VOL. 15 GREENWOOD, B. C., FRIDAY, JANUARY 20, 1911. No. 20

## New Year's Greeting:

Fancy Groceries—Everything Fresh
Cranberries, Sweet Potatoes, Nuts of all sorts
Big variety Fancy Biscuits
Raisins in cluster bunches. also in 1-pound boxes
Malaga Grapes in beautiful condition
Fresh Dates, Navel Oranges, excellent apples
An immense stock of Confectionery

**Russell-Law-Caulfield Compy**

Hardware, Crockery, Groceries, Men's and Boy's Goods

GREENWOOD, B. C.

## DO YOU KNOW

We sell Edison Phonographs and Victor Talking machines at the the same price as any dealer in Canada. When you send to Winnipeg or Vancouver you pay the express, when you buy from us the express is already paid.
We sell on easy terms when desired.

Everything in the Furniture Line.

**T. M. Gulley & Co.**

HOUSE FURNISHERS - - Phone 27

## New Year's Choice Meats AT P. BURNS & CO.

Specially Selected Stock for Your New Year's Dinner

Fresh Oysters, Fish and Dressed Poultry

Beef Mutton, Veal and Pork, all choice stock perfectly fresh. We cannot fail to please you. Call or Phone.

Copper Street, Greenwood, B. C.

## Jaynes' New Year's Bulletin

Mince, Apple and other Pies. Fruit and Plain Cake, Cookies, Etc. Fancy Confectionery, High Quality of Nuts of every variety. Fruit of all descriptions specially for this season.

**JAYNES, THE GROCER**

## Greenwood-Phoenix Stage Line

Leaves Greenwood Daily at 3 p. m.
Arrives Greenwood Daily at 10 a. m.
GREENWOOD OFFICE: L. L. MATTHEWS' CIGAR STORE
Prompt attention to Express and Freight.

**H. M. LAING, Pro.**

## RUSHING STEEL ON KETTLE VALLEY RAILWAY

### Twenty Miles Will Be Laid By End of Month—Work Going on From Both Ends of Line.

### WILL OPEN UP GREAT MINING PROPERTIES

### Vast Mountains of Rich Copper Deposits Await the Coming of the Iron Horse.

Twenty miles of steel on the Kettle Valley railway line will be laid by the end of the month. Track laying is going along simultaneously from both ends of the route between Midway and Merritt.

Work commenced at the Midway end this week and has made good progress. A big track laying machine is being operated with a large force of men, and under favorable conditions the ten miles of steel to Rock Creek will be completed before the end of January. The machine will lay a mile of steel a day, but the severe weather of the past week has retarded progress.

At the Merritt end of the Kettle Valley line, seven miles of steel is already laid, and the other three miles of the ten mile section will be completed in another week. In the meantime clearing and further construction goes on apace, and another ten mile of track will be laid in the early summer, so that it is expected an effort will be made to rush to completion the short cut Boundary-coast railway link.

This railway not only gives this section of British Columbia coast connections, but opens up a great mineral field that has long needed the railway in order that mines might be operated on a paying basis. The vastness of the copper deposits of the district traversed by this railway will soon be a realization in fact, as enough work has already been done to warrant the statement that this valley will soon be one of the largest producers of copper ore in the province.

### The Fisheries Dispute.

Diplomacy has secured a victory over arbitration in the fisheries dispute between Canada, Newfoundland and the United States.

A statement issued by the state department at Washington discloses that a complete agreement has been reached between Canada and the United States, and sufficient adjustment of difficulties with Newfoundland has been affected to make unnecesssary a recourse to the mixed committee of the Hague tribunal.

Negotiations will be continued, Sir Edward Morris, premier of Newfoundland having returned home to confer with the members of his cabinet.

### Trying to Secure Forests

The Montreal Star's correspondent at Washington sends the following despatch.

It is stated by acute observers that while a reciprocal agreement with Canada is even more likely than appeared at the begining of the negotiations, the immediate out come will be important only in principle and will have to do only with products. the interchange of which will not affect the general trade conditions of either country. The general groundwork has been cleared and there is a possibility of the negotiations being concluded on Saturday.

Senator A. B. Cummings of Iowa, admitted that he would like to see more of Canada's natural products admitted to the United States. "I still say," he remarked, "that the time for these negotiations is past and that our people will not stand for the removal of the duty from agricultural products, but I am in favor of taking duty off lumber of all kinds. That is because I would rather denude the forests of Canada than see our own denuded. The same applies to coal."

The United States is playing a desperate game to get our forests for the benefit of the United States newspaper publishers. The whole reciprocity agitation on this side of the border has as its aims the plundering of the Canadian forest. This is privately admitted by confidential agents of the United States newspapers to be the whole rasion d'etre for the reciprocity negotiations.

### Copper Dividend.

Directors of the British Columbia Copper company held their regular monthly meeting in New York, after which an official stated that consideration of the dividend question was postponed until the January meeting.

Another official of the company is credited with saying that the company has paid for the enlargement of its furnaces and the cyanide plant at the Napoleon mine; that it is entirely free from floating debt, and is accumulating a dividend fund, of which over $300,000 is on hand.

It will be remembered that it was the expressed intention of the company to declare a dividend when the company's surplus reached $300,000, so that the declaring of a dividend in January may not be unexpected.

