Dry Goods. Millinery

MONEY

Can be Saved by Dealing With Us.

Dealing exclusively in Everything Men Wear. Having a large business in Phoenix as well as Greenwood, we are in a position to purchase all our lines direct from the Manufacturers of the World

Saving the Middle Man's Profit.

This profit we divide with you in Cash and Value

Before filling your wants call and examine our different lines and you will be convinced what we state is correct

P. W. GEORGE & CO.

The only Exclusive Dealer in Men's Wear in Greenwood

COUNCIL MEETING.

The postponed meeting of the City Council was held last evening. Present—Mayor Bunting, Aldermen Gully, Sutherland, Fleming, Meyer, Mortimer and Wilson.

J. S. Martin, secretary of the Phoenix Water Supply Co., acknowledged the letter of the City Solicitor re damage to Providence creek from the outbreak of Marshall lake, and promised further consideration.

The Greenwood Concert Band asked for an allowance to cover the expenses of music, etc. The Council granted $20 a month for the remaining five months of the year, on condition that weekly open-air concerts were provided during reasonable weather.

The clerk then read the statement of the receipts and expenditures of the six months ending June 30. The report showed the following items of interest:

RECEIPTS.	
Police	$ 524 50
Traders' licenses	435 00
Liquor licenses	2,305 00
Cemetery stumpage	23 00
Dog tax	130 00
Water rates	2,575 00
Arrears of taxes	313 45
Bank of Montreal	7,804 78
EXPENDITURES.	
Streets and sidewalks	$ 992 09
Debenture interest	3,991 30
Gen. ex. and donations	568 91
Street lights	753 80
Schools	1,919 79
Advt. and stationery	218 35

Arnold D. Hallett and R. J. Sanders, appearing for the Auditorium Company, asked that the favor extended for two years past to the owners of the Auditorium be continued with them, in the matter of business tax, at least until they saw whether the company could make the venture pay. No change will be made by this Council during its tenure of office.

The Treasurer was instructed to have last year's note with the Bank of Montreal for $2,500 retired on receipt of the license fees, and the Mayor, the Finance Committee and the Clerk were authorized to make arrangements with the bank for covering the present overdraft with necessary paper.

In the reports of the committees the council considered a great many details. The Mayor reported that the reservoir on Providence creek had been used this week and worked perfectly. Twenty-five curb boxes were ordered to be purchased, the business to be placed, if possible, with the Greenwood branch of the Nelson Iron Works. The Fire and Light committee reported "No fires and plenty of light," while the Board of Health smiled "progress."

The Finance committee recommended the payment of the following accounts:

Laundry	$ 10 30
Jos. Wilmhurst	12 50
E. W. Bishop	37 70
H. McKee	11 00
Pacific Coast Pipe Co	15 00
G. C. Waterworks Co.	8 75
G. C. Waterworks Co.	128 80
A. A. Frechette	4 00
Greenwood Livery barn	40 29
Rendell & Co.	12 93
John L. Coles	2 10
Howard Moore	24 35
Hunter-Kendrick Co.	50
Russell-Law-Caulfield Co.	9 30
Kinney & McDonald	13 00

Then followed a general discussion on a number of things, collection of licenses, the pound by-law, etc. After hearing complaints of nuisances in the North Ward, Ald. Fleming "was glad to say that the are none of those people living in the South Ward. We're a peaceable law abiding Chinese colony down there."

Long County Court.

County Court, which opened on the 23rd of June, adjourned on Saturday, July 4th, until the 8th of September, 1908. The results not before published are as follows:

Hunter-Kendrick Co. v. Providence Mining Co.—Judgment for plaintiff.

In the cases against the Sudbury Mining Co., the plaintiffs, Graham, Bung and Skene, got judgment for $145, $138.25 and $70.75, and costs, respectively. The Greenwood City Waterworks Co got judgment for $429 against the same defendants.

In Lautard v. Bedard, the plaintiff was given judgment for $50 and costs, to defray the expense and time lost through a mistake of the defendant in providing him with the wrong record for pre-emption.

A cool evening, under the stars, in a comfortable hammock, makes life almost divine. Coles' keeps the Hammocks. See them.

FIRE SWEEPS GRAND FORKS

Fire Takes Heart Out of Business Section of the City--One Man Dead--Possibly Another

Special Dispatch to The Times.

GRAND FORKS, B.C., July 10.

The worst fire in the history of this city started early this morning, supposedly in the Square Hotel, which was vacant, and had made such headway before being noticed that it looked as if the lower end of town was doomed. Two blocks and a half were completely cleaned out, and the approximate loss, which can be ascertained at present will reach nearly $300,000, with possibly 25 per cent of insurance.

N. Barnetby, of Maloy, who was sleeping in the Valhalla Hotel, was burned to death, his charred remains being found in the ruins.

The buildings destroyed were the Yale Hotel, Alberta Hall, Valhalla Hotel, Victoria Hotel, Parry's barber shop, Bribilsky's barber shop, Miles' second-hand store, Waldron's barber shop, Telephone Exchange, Canadian Pacific telegraph office, Windsor Hotel, British American Trust Co., Eastern Townships Bank, Downey's cigar store, Province Hotel, Clarendon Hotel, Salvation Army Barracks, Grand Forks Hotel, Band hall, Folger's residence, Horner's residence, White's jewelry store, Co-Operative store, Chapple's plumbing shop Woodland's drug store, Cochrane's law offices, Dominion Express office, and practically all the lodges in the city suffered a total loss.

Besides these places, several buildings which were not occupied were burned to the ground.

When it was seen how serious the fire was, the steam fire engine was backed down to the river, which, along with the big tank, gave the fire boys plenty of water.

