative collective display of the King of Fruits from all apple growing districts; bringing the product of old and new orchards to his attention and thereby benefiting in a financial way, both the orchardist and the buyer.

By placing before the consumer the many varieties of scientifically grown and packed standard apples, insuring to him quality and quantity, and thus make a greater demand for the product of the orchard and a market for the ever increasing supply in all localities, as new trees planted each year reach the age of commercial value.

The Publicity Committee of the Chamber of Commerce of Spokane has pledged the sum of $10,000 towards the holding of the show.

Several small farms, many of them carrying a perpetual water right for irrigation, and suitable for apple culture, have been donated as special premiums.

The citizens of Spokane and many other sections have contributed liberally, not only money but valuable prizes of a useful nature. The total value of all premiums will be $25,000.

The secretary-manager, Mr. H. J. Neely, of Spokane, will furnish all necessary particulars on application, and British Columbia fruit growers should not go in ignorance for want of asking. British Columbia should carry off the $1,000 prize offered for the best apple in the show.

After advising his audience at Vernon, last week, not to confine their interests to too few varieties of fruit, and to go in for fall and winter varieties of apples, Professor Thornber, of Pullman, Wash., State College, made a very interesting address to the Institute there. In part, he said:

In the successful growth of fruit two conditions should exist. There should be a good quality of soil and there should not be much frost.

Spitzenburg, Yellow Newton and Winesaps were his favorite apples, because they were the best sellers in this country. Winesaps required plenty of moisture.

Where there was an elevation of not more than 1,400 feet and suitable soil, he would recommend Rome Beauty, Wagner and Jonathan. He would not advise growers to plant Winesaps unless they were sure of plenty of moisture.

Mr. Thornber was asked if it were advisable to grow Cox Orange Pippins, but did not think so on the ground that it was not a nice looking fruit.

Continuing, he said he would plant a thousand acres of pears; they were a lucrative crop, stating that as high as $3,500 had been returned from one acre of pears. Of course, owing to the thin skin habits of this fruit, they would have to be wrapped, but they gave large returns. The varieties he recommended were, Bartlett, Comice, and for an early variety the Doyenne. These were all heavy yielders.

In recommending more varieties he did not believe in excess, the very poorest commercial orchards were those that had too many varieties.

Speaking of cherries, Mr. Thornber said: One thing that he had noticed was that there were far too few of the sweet varieties. He would recommend more sweet cherries and a selection could be made from the following kinds which ranged from early to late: Lambert, Hoskins, Bing, Windsor and Royal Arm. Of the sour varieties the Olivette, Montmorency and Morella were the best.

In planting out an orchard get young trees if you want biggest returns for your money, older trees are shorter lived. Plant straight switch not over 28 inches long. If the land is well drained and prepared it is best to plant apples in the fall, but other plants in the spring. The soil should be moist when planted. Cut off 18 inches from the ground about 1-16 of an inch above the bud. If a peach tree about 12 to 14 inches above ground, if a cherry or pear, 24 to 30 inches above ground. The object the fruit grower should aim at is to get a good, solid framework. It is good policy to grow a low headed tree. Young trees of all kinds must be headed at the desired height when they are one year old. This is exceedingly important, and should never be overlooked. Low heading of trees economizes in spraying, thinning, picking, lessens the windfalls, and frequently improves the quality of the fruit.

As an illustration of how low heading counts in picking expense, a fruit grower sent his man one day to pick as much fruit as he could reach from the ground, the next day what he could pick from a three-step ladder, and the next the balance of the fruit, using the ordinary orchard ladder. On figuring up he found the first cost him 3 cents, the second 5 cents, and the third 9 cents.

He would never let orchards get old and high, the growing of cordwood is not aimed at. Cut out the old trees and substitute young. Plant nothing closer than 27½ feet for apples alone. He would advocate the triangular system. Thirty feet apart on square systems gives 46 trees per acre, while on a triangle you can plant 54 trees per acre. Plant apples 33 feet apart when peaches are used as fillers; this on the triangular system would give one-fourth apples and three-fourths peaches. The trees will then stand 16½ feet apart.

Heavy winter pruning is productive of wood, and heavy summer pruning is productive of fruit buds. The latter should be done from middle of July to middle of August.

The land should be worked as early as possible, deep tillage in spring in order to send roots down. To keep the trees from growing too late put on a cover crop, say of rye or wheat. If trees are not making growth enough grow Canada peas or vetch for nitrogen. If you have a good drainage put on a grass mulch, but if you do this you must have a plentiful water supply.