The November operations were the best ever recorded by the company. During the month there were produced 917,994 lbs. of copper, 10,694 ounces of silver and 2,845 ounces of gold. It cost the company 9.42 cents a pound to produce the copper. The running of low grade ores from the New Dominion Rawhide mine tended to keep down the company's earnings. It is estimated that at present copper prices the company,s net earnings will be about $40,000 a month, operating at full capacity, or at the rate of 15 per cent annually on the stock.

The new motor for the slag dumping tram has arrived at the smelter and everything appears propitious for a record production this mouth.

### FAMOUS PEOPLE

BY FANNIE M. LOTHROP

Photo. by Davis & Sanford, New York

**GUGLIELMO MARCONI**

**The Father of Wireless Telegraphy**

**This is the age of the elimination of the essentials. We have horseless carriages, trackless trolleys, inkless printing, loveless marriages, grapeless wine, clocks without hands, apples without seeds; and, greatest of all, telegraphy without wires. Marconi, who succeeded in performing this miracle of science which has been the dream of electrical experimenters since 1746, is a young Italian, born at Bologna and not yet thirty years old. His father is an Italian landed proprietor and his mother is the daughter of James Jameson, the famous Irish whiskey distiller.**

**At eight years of age, Guglielmo showed the first faint buds of promise of inventive genius; at twelve his tutor attempted to rob him of one of his devices; at sixteen he was absorbed in chemical, electrical and mathematical problems; and at twenty he was almost taxing the faith and love of his mother with the seemingly insane proposition of attempting to telegraph without wires, through hills and forests, across streams and over fields.**

**When he was twenty-one he went to England and somehow managed to interest Sir William Preece, engineer of the British telegraph system, sufficiently to secure his co-operation. When Marconi succeeded in sending a message two miles—a success sufficient to irritate him by the golden visions of greater distances yet to master—he was like Moses viewing the Promised Land which seemed impossible for him to enter. It seemed hopeless to persist further and he was discouraged almost to despair, but stuck loyally to the problem until the high-water mark of conquered distance rose to one hundred and twenty-five miles.**

**On December 13, 1901, the scientific world was astounded by the news that Marconi had succeeded in talking to England from Newfoundland across 2,000 miles of air and water. There was a smile of compassionate tolerance for the inventor who imagined he had done this, the smile of one who does not wish to arouse another from the empty happiness of a pleasant dream. But soon it was science that awoke to the realization of the marvel, and the fresh morning newspaper printed from news carried to the vessel by "marconigrams" and served with the fresh rolls on the breakfast table in midocean, proves anew the wonder that grows greater as its field broadens and develops. Marconi was the first to send a recorded message through space by electromagnetic waves (in 1894); the first to telegraph from a moving ship (in 1897), and the first to speed a wireless message across the Atlantic.**

Entered according to Act of the Parliament of Canada, in the year 1911, by W. G. Mac... at the Department of Agriculture.

### Not Quite there

The house committee of naval affairs at Washington, completed the examination of Capt. R. E. Perry on his claim to attainment of the north pole. Hugh C. Mitchell, a skilled computer of coast survey, testified that he handled Peary's observation. Mr. Mitchell said that he has figured that Peary, when he made his furthermost camp, was less than five miles from the pole and that in marches on the day of the climax of his trip, he passed with in one and one-sixteenth miles of the actual pole.

Mr. Mitchell believed that Peary's observations could not be faked. The committee will hear Admiral Chester and review the testimony at an early meeting with a view to passing on the bill proposing Peary's retirement as a rear-admiral.

## MINES AND MINING

The following taken from the report of Province mineralogist of B. C.: The aggregate mineral production in the province during 1910 was estimated at a total value of $26,183,504. If revised returns prove this figure to be approximately correct, the total for the year will be the highest yet recorded in the history of mining in British Columbia, as it will compare favorably with that of 1907 which, at $25,882,560 is the highest on record hitherto. The province continues to maintain its average proportion of the mineral production of the whole of Canada. Place the aggregate value of the Dominion for the 25 years, 1886 to 1910' at $1,150,000,000, which allows about $95.000,000 for 1910, and British Columbia may fairly claim to have produced between 27 and 28 pet cent, of this large sum. The aggregate value of the Province's production for all years inclusive of 1910, was nearly $374,000,000 and during the last 25 years, the worth was $310,000,000.

The Consolidated Mining & Smelting Co., made an output of 152,000 tons of ore from the Snowshoe mine, and about 1000 tons from the No. 7. The latter was connected with the C. P. R. at Boundary Falls by an aerial tramway about three miles long. Preparations were made to mine ore at the company's Phoenix Amalgamated group for shipment to Trail. The copper production has been estimated at 39.000,000 lbs., and of this, 3,600,000 lbs., could be credited to Rossland. Some 4,000,000 lbs., of zinc were produced of which the Van Roi contributed 1,362,000 lbs.

Application in large numbers are been made for license to prospect for coal and oil at Midway. Some ten are already gazetted.

Mr. F. C. Congdon, M. P., says a record was made last season in dredging in the Yukon. It extended over 233 days. It is remarked that a gold dredge can work to every advantage there up to two weeks of Christmas. There are difficulties in the Yukon not experienced in other countries, but it is being proved that they can be overcome.