In several of the hotels the guests barely escaped with but a few clothes on, and in some cases people made a dash for the street nearly naked.

The west side of First street was threatened for some time.

On account of two of the local banks being unable to reach their vaults, owing to this morning's fire, Mayor Fripp has proclaimed today and tomorrow legal holidays.

It is stated that another man is unaccounted for since the fire.

REMEMBERED THEIR FORMER CHIEF

Yesterday afternoon the employees of the Dominion Copper Co., at their smelter at Boundary Falls, made Mr. W. C. Thomas, the retiring manager, the recipient of a mark of the esteem in which they held him by presenting him with a very beautiful diamond scarf pin. Mr. Thomas has always been exceedingly popular, not only with the men, but with his office and executive staff, and the men didn't want to see the man who had done such faithful work as Mr. Thomas has done with them go away without an expression of their respect and kindly feeling. The presentation was held at 4 o'clock yesterday. B. M. Renaud, one of Mr. Thomas' oldest assistants, being chosen to make the presentation.

At the same time, the men felt that they wished also to remember Mrs. Thomas and their gift to her took the form of a beautiful silver pudding dish. All the men, over sixty in number, having gathered on the feed floor at the smelter the following address was read:

BOUNDARY FALLS, B. C.,
July 9, 1908.

Mr. W. C. Thomas, Boundary Falls, B. C:

DEAR SIR—We, the employees of the Dominion Copper Co. at Boundary Falls, who have worked under your leadership for the past two years, and since you have decided to leave us, it is our sincere desire to prove to you, in a suitable manner, our regret at parting with you, and to prove to you how deep in sympathy and high esteem you are held in our hearts, for the sympathetic manner you have always been ready to lend an ear to our grievances, personal or common, and it has never proven too great a task for your ability, to solve the problem for the good of all and satisfactorily to all parties concerned. But, as circumstances have made it impossible by the long shutdown, to be as liberal as we would like to be in offering you something that will speak for itself in expression of our sentiments, we therefore, resolve to present you this scarf pin.

We hope that it will be accepted in the same spirit in which it is given, not for its intrinsic value, but as a token of the esteem in which you are held in our hearts, and it will serve as a memento, in future days, when we are all scattered in this broad land, that still there remains a soft spot in the hearts of the Boundary Falls boys, and deep feeling for the welfare and prosperity of our friend and leader, Mr. W. C. Thomas, when Manager of the Dominion Copper Co.

Good wishes to you and your loved ones.

Mr. Thomas leaves tomorrow with Mrs. Thomas and their children for Salt Lake City. They intend, in going, to go first to the coast, visiting Vancouver and Victoria, and then on down the coast to San Francisco. Mr. Thomas returns practically to the position which he had when he was first sent by Mr. Newhouse to reorganize the smelter of the Dominion Copper Co. His will be a sort of a roving commission, doing special smelter work on the Newhouse properties, and his headquarters will be in Salt Lake City, Utah. Speaking of his residence here, Mr. Thomas stated that though he had remained a great deal longer than he had intended when first coming here, he had made many cloee friends whom he found it hard to leave behind, and expressed himself as greatly pleased with his life in British Columbia.

The smelter of the B. C. Copper Co. this week treated 13,052 tons of ore, distributed as follows: Mother Lode, 9,479 tons; Oro Denoro, 3,416 tons; others, 157 tons.

Diamond Drilling at the Lone Star.

At the B. C. Copper Co.'s Lone Star and Washington property, exploratory work with the diamond drill is being carried on in a more systematic way and on a larger scale than has yet been attempted in this company's mines. Holes are being drilled at regular intervals of 60 feet over the entire area to be explored, the holes being arranged in such a manner as to use raises previously made in place of two. Fourteen of these holes have been completed to date, and have blocked out a large amount of ore.

Two diamond drills are employed in this work at present the second machine having been started on June 22. The holes now being drilled are all started from the surface, and a shaft is sunk through the soil and gravel to solid rock in preparation for each. Much difficulty has been experienced in some of the holes on account of caving ground, the rock in the vicinity of the Lone Star mine not being as firm as in the Mother Lode and Granby. These difficulties are largely being overcome, however, by the use of two sizes of casing, within which the drill is operated. The smaller size of casing fits inside the larger one, thus making it possible to run the casing to twice the depth feasable with one size.

Power for running the drills is obtained from the old steam plant, which, up to the beginning of diamond drilling, had not been in use since the B. C. Copper Co. took over the property. A crew of six men is employed in this work, which is the only thing being done at the mine at present.

Big Profits for W. K. P. & L. Co.

Through the Bank of Montreal, the West Kootenay Power & Light Company has been offering first mortgage bonds bearing 6 per cent interest for $1,200,000; the subscription list closed on July 2nd. The bonds form part of a total authorized issue of £308,219, of which some £68,000 have already been sold. The auditors' certificate shows that the net profits of the company and subsidiary companies since 1901, as the result of the sale of 4,000 horse power, which was all that was available up to the edd of 1905; have been as follows: 1901, $77,324; 1902, $67,618; 1903, $55,397; 1904, 73,811; 1905, $95,181; 1906 $109,230, and 1907, $148,195.40. The most interesting part of the advertisement offering the bonds for sale is the announcement that the C. P. R will probably require power from the W. K. P. & L. Co. This means the electrification of the line from Proctor to West Robson and up to Rossland, a scheme which has been discussed for a long time and which now may be carried out. Incidentally it is stated that L. A. Campbell is to leave the service of the company and take up Mr. Graves' plans in Spokane, but whether this is true or who will succeed Mr Campbell as manager is not announced.

BOARD OF TRADE.