Dealing with orchard pests, he said:

For apple scabs: Spray thoroughly, as apple blossoms shows pink, with Bordeaux mixture.

Peach leaf curl: Spray before buds open with Bordeaux or lime sulphur.

Peach mildew: Spray with Bordeaux or lime sulphur. Another good spray is "Cupram," made of the following ingredients: Five ounces blue vitrol or copper carbonate, to 3 pints of water, add 3 pints of ammonia, dilute the whole with 45 to 68 gallons of water.

For mildew on gooseberries, spray early in spring with lime sulphur before buds open.

For mildew, leaf blight, and rust on strawberries, mow ground as soon as crop is harvested and burn leaves, then spray with Bordeaux.

For pear leaf blight: Mark the trees which you notice are affected and spray in the spring. For pear moth, spray with lime sulphur; for pear or cherry slug, use dry dust of some sort for the time being, and just as soon as fruit is off spray with arsenate of lead.

Pear blight is a bacterial disease and the remedy is to cut it out when found, no matter whether it is winter or summer. It must be cut six inches or a foot below the blight. Sterelize your saw with 75 per cent. carbolic and paint the cut over with a good lead paint in the winter season.

Apple canker or sun scald is a large patch of dead bark. Spray with double strength of Bordeaux mixture between the 1st and 15th of October. Apple pink or spot, spreads soon after apple trees blossom, and the remedy is to spray with Bordeaux in winter. Every tree with blotched fruit should be marked and examined for decayed patches.

Use bran and arsenate or kerosene emulsion on outside row of of trees for grasshoppers. For caterpillars use arsenate of lead.

For green aphis use sulphur in the fall. If seen, use coal oil emulsion heavily. Following is a good formula: Halt pound whale oil soap, 1 gallon of water, 2 gallons kerosene, dilute from 8 to 12 times. For apple aphis, 8 times; for peach, 10 times: for rose 12 times. When black aphis appears cut off affected parts. When sulphur is to be used, use Rex sulphur if possible.

In closing, Mr. Thornber said, with regard to irrigation, use it as little as possible. Try and cut it down to one-fifth of what you have been accustomed to, and cultivate five times as frequently. If you do this you will at once notice a difference in the size, grade and color of your fruit. It means a lot more work, but you will be well paid for it.

HOMESTEAD REGULATIONS.

ANY even-numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 150 acres, more or less.

Application for entry must be made in person by the applicant at a Dominion Land Agency or Sub-agency for the district in which the land is situate. Entry by proxy may, however, be made at any Agency on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

DUTIES—(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) A homesteader may, if he so desires, perform the required residence duties by living on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of his homestead. He may also do so by living with father or mother, on certain conditions. joint ownership in land will not meet this requirement.

(3) A homesteader intending to perform his residence duties in accordance with the above while living with parents or on farming land owned by himself must notify the Agent for the district of such intention.

W. W. CORY,
Deputy of the Minister of the Interior

Wallace-Miller Block, open evenings

Martin Burrell, of Grand Forks, was in the city on business yesterday.

C. J. McArthur returned this week from a business trip to Saskatchewan.

Miss Martin is the guest of Mrs. S. S. Taylor, of Nelson, for a few weeks.

Hugh Cameron, of Camp McKinney, returned from New Westminster on Monday.

Mrs. Chas. Wilson and children left on Wednesday evening for Fernie, where she will visit her sister.

A. J. Morrison returned on Wednesday from Butte, Mont., where his brother died nearly three weeks ago.

R. P. Williams, of Rossland, and H. V. Haight, of the Jenckes Machine Co., Sherbrooke, Que., arrived in the city yesterday.

H. P. Newbold, of the Capital City Nursery Co., Salem, Ore., was in town Tuesday, looking for sales of fruit trees in the Boundary.

J. A. Cowie, of Spokane, who is interested in the Grant mine at Chesaw, was in camp on Wednesday. The Grant mine is expected to reopen this week.

P. F. Roosa, manager of the Dominion Copper Co., and Supt. Rundberg, of the company's mines at Phoenix, were both in Greenwood yesterday.

Hamilton Fish, Jr., and William B. Parsons, of New York City, arrived in Greenwood on Saturday and are getting experience at the Mother Lode mine.

Dr. McLean, of Phoenix, was assisting in an operation at the hospital Wednesday. T. A. Love, editor of the Pioneer, came down with the doctor to get a touch of smelter smoke.