The British Columbia Copper company's smelter treated 11,237 tons of ore last week as follows: Mother Lode, 6,888; Jack Pot, 243; Rawhide, 3,658; Napoleon, 448.

Approximately $95,000 was paid by the Phoenix bank to employees of the local mining companies last week, representing the payroll for December. Of this amount Granby disbursed $50,000; New Dominion (Rawhide and Athelstan) $19,000; Consolidated company (Snowshoe, No. 7 and Phoenix amalgamated), $18,000; B. C. Copper (Jack Pot), $8,000. It was probably a record payroll in Phoenix.

Late reports from the Midway coal propertie state that a very influential syndicate has been formed at Spokane to outfit the mine with the most approved machinery to the value of 25 to 30 thousand dollars and the working gang increased to twenty men or over.

The year just closed in the the Rossland district was a good one. The outlook for mining in British Columbia during 1911 is particularly bright, and much activity is expected next spring.

In order to encourage the copper mining industry the government at Ottawa has ruled that no royalty shall be charged on products of copper mining locations for a period of ten years, and no reservations will be made in patents issued for such locations of a royalty on the sale of products thereof during that period.

It is reported that diamond drilling on the Hidden Creek properties, now under bond to the Granby Co., have been even better than anticipated. O. B. Smith, Jr., will inspect the work again sometime this month

Copper is firmer. Lake is 13 to 13¼ cents, and electrolytic is 12¾ to 12½ cents a pound. A renewal of European buying is reported. Exports during December, according to metal exchange statistics, were the second largest of any month last year, and notwithstanding this there was a further decrease of 5,494,720 pounds in the foreign visible supply.

According to a report issued by the Quebec government free gold is associated with sylvanite in viens of quartz ankerite in Northern Quebec, 50 miles north east of Cobalt. The discoveries are near Opasatikale lake, and are not entirely new. The government reports state that the formation is essentially similar to that at Porcupine, as the free gold occurs in conjunction with the sylvanite in quartz ankerite.

Dredging of the rivers Tulameen and Similkameen will start in the spring.

Returns on three tons of ore recently sent to the Granby smelter at Grand Forks from the Gold Ax mine, on Copper mountain are reported to have gone $77 to the ton. The ledge has been opened up in three different places on the property, showing values as high as $85 in gold, with some copper

Chateguay Smith is overhauling the Fremont plant and getting in shape to install the electric cable which is imperative before any mining can be done. A few weeks will see all in good running order at this well thought of property.

The Greenwood-Phoenix tunnel is now in 1100 feet and satisfactory progress is made daily.

Of the 257,000 ounces of lode gold estimated to have been the total production in the province for 1910, 139,000 ounces were obtained from the U. S. treated at the Trail smelter.

The tramway between the Lone Star and Boundary Falls will be completed this month at a cost of 70 thousand dollars.

### CARNIVAL.

### Grand Opening Carnival of the Greenwood Skating Rink.

The annual masked carnival under the supervision of the Skating Rink management will take place on Friday evening, January 27th. Twenty dollars in prizes will be awarded, five dollars each to the lady wearing the handsomest costume; the handsomest costume worn by a gentleman; best comic costume, and 2.50 each for the boy and girl with handsomest costume. Good music will be furnished the entire evening. Skating from 8 to 10:30. Skaters in ordinary clothes will be permitted on ice after 9 o'clock. Admission 50c, children 25c.

TO LET—Furnished house, centrally located, moderate rent. Enquire of A. L White.

## CONTRASTING METHODS.

Americans are considering the ways of Canadians, which may be said to be the beginning of republican wisdom. The jolt recently given our express companies by the Dominion Railway Commission has attracted in a marked manner the attention of all American newspapers which have been wrestling in an abstract way with powerful trusts, but without making any substantial progress towards a solution of the problem. "Canada," says the Boston Traveller, "has invented a most ingenious device for controlling monopolies. It is so very clever that one wonders why the United States has never thought of it. Our big neighbor—whose problems are much like ours—has a new anti-trust law which makes the Sherman act look mild and harmless. Under the Canadian law six citizens may go before any court and declare that any corporation that is oppressing or overcharging the consumer. If they seem to have good ground for complaint, the court orders the department of labor to investigate. A commission is named, the complainants selecting one member, the corporation a second member and the government a third. This commission has the power to summon witnesses and demand all necessary evidence, and to look up any persons who disobey or commit perjury. Now comes the Canadian remedy for monopoly. If the commission finds the defendant corporation guilty of raising prices unlawfully, it can suspend any tariff duties which protect the corporation's product. Thus the tariff, which in the United Stater is too often used as a weapon against the consumer, in Canada is turned into a weapon against the offend- corporations.

## The Prosperity of 1910

It is comfortable to note that there is practically a unanimous expression of opinion regarding the satisfactory state of trade throughout the Dominion and the statistics perform their duty in demonstrating that the year was one of the greatest in the history of the country.

Reviews and reports in the eastern papers pay close attention to the course of business events in the western provinces, recognizing that the vast territory on this side of the great lakes there are the elements which insure the continuance and permancy of Canada's prosperity. For a decade or more the west has occupied a most important position in relation to the general commercial scheme, and it is not too much to say that its importance is increasing every year.