The monthly meeting of the Board of Trade was called for 8:30 Wed. night, and was thinly attended, owing to a conflicting installation in the Odd Fellows' lodge and a meeting of the K. of P.'s. The secretary reported a large amount of correspondence attended to. There were 440 tickets sold for the Kilties concert, and receipts of $652.75, leaving the Board $126.35. Expenses amounting to about $66 had been incurred, leaving a net profit of $60.

The only other matter of more than routine importance that arose was the dangerous wagon road at Boundary Falls. The C. P. R. had failed to implement their promises regarding it, and the secretary was authorized to place the matter before the Dominion Railway Commission immediately, and also to ask Duncan Ross, M. P., to see that something was done to safeguard the life and property of the citizens of the district in this matter.

KICKS.

A few weeks ago, Superintendent Coleman, of the C. P. R., stated to The Times that the change in the road at Boundary Falls would be made in time for the opening of the smelter. The necessary appropriation had been made for the work and it was only a matter of getting the men at it. The smelter at Boundary Falls is now certainly doing business and the C. P. R. has not undertaken to put into effect its promise. It is stated that they are now attempting to postpone action until the return of Mr. Coleman from the coast. The road as it now is has been condemned by the grand jury twice; in its present situation it is a menace to human life, and it's up to the citizens to see that the new road is built before some fatality occurs. The C. P. R. has been altogether too slow in satisfying their acknowledged responsibilities in this matter.

A business man from the Rock Creek district said he was afraid to come to Greenwood because of having to come through the C. P. R.'s death trap at Boundary Falls. This can't be. The work can be done for very little, and it's up to the C. P. R. to get busy.

That the Dominion Copper Co.'s mines at Phoenix are turning out pretty steadily the kind of ore for which the superintendent has been looking for some time and only getting glimpses of, is the statement of the man best qualified to know outside of the officials of the company. The report is that they have been getting some good quality of ore from the Brooklyn.

Anaconda School Report

Folllowing is the report of the Anaconda school for the month of June:

No. of pupils attending	32
Average attendance	27 86
Percentage of regularity	92.62

Pupils present every session: Beada Boak, Robert Murray, Edward Nelson, Theodore Boak, Dottie Wescott, Elsie Hartman, Mable Craigie, Annie Wilcox. Mary Intilla, Walter Johnson, Genieve Wilcox. A. L. READING, Teacher

BOUNDARY ORE TONNAGE

July 10 '08

The following table gives the ore shipments of Boundary mines for 1900, 1901, 1902, 1903, 1904, 1905, 1906 and 1907, as reported to the Greenwood Times—

MINE.	1900	1901	1902	1903	1904	1905	1906	1907	1908	Past Week

FRIDAY, JULY 10, 1908

The Toronto Saturday Night has this to say of the elections. It may be remembered that this paper a few weeks ago made a similar statement about the influence of the Ontario elections: "The Dominion elections will, no doubt, be held within a year, and in view of Mr. Whitney's success, people are discussing Sir Wilfrid Laurier's chances in Ontario. At present this province sends to Ottawa a Conservative majority of ten, while in the local house Mr. Whitney has now a Conservative majority of sixty-eight. But the sweep made in the Provincial contest has little significance in federal politics. The forces line up in quite a different way for the Dominion elections. Probably the Conservatives will show up considerably better than ten of a majority from Ontario in the next Parliament, although not enough to imperil the safety of the Liberal government. From various causes Sir Wilfrid has lost ground in this province, which, perhaps, would not have been the case had he visited Ontario more frequently. No public man has been able to arouse more popular enthusiasm than he, and a few visits up this way would have worked wonders." In reference to Sir Wilfrid's visits and their value politically, even the Saturday Night would acknowledge that a man who fulfills the conditions of its last sentence probably knows what the possibilities of his presence in Ontario on a few occasions before election would do toward dissipating foolish and ill-judged criticism of his government.

The Hedley Gazette has worked itself into a fury over the decision of the County Court Judge in the appeal of David McBride, of Bridesville, reported in this paper two weeks ago. The editor of this paper was not in court during the progress of this case, but the statement of the case as it appeared in this paper was approved as correct by those most competent to judge outside of the judge himself. The Gazette says the case was not fairly stated; it does not show in any particular where this occurs. At the conclusion of the report The Times made the remark that "The decision is particularly important inasmuch as it will make it more difficult for injustice to be done to landholders by M. P. P.'s disposing of the monies voted for roads in ways that shall react to their political advantage rather than to the general good." This reflection, which the Gazette is pleased to call "a lying sentence," can refer in the mind of the Gazette only to L. W. Shatford, the provincial member for the Similkameen. Perhaps there is some justification for that being the natural inference on the part of the Gazette, but so far as The Times is concerned, we are quite prepared to leave it to our readers to judge whether not the observation is one that can rightly be made. It was made generally, but if the Gazette wishes to put the cap on the head of Mr. Shatford, the Gazette should know whether it fits, and perhaps the operation is interesting to his constituents. In the last day or two we have been informed by men from the Similkameen riding that it does fit, but that we do not know personally. If, however, Mr. Shatford follows elsewhere the tactics used in placing the Rock Creek bridge, we fear the observation is very pertinent to his case.

The Tercentenary celebration at Quebec in the latter part of this month, has attracted attention not only throughout the entire length and breadth of Canada, but from end to end of the Empire. Quebec holds a story of great fortitude and wonderful pertinacity. In its history are some of the most thrilling scenes which history holds, and it is particularly fitting that we, as Canadians, should remember the landing there of the man who held on there for twenty years with so great bravery and almost impossible hope.