Archie Bunting, son of Mayor Bunting, leaves on Monday for Vancouver, to enter the office of A. C. Hope, architect. It is Archie's ambition to design big business blocks and homes of delight.

W. O. Wright returned from the coast on Tuesday, and will spend a week visiting the properties of the Kettle Valley Irrigated Fruit Lands Co. at Rock Creek Mr. Wright's friends will be glad to know that his health is much improved.

C. G. Major, official administrator, of New Westminster, was in the city on Tuesday and Wednesday, in connection with the estate of the late Frank Fera, who died recently at the coast, and who owned some property here.

The extreme penalty of the law was inflicted this morning at 8 o'clock on Francesco Cedio. Today is the day when Cedio gives up his life for the life which he was found guilty of taking at Niagara on the 11th of January, 1907. Execution was performed by Radcliffe, the professional hangman. On May 26th last, Cedio was condemned to death, after trial by his peers, at Greenwood.

Many of the older residents of the Greenwood district will regret the news of the death of Arthur Stanhope Farwell, of Nelson. Mr. Farwell was not only one of the earliest settlers of the province, having come to Canada in 1862 via the Isthmus of Panama but was one of the most prominent men of the province. Early in the eighties he laid out the City of Revelstoke and assisted in the location of the line of the C.P.R. through Roger's Pass. In 1888 he surveyed and laid out the first eight blocks of the City of Nelson. In the 90's, he was prominent in politics, being defeated twice in the Kootenay. The night before his death he had talked long with F. J. Deane of old times in the Kootenay and after going home closed his eyes never to open them again. His death occurred, it is thought, between 4 and 5 o'clock on Wednesday morning.

TOWN TOPICS

Okanagan peaches are being delivered in Greenwood this week.

Keep in mind the date of the lawn social at the Church of the Sacred Heart, August 11th.

Rev. F. V. Venables will conduct divine service at the Mother Lode on Sunday next, August 2nd, at 3 p. m.

There will be a meeting of the Fish Association in the City Hall tonight. Everyone interested in fishing is requested to turn out.

The initiatory degree will be conferred on several candidates at the Odd Fellows' lodge on Tuesday next. Last Tuesday the first degree was put on.

Chesaw will play a revenge game at the baseball grounds on Sunday, and if anything like the ball furnished at Chesaw a fortnight ago is provided, the game will be worth seeing.

A split bamboo rod, 25 yards of silk line and a good reel, all for $2.00, at McRae Bros. Beat it if you can.

At the garden party of the Church of the Sacred Heart on August 11th, there will be foot and bicycle races and a tug-of-war, for which prizes will be given. Remember the date, Tuesday week.

A Children's Flower Service will be held at St. Jude's Church on Sunday morning next, August 2nd, at 11 o'clock. All children are invited and requested to bring bunches of flowers. After the service the flowers will be sent to the hospital.

Remington Carbon papers and ribbons are absolutely clean and long lasting. McRae Bros.

The first of the series of orchestra dances, held in the Auditorium last night, was an unqualified success. This is the first of the dances on the floor of the Auditorium since it has been put in shape for dancing, and considerable satisfaction was expressed with it. With a few more dances it ought to excel any floor in the district, the almost square character of it making the dancing very pleasant. As for the music, it has become quite unnecessary to make complimentary remarks. The orchestra's name is made.

If you are a judge of Wall Paper value, our 1908 line will appeal to you as no other can. McRae Bros.

Last night the Boys' Brigade was treated to a royal entertainment at the home of Mrs. Fair by Mrs. Fair, Mrs. Shaw and Mrs. McCutcheon. The Brigade paraded to the house, giving the general salute before it to the party of ladies gathered on the lawn to assist in looking after them. Ice cream and cake were served in abundance and every one of the thirty boys had all they wanted. Mrs. McCutcheon had provided an exhibition of fireworks for the boys which made a very pretty spectacle on the hill amid the lights of the Chinese lanterns. Both the boys and Instructor Hargreaves appreciated very much the kindness of the ladies and will remember the evening for some time.

A cool evening, under the stars, in a comfortable hammock, makes life almost divine. Coles' keeps the Hammocks. See them.