The outlook for the country as a whole was never brighter, and there are no forebodings of evil for the future. The volume and character of business, both domestic and foreign, is more encouraging than ever before, and with the exercise of moderation and patience, even more fatisfactory results may be secured.

The west is not disposed to brag about the part it plays in making Canada prosperous, but a word of suggestion to the suspicious few who are inclined to belittle western progress and achievement may not be out of place. Let some statistician prepare a statement showing details of the trade of the Dominion, internal and external, eliminating the prairie provinces and British Columbia. The tabulation would create much surprise, especially in eastern Canada.

## Mr. Whyte Talks Plainly.

Mr. William Whyte, vice president of the Canadian Pacific railway, contributed to the Annual Financial survey of the Toronto Globe an article covering some aspects of western development. He is unsparing in his criticisms of farming methods in the three provinces, and makes a strong plea for mixed farming. He says, in part:

"If ever there was an agricultural country in the world, Manitoba is the country. Our sole resources is agriculture Yet this year there were imported into Winnipeg over 12 million eggs. For our Canadian Pacific dining cars we are now bringing in chickens from Chicago. We are also importing cream from the United States.

"The trouble is that our farmers are wheat mad. They have made money with wheat, and they have not the labor which mixed farming involves. They can go away in the winter and leave the hired man to take care of the horses. The loss which follows exclusive wheat raising on the farm is universally recognized. The agriculturist is engaged in selling, not his products, but the farm itself. He is not so much tillingh is land as exploiting it. He is using the land, not as a farm should be used, but as a miner uses a mine. He is taking all out and putting nothing back. If the past hot summer should teach the farmer of our prairies to employ other methods and to practice mixed farming, the loss of a portion of our crop would not be greatly regretted."

## Keep Anarchists Out.

Anarchists and such cattle have abused the rights of asylum that England has granted them, and they ought to be made to take the consequences. It used to be said that these people would respect the law in England because if once British shores were closed to them they would have no place of refuge. They have not kept faith, and it is time not only to stop any more of them from coming in, but to expell as many as possible of those who have been admitted.

## The January Number.

Variety, and plenty of it, is the keynote of the January number of Rod and Gun in Canada, published at Woodstock, Ont. The opening article deals with the outfit required for the backwoods. This is followed by a number of experiences in hunting, fishing, canoeing and mountaineering throughout Canada, while a paper on the birds of Manitoba and some light verses materially add to the interest of the number. There are a number of items recording occurrences out of the common, showing how vastly experiences in the woods may differ and others reminding sportsmen of similar events on their own trips. The whole will act like a tonic in the winter months reminding sportsmen the joys they have had and those they anticipate in the future.

## A MODERN MIRACLE

**He Had Eczema 25 Years and Doctors Said "No Cure"**

**Yet Zam-Buk Has Worked Complete Cure**

This is the experience of a man of high reputation, widely known in Montreal, and whose case can readily be investigated. Mr. T. M. Marsh, the gentleman referred to, lives at 101 Delorimier Avenue, Montreal, and has lived there for years. For 25 years he had exzema on his hands and wrists. The disease first started in red blotches, which itched, and when scratched became painful. Bad sores followed, which discharged, and the discharge spread the disease until his hands were one raw, painful mass of sores. Just think of this state of affairs continuing for twenty-five years!

In that time four eminent medical men tried to cure him, and each gave up the case as hopeless in the end. Naturally, Mr. Marsh tried remedies of all kinds, but he, also, at last gave it up. For two years he had to wear gloves day and night so terrible was the pain and itching when the air got to the sores.

Then came Zam-Buk! He tried it just he has had tried hundreds of remedies before. But he soon found out that Zam-Buk was different. Within a few weeks there were distinct signs of benefit, and a little perservance with this great herbal balm resulted in what he had given up all hope of—a complete cure! And the cure was no temporary cure. It was permanent. He was cured nearly three years ago. Interviewed the other day, Mr. Marsh said: "The cure which Zam-Buk worked has been absolutely permanent. From the day that I was cured to the present moment I have had no trace of eczema, and I feel sure it will never return. Having suffered for twenty-five years, I have naturally concluded that my case was incurable, and I regard my cure as a modern miracle."

If you suffer from any skin trouble, cut out this article, write across it the name of this paper, and mail it, with one cent stamp to pay the postage, to Zam-Buk Co., Toronto. We will forward you by return a free trial box of Zam-Buk. All druggists and stores sell this famous remedy, 50c. box, or three for $1.25. Refuse imitations.

Have you a weak throat? If so, you cannot be too careful. You cannot begin treatment to early. Each cold makes you more liable to another and the last is always the harder to cure. If you will take Chamberlain's Cough Remedy at the outset you will be saved much trouble. Sold by all druggists and dealers.

Dig up your subscription to your home paper—terms are in advance Let us have it, please.

If you are a subscriber of the Times and not paid up, $2.00 from you would be very acceptable.

# How Old People May Prolong Their Lives

At advanced age the organs act more slowly than in youth. Circulation becomes poor, blood thin and watery, appetite fitful, and digestion weak. This condition leaves the system open to disease such as Coughs, Colds, Grippe, Pneumonia, Rheumatism, etc.

VINOL is the greatest health creator and body builder we know of for old people, as it supplies the very elements needed to rebuild wasting tissue and replace weakness with strength.