But there is another reason why Canada should remember Quebec. It was there that the great drama was played which determined Canada's future. Is it not well that these things should be remembered by Canadians born, and impressed on the new Canadians who are streaming constantly into our wide territories past the ancient citadel. Many people will echo the words of the Colonial Secretary, the Earl of Crewe, spoken recently in London. They are:

Surely it is a good thing that as each emigrant arrives at the gate of the New World, one of the most beautiful spots on which the eye of man has ever rested, he should be encouraged to bare his head to the memory of the glorious past, even if it be for only one hour that he is able to visit the scene of that great historical encounter.

The pageant that will be opened in a fortnight in Quebec will be one of the most brilliant celebrations ever held on the American continent. The pageant, which will be a feature of it, will be the first representation of a complete series of historical events ever held on this continent. It is gratifying to Canadians to hear the favorable opinion of critics that among all the historical dramas of the past there is none more complete in all its details, none more altogether satisfying, than that which was played in Canada in the middle of the eighteenth century.

OIL LANDS IN EAST KOOTENAY.

Reserve Raised—Locations Made by Government Employe.

The Kootenay Liberal calls attention to what looks very much like more trouble ahead in the East Kootenay coal and oil lands:

IS THIS ABOVE BOARD?

There is something doing in Southeast Kootenay. Just what it is is not yet quite apparent. But that it is something is certain. A glance at the B. C. Gazette, any of the May issues, will confirm this statement. At one time the whole of the Flathead section was supposed to be under coal and oil reserve—particularly the latter. A short time ago notice that the reserve was about to be raised was published in the Gazette. This meant that the land was to be thrown open for purchase. Someone noticed this—someone with a name well known in Kootenay; and particularly in Ymir. And that someone at once got busy. The fact that he holds a responsible position with the government did not deter him. As a result we have a whole grist of applications to purchase centering around one name—and that name is WRIGHT. There are Wright's of various descriptions, probably some of them related to THE Wright; but the fact remains that they are Wrights and that the moving spirit is Wright. Seventeen sections in all have been located on the Flathead, and of these several overlap coal and oil areas already under license.

WHERE IT PINCHES.

This is where the story of the Southeast Kootenay activity finds its head. These existing coal and oil licenses are the ones over which there has been so much trouble due to the government's bungle in granting several conflicting licenses for the same areas. That tangle has almost been straightened cut through lengthy litigation; but the litigating licenses are now threatened with greater evils than those from which they are escaping. The raising of the reserve and the throwing open of the lands to private purchase means a serious thing for the license holders; it means that the purchasers can hold them up and hamper them in their operations almost at will. It means that their holdings will be so encumbered that they may become almost worthless to them and that, rather than continue the intolerable situation, they may forfeit the license fees already paid and drop their licenses. The purchaser who stakes over their holdings stands to win on a double count; first, by making them disgorge cash in return for privileges; second, by securing control of the license for himself if he can succeed in cold-shouldering the original holders out of their possessions.

WRIGHT'S QUICK MOVE.

The remarkable things about this are twofold: First, that the government should precipitate a condition which must inevitably lead to wholesale trouble and contention; and, second, stat it should step in at the earliest moment and take advantage of the raising of the reserve. It always looks fishy when one on the inside circle, to whom information denied the public is supposed to be available, makes application for valuable public concessions at the first moment when those concessions become available. The relation of Mr. Harry Wright, gold commissioner, to the seventeen sections staked for purchase we do not definitely know; but we are aware that if one J. Fisher were to divulge the knowledge he has concerning the transaction it would provide very interesting material. We have heard a great many things during the past few months through Conservative sources of unfair partiality shown its friends by the Liberal government at Ottawa; but, after investigation, the majority of the instances cited have been proved to have been foundationless. In other cases, the offenders have been punished. Here we have, right at our own doors, something which bears on its very face the marks of peculiar dealings; and it is the Conservative McBride government, not the Liberal Laurier government, which is at fault. Further reference will be made to this subject in a later issue.

New Phoenix Park

Phoenix is to have a new park, and one that will be a credit to the city, the Pioneer being informed that $5,000 will be expended in putting the ground in shape.

The location of the new park is on the New York townsite. The land has been donated by George W. Rumberger and J. Sercu, and the Granby Consolidated Company donated the power. A large number of men have been busy all week blowing out stumps and otherwise clearing the property. A great deal of labor will be required to put the ground in shape, but the Miners' Union have taken hold in earnest and will have a splendid park when completed. It will include a first-class baseball diamond and will be fenced in. The ground will have the advantage of being high and dry, and yet shaded by surrounding trees.

It has been decided to have the formal opening of the ground on Labor Day, Monday, September 7th, for which arrangements have already been made for a big demonstration in Phoenix. There will be a full program of attractions—baseball tournament, football, races and various athletic sports. An effort will be made to eclipse all previous celebrations here.—Phoenix Pioneer.

PHONE 65.

Copper HANDBOOK.

(New Edition, issued March, 1908.)
Size: Octavo. Pages: 1228.
Chapters: 25.
Scope: The Copper Industry of the World.
Covering: Copper History, Geology, Geography, Chemistry, Mineralogy, Mining, Milling, Leaching, Smelting, Refining, Brands, Grades, Impurities, Alloys, Uses, Substitutes, Terminology Deposits by Districts, States, Countries and Continents, Mines in Detail, Statistics of Production, Consumption, Imports, Exports, Finances, Dividends, etc.

The Copper Handbook is concededly the

WORLD'S STANDARD REFERENCE BOOK ON COPPER

The Miner needs the book for the facts it gives him regarding Geology, Mining, Copper Deposits and Copper Mines.

The Metallurgist needs the book for the facts it gives him regarding copper milling, leaching, smelting, and refining.

The Copper Consumer needs the book for every chapter it contains. It tells what and explains how and why.