Cricket is Greenwood's latest venture in the line of sport, and as the club starts out with 30 members and lots of enthusiasm, there ought to be something doing on the exhibition grounds before the end of the season. On Wednesday night the club was organized and decided to practice regularly on Tuesdays and Thursdays. Arrangements were made for the purchase of a complete outfit, a crease will be made at the ball grounds and the membership fee was made $2.50. The following are the officers elected at the meeting: President, Mayor Bunting; vice-presidents, Duncan Ross, M. P., Dr. J. E. Spankie, E. G. Warren; secretary-treasurer, H. D. Rochfort; committee, E. B. Dill, H. Browning, O. T. Hawtrey, G. B. Taylor and F. W. McLaine.

A party of C. P. R. engineers will arrive today to go over the wagon road route at Boundary Falls. It is understood that there are some slight difficulties over the right-of-way, but that these will likely be arranged and construction started very shortly.

Mother Lode tonnage this week establishes another record of 10,492 tons. On Monday the mine shipped 2,451 tons. The Oro Denoro also made a top notch with 4,300 tons for the week.

The special postage stamps issued in commemoration of the Tercentenary celebration at Quebec have been on sale for the past week. The stamps are of most artistic design, and are twice the ordinary size, to allow of adequate representation of historic scenes, portraits, etc. The description of each denomination is as follows: Half cent, grey, picture of the Prince and Princess of Wales; one-cent, green, portraits of Champlain and Cartier; two-cent, red, King Edward and Queen Alexandra; five-cent, blue, representation of L'Habitation de Quebec; seven-cent, yellow, pictures of Montcalm and Wolfe; ten-cent, mauve, picture of Quebec in 1700; fifteen-cent, picture of the parliament of the west of the old regime; twenty-cent, green, picture of a courier du bois with Indians.

Myncaster was the scene of an exciting event on Sunday, the attraction being a game of cricket between an eleven gathered together in Greenwood through the very creditable efforts of O. T. Hawtrey, and the champion players of Myncaster. The majority of the Greenwood players left on Saturday afternoon, taking in the dance at Myncaster that evening. As for the game, an official reporter was appointed, but at noon today his report had not materialized. The match was one innings each side, and the honor of carrying the bat through fell to H. Browning, of the smelter office force, who also scored 33 of the 70 runs made by the local team. Myncaster's total was 98, the winning runs being made by them in the last two wickets. The players representing Greenwood were: Browning, Hawtrey, Taylor, Rochfort, McMynn, Dill, de Weile, Ebitt, Laws, Curtis, Warren, A. D. Hallett, scorer; D. A. McDonald, manager.

The resumption of operations at the Snowshoe mine, which has been rumored several times since its shutdown on November 18th last, was announced definitely on Saturday. During the interim, Charles Biesel, the superintendent of the mine, has been employed as the company's purchasing agent at the Trail smelter. Mr. Biesel returns to Phoenix tomorrow and will start employing men immediately. By August 10th, there will be 150 men employed, and in less than a week later regular shipments or ore will be made.

The ores from the Snowshoe last year were shipped mainly to the smelter of the B. C. Copper Co. here, but it is now understood that they will go almost entirely to Trail, the B. C. Copper Co. having plenty of good fluxing ore of its own and quite sufficient of its own output generally to keep the smelter running at full capacity. The only ore shipped from the Snowshoe since its closing was 367 tons, which went to Trail in February.

K. of P. Installation.

A number of members of the K. of P. lodge at Phoenix Wednesday night assisted in the installation of officers of Greenwood Lodge No. 29, K. of P. The installation was in charge of A. D. Hallett, D. D. G. C., assisted by Past Chancellors Max Berger, Albin Almstrom and Martin Anderson. After the ceremony a banquet was served in the Windsor, at which toastmaking and speeches concluded a most pleasant evening. The following are the officers installed:

Jas. W. Grier, C. C.
W. T. Thompson, V. C.
W. B. Embree, P.
Wm. Lawson, M. of W.
A. D. Hallett, P. C., K. of R. & S
A. J. Logan, M. of F.
Chas. Bierce, M. of E.
J. A. Otto, M. at A.
Martin Anderson, P. C., I. G.
Chas. Dagman, O. G.

Your tailor may make good enough clothes, but

Do they Lack Style?

He can't help it—he merely follows the lead set by the large clothing makers and, of course, is a season behind the styles.

We can make your clothes to measure and yet give them all the latest touches of Style and Finish.

The reason is, that by our system, the men who originate the styles, make our customers' clothes.

The cost of a suit, specially made, runs from $14 to $20. Come in and let us tell you about the

Campbell's Clothing

Special Order Service and show you our range of summer suitings.