**HERE IS THE PROOF**

**A case is recorded in Albany, N. Y., of a woman who felt she was breaking down by age and was doomed to the weak and feeble condition of old people. She had no strength and the slightest exertion tired her, but VINOL made her well and strong, and she states that she feels ten years younger than she did before taking VINOL.**

We ask every aged person in this neighborhood to try a bottle of VINOL with the understanding that we will return their money if it does not prove beneficial.

J. L. Whité, Druggist, Greenwood

SCHEDULE OF GAMES

The following is the schedule of games to be played by the Boundard Hockey League teams:

Phoenix and Grand Forks—Grand Forks Jan. 2.

Grand Forks and Phoenix—Phoenix Jan. 9.

Greenwood and Phoenix—Phoenix Jan. 12.

Grand Forks and Greenwood—Greenwood Jan. 16.

Greenwood and Grand Forks—Grand Forks Jan, 20.

Phoenix and Greenwood—Greenwood Jan. 24.

Grand Forks and Phoenix—Phoenix Jan. 27.

Phoenix and Grand Forks—Grand Forks Jan 30.

Grand Forks and Greenwood—Greenwood Feb. 3.

Greenwood and Phoenix—Phoenix Feb. 6.

Greenwood and Grand Forks—Grand Forks Feb. 9.

Phoenix and Greenwood—Greenwood Feb. 13.

# Strong Healthy Women

If a woman is strong and healthy in a womanly way, motherhood means to her but little suffering. The trouble lies in the fact that the many women suffer from weakness and disease of the distinctly feminine organism and are unfitted for motherhood. This can be remedied.

## Dr. Pierce's Favorite Prescription

Cures the weaknesses and disorders of women. It acts directly on the delicate and important organs concerned in motherhood, making them healthy, strong, vigorous, virile and elastic.

"Favorite Prescription" banishes the indispositions of the period of expectancy and makes baby's advent easy and almost painless. It quickens and vitalizes the feminine organs, and insures a healthy and robust baby. Thousands of women have testified to its marvelous merits.

*It Makes Weak Women Strong. It Makes Sick Women Well.*

Honest druggists do not offer substitutes, and urge them upon you as "just as good." Accept no secret nostrum in place of this *non-secret* remedy. It contains not a drop of alcohol and not a grain of habit-forming or injurious drugs. Is a pure glyceric extract of healing, native American roots.

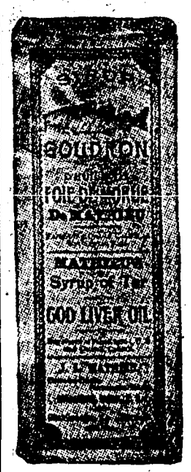
# MATHIEU'S SYRUP

**of Tar and Cod Liver Oil**



This famous remedy is made of two curative agents of proved efficacy in diseases of the throat and lungs.

Beech Tar directly relieves a cough or cold, and at once begins to heal the delicate passages; Cod Liver Oil strengthens, and builds up the system. These two ingredients are scientifically combined in the pleasant tasting Mathieu's Syrup.

Mathieu's Syrup does not merely suppress the symptons of disease, it removes their cause. It not only relieves—it cures.

There is nothing better for children. They like it, and should take it on the first appearance of a cold. Keep a bottle always at hand. When feverish take Mathieu's Nervine Powders as well as the Syrup—25 cts a package, containing 18 powders.

Mathieu's Syrup large bottle 35c.

**The Damper Lever of a**

# MAGNET
## Wood Furnace

is where it ought to be—at the front, readily reached without groping in the dark or taking unnecessary steps. A turn of the lever instantly changes the draft so the fire is quickened or checked, at will. Turned on, McClary's Magnet Wood Furnace produces the strongest heat in a few minutes; and the nickelled steel tubes radiate this heat for hours after the draft is shut off. Because of this *stored* heat McClary's Magnet Wood Furnace is economical and a continuous roaring fire is unnecessary. The heat that goes up the smoke pipe of ordinary wood furnaces, goes into the register pipes of the Magnet. Like the position of the damper, the Magnet Wood Furnace is *right* all through. Right in principle, right in construction; right in materials. See the Magnet at the McClary agent's in the nearest town. Write to nearest McClary branch for booklet, giving a detailed description. Free, postpaid.

# SMITH KNOCKED OUT IN THE THIRD ROUND

## McCarth Cracks the Negro on the Jaw Who Fails to take the Count.

## TWO VERY GOOD PRELIMINARIES.

## The Attendance Was Not Large—Another Bout in Near Future.

The Smoker given under the auspices of the Hockey club at the Auditorium last Saturday night was fairly well attended, but the crowd hardly came up to the expectations of the promoters. The two preliminaries pulled off were three round bouts between local talent in which honors were rather even. After these exhibitions of the manly art came the main event of the evening.

At the sound of the gong McCarthy and Smith appeared stripped ready for action, and it was plain to the onlookers that McCarthy had decidedly the best of Smith in heighth, reach and general physical prowess.

The first round was fast from the start, both men showing good ring generalship and fairly scientific ability. This round ended with points in McCarthy's favor, Smith receiving a punch on the nose that started the claret to flow.

In the second round both men came to the center with a determined look, and while the round was in most respects like the first, there was considerable sidestepping and sparing for an opening, and the round ended in honors about even.