The Investor in Copper Shares cannot afford to be without it. The Copper Handbook gives statistics and general information on one hand, with thousands of detailed mine descriptions on the other, covering the copper mines of the entire world, and the 40 pages of condensed statistical tables alone are worth more than the price of the book to each and every owner of copper mining shares.

Price: $5.00 in Buckram with gilt top, or $7.50 in full library morocco.

Terms: The most liberal. Send no money, but order the book sent you, all carriage charges prepaid, on one week's approval, to be returned if unsatisfactory, or paid for if it suits. Can you afford not to see the book and judge for yourself of its value to you?

Words of Praise

For the several ingredients of which Dr. Pierce's medicines are composed, as given by leaders in all the several schools of medicine, should have far more weight than any amount of non-professional testimonials. Dr. Pierce's Favorite Prescription has THE BADGE OF HONESTY on every bottle-wrapper, in a full list of all its ingredients printed in plain English.

If you are an invalid woman and suffer from nervousness, headache, backache, gnawing distress in stomach, periodical pains, disagreeable, catarrhal discharge, dragging-down distress in lower abdomen, "floating specks," perhaps dark spots or specks dancing before the eyes, faint spells, and kindred symptoms caused by female weakness, or other derangement of the feminine organs, you can not do better than take Dr. Pierce's Favorite Prescription.

The hospital, surgeon's knife and operating table may be avoided by the timely use of "Favorite Prescription" in such cases. Thereby the obnoxious examinations and local treatments of the family physician can be avoided and a thorough course of successful treatment carried out in the privacy of the home. "Favorite Prescription" is composed of the very best native medicinal roots known to medical science for the cure of woman's peculiar ailments, contains no alcohol and no harmful or habit-forming drugs.

Do not expect too much from "Favorite Prescription;" it will not perform miracles; it will not dissolve or cure tumors. No medicine will. It will do as much to establish vigorous health in most weaknesses and ailments peculiarly incident to women as any medicine can. It must be given a fair chance by perseverance in its use for a reasonable length of time.

You can't afford to accept a secret nostrum as a substitute for this remedy of known composition.

Sick women are invited to consult Dr. Pierce, by letter, free. All correspondence is guarded as sacredly secret, and womanly confidences are protected by professional privacy. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets the best laxative and regulator of the bowels. They invigorate stomach, liver and bowels. One a laxative; two or three a cathartic. Easy to take as candy.

Tasty Dishes.

In a little booklet of recipes, under the title of "Tasty Dishes," the author says:

"Good food necessarily possesses three qualities. It is appetising, digestible and nourishing. The nutritive quality is often sacrificed in the effort to make a dish tasty, and quite frequently the necessity of digestibility is entirely overlooked, for many dishes possessing high nutrative properties are not suitable foods for use under the conditions of present day life."

The little booklet gives a few examples of dishes which truly come under the head of "Good Food." We believe every housewife should have a copy of "Tasty Dishes." Bovril, Limited, 27 St. Peter S.t, Montreal, will be pleased to send a copy, free, on request.

AT THE CHURCHES

PRESBYTERIAN—Services will be conducted morning and evening, 11 a.m. and 7.30 p.m. Rev. M. D. McKee, Pastor.

METHODIST—Rev. E. J. Rutherford B.A., will conduct services as usual at Methodist Church morning and evening. Services every Sunday, 11 a.m. and 7.30 p.m. and Sunday School at 3.

CATHOLIC—Church of the Sacred Heart.—Divine service 1st, third and fourth Sunday in each month. Holy mass at 10 a.m., vespers and benediction at 7:30 p.m.; Sunday school at 2:30 p.m. REV. J. A. HEDARD, O.M.I. pastor.

CHURCH OF ENGLAND (St. Jude's)—Morning and evening. Matins, 11 a.m. Evensong, 7:30 p.m. Sunday school, 2:30 p.m. Holy Communion, 1st, 3rd and 5th Sundays at 8 a.m; 2nd and 4th Sundays after Matins at 11 a.m. Saints' Day services as announced in Church. Rev. F Vernon Venables, Vicar.

Fruit Industry

An interesting and well illustrated bulletin, entitled "Spraying Apples!" has been issued by the Agricultural Experiment Station at Wooster, Ohio, of which the following is a summary:

1. Orchards sprayed with lime-sulphur wash in the winter do not need treatment with Bordeaux mixture before blossoming unless this ingredient is omitted from the spray applied after blossoming.

2. Very heavy application of combined spray (Bordeaux mixture and arsenate of lead) within a week or ten days after the blossoms fall, will do much to secure a high percentage of sound fruit, but in cold, wet seasons, and we may discover that it also russets the fruit, diminishing its value for fancy markets.

3. By omitting Bordeaux from the first treatment after bloom and using only a heavy spray of arsenate of lead, it may be possible to secure a high percentage of sound fruit reasonably free from russet.

4. If Bordeaux is omitted from the treatment just after bloom, as suggested in 3, it would probably be best to use it before the bloom, after the leaves have expanded, and again in the second spraying after bloom. Observation alone can determine whether it should be used in the July spraying. If the leaves are yellow and falling at this time leave out the Bordeaux.

5. The third spraying should be given by July 15th, or earlier.

6. The trees should be sprayed at least four times to secure the best results. Some growers make five applications or more.

7. The net profit from spraying on an average-sized tree from 12 to 20 years old throughout the season at a total cost of from 30 to 50 cents is from $3 to $7 or more, when apples are worth $1 a bushel.