The third round was of short duration, McCarthy going at his opponent like a bengal tiger, and in a short but furious exchange of blows landed on Smith's jaw, and the mill ended in a knock-out as complete as is possible to describe it. Smith lit on the back of his head on the hard floor and lay there in a quiver until his seconns raised him to his feet. He was unable to stand and was carried to one of the dressing rooms below the stage where he was revived after several minutes' hard work on the part of his attendants.

The fight was scheduled to go fifteen rounds, and its short duration and Smith's inability to last longer than three, was great disappointment to the sports who paid their money hoping to witness a contest above the ordinary fakes so common nowadays.

The club hopes to be able to pull off another bout in the near future, and any evenly matched artists of the roped arena will be able to draw down a goodly piece of money if they can show the sure thing to the prize ring fans of Greenwood.

## West Fork Happenings.

Wm. Middleton and Dave Terhune are trapping in the vicinity of Westbridge. It is understood that up to now they have succeed in killing only four quarts.

Mr. Virgil, superintendent of the Dominion Sawmill Co., and Mr. Esty, manager of that company's mill at Cascade, were up the main river last week to visit the various logging camps, piloted by the head scaler, Mr. Smith.

The English language is not heard much around Westbridge these days.

It is whispered that the sawmill company is considering the advisability of placing a mill at Westbridge, consequently Alex Broomfield's face is wreathed in smiles, and Geo. Wellwood hopes that he'll get that license.

A rumor to the effect that Sam McConnell had been killed while descending the hill to his logging camp with a team, has been denied.

The plan to erect a church at Westbridge has been taken up with enthusiasm. It is understood that a committee of the following gentlemen has been formed to consider the matter: W. Middleton, Wm. Blythe, Finlay McDonald, Gorman West and G. O. Guise.

It is said that Mr. G. West is about to inaugurate a local option campaign in this district. We fear, however, that the time is not yet ripe for this.

The station work is progressing favorably.

Messrs. Hardy & Thompson report trade to be excellent owing to logging and railroad construction. The former gentleman, son of the veteran in Midway, complains that he has not had a layoff for at least a week.

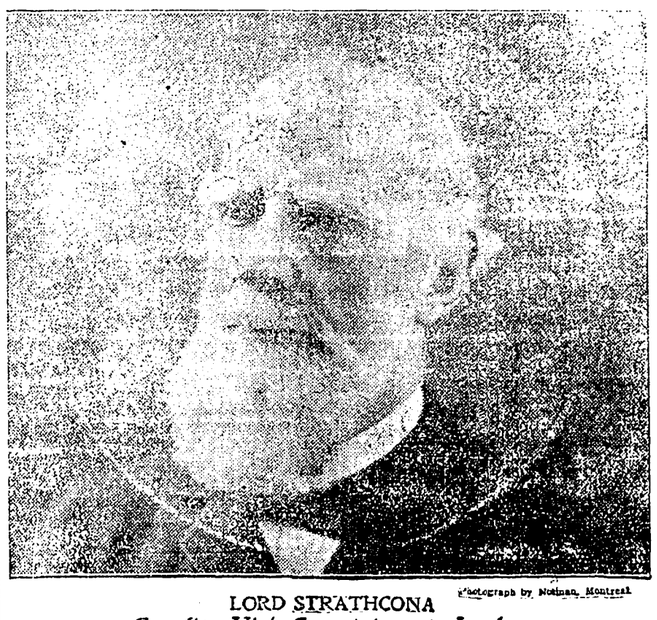
## FAMOUS PEOPLE
BY FANNIE M. LOTHROP



Photograph by Notman, Montreal

LORD STRATHCONA
Canadian High Commissioner to London

In 1838 a young Scotch boy of eighteen, named Donald A. Smith, entered the service of the Hudson Bay Co. He had been educated for the Civil Service in India; but the sturdy life of hardship, the rigorous, close, hand-to-hand battle with fate, somehow appealed to him more than the easier and more enervating life of the Orient.

For thirteen years he labored on the hard Labrador coast, where the climate was inhuman, the monotony insurmountable, the loneliness appalling, and promotion seemed slower than the movement of a glacier. But young Smith made his record, and in this rough training-school learned self-reliance, courage, self-conquest, prudence and shrewdness among the solitudes, and a sureness of judgment. He learned to conquer obstacles and to laugh in triumph at them. In 1869 he had gradually risen to the post of resident-governor—the supreme possibility under the Hudson Bay Co.

When the Federation decided to take over the title of the company, they met an obstacle in the opposition of the Metis, the halfbreeds of the plains, who rose in rebellion under the leadership of the fanatic Louis Reil. In this extremity Donald Smith was recognized, and his courage, tact and wisdom aided in cutting the Gordian knot of disagreement. He at once became the most powerful man of the Northwest, and a year later was elected to the House of Commons. Then came the fierce battle against the corruption, bribery, and Governmental incompetency in building the great railroad connecting the oceans, and later the organizing of the company, headed by Mr. Smith (the future Lord Strathcona) and his co sin, Lord Mount Stephen, that built the magnificent railroad on the ruins of the Government's hopeless failure. Lord Strathcona's financial ability, his organizing power, his genius to inspire others to see and to realize his visions, carried the day; and as J. J. Hill says, "the one person to whose efforts and confidence in the growth of our country, our success in early railroading is due, is Lord Strathcona."

He received his first imperial honor in 1886 and in 1897 was raised to the peerage. His manifold duties defy cataloguing; as financier, statesman, philanthropist, and in various other fields he has been pre-eminent. [illegible] all really great men has retained his simplicity through it all. [illegible] the age of seventy-five, he is Canadian High Commissioner in London, an exacting position, and his marvelous knowledge of Canadian affairs, and other unique qualities would make it impossible to replace him.

Entered according to Act of the Parliament of Canada in the year 1905, by W. G. Mack, of the Department of Agriculture, at Ottawa.

# DR. PRICE'S
## Cream Baking Powder

**Its superiority is unquestioned**
**Its fame world-wide**
**Its use a protection and a guarantee against alum food**

The low-grade powders are made from "phosphate alum," or "sodium aluminum sulphate," which is also alum, a mineral acid, and that makes the food unhealthful.

One pound of the imitation (25c.) powders contains five ounces of alum, a mineral poison.

**Food baked with alum baking powders is found to contain a portion of the alum unchanged.**

The continued use of alum made food impairs digestion, causing dyspepsia. The careful housewife when buying baking powder, will examine the label and take only a brand whose label shows the powder to be made from cream of tartar.

Kie, 10 members of the curling club, Grand Forks; D. R. Tait, Rock Creek; H. R. Tuttle, Toronto; Chas. S. Pincott, C. Hanson, Spokane.

Windsor: E. E. Gibson, D. Eastman, Grand Forks; N. G. Stuart, Bridesville; E. D. Redding, Vancouver: F. R. Hawthorne, G. N. Gilchrist, W. McLeod, Nelson; John Smith, Midway.

Pacific: R. Harris, Nelson; Gerald S. Mead, Rock Creek; D. J. Darragh, Bergen.

Norden: Mr. and Mrs. Eurby, Spokane; Geo. and Wm. Brown, Sheep Creek.

### Greenwood vs Grand Forks

The fourth event on the hockey schedule of games took place at our new rink on Monday last, resulting in Grand Forks winning 4 to 2.

Both teams lined up with a bold front and their appearance was an auguary of a hot game coming. The game was well played on both sides, clean and very fast was the prevailing feature. A few events happened that was not on the bill to the detriment of our home boys. A blow probably meant for the puck been diverted to the body or hand of an opponent, causing a momentary cessation of play to the party.

Comments were frequently heard that the referee rulings were tinctured with a bias against Greenwood and in many rulings the decision was decidedly coarse and unfair Our boys of Greenwood and also the boys of Grand Forks play this game on its merits and do not ask or will accept any concessions but ready to play it out emphatically upon the square and have the best side get away with the honors.

Chamberlain's Cough Remedy never disappoints those who use it for obstinate coughs, colds and irritations of the throat and lungs. It stands unrivalled as a remedy for all throat and lung diseases. Sold by all druggists. and dealers.

Make use of the want ad. column. It will do the work for you at less cost and be more effectual.

## GREENWOOD GRIST

### Items of Interest Picked Up Here and There For The Times Readers.

W. Hart left for Fernie on Thursday.

Jaynes the grocer has moved to his new quarters, opposite P. Burns & Co.

Mrs. Thomas, of the Midway hotel, Midway, was a guest at the Windsor this week.

Rev. N. G. Stuart, missioner, of Bridesville, was a visitor to town this week.

For Sale—An A. 1. cutter practically new, with pole, $35.00. Apply A. L. White.

The annual general meeting of the Greenwood club will take place on Friday evening, Jan. 20, 8 p. m. sharp.

Emil Larson, of Grand Forks, proprietor of the Province hotel in that city, was a Greenwood guests this week.

A. L. White's trunk line from Toronto to Greenwood. He has got it all stored at the O. I. C. store.

Show Grand Forks what Greenwood can turn out for the hockey special tonight. Return tickets 1.25.

D. R. Tait, a contractor of near Midway, was in city Tuesday in search for a cook for his logging camp.

A Tennis club dance will be given on Wednesday evening, January 25th, at the Auditorinm. First class music arranged for. Tickets 1.50.

Mrs. J. A. Russell, who has been spending some weeks at Vancouver with her friends has returned to town.

Dan Stuart, of Greenwood, is taking over the business of the Victoria hotel in Slocan, his brother Alex retiring from business.

At the curling bonspel for the Warren cup on the 18th, Taylor skip defedted Birnie skip 15 to 8, east rink. Skip McCutcheon defeated Skip Russell 10 to 7, west rink.

H. C. Shaw, formerly lawyer Hallett's partner in Greenwood is the new Police Magistrate chosen to succeed A. E. Bull in Vancouver. Mr. Hallett also held the position in Vancouer's earlier days.

The entertainment at the Star Theatre next Monday night, Jan. 23, will be under the patronage of the ladies' of St. Jude's Guild and a large crowd is expected. There will be a special program. Come and bring your friends and make it a gala night. Adults 25c. children 15c.

Two rinks of Grand Forks curlers came in on the regular train and departed on the hockey special. Two keen games were put on by skips Birnie and McDonald for Greenwood and skips Gardner and Williams from Grand Forks. The games after some very pretty playing on both sides was declared a tie. The visitors were delighted with our curling rink and the proverbial courtesy extended by our home teams.