The Kootenay Liberal, of Nelson, gives the following observations of the prospects of the fruit industry in B. C. which are quite apropos to the future of the Boundary: "The first carload shipment of strawberries ever sent out of British Columbia were shipped from Vancouver last week by R. Robertson & Co. The shipment was destined for Winnipeg and was made possible by the co-operation of growers round the district of Victoria. The berries were handled by the Fruit and Produce Exchange at Revelstoke, through which the Kootenay Fruit Growers' Association is marketing its crop. The result will be watched with great interest by all who are connected with fruit growing, as it means practically the opening of a new era in this important industry in British Columbia. It but foreshadows the time when regular fruit refrigerator cars will leave Nelson daily for the prairies."

And What About Apples.

In a recent report of the Department of Trade and Commerce, Mr. J. S. Larke, Canadian Trade Commissioner for New Zealand, says: "For some reason Canadian fruit men have failed to become interested in the best market for British Columbia." As a matter of fact the best market for British Columbia apples is our own prairie provinces of Alberta, Saskatchewan and Manitoba and the mining districts of the north and wherever there is a British Columbia fruit grower does he should cultivate our own domestic market and hold it. Every box of first class fruit going into the prairie country from British Columbia helps to build up the old and new settlers in that country more loyal to the Great Dominion of Canada, and the tourist passing through this country should not be permitted to eat foreign fruit that can be produced here. But there is wisdom in giving heed to Mr. Larke's remarks, and whenever opportunity offers the British Columbia apple grower should establish a connection in the Australian countries. But care should be taken to send only such varieties as will carry well, and give a good account of themselves in the land of the Southern Cross, and under no circumstances should fruit be shipped on deck or in the ordinary hold of the Australian boats. There is only one way to get satisfactory results, and that is in cold storage only. Good British Columbia fruit shipped under proper conditions will bring high prices in the Island Kingdom.

RESOURCES OF B. C. AT CALGARY FAIR.

At the Calgary Fair, which closed yesterday, the British Columbia exhibit proved to be a very great credit to the province. It is, of course, impossible to do absolute justice to the illimitable and inexhaustible resources of the province, but as exhibitions go, this one seems to be a success.

The stand of the British Columbia government exhibit faces the main entrance to the Agricultural Hall, and forms one of the most attractive exhibits, with a magnificent display of fruits, fresh and preserved, and museum specimens of fish and game from the famous government museum at Victoria.

The preserved fruits are shown in clear glass jars, floating in fluid, and include specimens of apples, pears, peaches, grapes, plums, cherries, raspberries, gooseberries and other small fruits, representative of the various fruit growing districts of the province, placed in the upper fair ground. Below these are splendid specimens of packed fruits, fresh from provincial orchards and gardens, including strawberries, cherries, gooseberries and currants. These are shown in commercial packages and put up for shipping purposes.

Below these, forming a bell running round three sides of the entire stand are museum specimens of the principal food fishes which are found in British Columbia waters, shown in glass cases, including a magnificent specimen of the typee salmon, also cohoe, dog and sockeye salmon, the latter is exhibited in the egg and embryo form, showing the development and growth of the young salmon. Other cases contain specimens of steelhead, Kamloops and silver trout, and in sea fishes, black bass, rock cod, red rock fish and black banded rock fish.

In the background is a splendid group of specimen game animals, from the Provincial museum, including the rare kermode white bear, big horn mountain sheep, mule deer, black-tailed deer, panther and black bear.

The top of the stand is decorated with large framed photographs of orchards, hop yards, fishing and forest scenes. Fruit trees in bearing, etc.

Visitors to the stand obtained literature descriptive of the various districts and industries of the province.

On another portion of the grounds, in one of the ready-made houses exhibited by the B. C. Timber and Trading Co., are shown specimens of the giant timber of the province. There is a plot of perfect fir timber 200 feet long, 20 feet wide, 6 inches thick and 20 feet in length, large blocks of fir, spruce, cedar, hemlock and pine in section as cut from the log a short time ago; also squared blocks of the various kinds of timber in common use, and the whole conveys an impressive idea of the vast timber resources of the province.

The tendency to increase in fruit growing in British Columbia is a certain indication of the future importance of its industry. Its history is condensed in the facts following:

Total acres in fruit—

1901 6,437
1905 7,430
1905 22,000
1907 100,000

Over one million fruit trees were planted in 1907, and a still larger number has been planted in 1908.

Ten years ago British Columbia did not grow enough fruit to supply her own population.

In 1902 the fruit shipments aggregated 1,956 tons.

In 1907 the fruit shipments aggregated 4,743 tons.

These facts and figures show how the industry is growing.

The fruit growing lands of British Columbia are of large extent, and include all the great fertile valleys from the Rocky Mountains to the Pacific coast, and from the International boundary north to Cariboo.

Apples, pears, cherries, plums and small fruits grow over the area mentioned.

Peaches, grapes, apricots and other delicate fruits grow to perfection in the open in the southern districts.

The principal districts in which fruit is grown on a large scale are: Vancouver island and adjacent islands, New Westminster, Lillooett, Yale and Kootenay.

Some of the favorite sections of these districts, in which fruit growing is firmly established on a commercial basis, are: Victoria, Vancouver, Salt Spring and other islands, Lower Fraser valley, Kamloops, Lytton, Ashcroft, Spence's Bridge, Enderby, Armstrong, Similkameen, Vernon, Kelowna, Penticton, Nelson, and Grand Forks.

Next Year Centenaries.

The fact that a remarkable number of centenaries of great men will be celebrated next year has been pointed out by Munsey's Magazine. Here are some of them:

Felix Mendelssohn-Bartholdy, German musician, born February 3, 1809.

Abraham Lincoln, sixteenth president of the United States, born February 12, 1809.

Edgar Allen Poe, American poet and writer of tales, born January 19, 1809.

Edward Fitzgerald, the translator of Omar Khayyam, born March 31, 1809.

Richard Monckton Milnes (Lord Houghton), statesman and poet, born June 19, 1809.

Oliver Wendell Holmes, the American poet and essayist, born August 29, 1809.

W. E. Gladstone, born December 29, 1809.

A. W. Kinglake, historian of the Crimean War, born August 5, 1809.

F. E. Chopin, Polish musician, born March 1, 1809.

Lord Tennyson, born August 6, 1809.

TODAY'S OURS.

There's many a woman in this world of ours
Who's biding the time when her ship comes in,
And waiting the hours for fear, too late,
The craft bring a cargo of worthless tin.

Miss Maude Moffatt returned to her home here last week to spend her holidays with her sister, Mrs. Ward.

Mrs. R. Mortimer returning to her home in Penticton, after visiting friends here.

Died—At Grand Forks, on Monday, Aug. 24th, Archibald McKechnie, aged 73 years, father of Mrs. C. Taylor, who has been visiting her daughter here for the past month.

Mrs. Taylor is spending her holidays with her sister, Mrs. Ward.

Mrs. R. Mortimer returning to her home in Penticton, after visiting friends here.

Miss Maude Moffatt returned to her home here last week to spend her holidays with her sister, Mrs. Ward.

Dr. Simmons, dentist, Phone 96 Wallace-Miller Block, open evenings

W. M. Law, formerly of Russell-Law-Caulfield, is now in Prince Rupert.

Mrs. E. H. Mortimer returned from a visit to her father's home at Northport, on Monday.

Miss Gladys Ward, of Vancouver, is spending the holidays with her sister, Miss Ward.

Gab. Eustis, of Anaconda, returned to his home here last week after spending several months in Oregon.

O. N. Galer and wife, of Phoenix, and W. H. Docksteader and wife, of Phoenix, were in Greenwood on Sunday.

Arthur English, formerly bookkeeper for the Hunter-Kendrick Co., and afterward cashier for the Nipissing mine, near Cobalt, is now surveying for that mine.

Miss Caldwell, sister of Mrs. G. B. Taylor, is spending her holidays in Greenwood. Miss Caldwell is on the staff of the Cranbrook schools.

The friends of Charlie Buckston will be glad to know that he is out of the hospital today feeling very much better. He was taken to the hospital the beginning of the week, the doctors fearing an attack of appendicitis.

Miss Maude Moffatt returned last week to spend her holidays at her home here. The Kootenay Liberal reports a pretty presentation to one of the members of the teaching staff of the Nelson schools who will not return to her duties after the holidays. We wonder who it is.

Miss Murray, who left Greenwood last November, and has since been on the Pacific coast, in Portland, Seattle and San Francisco, returned to the city on Friday night last. Miss Murray was formerly on the staff of the Phoenix hospital, and now intends remaining in Greenwood for some time.

Regular practices will be held by the Greenwood Football Club every Monday and Thursday evening at 6:30 p. m. Anyone interested in the game is invited to put in an appearance. The club holds weekly business meetings on Friday evening in Union hall.

The many friends of Miss Stark, who left Greenwood a few months ago to go to her sister in North Vancouver, will regret to hear of her misfortune on Dominion Day, as reported in the Vancouver papers. The following is from last Friday's News-Advertiser: "Miss Stark of North Vancouver, met with a bad accident while descending Crown Mountain on Dominion Day. She was the guest of one of the members of the Vancouver Mountaineering Club. The party went up to the top of Crown Mountain and Miss Stark and two gentlemen, after going half way up, turned to descend. Instead of sticking to the bush near the edge, Miss Stark came down over the snow banks, and suddenly slipping, fell down a a distance of 40 feet. The young lady struck a tree stump, which was level with the surface of the snow, and a gash was torn in her leg below the knee. Her friends hurried to her assistance and made a sledge of coats. By the use of ropes Miss Stark was conveyed to the bottom of the mountain, and then managed to walk. with assistance, to the camp of the night before. The trip was necessarily slow, and 7½ hours were spent from the time Miss Stark met with the accident until the camp was reached. At it was impossible for her to travel through the brush to the Capilano hotel, a tent was put up and she remained there for the night. Dr. Wilson, of Vancouver, went out yesterday morning, and after attending to Miss Stark's injuries, superintended her removal through the brush, a mile and a half, to a conveyance waiting on the Capilano road, and she was taken to North Vancouver. Miss Stark is a sister-in-law to Mr. L. B. Hodge, manager of the North Vancouver branch of the British Columbia Telegraph Company.

TOWN TOPICS

The Sally shipped a car of ore this week to the Trail smelter.

Rev. F. V. Venables will conduct service at Eholt on Sunday afternoon next at 3:30 p. m.

The B. C. Copper Co. today is paying out $46,000 in wages. This is the first normal pay day since last November.

Died—Archibald McKechine, aged 75 years, father of Mrs. M. D. McKee, died suddenly last evening at Inglewood, Ontario.

It is expected that the House of Commons will be prorogued on Saturday, the 18th. In that case Duncan Ross, M. P., will return to Greenwood before the end of this month.

On Sunday next the Presbyterian and Methodist churches will hold Union services. Service 11 a.m. in the Methodist church; and 7.30 p.m. in the Presbytern church

On Sunday afternoon the Phoenix and Greenwood football teams will play a benefit football match at 3 p. m. in the exhibition grounds. The proceeds will be directed to the assistance of the man hurt in the Dominion Day game.

Greenwood gave the Kilties a game of ball on Monday afternoon. The Kilts traveled along hitting a very good pace until the last inning, when Greenwood, unfortunately for the bandsmen, hit their pitcher at will, and scored just ten runs. From the way they did it, it looked as if they could have done it earlier had they wished.