The performance of Uncle Tom's Cabin at the Auditorium on Friday, Jan. 13, was quite up to expectations although there was not a large an audience as was merited. It was a big company and the various artistes presented the old story in a most agreeable manner. The senic effects were good and all did well, but the outstanding feature was the splendid performance of Baby Maxine as "Little Eva." She was excellent. The show was finely staged and those who were present thoroughly enjoyed it.

Dig up your subscription to your home paper—terms are in advance Let us have it, please.

### Enforcing License

A practical comment on the report Judge Robson was furnished in the provincial police court in Winnipeg, when Magistrate McMicken imposed fines aggregating $2100 as a result of a raid made on the red light district by city police officers under the direction of M. J. Johnston chief license inspector. Instead of the usual $50 and costs, first offenders paid double that, and second offenders $200 and costs, while three dray loads of liquor were confiscated and destroyed, The women were promised worse things, and this vigorous policy will drive many of them out of town, or at least out of the segregated district.

### Progress in Reciprocity

The reciprocity negotiations between the United States and Canada will be continued next week. It is understood that fair progress is being made. One of the Canadian representatives said that the reason for the secrecy of the negotiations was the fact that not a single item could be finaliy agreed upon till the proceedings were ended because of the interdependence of each on the articles being considered.

NOTICE is hereby given that application will be made to the Legislative Assembly of the Province of British Columbia at its next session for an Act to incorporate The Greenwood Phoenix Tramway Company, Limited, with power to run, construct excavate and maintain a tunnel through and under the mountain lying east of the City of Greenwood, in the county of Yale, from a point on the Nelson mineral claim, which claim adjoin the east boundary of said City of Greenwood to a point at or near the Victoria mineral claim under the City of Phoenix; and for the purposes of the undertaking to run exploring and branch working tunnels from the main tunnel; also to sink or raise mining, working or ore shafts along the line or course of the said tunnel or its branches; to explore for minerals by the use of drills, shafts or excavations; to construct, maintain and operate by electricity or otherwise tramways and roadways for the purpose of carrying ores, or as may be otherwise required to erect and maintain crushing, electrical, hydraulic, concentrating or smelting works or for plants and deal in the products of the same; to supply, sell and dispose of light or power, and to erect and place any electric line, cable or other electrical apparatus, above or below ground, along, over and across streets, bridges and lands; to erect, construct and maintain any dam, raceway, flume or other contrivance, or plan for diverting and utilizing water, or for drainage, and to construct all works neccssary to obtain and make water power available; to carry on the business of mining in all its branches; to purchase and deal in ores; to enter into any agreements and make contracts with persons or companies owning any interest in mining lands or otherwise, contiguous to the said tunnel and to receive compensation for the use of the tunnels or works of the Company, and for drainage or other benefits derived from the tunnels or branches; to acquire and take over the business of the Phoenix Tramway Company, a company incorporated under the Tramway Company Incorporation Act, and to acquire and obtain all concessions, bonuses, or other rights and privileges belonging to said Company; to purchase, lease or otherwise acquire and hold patents, machinery, lands, premises, buildings and all real and personal property necessary to carry out the objects of the Company with all necessary or incidental rights, powers and privileges as may be necessary: incidental or conducive to the attainment of the above objects or any of them.

Dated at Greenwood, B. C., this 24th day of December, A. D, 1910.

I. H. HALLETT.
Solicitor for Applicant.

Has a new equipment for Photo work and can turn out as good work as any in the land. Give him a trial.

### Phoenix Hotel Fire.

The Queens hotel at Phoenix, formerly the Summit hotel, located on the main business corner of the town, was completely gutted by fire Sunday morning. It is one of a dozen frame structures which adjoin each other, and only the splendid work of the fire department together with the snow on the roofs prevented an entire sweep of the business section of the city.

The fire broke out at 3 o'clock on the second floor and had gained considerable headway before the water could be turned on. The contents of Pulliers' barber shop, Nicholson's cigar store, the Royal billiard parlors and Love's drug store were moved out, while the stocks of several other stores were made ready for removal.

The Queens is owned by David Oxley of Shuswap, B. C., the business being conducted by R. V. Chisholm. The fire is supposed to have been caused by an overheated stove. Some of the occupants of the rooms escaped with difficulty.

**For Sale at a Bargain—One Solid Oak Show Case, also One Solid Oak Hall Rack with Mirror. The Hunter Kendrick Co., Ltd.**

### Beef Raising in Canada.

We acknowledge with thanks the receipt from the Department of Agriculture, Ottawa. Bulletin 13 on "Beef Raising in Canada," compiled by J. B. Spencer. The object of these most excellent treaties on subjects of most vital importance to the stock raiser, imparting most useful information with reference to the breeding, feeding and marketing of beef cattle. The pamphlet may be obtained by any one addressing the Department of Agriculture, Ottawa.

## This Is

No recollection of the past; no exaggeration of the present, but should be a forecast of the future

**A. L. WHITE**

this week received his large semi-annual consignment of

**Trunks, Valises & Suitcases**

On account of the absence of street troleys he had to requisition his sled for transportation from the depot. Truly the prominence of Greenwood on the map does not warrant this. Certainly the size of the shipment does not.