D. T. Phillips, a skip-tender at the Mother Lode yesterday morning had his arm broken. He had signalled for the skip and afterwards put his arm through the shafting. The break was a simple fracture and the patient who was taken immediately to the hospital is doing nicely. Phillips had been working at the Mother Lode only a few days.

H. H. Melville, vice-president of the Dominion Copper Co. returned to Phoenix last night and will arrive in Greenwood tonight. About the 15th inst., M. M. Johnson, consulting engineer of the company will be in. A survey has already been made and plans drawn for the aerial tram connecting the Idaho mine with the Brooklyn-Rawhide. This tram when completed will mean a saving of 15 cents per ton in the handling of ore. At the Smelter everything is working smoothly and a good tonnage treated.

James D. Sword, now of Goldfield, Nev., and one of the boom day's men of Greenwood and the West Fork camp is in the city today, accompanied by Reginald E. Raven and A. N. Borton, both of Goldfields, Nevada. They intend leaving tomorrow for the West Fork, where Mr. Sword has an interest in the Bell mine. Mr. Sword says that there seems to be more old-time Greenwood boys in Goldfields than in Greenwood itself, but they all recognize that this country is the best. "It's all right," said Mr. Sword. Jas. Dale goes with them on their trip, which will take perhaps several weeks.

The following officers were elected at the annual meeting of the Y. P. S. C. E. of St. Columba's church on Wednesday: Pres., S. E. Belt; Vice Pres., Mrs. K. P. McLeod; Sec-Treas., Miss R. Smith. The following are the convenors of the various committees: Prayer meeting, W. S. Graham; social, H. McArthur; missionary, Mrs. M. D. McKee; lookout, Rev. M. D. McKee. The society will continue to hold its meetings during the summer months.

Instructor Hargreaves of the Boys' Brigade, last week refused a couple of large donations offered him by strangers for the support of the Boys' Brigade. The Brigade could use the money, but they preferred to have the money they needed raised by small subscriptions. It is intended that these subscriptions shall not exceed 50 cents. The Brigade wishes to purchase some new apparatus, and if the subscription is raised in this way, everyone will have a part in it and no one will be burdened. Subscription cards will be circulated for this purpose.

The election for financial secretary of the Greenwood Miners' Union last Saturday night, resulted in the selection as successor to Mr. Mathieson of Geo. Heatherton, who has been president of the Union. Mr. Heatherton has been in the country for 12 years and is well known. He left on Tuesday to attend the annual convention of the Federation at Denver. In his absence B. de Weile is taking charge of the office. The vacancy caused by the resignation of Mr. Heatherton, as president, has been filled by the election of Chas. Birce.

Lost—Between Judge Brown's residence and Smith & McEwen's, Anaconda, a gold bracelet, set with Turquoise with gold dollar-piece attached. Please return to Rendell & Co. Reward given

Owing to a regrettable mix-up, which was certainly no fault of the Celebration committee, the railway agents charged higher prices for transportation on the excursion trains to Greenwood than those advertised. The company had offered the committee two sets of rates; taking the maximum, the one charged, the difference between it and the minimum reverted to the committee. The committee clearly instructed the railway authorities at Nelson to charge only the minimum rate, the same as they advertised, giving the public the advantage. That this was not done, they were as greatly surprised to learn as was anyone else. The mistake is clearly the fault of the department of the railway holding the excursion.

The Greenwood branch of the Nelson Iron Works has been leased by Leslie Craufurd, recently of the Canada Metal Works, Nelson. Mr. Craufurd has been in the engineering and mechanical draughting business for fifteen years, and with the assistance of the staff of the branch, which he is retaining in full, hopes to make the foundry here larger and better than ever. The Iron Works has handled some remarkably big contracts and is at present busy with work from the Boundary smelters. If you have work of this kind, your local foundry will be able to give service as good, and often better, than you can get elsewhere.

E. Foyle-Smith performed the first installment of his new duties as D. D. G. M. of the I. O. O. F. by installing the officers of the Phoenix lodge on Wednesday night. He was assisted by the following P. G.'s who were appointed to the offices named for the occasion. Geo. Pow, Marshal; G. B. Taylor, Sec.; T. M. Gulley, Treas.; W. B. Fleming, Warden; W. Elson, Chaplain; E. H. Mortimer, Guardian; A. E. Braithwaite, Herald. The Greenwood and Phoenix Rebekahs also held a joint installation, and after it provided a banquet for the visitors, who broke in upon the slumbering population of Copper street just after 3 a. m. Installation of officers at Boundary Valley lodge takes place on Tuesday next.

Followed by nearly two hundred of his fellow workmen, the remains of the late Frank A. Taylor were removed on Tuesday afternoon to the station of the C. P. R., and from there sent to his relatives at Pugwash, Cumberland county, N. S. The particulars of Taylor's very painful accident at the Mother Lode, having his arm completely torn out at the shoulder, will still be very clearly in the public mind. After an astonishingly brave and successful fight for life, through which the deceased came with his immediate injuries well cared for and in as good condition as they could under the circumstances be, an affection of the brain set in resulting in meningitis, which took his life in two days. The funeral was held on Tuesday afternoon, work at the Mother Lode being practically suspended to allow the comrades of the deceased to attend. The pall bearers were: J. F. Smith, W. Turney, J. Thompson, T. Archambault. M. L. Gordon and W. Batterby.

Your tailor may make good serviceable clothes, but

Do they Lack Style?

He can't help it—he merely follows the leadset by the large clothing makers and, of course, is a season behind the styles.

We can make your clothes to measure and yet give them all the latest touches of Style and Finish.

The reason is, that by our system, the men who originate the styles, make our customers' clothes.

The cost of a suit, specially made, runs from $14 to $20. Come in and let us tell you about the

Campbell's Clothing

Special Order Service and show you our range of summer suitings.
